CITY OF LOS ALAMITOS
Council Chamber
3191 Katella Ave., Los Alamitos CA 90720

CITY COUNCIL AGENDA
REGULAR MEETING

Monday, November 18, 2024 – 5:30 PM

NOTICE TO THE PUBLIC – This Agenda contains a brief general description of each item to be considered. Except as provided by law, action or discussion shall not be taken on any item not appearing on the agenda. Supporting documents, including staff reports, are available for review at City Hall in the City Clerk's Office or on the City's website at www.cityoflosalamitos.org once the agenda has been publicly posted.

Each matter on the agenda, no matter how described, shall be deemed to include any appropriate motion, whether to adopt a minute motion, resolution, payment of any bill, approval of any matter or action, or any other action. Items listed as "for information" or "for discussion" may also be the subject of an "action" taken by the City Council at the same meeting.

Agenda-related documents provided to a majority of the City Council after distribution of the City Council agenda packet (GC §54957.5) will be made available for public inspection at the meeting. Such documents will also be available at the City Clerk's office, 3191 Katella Ave., Los Alamitos, CA 90720.

In compliance with the Americans with Disabilities Act, Assistive Listening headphones are available and can be checked out from the City Clerk. If you need special assistance to participate in this meeting, please contact the City Clerk at (562) 431-3538, ext. 220. Notification at least 42 hours prior to the meeting will enable the City to make reasonable arrangements to ensure accessibility to this meeting. [28 CFR 35.102.35.104 ADA Title II]. Language translation services are available for this meeting by calling the City Clerk's Office least 42 hours in advance

If you are unable to attend this meeting in person, you may submit comments on any agenda item or on any item not on the agenda by email to cityclerk@cityoflosalamitos.org with the subject line "COUNCIL PUBLIC COMMENT". Comments received by 3:00 p.m. they day of the meeting will be compiled, provided to the City Council, and made available to the public before the start of the meeting. Staff will not read email comments at the meeting. You may also view the meeting live on local cable channel 3.

If, as an attendee, or a participant at this meeting, you will need special assistance beyond what is normally provided, please contact the City Clerk's Office at (562) 431-3538, extension 220, 48 hours prior to the meeting so that reasonable arrangements may be made.

1. CALL TO ORDER

2. ROLL CALL

Mayor Nefulda
Mayor Pro Tem Hasselbrink
Council Member Doby
Council Member Hibard
Council Member Murphy

3. PLEDGE OF ALLEGIANCE

Mayor Nefulda will lead the Pledge of Allegiance.

4. INVOCATION

Mayor Pro Tem Hasselbrink will give the Invocation.

5. CLOSED SESSION

A. Conference with Legal Counsel - Anticipated Litigation
Significant exposure to litigation pursuant to paragraph (2) of subdivision (d) of Government Code section 54956.9: (One potential case).

6. PRESENTATIONS

A. Oath of Office for Los Alamitos Police Officer Robert Olvera

B. Presentation of a Commendation to the Los Alamitos Police Department Representatives in Recognition of Law Enforcement Records and Support Personnel Appreciation Week

C. Presentation by Girl Scout Troop 2085 in Appreciation of Mayor Pro Tem Hasselbrink and Council Member Doby

D. Presentation of a Certificate to Wuttipat Charoenmit, owner of Thailusion Cuisine, in Recognition of Small Business Saturday

E. Presentation of a Certificate to Antoine Phan, owner of An Noodles, Asian Comfort Food, in Recognition of Being Featured in the Mayor's Business Spotlight

7. ORAL COMMUNICATIONS

At this time, any individual in the audience may come forward to speak on any item within the subject matter jurisdiction of the City Council. Remarks are to be limited to not more than five minutes per speaker.

8. UPDATES FROM THE MAYOR

At this time, the Mayor may report on items not specifically described on the Agenda that are of interest to the community, provided no action or discussion is taken.

9. UPDATES FROM THE CITY STAFF

At this time, City Staff may also report on items not specifically described on the Agenda that are of interest to the community, provided no action or discussion is taken except.

10. WARRANTS

A. Warrants (Finance)
The attached Warrant Register contains checks and electronic funds transfers for the period from October 1, 2024, to October 31, 2024.

Recommendation: Ratify the Warrants from October 1, 2024, to October 31, 2024, for $2,746,186.35.

ROLL CALL
Mayor Nefulda
Mayor Pro Tem Hasselbrink
Council Member Doby
Council Member Hibard
Council Member Murphy

11. CONSENT CALENDAR

All Consent Calendar items may be acted upon by one motion unless a Council Member requests separate action on a specific item.

A. Approval of Minutes (Administration)
Approve the Regular City Council Minutes of October 21, 2024.

B. Treasurer's Quarterly Investment Report – September 2024 (Finance)
The item for City Council consideration is receipt of the Treasurer's Quarterly Investment Report.

Recommendation: Receive and file the Treasurer's Quarterly Investment Report – September 2024.

C. Resolution No. 2024-39 - Investment Policy Update (Finance)
This report provides the Council with an update on the City's Investment Policy for allowable investments per the California Government Code.

Recommendation: Adopt Resolution No. 2024-39, entitled "A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, ADOPTING THE STATEMENT OF INVESTMENT POLICY DATED NOVEMBER 2024."

D. Resolution No. 2024-41 - Adopting the June 30, 2024 Measure M2 Expenditure Report (Finance)
The Orange County Transportation Authority requires each agency that receives Measure M2 funds to adopt an annual Expenditure Report to account for the use of Measure M2 funds.

Recommendation: Adopt Resolution No. 2024-41, entitled "A RESOLUTION OF THE CITY COUNCIL OF LOS ALAMITOS, CALIFORNIA, CONCERNING THE MEASURE M2 EXPENDITURE REPORT FOR THE CITY OF LOS ALAMITOS FOR THE FISCAL YEAR ENDING JUNE 30, 2024."

E. Resolution No. 2024-43 - Community Development Block Grant (CDBG) 2025/2026 (Development Services)
This item recommends the City Council adopt a resolution for the Fiscal Year

2025/2026 Community Development Block Grant (CDBG) project application to Orange County.

Recommendation: Adopt Resolution No. 2024-43, entitled, “A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA APPROVING THE CITY’S PARTICIPATION IN THE FISCAL YEAR 2025/2026 COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG) PROGRAM WITH THE COUNTY OF ORANGE.”

F. Approval of Plans and Specifications to Bid for the CDBG Street Improvements on Maple Street (CIP 24/25-04) (Development Services)

This item recommends actions to begin facilitating the construction of the CDBG Street Improvements on Maple Street (CIP 24/25-04).

Recommendation:

1. Approve the plans and specifications for the construction of the CDBG Street Improvements on Maple Street (CIP 24/25-04); and,

2. Authorize Staff to advertise and solicit bid proposals.

G. Authorize the Purchase and Installation of a Modular Office Building (Development Services)

This item is for purchasing a modular office directly from the KYA Group through a cooperative purchasing agreement via the California Multiple Award Schedule (CMAS). The purchase and installation of a 6-office modular building will provide offices for employees and contractors. The purchase of the modular would enable cost savings and assurance that the timeline to provide work areas for employees would be met in a timely manner. The modular building will be located where the former LATV/PW Break Room building was located. The existing electrical, water, and sewer infrastructure will be connected to the modular office building where it will be able to accommodate 6–8 employees.

Recommendation:

1. Authorize the Mayor to use a cooperative purchasing agreement, in a form approved by the City Attorney, for the installation and purchase of a modular building from the KYA Group n the amount of $289,106.00; and,

2. Authorize a contingency of 15% of the bid amount not to exceed $43,365.90.

H. Award of Bid for the Installation/Upgrade of the City’s Access Control System (RFP No. 2025-02) to Spectrum Security Group, LLC (Development Services)

This item proposes awarding Spectrum Security Group LLC an agreement to install and/or upgrade the existing access control system at designated City facilities (RFP No. 2025-02).

Recommendation:

1. Award the proposal for RFP No. 2025-02 for the installation/upgrade of the City's Access Control System Services to Spectrum Security Group LLC for the amount of $114,589.24; and,

2. Authorize the Mayor to execute the Access Control System Services Agreement with Spectrum Security Group, LLC; and,

3. Authorize the City Manager to execute amendments for any unforeseen issues, with the total amount not to exceed thirty-five percent (35%) of the proposal amount or $40,105.

I. Notice of Completion (NOC) for the Demolition of Los Alamitos Television Production (LATV)/Public Works (PW) Building at 10921 Oak Street Project (CIP No. 22/23-04) (Development Services)

The Demolition project of the Los Alamitos Television Production (LATV)/Public Works (PW) Building at 10921 Oak Street (CIP No. 22/23-04) has been completed.

Staff recommends that the Council accept the work as completed, direct filing of the Notice of Completion (NOC), and authorize retention release as prescribed by the California Public Contract Code.

Recommendation:

1. Accept as complete the construction by Unlimited Environmental, Inc. for the LATV Building Demo at 10921 Oak Street (CIP No. 22/23-04); and,

2. Authorize the City Clerk to record the Notice of Completion/Final Report with the County Recorder's Office; and,

3. Authorize Staff to release the 5% retention to the contractor in the amount of $5,233.55, thirty-five (35) days after recordation of the Notice of Completion.

12. DISCUSSION ITEM

A. Survey Results for Potential Name Change of Apartment Row (Development Services)

This discussion item proposes renaming the Apartment Row neighborhood.

Recommendation:

1. Evaluate the survey results and discuss the options for the name change of the Apartment Row neighborhood; and,

2. Determine the new name for the Apartment Row neighborhood.

B. Council Member Requested Agenda Item: Electronic Delivery of Financial Information (Administration)

During the September 23, 2024, adjourned regular meeting, Council Member Hibard made a motion requesting that the City Council discuss the electronic delivery of financial information. Council Member Murphy supported the motion. The motion passed 3-1-1, with Mayor Pro Tem Hasselbrink voting no and Council Member Doby abstaining. This informational staff report is the first step in the two-step process for placing items of the Agenda for consideration by the Council. The item was first introduced at the October 21, 2024, Council meeting and continued until tonight without any discussion.

Recommendation: In accordance with the City Council's adopted Agenda Policy, this informational staff report does not request action, but seeks Council's direction. By a majority vote of the City Council Members present, staff may be directed to place this item on a future Agenda for consideration by the Council.

13. PUBLIC HEARING

A. Site Development Permit 22-02: 4665 Lampson Project (APN 130-012-35) (Development Services)

The City Council will consider resolutions to certifiy an Environmental Impact Report pursuant to the California Environmental Quality Act, adopt a Statement of Overriding Considerations, adopt a Mitigation Monitoring and Reporting Plan, approve a Tentative Parcel Map 2022-133 (For Finance and Conveyance Purposes), approve a Vesting Tentative Tract Map No. 19263 (For Condominium Purposes), approve an Affordable Housing Unit Application, and approve a Site Development Permit – Major for the 4665 Lampson Project Located at 4665 Lampson Avenue (APN 130-012-35) to Allow Redevelopment of the Project Site with 246 Residential Units consisting of a variety of housing product types, including 55 single-family detached homes, 114 townhomes, and 77 for-rent multifamily apartment homes comprised of 76 units restricted to lower income and one unrestricted manager's unit (the "Project").

Recommendation:

1. Open the Public Hearing; and,

2. Take testimony; and,

If appropriate,

3. Adopt Resolution No. 2024-44, entitled “A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, CERTIFYING THE FINAL ENVIRONMENTAL IMPACT REPORT, ADOPTING A STATEMENT OF OVERRIDING CONSIDERATIONS, AND ADOPTING A MITIGATION MONITORING AND REPORTING PLAN FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS (APPLICANT: LAMPSON PARK PLACE, LLC)”; and,

4. Adopt Resolution No. 2024-45, entitled “A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, APPROVING TENTATIVE PARCEL MAP 2022-133 (FOR FINANCE AND CONVEYANCE PURPOSES) AND VESTING TENTATIVE TRACT MAP NO. 19263 (FOR CONDOMINIUM PURPOSES) FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS (APPLICANT: LAMPSON PARK PLACE, LLC)”; and,

5. Adopt Resolution No. 2024-46, entitled “A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, APPROVING AN AFFORDABLE HOUSING UNIT APPLICATION FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE, IN THE MULTI-FAMILY RESIDENTIAL (R-3) ZONING DISTRICT (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS, INCLUDING 76 AFFORDABLE MULTI-FAMILY APARTMENT HOMES (APPLICANT: LAMPSON PARK PLACE, LLC)”; and,

6. Adopt Resolution No. 2024-47, entitled “A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, APPROVING A SITE DEVELOPMENT PERMIT – MAJOR FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE, IN THE MULTI-FAMILY RESIDENTIAL (R-3) ZONING DISTRICT (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS (APPLICANT: LAMPSON PARK PLACE, LLC)”.

14. COUNCIL ANNOUNCEMENTS

At this time, Council Members may also report on items not specifically described on the Agenda that are of interest to the community, provided no action or

discussion is taken except to provide Staff direction to report back or to place the item on a future Agenda.

15. ADJOURNMENT

I hereby certify under penalty of perjury under the laws of the State of California, that the foregoing Agenda was posted at the Los Alamitos City Hall, 3191 Katella Ave. and online at www.cityoflosalamitos.org not less than 72 hours prior to the meeting.

Windmera Quintanar, MMC, City Clerk
Dated: November 13, 2024

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 10A**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Craig Koehler, Director of Finance**

Subject: **Warrants**

SUMMARY

The attached Warrant Register contains checks and electronic funds transfers for the period from October 1, 2024, to October 31, 2024.

MINUTES OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS

REGULAR MEETING
Monday, October 21, 2024

1. CALL TO ORDER

The City Council met in Regular Session at 6:01 p.m., Monday, October 21, 2024, in the Council Chamber located at 3191 Katella Ave., Los Alamitos, CA 90720, Mayor Nefulda presiding.

2. ROLL CALL

Present: Council Members: Doby, Murphy
Mayor Pro Tem Hasselbrink, Mayor Nefulda

Absent: Council Members: Hibard

Present: Staff: Chet Simmons, City Manager
Michael Claborn, Chief of Police
Michael S. Daudt, City Attorney
Craig Koehler, Finance Director
Matthew Lightener, Management Analyst
Orange County Fire Authority
Emeline Noda, Recreation and Community Services Director
Ron Noda, Development Services Director
Windmera Quintanar, MMC, City Clerk/Dir. of Communications
Chelsi Wilson, Administrative Services Manager

3. PLEDGE OF ALLEGIANCE

Council Member Murphy led the Pledge of Allegiance.

4. INVOCATION

Council Member Doby gave the Invocation.

5. PRESENTATIONS

A. Presentation by Orange County Mosquito and Vector Control District (OCMVCD) to the City in Recognition of Being Named the Most Supportive Small City Award

Brian Brannon, OCMVCD Representative, spoke briefly and presented a certificate to the City.

B. Presentation of a Commendation to the Los Alamitos Code Enforcement Staff in Recognition of Code Enforcement Officer Appreciation Month

Development Services Director Noda spoke briefly regarding the Code Enforcement Staff.

C. Presentation by Officer Navarro Providing an Update on the Canine Program

Officer Navarro and Canine Officer Elvis provided an update.

6. ORAL COMMUNICATIONS

At this time, any individual in the audience may come forward to speak on any item within the subject matter jurisdiction of the City Council. Remarks are to be limited to not more than five minutes per speaker.

Mayor Nefulda opened Oral Communications.

Christine Arfwedson spoke in opposition to candidate Doby and Measure X.

John Underwood spoke in opposition to the management of Los Al TV 3.

Mayor Nefulda closed Oral Communications.

7. UPDATES FROM THE MAYOR

At this time, the Mayor may report on items not specifically described on the Agenda that are of interest to the community, provided no action or discussion is taken.

Mayor Nefulda gave an overview of the upcoming Trunk or Treat event.

Mayor Pro Tem Hasselbrink provided a recovery update on the Orange County Fire Authority hand crew injured in the recent airport fire.

8. UPDATES FROM THE CITY STAFF

At this time, City Staff may also report on items not specifically described on the Agenda that are of interest to the community, provided no action or discussion is taken except.

Development Services Director Noda provided an update on the street projects within the City.

Chief Claborn provided an update regarding the confidentiality of employee information on City networks.

City Manager Simmons provided an update on the City's critical systems restoration.

Recreation and Community Services Director Noda announced Jennifer Sisoev as the City's Fall 2024 Employee of the Quarter and provided an overview of the Women's Conference.

9. WARRANTS

A. Warrants (Finance)

The attached Warrant Register contains checks and electronic funds transfers for the period from September 1, 2024, to September 30, 2024.

Motion/Second: Hasselbrink/Doby
Carried 3/1: The City Council ratified the Warrants from September 1, 2024, to September 30, 2024, for $2,270,057.03.

ROLL CALL

Mayor Nefulda	Yes
Mayor Pro Tem Hasselbrink	Yes
Council Member Doby	Yes
Council Member Hibard	Absent
Council Member Murphy	No

Council Member Murphy stated she could not vote to approve the warrants until she had a chance to review them.

10. CONSENT CALENDAR

All Consent Calendar items may be acted upon by one motion unless a Council Member requests separate action on a specific item.

Motion/Second: Hasselbrink/Doby
Unanimously Carried: The City Council approved the following Consent Calendar items.

A. Approval of Minutes (Administration)

Approved the City Council Adjourned Regular Minutes of September 23, 2024.

B. Authorization to Approve a Request for Proposal (RFP) for Parks and Landscape Maintenance Services (RFP 2025-06) (Development Services)

This item recommended approving a Request for Proposal (RFP) for Parks and Landscape Maintenance Services (RFP 2025-06).

The City Council:

1. Approved the Request for Proposals (RFP 2025-06) for Parks and Landscape Maintenance Services; and,

2. Authorized Staff to advertise and solicit proposals.

C. Award of Professional Services Agreement (PSA) with Bear Electrical Solutions, LLC. for Citywide Traffic Signal Maintenance Services (Development Services)

This item recommended the awarding of a bid for citywide Traffic Signal Maintenance Services (RFP 2025-03) to Bear Electrical Solutions, LLC. in the amount of $1,470 per month for three years with two one-year extensions.

The City Council:

1. Awarded the bid for RFP 2025-03 for citywide Traffic Signal Maintenance Services to Bear Electrical Solutions, LLC. in the amount of $1,470 per month; and,

2. Authorized the Mayor to execute the Professional Services Agreement for Traffic Signal Maintenance Services with Bear Electrical Solutions, LLC.

D. Award of Bid to Pavewest Incorporated for Citywide Hardscape Maintenance (Development Services)

This item recommended awarding a contract agreement to Pavewest Incorporated for citywide Hardscape Maintenance for an annual amount of $298,553.

The City Council:

1. Authorized the Mayor to execute a one-year contract agreement with Pavewest Incorporated for Citywide Hardscape Maintenance for $259,611 for Fiscal Year 2024-2025; and,

2. Authorized the City Manager to execute up to four 1-year extensions; and,

3. Authorized a contingency of 15 percent of the bid amount not to exceed $38,942.00.

E. Award of Bid to Marjani Builders, Inc. for Labourdette Park Construction Services (CIP No. 24/25-02) (Development Services)

This item recommended the award of a bid for the contractual demolition and construction services for the Labourdette Park Project (CIP 24/25-02) at 4401 Howard Avenue. It is recommended to award the lowest, responsible bidder, Marjani Builders, Inc., for a total project cost of $736,826.00.

The City Council:

1. Awarded demolition and construction services for the Labourdette Park Project (CIP 24/25-02) at 4401 Howard Avenue to Marjani Builders, Inc.; and,

2. Authorized the Mayor to execute the Articles of Agreement with Marjani Builders, Inc. for the Labourdette Park Project (CIP 24/25-02) in the amount of $736,826.00; and,

3. Authorized the City Manager to add work and execute change orders relevant to the project.

11. DISCUSSION ITEM

A. Council Member Requested Agenda Item: Electronic Delivery of Financial Information (Administration)

During the September 23, 2024, adjourned regular meeting, Council Member Hibard made a motion requesting that the City Council discuss the electronic delivery of financial information. Council Member Murphy supported the motion. The motion passed 3-1-1, with Mayor Pro Tem Hasselbrink voting no and Council Member Doby abstaining. This informational staff report is the first step in the two-step process for placing items of the Agenda for consideration by the Council.

Mayor Nefulda moved the item to the November 18, 2024, City Council meeting.

Recommendation: In accordance with the City Council's adopted Agenda Policy, this informational staff report does not request action, but seeks Council's direction. By a majority vote of the City Council Members present, staff may be directed to place this item on a future Agenda for consideration by the Council.

12. COUNCIL ANNOUNCEMENTS

At this time, Council Members may also report on items not specifically described on the Agenda that are of interest to the community, provided no action or discussion is taken except to provide Staff direction to report back or to place the item on a future Agenda.

Mayor Pro Tem Hasselbrink spoke regarding attendance at the Community Center's Grand Reopening, the Rotary Wine Tasting event, the State of the District, the Taste of Los Al, speaking with the Girl Scout Troop at Weaver with Council Member Doby, the League of California Cities Annual Conference, and the dedication of St. Isidore Memorial Hall. She advised of the upcoming Trunk or Treat event.

Council Member Doby spoke regarding attendance at the Association of California Cities – Orange County Board meeting, Orange County Council of Governments Board meeting, the Community Center's Grand Reopening, Los Alamitos Education Foundation's State of the District, the Los Alamitos Women's Conference, and a hosting two girl scout troop tours.

Council Member Murphy spoke regarding attendance at the Rotary Wine Tasting event, the Community Center's Grand Reopening, the dedication of St. Isidore Memorial Hall, and Cypress' State of the City.

Mayor Nefulda spoke regarding attendance at the League of California Cities Annual Conference.

13. CLOSED SESSION

A. CONFERENCE WITH LEGAL COUNSEL – ANTICIPATED LITIGATION

Significant exposure to litigation pursuant to paragraph (2) of subdivision (d) of Government Code section 54956.9: (One potential case).

City Attorney Daudt read the item aloud.

RECESS
The City Council recessed into Closed Session at 6:58 p.m.

RECONVENE
The City Council reconvened in Regular Session at 7:23 p.m.

City Attorney Daudt stated there was no reportable action.

14. ADJOURNMENT

The City Council adjourned at 7:23 p.m. in memory of Doug Wood.

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 11B**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Craig Koehler, Director of Finance**

Subject: **Treasurer's Quarterly Investment Report – September 2024**

SUMMARY

The item for City Council consideration is receipt of the Treasurer's Quarterly Investment Report.

RECOMMENDATION

Receive and file the Treasurer's Quarterly Investment Report – September 2024.

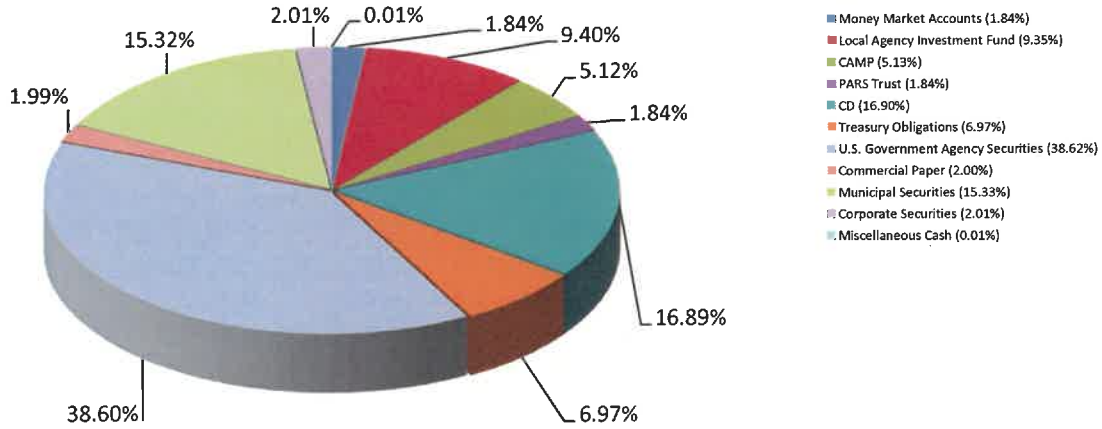
BACKGROUND

Sound investment practices are essential to the City's fiscal management. The City Treasurer is responsible for managing the City's investment portfolio, focusing first on the safety of investments and then on liquidity and an appropriate rate of return. The investment report and portfolio composition are attached.

DISCUSSION

This report summarizes the City's investment activities, portfolio listing, and balances for the September 30, 2024 quarter.

FISCAL IMPACT



Interest earnings for the quarter ending September 30, 2024, were $197,494.

Attachment:
1. Quarterly Investment Report - September 2024
2. Pooled Investment Portfolio Holdings - September 2024
3. Bank Statements - July 2024
4. Bank Statements - August 2024
5. Bank Statements - September 2024

COMPOSITION OF POOLED PORTFOLIO (NON-FISCAL AGENT)

It has been verified that this investment portfolio conforms with the City's investment policy approved by City Council on 11/20/23. The Treasurer's cash management program and cash flow analysis indicate that sufficient liquidity is on hand to meet estimated future expenditures for six months. The weighted average maturity of the pooled investment portfolio is 2.19 years, and the weighted average yield on cost is 11.839% indenture associated with the bond transaction that generated the cash.

Craig Koehler
Finance Director/Treasurer
City of Los Alamitos
3191 Katella Ave
Los Alamitos, CA 90720

Account Summary

Source	Balance as of 7/1/2024	Contributions	Earnings	Expenses	Distributions	Transfers	Balance as of 7/31/2024
PENSION	$308,529.93	$50,000.00	$7,978.36	$135.66	$0.00	$0.00	$366,372.63
Totals	**$308,529.93**	**$50,000.00**	**$7,978.36**	**$135.66**	**$0.00**	**$0.00**	**$366,372.63**

Investment Selection

Source	
PENSION	**Moderate - Strategic Blend**

Investment Objective

Source	
PENSION	The dual goals of the Moderate Strategy are growth of principal and income. It is expected that dividend and interest income will comprise a significant portion of total return, although growth through capital appreciation is equally important. The portfolio will be allocated between equity and fixed income investments.

Investment Return

Source	1-Month	3-Months	1-Year	Annualized Return 3-Years	5-Years	10-Years	Plan's Inception Date
PENSION	2.32%	6.83%	-	-	-	-	1/25/2024

Information as provided by US Bank, Trustee for PARS; Not FDIC Insured; No Bank Guarantee; May Lose Value
Past performance does not guarantee future results. Performance returns may not reflect the deduction of applicable fees, which could reduce returns. Information is deemed reliable but may be subject to change.
Investment Return: Annualized rate of return is the return on an investment over a period other than one year multiplied or divided to give a comparable one-year return.
Account balances are inclusive of Trust Administration, Trustee and Investment Management fees

INFORMATION YOU SHOULD KNOW

Effective August 12, 2024, please review updates made to the *Your Deposit Account Agreement* document which may affect your rights.

Beginning July 8, 2024, you can review the full revised document at **usbank.com/YDAA-upcoming-version**, by calling 24-Hour Banking at 800-USBANKS (872-2657) or by visiting your local U.S. Bank branch. We accept relay calls.

Here's what you should know:

Under the **Time Deposits** section, the early withdrawal fee will be removed.

If you have questions or need to request a copy of the current *Your Deposit Account Agreement*, visit **usbank.com/tmtermsandconditions** or please call your customer service team at the phone number listed at the top of this statement.

Totals	**$366,372.63**	**$50,000.00**	**$6,945.38**	**$161.93**	**$0.00**	**$0.00**	**$423,156.08**

Investment Selection

Source	
PENSION	**Moderate - Strategic Blend**

Investment Objective

Source	
PENSION	The dual goals of the Moderate Strategy are growth of principal and income. It is expected that dividend and interest income will comprise a significant portion of total return, although growth through capital appreciation is equally important. The portfolio will be allocated between equity and fixed income investments.

Investment Return

Source	1-Month	3-Months	1-Year	Annualized Return 3-Years	5-Years	10-Years	Plan's Inception Date
PENSION	1.72%	5.46%	-	-	-	-	1/25/2024

Information as provided by US Bank, Trustee for PARS; Not FDIC Insured; No Bank Guarantee; May Lose Value

Past performance does not guarantee future results. Performance returns may not reflect the deduction of applicable fees, which could reduce returns. Information is deemed reliable but may be subject to change.
Investment Return: Annualized rate of return is the return on an investment over a period other than one year multiplied or divided to give a comparable one-year return.
Account balances are inclusive of Trust Administration, Trustee and Investment Management fees

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 11C**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Craig Koehler, Director of Finance**

Subject: **Resolution No. 2024-39 - Investment Policy Update**

SUMMARY

This report provides the Council with an update on the City's Investment Policy for allowable investments per the Caliornia Government Code.

RECOMMENDATION

Adopt Resolution No. 2024-39, entitled "A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, ADOPTING THE STATEMENT OF INVESTMENT POLICY DATED NOVEMBER 2024."

BACKGROUND

The Investment Policy provides guidelines for prudent investment of the City's reserve cash and outlines the policies essential to ensuring the safety and financial strength of the City's investment portfolio. The Policy is reviewed annually for submission and approval by the City Council. The last report was dated November 20, 2023.

The City's investment portfolio consists primarily of Certificates of Deposit, U.S. Government Agency Securities, Local Agency Investment Fund (LAIF), and California Asset Management Program (CAMP) pool investments. The City's permitted investments are more restrictive than the State guidelines.

The City's primary objectives, in order of priority, remain as follows:

1. Safety of principal,
2. Liquidity, and
3. Yield.

While investment risk is associated with any investment activity, there is also an opportunity risk related to inactivity. The goals and objectives will be to actively manage the City's idle cash to earn a greater yield while prioritizing safety and liquidity.

DISCUSSION

Within the constraints of the investment guidelines, the investment portfolio resulted in $855 thousand in investment revenue for FY2023-24.

Attached is the California Allowable Investments as of January 1, 2024, as defined by the California Debt and Investment Advisory Commission (CDIAC).

No changes or proposed additional allowable investment instruments are being recommended.

As previously defined, allowable investment instruments specifically exclude reverse repurchase agreements, derivatives, options, futures, zero coupon bonds, inverse floaters, range notes, first mortgages or trust deeds, collateralized mortgage obligations (CMOs), limited partnerships, real estate investment trusts (REIT's), open-end mutual funds, closed-end mutual funds, mutual funds with a weighted average maturity greater than 180 days, unregulated and/or uninsured investment pools, common stock, preferred stock, commodities, precious metals, securities with high price volatility, limited marketability (less than three active bidders), securities that may default on interest payments and any other speculative investment deemed inappropriate under the Prudent Investor Standard, all having terms of five years or less to maintain liquidity.

FISCAL IMPACT

There is no direct fiscal impact. However, utilizing the available investment options under the California Government Code could potentially increase interest earnings.

Attachment:
1. Resolution 2024-39 - Annual Investment Policy
2. Exhibit A - Statement of Investment Policy - November 2024
3. Allowable Investments - January 2024

RESOLUTION NO. 2024-39

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, ADOPTING THE STATEMENT OF INVESTMENT POLICY DATED NOVEMBER 2024

WHEREAS, Government Code section 53646(a)(2) states that the treasurer of a local agency may annually present a statement of investment policy to the legislative body; and,

WHEREAS, it is the City's policy to annually adopt a statement of investment policy; and,

WHEREAS, the statement of investment policy is intended to provide guidelines for the prudent investment of the City's temporarily idle cash and to outline the policies for maximizing the efficiency of the City's cash management system.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS DOES RESOLVE AS FOLLOWS:

SECTION 1. The City Council of the City of Los Alamitos, California, finds that the above recitals are true and correct.

SECTION 2. The City Council of the City of Los Alamitos hereby adopts the Statement of Investment Policy, dated November 2024, which is attached hereto as Exhibit "A."

SECTION 3. The City Clerk shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 18th day of November, 2024.

City of Los Alamitos

Statement of Investment Policy
November 2024

This Statement of Investment Policy ("Policy"), as set forth by the City of Los Alamitos ("City"), provides the guidelines for prudent investment of the City's idle or reserve cash and outlines the policies essential to ensuring the safety and financial strength of the City's investment portfolio.

This Policy is based on the principles of prudent money management and conforms to all applicable Federal and State Laws governing the investment of public funds. In instances where the Policy is more restrictive than Federal or State Law, the Policy will supersede.

1. Purpose: This statement sets forth policies that shall govern the investment of the City's funds. It will be used by the City Treasurer, other City officials and staff, and all other third-party providers of investment or investment-related services. Its purpose is to direct the prudent investment and protection of the City's funds and investment portfolio in compliance with California Government Code Section 53600 et. seq requirements.

2. Application: It is intended that this policy cover all short-term operating funds and investment activities under the direct authority of the City. These funds are described in the City's annual financial report and include:

General Fund
Special Revenue Funds
Capital Projects Funds
Internal Service Funds

Investment income will be allocated to the various funds based on their respective participation and in accordance with generally accepted accounting principles.

This investment policy does not apply to Bond Proceeds. California Government Code Section 5922(d) authorizes bonds, certificates of participation notes and other debt issue proceeds to be invested in accordance with the related offering documentation. This Code Section recognizes the unique needs and objectives of such proceeds.

3. Regulation:

A. Investment Objectives

It is the policy of the City to invest public funds in a manner that will provide for the preservation of capital while meeting the daily cash flow requirements of the City, and attaining a reasonable rate of return within an acceptable and defined level of risk.

The Policy has three primary objectives in order of priority:

Preservation of Capital (Safety) – The protection of the principal is the foremost consideration when undertaking investment decisions that affect public funds. The objective is to mitigate credit risk and interest rate risk.
Credit Risk is the risk of loss of principal due to the failure of the security issuer.

Credit Risk can be mitigated by:

- Limiting investments to the safest types of securities.
- Pre-qualifying accountants, auditors, financial institutions, broker/dealers, financial advisors, and other outside consultants with which the City does business.
- Diversifying the investment portfolio so that potential losses are minimized
- Interest Rate Risk is the risk that the market value of securities will fall due to a rise in general market interest rates. It is the policy of the City to hold individual securities to maturity in an effort to meet liquidity demands. Interest rate risk can be mitigated by:
- Holding individual securities to maturity - Structuring the investment portfolio so that securities mature to meet cash flow requirements for ongoing operations, thereby avoiding the need to sell securities on the open market prior to maturity.
- Employing a laddering strategy whereby staggering maturities of individual securities so that bonds come due in increments assuring an overall liquidity pattern.
- Limiting maturities of individual securities and the average maturity of the overall portfolio.
- Liquidity – the investment portfolio shall remain sufficiently liquid to meet all daily cash flow and operating requirements that may be reasonably expected or anticipated.
- Yield – the investment portfolio shall be designed with the objective of attaining a benchmark rate of return throughout budgetary and economic cycles, consistent with the primary objectives of safety and liquidity.

B. Legal and Policy Constraints

The authority governing investments for municipal government agencies is outlined in the California Government Code Section 53600, et. seq. In all instances, the City of Los Alamitos shall comply with state law requirements.

In addition to the requirements of state law, the city's investment philosophy is to make investment decisions based on an overall passive management style that embodies a prudent investor standard and purchases investments with the intent to hold until maturity.

Accordingly, the City’s conservative philosophy prohibits active trading and speculation, i.e., the purchase of securities intending to profit from favorable market changes in market prices or market conditions. Leveraging or borrowing money for the purpose of investing is expressly prohibited. However, the City may elect to sell a security prior to its maturity and record a capital gain or loss in order to improve the quality, liquidity, or yield of the portfolio in response to market conditions or City needs.

Investments shall be made with judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of

their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived.

C. Safekeeping of Securities

To protect against fraud or embezzlement or losses caused by collapse of an individual securities dealer, all securities owned by the City shall be held in safekeeping by a third-party bank trust department. Designated third party shall act as agents for the City under the terms of a custody agreement. All trades executed by a dealer will settle delivery vs. payment (DVP) through the City's safekeeping agent. Investment officials shall be bonded to protect the public against possible embezzlement or malice. Securities held in custody for the City shall be independently audited on an annual basis to verify investment holdings.

D. Maturity and Term

California Government Code Section 53601 states that except as otherwise allowed:

> No investment shall be made in any security, other than security underlying a repurchase or reverse repurchase agreement authorized by this section, which at the time of the investment has a term remaining to maturity in excess of five years unless the legislative body has granted express authority to make that investment either specifically or as a part of an investment program approved by the legislative body no less than three months before the investment.

The City of Los Alamitos administers funds according to cash flow requirements. As a result, there is a core of funds that are not necessary for the daily operational needs of the City to pay expenses. From time to time, fixed-income market conditions present opportunities for higher interest rates on high-grade securities with low-risk exposure. It is in the best interest of the City of Los Alamitos to practice a fully diversified investment plan that will ensure safety, liquidity, and the increase of acceptable yield from these situations.

The City of Los Alamitos will attempt to match its investments with anticipated cash flow requirements to the extent possible.

Investment maturities will be selected based on liquidity requirements to minimize interest rate risk and maximize earnings. Current and expected yield curve analysis will be monitored, and the portfolio will be invested accordingly.

Market risk, the risk of market value fluctuations due to changes in the general level of interest rates, is mitigated by limiting the weighted average maturity of the portfolio along with a laddered structure. The weighted average maturity of the pooled portfolio should not exceed three years. At least 30% of the portfolio should have a maturity of 1 year or less, with the balance of the portfolio laddered with maturities ranging from 1 to 5 years. No securities can be purchased with a maturity greater than five years without the prior approval of the City Council.

E. Investment Authority

The City Treasurer is authorized to make investments on behalf of the City of Los Alamitos. Such investments shall only be limited to the instruments authorized under California Government Code Sections 53601 and 53635 and further described in Appendix A and B.

All City of Los Alamitos investments shall be approved by the City Manager or their designee.

No person may engage in an investment transaction except as provided under the terms of this policy and the procedures established by the City Treasurer.

Officers and employees of the City of Los Alamitos involved in the investment process shall refrain from personal business activity that could conflict with the proper execution of the investment program or which could impair their ability to make impartial investment decisions. Employees and investment officials shall disclose to the City Treasurer any material financial interests in financial institutions that conduct business with the City of Los Alamitos, and they shall further disclose any large personal financial/investment positions that could be related to the performance of the City of Los Alamitos, particularly with regard to the time of purchases and sales. The City Treasurer shall make similar disclosures to the City Council. Under no circumstances shall investment officers or employees accept gifts, trips, or any type of gratuity from individuals or institutions engaged in investment practices with the City of Los Alamitos.

F. Transfer of Investment Funds

The transfer of investment funds will be carried out exclusively by telephone or electronic wire transfer. Each entity with which the City does business shall receive, in writing from the City Treasurer, a listing that limits funds transfers to preauthorized bank accounts only. The listing will also contain the names of City staff authorized to request such transfers and will be updated in writing for all authorized staff and bank account changes, as necessary.

G. Deposits

Money must be deposited in state or national banks, state or federal savings associations, or state or federal credit unions in the State of California. It may be in inactive deposits, active deposits, or interest-bearing active deposits. The deposits cannot exceed the amount of the bank's savings and loan or credit union's paid-up capital surplus.

The bank or savings and loan must secure the active and inactive deposits with eligible securities having a market value of 110% of the total amount of the deposits. At his/her discretion, the investment officer may waive security for that portion of a deposit that is insured pursuant to federal law. Currently, the first $250,000 of a deposit is federally insured. It is the City's policy to waive this collateral requirement for the first $250,000 because it is possible to receive a higher rate.

The City will not maintain a deposit above the FDIC insured level, including the accrued interest on the deposit.

H. Permitted Investments

Investments shall be made only in those instruments specifically authorized by California State laws (Government Code Sections 53600-53609), and to no greater an extent than those authorized by those laws.

The City's specific permitted investment guidelines are listed in Appendix A, with the noted restricted instruments.

State and Federal laws notwithstanding, any investment not explicitly described herein including, but not limited to, reverse repurchase agreements, derivatives, options, futures, zero coupon bonds, inverse floaters, range notes, first mortgages or trust deeds, collateralized mortgage obligations (CMO's), limited partnerships, real estate investments trusts (REIT's), open-end mutual funds, closed-end mutual funds, mutual funds with a weighted average maturity more than 180 days, unregulated and/or uninsured investment pools, common stock, preferred stock, commodities, precious metals, securities with high price volatility, limited marketability (less than three active bidders), securities that may default on interest payments and any other speculative investment deemed inappropriate under the Prudent Investor standard are strictly prohibited. In addition, any investment transaction that might impair public confidence in the City of Los Alamitos government must be avoided.

I. Diversification

The City of Los Alamitos shall diversify its investments by security type and institution. The City recognizes diversification is an investment strategy that will mitigate risk in the investment portfolio. The City's investment portfolio shall be diversified to avoid incurring unreasonable and avoidable risks with regard to specific investment types. Within investment types, the City shall also maintain a mix of securities to avoid concentrations within individual financial institutions, geographic areas, industry types, and maturities. The City will only invest in fixed-rate securities.

J. Performance Standards

The investment portfolio shall be designed with the objective of obtaining a rate of return throughout budgetary and economic cycles commensurate with investment risk constraints and cash flow needs.

Since the pooled portfolio's weighted average maturity cannot exceed three years, the investment portfolio shall be designed to attain a market-average rate of return comparable to the Merrill Lynch 1-5 Year Federal Agency Index on a total return basis, excluding the funds maintained in money market accounts.

K. Reporting

In accordance with California Government Code Sections 53607 and 53646, the City Treasurer and the City Manager shall render quarterly reports to the City Council showing

(a) type of investment, (b) institution, (c) date of maturity, (d) amount of deposit; (e) current market value for all securities with a maturity of more than twelve (12) months; (f) rate of interest on each security; and (g) such other data as the City Council may, from time to time, specify. (This section is applicable when the City Treasurer has invested in other types of securities other than LAIF.)

The City Treasurer shall establish an annual process of independent review by an external auditor. This review will provide internal control by assuring compliance with policies and procedures.

L. Policy Review

1. Annual Statement of Investment Policy

The City Treasurer and the City Manager shall annually render to the City Council a Statement of Investment Policy, which Statement shall be adopted by the City Council.

2. Periodic Review

To ensure a statement that is consistent with any new relevant legislation and financial trends, the City Treasurer shall periodically report to the City Council proposed changes and amendments to this document for review and approval. In any event, all changes in state law affecting this policy shall be considered incorporated immediately upon their effective date unless otherwise adopted earlier by action of the City Council.

M. Qualified Dealers

The City of Los Alamitos shall purchase authorized investments either directly from the issuer or shall be purchased either from an institution licensed by the State as a broker-dealer, as defined in the Corporations Code, or from a member of the federally regulated securities exchange, from a national or state-chartered bank, from a savings association or federal association, or a brokerage firm designated as a primary or regional government dealer.

The City Treasurer will maintain a list of financial institutions formally authorized to provide investment services. The City Treasurer shall formally authorize investment brokers to provide investment services to the City. Investment Brokers may be primary dealers or regional brokers licensed to do business in the State of California.

Brokers must complete a broker questionnaire, which includes proof of Financial Industry Regulatory Authority (FINRA) certification and proof of State registration and execute a certification that the Broker's employees and supervisory personnel have read and understand the City's Investment Policy. The City Treasurer may conduct periodic reviews of the approved list of investment brokers and may remove a firm from the approval list at any time due to any failure to comply with any of the above criteria, failure to execute a transaction, any change in broker/dealer staff, or any action, event or failure

to act which, in the sole discretion of the City Treasurer, is materially adverse to the best interest of the City of Los Alamitos.

APPENDIX A -Permitted Investments

DEPOSITORY SERVICES

Active deposits are demand or checking accounts which receive revenues and pay disbursements.

Interest-bearing active deposits are money market accounts at a financial institution (i.e., bank, savings and loan, credit union). These accounts are demand accounts (i.e., checking accounts) with restricted transaction activity.

Inactive deposits are Certificates of Deposit issued in any amount for periods of time as short as fourteen days and as long as several years. Interest must be calculated on a 360 day basis, actual number of days.

Passbook savings account is similar to an inactive deposit except not for a fixed term. The interest rate is much lower than Certificates of Deposit, but the savings account allows for flexibility. Funds can be deposited and withdrawn according to daily operational needs.

INVESTMENT SECURITIES

U.S. Treasury Issues are direct obligations of the United States Government. These issues are called bills, notes, and bonds. The maturity range of new issues is from 13 weeks (T-Bills) to 30 years (T-Bonds). These are highly liquid and are considered the safest investment security.

Federal Agency Issues are issued by direct U. S. Government agencies or quasi-government agencies. These issues are guaranteed directly or indirectly by the United States Government. Examples of these securities are Federal Home Loan Bank (FHLB) notes, Federal National Mortgage Association (FNMA) notes, Federal Farm Credit Bank (FFCB) notes, Federal Home Loan Mortgage Corporation (FHLMC) notes, Federal Intermediate Credit Bank (FICB) debentures, Small Business Administration (SBA) notes, Government National Mortgage Association (GNMA) notes, and Student Loan Association (SALLMAE) notes.

Certificates of Deposit are investments for inactive funds issued by banks, savings and loans, and credit unions. Investments of $250,000 are insured respectively by Federal Deposit Insurance Corporation (FDIC), and the National Credit Union Share Insurance Fund (NCUSIF). Certificates of Deposit can be issued from 14 days to several years in maturity, allowing the City investment of funds to be matched to cash flow needs. For deposits exceeding $250,000, the financial institution is required to collateralize the investment with 110% government securities. The City does not accept 150% collateral (First Trust Deeds) or 105% Letters of Credit (L.C.).

A **Non-Negotiable Certificate of Deposit** is a promissory note issued by a depository institution (such as a bank, credit union, a saving association, etc.) that usually carries a penalty for early withdrawal and does not have a CUSIP.

Negotiable Certificates of Deposit are issued by a nationally or state-chartered bank, a savings association or a federal association (as defined by Section 5102 of the Financial Code), a state or federal credit union, or by a federally licensed or state-licensed branch of a foreign bank and are assigned a CUSIP.

Local Agency Investment Fund (LAIF) is a special fund in the State Treasury which local agencies may use to deposit funds for investment. There is no minimum investment period and the minimum transaction is $5,000, in multiples of $1,000 above that, with a maximum of $50 million for any agency. It offers high liquidity because deposits can be converted to cash in twenty-four hours and no interest is lost. All interest is distributed to those agencies participating on a proportionate share determined by the amounts deposited and the length of time they are deposited. Interest is paid quarterly by electronic deposit to a designated bank account.

The State keeps an amount for reasonable costs of making the investments. State law provides that administrative costs are not to exceed 5% of the fund's quarterly earnings. However, if the 13-week Daily Treasury Bill Rate on the last day of the fiscal year is below 1%, then administrative costs shall not exceed 8% of the fund's quarterly earnings for the subsequent fiscal year.

Local Agency Bonds are bonds issued by other local agencies, maximum maturity 5 years, no maximum specified percentage of portfolio, no minimum quality requirements, Government Code 53601(a).

State Obligations – CA and others are obligations issued by California and other states, maximum maturity 5 years, no maximum specified percentage of portfolio, no minimum quality requirements, Government Code 53601(c)(d).

California Local Agency Obligations are obligations issued by local agencies within California, maximum maturity 5 years, no maximum specified percentage of portfolio, no minimum quality requirements, Government Code 53601(e).

Bankers' Acceptance is a negotiable piece of paper that functions like a post-dated check. A bank, rather than an account holder, guarantees the payment. Companies use Banker's acceptances (also known as bills of exchange) as a relatively safe form of payment for large transactions. BAs can also be short-term debt instruments, similar to U.S. Treasury bills, that trade at a discount to face value, maximum maturity 180 days, specified at 40% maximum percentage of portfolio, no minimum quality requirements, Government Code 53601(g).

Placement Service Deposits are deposit placement services, which enables funds to be placed in demand deposit accounts, money market deposit accounts, or both,

maximum maturity 5 years, specified 50% maximum percentage of portfolio, no minimum quality requirements, Government Code 53601.8 and 53635.8.

Placement Service Certificates of Deposit are certificates of deposit placed by a service on behalf of banks and credit unions that are FDIC or NCUA insured, 5 years maximum maturity, specified 50% maximum percentage of portfolio, no minimum quality requirements, Government Code 53601.8 and 53635.8.

Collaterized Bank Deposits are protected public funds backed by a collateriztion agreement to protect the principal in the event of failure by the financial institution, maximum maturity 5 years, no maximum specified percentage of portfolio, no minimum quality requirements, Government Code 53630 et seq, and 53601(n).

Mortgage Pass-Through and Asset-Backed Securities are pools of fixed-income securities backed by a package of assets. A servicing intermediary collects the monthly payments from issuers and, after deducting a fee, remits or passes them through to the holders of the pass-through security or entities who have invested in it). A pass-through security is also known as a "pay-through security" or a "pass-through certificate "though technically the certificate is the evidence of interest or participation in a pool of assets that signifies the transfer of payments to investors; it's not the security itself; maturity maximum maturity 5 years or less; specified maximum of 20% of portfolio; AA rating or better; Government Code 53061(o).

Commercial Paper Non- Pooled Funds (under $100 million investments) – are short-term money market instruments that is used for obtaining short-term funding secured by a promissory note; maximum maturity 270 days or less, specified maximum of 25% of portfolio, rating of highest letter by NRSRO, Government Code 53601(h)(2)(c).

Medium Term Notes – are securities that are collaterized in an amount equal to their full outstanding principal amount; maximum maturity 5 years or less, specified maximum 30% of portfolio, A rating or better, Government Code 53601(k).

County Pooled Investment Funds are investments that are combined in a pool from all participating members and share in the performance of the pooled money; generally large county pools like Orange County Investment Pool (OCIP), no specified maturity but would default to 5 years maximum, no maximum specified percentage of portfolio, no minimum quality requirements, Government Code 27133.

Joint Powers Authority Pool – California Asset Management Program (CAMP) are investments that are combined in a qualified pool from all participating members and share in the performance of the pooled money; generally large county pools like Orange County Investment Pool (OCIP), no specified maturity but would default to 5 years maximum, no maximum specified percentage of portfolio, no minimum quality requirements, Government Code 53601 (p).

Public Bank Obligations are obligations issued by a public bank or financial institution in which a state, municipality, or public actors are the owners. It is an enterprise under government control. Prominent among current public banking models are the Bank of North Dakota, the German public bank system, and many nations' postal bank systems, maximum maturity 5 years, no specified percentage of portfolio, no minimum quality requirements, Government Code 53601(r), 53635(c), and 57603.

CUSIP (Committee on Uniform Security Identification Procedures) is a nine-character alphanumeric code that identifies a North American financial security for the purposes of facilitating clearing and settlement of trades.

TABLE OF NOTES FOR FIGURE 1

[A] *Sources: Sections 16340, 16429.1, 27133, 53601, 53601.6, 53601.8, 53630 et seq., 53635, 53635.8, and 57603.*

[B] *Municipal Utilities Districts have the authority under the Public Utilities Code Section 12871 to invest in certain securities not addressed here.*

[C] *Section 53601 provides that the maximum term of any investment authorized under this section, unless otherwise stated, is five years from the settlement date. However, the legislative body may grant express authority to make investments either specifically or as a part of an investment program approved by the legislative body that exceeds this five year remaining maturity limit. Such approval must be issued no less than three months prior to the purchase of any security exceeding the five-year maturity limit.*

[D] *Percentages apply to all portfolio investments regardless of source of funds. For instance, cash from a reverse repurchase agreement would be subject to the restrictions.*

[E] *No more than 30% of the agency's money may be in bankers' acceptances of any one commercial bank.*

[F] *Applies to local agencies, other than counties or a city and county, with less than $100 million of investment assets under management. Includes agencies defined as a city, a district, or other local agency that do not pool money in deposits or investment with other local agencies, other than local agencies that have the same governing body.*

[G] *Local agencies, other than counties or a city and county, may purchase no more than 10% of the outstanding commercial paper and medium-term notes of any single issuer.*

[H] *Issuing corporation must be organized and operating within the U.S., have assets in excess of $500 million, and debt other than commercial paper must be in a rating category of "A" or its equivalent or higher by a nationally recognized statistical rating organization, or the issuing corporation must be organized within the U.S. as a special purpose corporation, trust, or LLC, have program wide credit enhancements, and have commercial paper that is rated "A-1" or higher, or the equivalent, by a nationally recognized statistical rating organization.*

[I] *Applies to counties or a city and county, and the City of Los Angeles that have $100 million or more of investment assets under management.*

[J] *Includes agencies defined as a county, a city and county, or other local agency that pools money in deposits or investments with other local agencies, including local agencies that have the same governing body. Local agencies that pool exclusively with other local agencies that have the same governing body must adhere to the limits set forth in Section 53601(h)(2)(C).*

[K] *No more than 30% of the agency's money may be in negotiable certificates of deposit that are authorized under Section 53601(i).*

[L] *Effective January 1, 2020, no more than 50% of the agency's money may be invested in deposits, including certificates of deposit, through a placement service as authorized under 53601.8 (excludes negotiable certificates of deposit authorized under Section 53601(i)). On January 1, 2026, the maximum percentage of the portfolio reverts back to 30%. Investments made pursuant to 53635.8 remain subject to a maximum of 30% of the portfolio.*

[M] *Reverse repurchase agreements or securities lending agreements may exceed the 92-day term if the agreement includes a written codicil guaranteeing a minimum earning or spread for the entire period between the sale of a security using a reverse repurchase agreement or securities lending agreement and the final maturity dates of the same security.*

[N] *Reverse repurchase agreements must be made with primary dealers of the Federal Reserve Bank of New York or with a nationally or state chartered bank that has a significant relationship with the local agency. The local agency must have held the securities used for the agreements for at least 30 days.*

[O] *"Medium-term notes" are defined in Section 53601 as "all corporate and depository institution debt securities with a maximum remaining maturity of five years or less, issued by corporations organized and operating within the United States or by depository institutions licensed by the United States or any state and operating within the United States."*

[P] *No more than 10% invested in any one mutual fund. This limitation does not apply to money market mutual funds.*

[Q] *A mutual fund must receive the highest ranking by not less than two nationally recognized rating agencies or the fund must retain an investment advisor who is registered with the SEC (or exempt from registration), has assets under management in excess of $500 million, and has at least five years' experience investing in instruments authorized by Sections 53601 and 53635.*

[R] *A money market mutual fund must receive the highest ranking by not less than two nationally recognized statistical rating organizations or retain an investment advisor registered with the SEC or exempt from registration and who has not less than five years' experience investing in money market instruments with assets under management in excess of $500 million.*

[S] *Investments in notes, bonds, or other obligations under Section 53601(n) require that collateral be placed into the custody of a trust company or the trust department of a bank that is not affiliated with the issuer of the secured obligation, among other specific collateral requirements.*

[T] *Security types authorized under Section 53601(o) that are issued or guaranteed by an issuer identified in subdivisions (b) or (f), are not subject to the limitations placed on privately issued securities authorized in Section 53601(o)(2)(A)(B).*

[U] *A joint powers authority pool must retain an investment advisor who is registered with the SEC (or exempt from registration), has assets under management in excess of $500 million, and has at least five years' experience investing in instruments authorized by Section 53601, subdivisions (a) to (o).*

[V] *Local entities can deposit between $200 million and $10 billion into the Voluntary Investment Program Fund, upon approval by their governing bodies. Deposits in the fund will be invested in the Pooled Money Investment Account.*

[W] *Only those obligations issued or unconditionally guaranteed by the International Bank for Reconstruction and Development (IBRD), International Finance Corporation (IFC), and Inter-American Development Bank (IADB), with a maximum remaining maturity of five years or less.*

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 11D**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Craig Koehler, Director of Finance**

Subject: **Resolution No. 2024-41 - Adopting the June 30, 2024 Measure M2 Expenditure Report**

SUMMARY

The Orange County Transportation Authority requires each agency that receives Measure M2 funds to adopt an annual Expenditure Report to account for the use of Neasure M2 funds.

RECOMMENDATION

Adopt Resolution No. 2024-41, entitled "A RESOLUTION OF THE CITY COUNCIL OF LOS ALAMITOS, CALIFORNIA, CONCERNING THE MEASURE M2 EXPENDITURE REPORT FOR THE CITY OF LOS ALAMITOS FOR THE FISCAL YEAR ENDING JUNE 30, 2024."

BACKGROUND

On November 7, 2006, Orange County voters approved the renewal of the Measure M2 one-half cent sales tax for transportation improvements. This renewal plan is designated as Measure M2 and provides funding for 30 years that focuses solely on improving the regional transportation system. The measure includes taxpayer safeguards, one of which is a requirement to provide the annual expenditure report. Within six months of the close of the fiscal year, each agency must complete and submit a Measure M2 expenditure report and accompanying resolution to the City Council for adoption and approval.

DISCUSSION

The M2 Expenditure Report includes all possible funds. The line item referred to throughout this report is labeled as "Local Fair Share". Below is a summary of the fund.

Fund Balance-Schedule - 1
$837,904 as of June 30, 2024
This amount includes funds received totaling $308,014 and interest earned on unexpended receipts of $15,869.

Revenues - Schedule 2
$323,883 in Fiscal Year 2023-24
This amount includes revenues received totaling $308,014 and earned interest on receipts of $15,869.

Expenditures - Schedule 3

$63,924 in Fiscal Year 2023-24
This amount includes expenditures of $60,792 and interest on receipts in the amount of $3,132.

Local Fair Share Project List - Schedule 4
$63,924 in Fiscal Year 2023-24
This schedule reflects the amounts expended on various transportation improvement projects.

FISCAL IMPACT

Adoption and compliance as required will ensure the City will continue to receive Measure M2 allocations. Total revenues for FY2024-25 are expected to be $321,029.

Attachment:
1. Resolution 2024-41 - Measure M2 Expenditure Report (June 30, 2024)
2. Exhibit A - M2 Expenditure Report

RESOLUTION NO. 2024-41

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, CONCERNING THE MEASURE M2 EXPENDITURE REPORT FOR THE CITY OF LOS ALAMITOS FOR THE FISCAL YEAR ENDING JUNE 30, 2024

WHEREAS, local jurisdictions are required to meet eligibility requirements and submit eligibility verification packages to Orange County Transportation Authority (OCTA) in order to remain eligible to receive M2 funds; and,

WHEREAS, local jurisdictions are required to adopt an annual Expenditure Report as part of one of the eligibility requirements; and,

WHEREAS, local jurisdictions are required to account for Net Revenues, developer/traffic impact fees, and funds expended by the local jurisdiction in the Expenditure Report that satisfy the Maintenance of Effort requirements; and,

WHEREAS, the Expenditure Report shall include all Net Revenue fund balances, interest earned and expenditures identified by type and program or project; and,

WHEREAS, the Expenditure Report must be adopted and submitted to the OCTA each year within six months of the end of the local jurisdiction's fiscal year to be eligible to receive Net Revenues as part of M2.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS DOES RESOLVE AS FOLLOWS:

SECTION 1. The M2 Expenditure Report is in conformance with the template provided in the Measure M2 Eligibility Guidelines and accounts for Net Revenues, including interest earned, expenditures during the fiscal year, and balances at the end of the fiscal year.

SECTION 2. The M2 Expenditure Report is hereby adopted by the City of Los Alamitos, CA, and included as Exhibit A.

SECTION 3. The City of Los Alamitos Finance Director is hereby authorized to sign and submit the M2 Expenditure Report to OCTA for the fiscal year ending June 30, 2024.

PASSED, APPROVED, AND ADOPTED this 18th day of November, 2024.

Jordan B. Nefulda, Mayor

ATTEST:

Windmera Quintanar, MMC, City Clerk

APPROVED AS TO FORM:

Michael S. Daudt, City Attorney

STATE OF CALIFORNIA)
COUNTY OF ORANGE) ss
CITY OF LOS ALAMITOS)

I, Windmera Quintanar, MMC, City Clerk of the City of Los Alamitos, do hereby certify that the foregoing Resolution was adopted at a Regular meeting of the City Council held on the 18th day of November 2024 by the following vote to wit:

AYES:	COUNCIL MEMBERS:
NOES:	COUNCIL MEMBERS:
ABSENT:	COUNCIL MEMBERS:
ABSTAIN:	COUNCIL MEMBERS:

Windmera Quintanar, MMC, City Clerk

M2 Expenditure Report
Fiscal Year Ended June 30, 2024

I hereby certify that:

☑ All the information attached herein and included in schedules 1 through 4 is true and accurate to the best of my knowledge;

☑ The interest earned on Net Revenues allocated pursuant to the Ordinance shall be expended only for those purposes for which the Net Revenues were allocated;

☑ The City of Los Alamitos is aware of the State Controller's "Guidelines Relating to Gas Tax Expenditures for Cities and Counties", which is a guide for determining MOE Expenditures for M2 Eligibility purposes;

☑ The City's Expenditure Report is in compliance with the direction provided in the State Controller's "Guidelines Relating to Gas Tax Expenditures for Cities and Counties;" and

☑ The City of Los Alamitos has expended in this fiscal year an amount of local discretionary funds for streets and roads purposes at least equal to or exceeding the FY 2023-24 MOE benchmark dollar amount[11].

Craig A Koehler — 10/15/2024

Director of Finance (Print Name) — Date

Signature

[11] Jurisdictions are encouraged to submit MOE eligible expenditures higher than their MOE benchmark, so that should certain expenses be ruled ineligible during an MOE audit, the local jurisdiction still has sufficient MOE expenditures to demonstrate continued achievement of the MOE benchmark.

Finance Director Confirmation	19	Any California State Constitution Article XIX streets and road eligible expenditure may be "counted" in local jurisdictions' calculation of MOE if the activity is supported (funded) by a local jurisdictions' discretionary funds (e.g. general fund). The California State Controller also provides useful information on Article XIX and the Streets and Highways Code eligible expenditures in its "Guidelines Relating to Gas Tax Expenditures for Cities and Counties". I have reviewed and am aware of these guidelines and their applicability in calculating and reporting on Maintenance of Effort expenditures. Finance Director initial:

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 11E**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Ron Noda, Development Services Director**

Subject: **Resolution No. 2024-43 - Community Development Block Grant (CDBG) 2025/2026**

SUMMARY

This item recommends the City Council adopt a resolution for the Fiscal Year 2025/2026 Community Development Block Grant (CDBG) project application to Orange County.

RECOMMENDATION

Adopt Resolution No. 2024-43, entitled, “A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA APPROVING THE CITY’S PARTICIPATION IN THE FISCAL YEAR 2025/2026 COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG) PROGRAM WITH THE COUNTY OF ORANGE.”

BACKGROUND

The Orange County Housing and Community Development & Homeless Prevention department administers and disperses Federal Community Development Block Grant (CDBG) monies for smaller cities such as Los Alamitos. The Program provides federal funds to cities with populations under 50,000 for programs targeted toward community development. The funds are commonly used for neighborhoods that have a substantial number of low, very low, and extremely low-income residents and can be used for Senior or ADA (Americans with Disabilities Act) projects as well. The public was notified of a community meeting held on October 23, 2024, at the Planning Commission meeting and through an advertisement in the Event-News Enterprise on October 16, 2024.

DISCUSSION

In Orange County, CDBG funds are pursued through competitive grant applications submitted to the County. The request for approval of this year’s resolution will require a City match on the resolution of 20% to fulfill the grant application requirement for fund requests over $150,000.00. The Planning Commission recommends grinding and overlaying Reagan Street from Farquhar Avenue to Katella Avenue.

FISCAL IMPACT

Should the County approve our application and the City receive $350,000 from CDBG funding, the 20% matching funds, a minimum of $70,000, will be reflected in next year's annual Capital Improvement Plan (CIP) budget. The matching funds are anticipated to be drawn from the

City’s General Fund, which was historically drawn from the City’s General Fund. The project's total cost is unknown at this time as the assessment has not been completed, and the resulting plans and specs have not been done.

Attachment: 1. CDBG Resolution

RESOLUTION NO. 2024-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA APPROVING THE CITY'S PARTICIPATION IN THE FISCAL YEAR 2025/2026 COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG) PROGRAM WITH THE COUNTY OF ORANGE.

WHEREAS, it is the intent of the City of Los Alamitos to participate in the timely filing of an application with the County of Orange for a grant authorized under the Housing and Community Development Act of 1974; and,

WHEREAS, the Housing and Community Development Act of 1974, as amended, authorizes cities under 50,000 in population to enter into cooperation agreements with the County in which they are located for the purpose of undertaking essential community development activities.

WHEREAS, the City of Los Alamitos will be submitting an application under FY 2025-26 for PUBLIC FACILITIES & IMPROVEMENTS REQUEST FOR PROPOSAL BID NO. TBD.

WHEREAS, the City of Los Alamitos desires to accept the award of CDBG funds and authorizes the execution of the necessary agreements, contracts and amendments and other corresponding documentation to accept the CDBG funds.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, DOES RESOLVE AS FOLLOWS:

SECTION 1. The City Council of the City of Los Alamitos, California, finds that the above recitals are true and correct.

SECTION 2. The City of Los Alamitos hereby accepts the award of CDBG funds through the County's Urban Counties Program, which will be used to support the City of Los Alamitos' Public Facilities & Improvements Apartment Row Street Repair Project (Cont'd) under Bid No. TBD.

SECTION 3. The City Council does hereby approve and adopt the selection of the following project funding request and directs that an application reflecting this project, be submitted to the County of Orange:

Project	**Approximate Cost**
Street Repair: Street Repair – Reagan Street, Farquhar Avenue to Katella Avenue	Street Repair - $350,000 To include a 20% City match

SECTION 4. The City of Los Alamitos authorizes the City Manager or his/her designee to execute, for and on behalf of the City of Los Alamitos, the necessary

agreements(s) and/or any other documents or instruments required by the County and/or the United States Department of Housing and Urban Development for participation in the Urban Counties Program and/or for acceptance of the CDBG funds under Bid No. TBD.

SECTION 5. The City Clerk shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 18th day of November, 2024.

CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 11F**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Ron Noda, Development Services Director**

Subject: **Approval of Plans and Specifications to Bid for the CDBG Street Improvements on Maple Street (CIP 24/25-04)**

SUMMARY

This item recommends actions to begin facilitating the construction of the CDBG Street Improvements on Maple Street (CIP 24/25-04).

RECOMMENDATION

1. Approve the plans and specifications for the construction of the CDBG Street Improvements on Maple Street (CIP 24/25-04); and,

2. Authorize Staff to advertise and solicit bid proposals.

BACKGROUND

The Orange County Housing and Community Development & Homeless Prevention department administers and disperses Federal Community Development Block Grant (CDBG) monies for smaller cities such as Los Alamitos. The Program provides federal funds to cities with populations under 50,000 for programs targeted toward community development. The funds are commonly used for neighborhoods that have a substantial number of low, very low, and extremely low-income residents and can be used for Senior or ADA (Americans with Disabilities Act) projects as well. The Maple Street Project (CIP 24/25-04) has been recommended for approval by the Planning Commission and approved by the City Council. The project proposes to grind and overlay Maple Street from Katella Avenue to Farquhar Avenue as part of the City's ongoing pavement management program. The project will also replace damaged curb & gutter and lifted sidewalk to correct drainage. ADA curb ramps will be modified to current codes as necessary for accessibility.

DISCUSSION

The following is an approximate timeline for the completion of the CDBG Street Improvements on Maple Street - CIP 24/25-04:

- 11/18/2024 Approval of plans & specifications by the City Council
- 11/20/2024 Advertise project
- 12/11/2024 Bid opening
- 01/21/2025 Award of Contract (City Council Meeting)
- 02/24/2025 Start of construction

- 03/28/2025 End of construction

FISCAL IMPACT

Funding for this project is included in the 2024-2025 adopted budget and includes funds from CDBG and Measure M (matching 20%) as shown below:

Available funding for the projects is provided as follows:

Budget Fiscal Year	**Source**	**Amount**
2024-25	CDBG Fund	$ 350,000
2024-25	General Fund	$ 70,000
	Project Total	$ 420,000

NOTICE INVITING ELECTRONIC BIDS

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

PUBLIC NOTICE IS HEREBY GIVEN that the City of Los Alamitos as AGENCY, invites electronic bids for the above stated project and will receive such bids electronically through BidNet Direct (http://cityoflosalamitos.org/517/Bid-Opportunities). Bids will be received up to the hour of **11:00 a.m., on December 11, 2024** and will be opened virtually at that time. If you would like to attend the virtual bid opening, it will be accessible through Microsoft Teams Meeting:

Click here to join the meeting
Meeting ID: 245 144 010 04
Passcode: VhvjSc

The City of Los Alamitos proposes to grind and overlay various residential streets throughout the City as part of the City's ongoing pavement management program. The project will also replace damaged curb & gutter and lifted sidewalk to correct drainage. ADA curb ramps will be modified to current codes as necessary for accessibility. The project includes the following street:

- Maple Street from Farquhar Ave to Katella Ave

Bids must be prepared on the approved bid forms in conformance with INSTRUCTIONS TO BIDDERS and must be submitted electronically on BidNet Direct (BidNet), accessible through the Agency's webpage at http://cityoflosalamitos.org/517/Bid-Opportunities where each prospective bidder must first register as a vendor through the Agency's BidNet portal. No hard copy bid packages will be accepted.

Plans, and specifications will be available for review on BidNet. All relevant materials shall be obtained from the link above. The Agency is not responsible for and accepts no liability in the event a response is late due to any network, internet or any other technical problem or interruption. The bidder is solely responsible for the "on time" submission of their electronic bid. The Agency will only consider bids that have been transmitted successfully and have been issued an e-bid confirmation number. Bidders experiencing any technical difficulties with the bid submission process may contact BidNet at (800)835-4603.

In accordance with the provisions of California Public Contract Code § 3300, and Business and Professions Code § 7028.15(e), the Agency has determined that the contractor shall possess a valid Class A contractor's license at the time that the contract is awarded. Failure to possess the specified license shall render a bidder's bid as non-responsive and shall bar award of the contract to any bidder not possessing the specified license at the time of the award.

CONTRACTORS ARE REQUIRED BY LAW TO BE LICENSED AND REGULATED BY THE CONTRACTORS' STATE LICENSE BOARD. ANY QUESTIONS CONCERNING A CONTRACTOR MAY BE REFERRED TO THE REGISTRAR, CONTRACTORS' STATE LICENSE BOARD, P.O. BOX 2600, SACRAMENTO, CA 95826. At the time the contract is awarded, the contractor shall be properly licensed in accordance with the laws of this state. The first payment for work or material shall not be made unless and until the Registrar of Contractors verifies to the Agency that the records of the Contractors' State License Board indicate that the contractor was properly licensed at the time the contract was awarded. Any bidder or contractor not so licensed shall be subject to all legal penalties imposed by law including, but not limited to, any appropriate disciplinary

action by the Contractors' State Board. Failure of the bidder to obtain proper and adequate licensing for an award of a contract shall constitute a failure to execute the contract and shall result in the forfeiture of the security of the bidder. (Public Contract Code § 20103.5)

REGISTRATION WITH THE DEPARTMENT OF INDUSTRIAL RELATIONS. In accordance with Labor Code Sections 1725.5 and 1771.1, no contractor or subcontractor shall be qualified to bid on, be listed in a bid proposal, or engage in the performance of any contract for public work, unless currently registered with the Department of Industrial Relations.

THE BID MUST BE ACCOMPANIED BY A BID GUARANTEE IN THE AMOUNT OF 10% OF THE TOTAL BID PRIOR TO THE BID SUBMISSION DEADLINE, SUBMITTED TO THE DEVELOPMENT SERVICES DEPARTMENT, ATTN: PUBLIC WORKS DEPARTMENT SECRETARY, 3191 KATELLA AVENUE, LOS ALAMITOS, CA 90720. Sealed envelopes bearing the bid bond should be clearly marked with the project title and CIP number as shown on the cover sheet of these specifications. More specifically, pursuant to Public Contract Code §§ 20170 and 20171, all bids for the project shall be presented, under sealed cover and shall be accompanied by one of the following forms of bidder's security in the amount of ten percent (10%) of the bid: (a) cash; (b) a cashier's check made payable to the City of Los Alamitos; (c) a certified check made payable to the City of Los Alamitos; or (d) a bidder's bond executed by an admitted surety insurer made payable to the City of Los Alamitos. Such security shall be forfeited should the successful bidder to whom the contract is awarded fails to timely execute the contract and to deliver the necessary bonds and insurance certificates as specified in the contract documents.

To the extent applicable, at any time during the term of the Agreement for the proposed project, the successful bidder may, at its own expense, substitute securities equivalent to the amount withheld as retention (or the retained percentage) in accordance with Public Contract Code § 22300.

Pursuant to California Civil Code § 3247, a payment bond is required to be submitted for all projects estimated in excess of $25,000.00.

PRE-BID MEETING: A voluntary pre-bid meeting will be held at 10:00 a.m., on December 4, 2024 virtually to discuss prevailing wage and Section 3 requirements. All potential bidders are highly recommended to attend this meeting. If you would like to attend, it will be accessible through Microsoft Teams Meeting:

Click here to join the meeting
Meeting ID: 256 708 153 994
Passcode: amhFTr

SECTION 3 REQUIREMENTS: This is a HUD Section 3 construction contract. Contractors and subcontractors must address the Section 3 employment work hours benchmarks for Section 3 Workers and Targeted Section 3 Workers as established by the U.S. Department of Housing and Urban Development at 24 CFR Part 75.

PREVAILING WAGE REQUIREMENTS: This is a federally assisted construction contract. Federal labor standards provisions outlined in the HUD-4010 form, including the prevailing wage requirements of the Davis-Bacon and Related Acts (DBRA), will be enforced. The applicable Federal wage decision is the one in effect ten (10) days prior to bid opening; it is included in these specifications and is available online at https://sam.gov/content/wage-determinations. In the event of a conflict between the Federal and State wage rates, the higher of the two will prevail. The State wage rates are available online at

http://www.dir.ca.gov/DLSR/PWD/index.htm. Lower State wage rates for work classifications not specifically included in the Federal wage decision are not acceptable.

APPRENTICESHIP PROGRAM: Attention is directed to Sections 1777.5, 1777.6, and 1777.7 of the California Labor Code and Title 8 of the California Administrative Code, Section 200, et seq., to ensure compliance and complete understanding of the law regarding apprentices.
The Agency reserves the right to reject any and all bids.

Questions or Requests for Information (RFIs) or interpretations are due November 27, 2024, at 11:00 a.m., ten (10) days before the time announced for the opening of the bids and shall be submitted on the BidNet portal. If you have any questions, please contact Vandine Ouk at (562)431-3538 ext. 301 or VOuk@CityofLosAlamitos.org.

BY ORDER OF the City Council of the City of Los Alamitos, California.

INSTRUCTIONS TO BIDDERS

INSTRUCTIONS TO BIDDERS

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

B1.01 INSPECTION OF SITE OF WORK

Bidders are required to inspect the site of the work in order to satisfy themselves, by personal examination or by such other means as they may prefer, of the location of the proposed work and as to the actual conditions of and at the site of work. If, during the course of his/her examination, a bidder finds facts or conditions which appear to him/her to conflict with the letter or spirit of the contract documents, or with any other data furnished him/her, he/she may apply to the Agency in writing in accordance with **B1.04 INTERPRETATION OF CONTRACT DOCUMENTS** for additional information and explanation before submitting his/her bid.
The submission of a proposal by the bidder shall constitute the acknowledgment that, if awarded the contract, he/she has relied and is relying on his/her own examination of (a) the site of the work, (b) the access to the site, and (c) all other data, matters, and things requisite to the fulfillment of the work and on his/her own knowledge of existing services and utilities on and in the vicinity of the site of the work to be constructed under the contract, and not on any representation or warranty of the Agency. No claim for additional compensation will be allowed which is based upon a lack of knowledge of these items.

B1.02 EXAMINATION OF CONTRACT DOCUMENTS

Each bidder shall thoroughly examine and be familiar with legal and procedural documents, general conditions, specifications, drawings and addenda (if any). The submission of a proposal shall constitute an acknowledgment upon which the Agency may rely that the bidder has thoroughly examined and is familiar with the contract documents. The bidders' attention is directed to the need, if any, for special invoicing for this project. The failure or neglect of a bidder to receive or examine any of the contract documents shall in no way relieve him/her from any obligations with respect to his/her proposal or to the contract. No claim for additional compensation will be allowed which is based upon a lack of knowledge of any contract document.

B1.03 CONTRACT PERIOD/CONSTRUCTION COMPLETION DATE

Bidder's attention is called to the provisions set forth in **SECTION E, STANDARD SPECIFICATIONS**, particularly those pertaining to the contract period and liquidated damages for avoidable delays.

The Contractor shall begin work within fifteen (15) calendar days after the date of the Notice to Proceed, and shall diligently prosecute said work to completion before the expiration **20 WORKING DAYS.** The Contractor shall pay to the Agency the sum of **$500.00** per day, for each and every calendar day's delay in finishing the work in excess of the number of working days prescribed above.

B1.04 INTERPRETATION OF CONTRACT DOCUMENTS

No oral interpretations will be made to any bidder as to the meaning of the contract documents. Requests for an interpretation shall be made in writing and delivered to the Agency at least ten (10) days before the time announced for opening the proposals. Interpretations by the Agency will be in the form of addenda to the contract documents and, when issued, will be sent as promptly as is practical to all parties to whom the contract documents have been issued. Agency makes no guarantee that all bidders will receive all addenda. Copies of addenda will be made available for inspection at the office where contract documents are on file for inspection as indicated on the Invitation for Bids. All such addenda shall become part of the contract. All questions shall be addressed to Chris Kelley, City of Los Alamitos, (562) 357-5411.

B1.05 SOIL INFORMATION

Soil reports have not been prepared for this project.

B1.06 PROPOSAL

Proposals shall be made on the forms enclosed in **SECTION C** of these specifications with or without removal from the bound contract documents. All proposals shall give the prices proposed, both in words and in numbers, shall give all other information requested herein, and shall be signed by the bidder or his/her authorized representative, with his/her address. If the proposal is made by an individual, his/her name, signature and mailing address must be shown; if made by firm or partnership, the name and mailing address of the firm or partnership and the signature of at least one of the general partners must be shown; if made by a corporation, the proposal shall show the name of the state under the laws of which the corporation is chartered, the name and mailing address of the corporation, and the name and title of the person who signs on behalf of the corporation. If the proposal is made by a corporation, a certified copy of the bylaws or resolution of the board of directors of the corporation shall be furnished demonstrating the authority of the officer signing the proposal to execute contracts on behalf of the corporation.

Each proposal shall be submitted as specified in **SECTION A - NOTICE INVITING ELECTRONIC BIDS**. Bidders are warned against making erasures or alterations of any kind, and proposals which contain omissions, erasures or irregularities of any kind may be rejected. No oral, telegraphic or telephonic proposals or modifications will be considered.

In conformance with the Business and Profession Code, § 7028.15, the Contractor must state clearly his/her license number and expiration date. In addition he/she shall sign a statement that these representations were made under the penalty of perjury. This statement shall be made on the **EXPERIENCE STATEMENT** in **SECTION C**.

The contractor will be required to pay prevailing wage pursuant to California Law, including California Labor Code §§ 1770 et seq. Copies of the prevailing rate of per diem wages are on file at the offices of the Agency.

B1.07 ADDENDA

Each proposal shall include specific acknowledgment in the space provided on **SECTION C - BID PROPOSAL** of receipt of all addenda issued during the bidding period. Failure to so acknowledge may result in the proposal being rejected as not responsive.

B1.08 BID PRICES

Bid prices shall include everything necessary for the completion of construction and fulfillment of the contract including, but not limited to, furnishing all materials, equipment, tools, plant and other facilities and all management, superintendence, labor and services, except as may be provided otherwise in the contract documents. In the event of a difference between a price quoted in words and a price quoted in numbers for the same quotation, the words shall be the amount bid.

In preparing bid prices, bidder represents that he/she has carefully examined the Contract Documents and the site where the work is to be performed and that he/she has familiarized himself with all local conditions and federal, state and local laws, ordinances, rules, and regulations that may affect the performance of the work in any manner. The bidder further represents that he/she has studied all surveys and investigation reports about subsurface and physical conditions pertaining to the job site, that he/she has performed such additional surveys and investigations as he/she deems necessary to complete the work at his/her bid price, and that he/she has correlated the results of all such data with the requirements of the Contract Documents. The submittal of a bid shall be conclusive evidence that the bidder has investigated and is satisfied as to the conditions to be encountered, including locality, uncertainty of weather and all other contingencies, and as to the character, quality, quantities, and scope of the work.

The plans and specifications for the work show subsurface conditions or otherwise hidden conditions as the Design Engineer supposes or believes them to exist, but is not intended or to be inferred that the conditions as shown thereon constitute a representation that such conditions are actually existent. Except as otherwise specifically provided in the Contract Documents, the Agency, the Design Engineer and their consultants or agents shall not be liable for any loss sustained by the Contractor as a result of any variance of such conditions as shown on the plans and the actual conditions revealed during the progress of the work or otherwise.

The Contractor shall perform an independent take-off of the plans and bid accordingly. Quantities listed in the **BID SCHEDULE** in **SECTION C** are intended only as a guide for the Contractor as to the anticipated order of magnitude of work. Contractor shall be responsible for verifying all estimated quantities. Contractor will be reimbursed for the quantity of items actually installed as required by the Contract Documents and shown on the plans to neat line and grade.

The Contractor will not be reimbursed for unauthorized work performed outside of that required by the Contract Documents.

B1.09 TAXES

No mention shall be made in the proposal of sales tax, use tax, or any other tax, as all amounts bid will be deemed and held to include any such taxes which may be applicable.

B1.10 RECOGNITION OF BONDING COMPANIES

All bonding companies used by the Contractor in this contract must be recognized by the Federal Government within Circular 570. All proposals or contracts received that include bonds posted by bonding companies not recognized in Circular 570 will result in the disqualification of the bid proposal and forfeiture of the bid bond.

B1.11 QUALIFICATION OF BIDDERS

Each bidder shall be skilled and regularly engaged in the general class or type of work called for under the contract. A statement setting forth his/her experience shall be submitted by each bidder on the **EXPERIENCE STATEMENT** form provided in **SECTION C**.

Each bidder shall posses a valid Contractor's License issued by the Contractor's State License Board at the time his/her bid is submitted. The class of license shall be applicable to the work specified in the contract. Each bidder shall also have no less than five (5) years experience in the magnitude and character of the work bid.

It is the intention of the Agency to award a contract to a bidder who furnished satisfactory evidence that he/she has the requisite experience and ability, and that he/she has sufficient capital, facilities, and plant to enable him/her to prosecute the work successfully and properly, and to complete it within the time stated in the contract.

To determine the degree of responsibility to be credited to the bidder, the Agency will weigh any evidence that the bidder has performed satisfactorily other contracts of like nature, magnitude and comparable difficulty and comparable rates of progress. If in the opinion of the Agency, a bidder is determined to be insufficiently qualified, then that bidder will not be considered for award of the contract.

B1.12 DESIGNATION OF SUPPLIERS AND SUBCONTRACTORS

Each proposal shall have listed on the **DESIGNATION OF SUPPLIERS AND SUBCONTRACTORS** form provided in **SECTION C** the name and address of each subcontractor to whom the bidder proposes to sublet portions of the work in excess of one-half percent of the total amount of his/her bid. For the purpose of this paragraph, a subcontractor is defined as one who contracts with the Contractor to furnish materials and labor, or labor only for the performance of work at the site of the work or who will specially fabricate a portion of the work off the site pursuant to detailed drawings in the contract documents.

Public Contract Code § 4104 requires all bidders to list subcontractors who will perform work in excess of ½% of the total bid, or in the case of streets and highways, ½% or $10,000, whichever is greater.

Public Contract Code § 6109 prohibits a contractor from performing work with a subcontractor who is debarred pursuant to Labor Code §§ 1777.1 or 1777.7.

B1.13 PROPOSAL GUARANTEE

The proposal shall be accompanied by a proposal guarantee bond duly completed on the form provided herewith by a guarantee company authorized to carry on business in the State of California for payments to the Agency in the sum of at least 10% of the total amount of the bid proposal, or alternatively by a certified or cashier's check payable to the Agency, or cash, in the sum of at least 10% of the total amount of the bid proposal. The amount payable to the Agency under the proposal guarantee shall be forfeited to the Agency in case of failure or neglect of the bidder to furnish, execute and deliver to the Agency the required bonds, evidence of insurance and to enter into, execute and deliver to the Agency the agreement on the form provided herewith, within ten (10) days after being notified in writing by the Agency that the award has been made and the agreement is ready for execution.

B1.14 MODIFICATION OF PROPOSAL

A modification of a bid proposal already received will be considered only if the modification is received before the time announced for the opening of bids. All modifications shall be made in writing, executed and submitted in the same form and manner as the original bid proposal.

B1.15 WITHDRAWAL OF PROPOSAL

A proposal may be withdrawn by a written request signed by the bidder. Such requests must be delivered to the Agency's designated official prior to the bid opening hour stipulated in **SECTION A – NOTICE INVITING ELECTRONIC BIDS**. Proposals may not be withdrawn after that time without forfeiture of the proposal guarantee. The withdrawal of a proposal will not prejudice the right of the bidder to submit a new proposal, providing there is time to do so.

B1.16 POSTPONEMENT OF BID OPENING

The Agency reserves the right to postpone the date and time for opening of bids at any time prior to the date and time announced in **SECTION A–NOTICE INVITING ELECTRONIC BIDS**.

B1.17 DISQUALIFICATION OF BIDDERS

If there is reason to believe that collusion exists among the bidders, none of the bids of the participants in such collusion will be considered. In the event that any bidder acting as a prime Contractor has an interest in more than one proposal, all such proposals will be rejected, and the bidder will be disqualified. This restriction does not apply to subcontractors or suppliers who may submit quotations to more than one bidder, and while doing so, may also submit a formal proposal as a prime Contractor.

B1.18 REJECTION OF PROPOSALS

The Agency reserves the right to reject any and all proposals, to waive any irregularity, and to reject any proposals which are incomplete, obscure or irregular; any proposals which omit a bid on any one or more items on which bids are required; which omit unit prices if unit prices are required; in which unit prices are unbalanced in the opinion of the Agency; which are accompanied by insufficient or irregular bid security; or which are from bidders who have previously failed to perform properly or to timely complete contracts of any nature.

B1.19 AWARD OF CONTRACT

The Contract will be awarded, if at all, to the lowest responsible and responsive bidder, whose bid proposal is not rejected for cause by the Agency. However, until an award is made, the Agency reserves right will be reserved to reject any or all bids, and to waive technical errors or discrepancies, if to do so is deemed to best serve the interests of the Agency. In no event will an award be made until all necessary investigations are made as to the responsibility and qualifications of the bidder to whom it is proposed to make such an award.

Each bidder's attention is directed to the possibility that the award of the project may be delayed for various reasons. The Agency reserves the right to delay the award of the project for 45 calendar days. After 45 calendar days, the low bidder may at any time request release from its bid without penalty.

The acceptance of a proposal will be evidenced by a Notice of Award of Contract in writing, delivered by mail to the bidder whose proposal is accepted. No other act of the Agency shall constitute acceptance of a proposal. The award of contract shall obligate the bidder whose proposal is accepted to furnish a performance bond, payment bond and maintenance bond, as well as evidence of insurance and to execute the contract set forth herein.

B1.20 RETURN OF PROPOSAL GUARANTEES

Within ten (10) calendar days after the bids are opened, the Agency will release the proposal guarantees accompanying the proposals which are not to be considered in making the award. Proposal guarantees for the two lowest bidders will be held until the contract has been fully executed, after which they will be returned to the respective bidders.

B2.21 EXECUTION OF CONTRACT

The contract agreement shall be executed in duplicate by the successful bidder and returned, together with the contract bonds and evidence of insurance, within ten (10) calendar days after the notification of the contract award by the Agency in writing. In case of failure of the successful bidder to execute the contract agreement within ten (10) calendar days after such notice, or any subsequent extension approved by Agency, the Agency at its option may consider the bidder in default, in which case the bid bond or proposal guarantee accompanying the bid shall become the property of the Agency. After execution by the Agency, one original contract shall be returned to the Contractor.

B1.22 FLEXIBILITY OF BID SCHEDULE

It is the intent of the Agency to award a contract to the lowest responsible and responsive bidder and the flexibility shown in the bid schedule is necessary to ensure a project within the Agency's budget limits and constraints.

BID PROPOSAL

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

The undersigned, as bidder, declares that he/she has examined all of the contract documents and specifications contained in this project manual for the above referenced project, and that he/she will contract with the Agency on the form of contract provided herewith to do everything necessary for the fulfillment of this contract at the price, and on the terms and conditions therein contained.

The following are included and are to be considered as forming a part of this proposal: **BID PROPOSAL**, **BID SCHEDULE**, **BID BOND, NONCOLLUSION DECLARATION, BID GUARANTEE** (if submitted in lieu of Bid Bond), **BIDDER INFORMATION**, **EXPERIENCE STATEMENT**, **DESIGNATION OF SUPPLIERS & SUBCONTRACTORS**, **FEDERAL REQUIREMENTS SECTION 3 REQUIREMENTS, BIDDER'S STATEMENT REGARDING INSURANCE COVERAGE**, and **STATEMENT REGARDING CONTRACTOR'S LICENSING LAWS**.

Contractor acknowledges receipt and inclusion of addenda _____ to _____ into this bid proposal and the contract documents.

Attached is a Bid Bond duly completed by a guarantee company authorized to carry on business in the State of California in the amount of at least 10% of the total amount of this proposal, or alternatively, there is attached a certified or cashier's check payable to the Agency or evidence of a cash payment to the Agency, in the amount of at least 10% of the total amount of our proposal.

If this proposal is accepted, we agree to sign the contract form and to furnish the Performance Bond and the Payment Bond (each to be 100% of the bid amount), the Maintenance Bond (to be 50% of the bid amount), and the required evidences of insurance within ten (10) calendar days after receiving written Notice of Award of Contract.

We further agree if our proposal is accepted and a contract for the performance of the work is entered into with the Agency, to so plan the work and to prosecute it with such diligence that all of the work shall be completed within the time stipulated in **SECTION E - TIME OF COMPLETION**.

BID SCHEDULE

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

The cost of all labor, services, material, equipment and installation necessary for the completion of the work itemized under this schedule, even though not shown or specified, shall be included in the unit price for the various items shown herein. For a description of the work associated with each bid item, see **SECTION E–SPECIAL PROVISIONS**. The Agency reserves the right to increase or decrease the quantity of any item or omit items as may be necessary, and the same shall in no way affect or void the contract, except that appropriate additions or deductions from the contract total price will be made at the stipulated unit price in accordance with these Contract Documents.

The Agency reserves the right to reject any and all bids, to waive any informality in a bid, and to make awards in the interest of the Agency.

The Contractor shall perform an independent take-off of the plans and bid accordingly. Quantities listed in this Bid Schedule are intended only as a guide for the Contractor as to the anticipated order of magnitude of work. The Contractor shall be responsible for verifying all estimated quantities. The Contractor will be reimbursed for the quantity of items actually installed as required by the Contract Documents, including addenda, and shown on the plans to neat line and grade.

The Contractor will not be reimbursed for work performed for his convenience, or as required to adapt to field conditions, or for unauthorized work performed outside of that required by the Contract Documents.

The Contractor shall be responsible for calculating and providing totals for the bid schedule. The proposal schedule shall include all costs for labor, services, material, equipment, and installation associated with completing the work in place per the plans, specifications and details.

FEDERAL REQUIREMENTS

SECTION 3 REQUIREMENTS

The bidder/proposer must declare an intent to comply with Section 3 requirements, including benchmarks, in order to be a responsive bidder/proposer eligible for contract award.

The work to be performed under this Contract is subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. 1701u. The purpose of Section 3 is to ensure that employment and other economic opportunities generated by HUD assistance or HUD-assisted projects covered by Section 3, shall, to the greatest extent feasible, be directed to low- and very low-income persons, particularly persons who are recipients of HUD assistance for housing.

The bidders/proposers are required to complete and submit the Declaration of Intent to Comply with Section 3 Requirements certifying that they intend to comply with the Section 3 provisions as defined in Section 8.43 (Section 3 of the Housing and Urban Development Act of 1968, as amended). Further, bidders/proposers are required to comply with these requirements for the term of any contract awarded pursuant to this solicitation.

Prospective bidders/proposers should carefully review Section 3 requirements, including *Contract Notices and Section 3 Provisions for Housing and Community Development Assistance and Public Housing Assistance, as applicable*. Proposals that fail to comply with the requirements of Section 3 will be considered non-responsive and excluded from further consideration.

The Section 3 Clause and the Federal Labor Standards Provisions Form HUD-4010 shall be inserted in all contracts and subcontracts.

Build America, Buy America Act (BABA)

Background: The construction services performed pursuant to this contract agreement are subject to the Build America, Buy America Act (BABA) requirements under Title IX of the Infrastructure Investment and Jobs Act ("IIJA"), Pub. L. 177-58. Absent an approved waiver, all iron, steel, manufactured products, and construction materials used in this project must be produced in the United States, as further outlined by the Office of Management and Budget's Memorandum M-22-11, Initial Implementation Guidance on Application of Buy America Preference in Federal Financial Assistance Programs for Infrastructure, April 18, 2022.

The BABA requirements instituted by the Bipartisan Infrastructure Law of 2021 mandates a domestic preference that all iron and steel, manufactured products, and construction materials are produced in the United States. For the purposes of this contract agreement, the term "Construction Materials shall mean those articles, materials, or supply – other than an item of primarily iron or steel; a manufactured product; cement and cementitious materials; aggregates such as stone, sand, or gravel; or aggregate binding agents or additives – that are or consist primarily of: non-ferrous metals, plastic and polymer-based products, glass, lumber or drywall. For the purposes of this contract agreement, the term "Manufactured Product" shall mean all those items assembled out of components, or otherwise made or processed from raw materials into finished products. Manufactured products must be manufactured (assembled) in the United States, and the cost of components that were mined, produced, or manufactured in the United States must be greater than 55 percent of the total cost of all components of the project.

BABA Contract Provisions: The construction services performed pursuant to this contract agreement are subject to the Build America, Buy America Act (BABA) requirements under Title IX of the Infrastructure Investment and Jobs Act ("IIJA"), Pub. L. 177-58. Absent an approved waiver, all iron, steel, manufactured products, and construction materials used in this project must be produced in the United States, as further outlined by the Office of Management and Budget's Memorandum M-22-11, Initial Implementation Guidance on Application of Buy America Preference in Federal Financial Assistance Programs for Infrastructure, April 18, 2022.

Any request for substitute or "or equal" shall include the Manufacturer's Certification of compliance with the Build America, Buy America Act (BABA) requirements mandated by Title IX of the Infrastructure Investment and Jobs Act ("IIJA"), Pub. L. 177-58.

By submitting a bid, Contractor hereby certifies they are familiar with all laws and regulations that may affect cost, progress, and performance of the work, including BABA requirements.

General Requirements:

1. Contractor's submitted bid price shall reflect compliance with BABA requirements.
2. By submitting a bid, Contractor acknowledges and certifies intent to comply with BABA requirements in all respects.
3. If a specific manufacturer is used in the bidding, a statement that the manufacturer will comply with BABA must be included with the bid submission.
4. The Awarding Body shall review substitutes and "or equals" for conformity with contract conditions, U.S. Department of Housing and Urban Development regulations, and BABA requirements.
5. Engineer/Architect approval of shop drawings or samples shall include review of BABA documentation.
6. The Awarding Body shall cause to review and / or take action with respect to shop drawings, samples, and other required Contractor submittals, including applications for payment, to ensure compliance with BABA.
7. Installation of materials or products that are not compliant with BABA requirements shall be considered defective work. Contractor should ensure that Engineer/Architect has an approved Manufacturer's Certification or waiver prior to items being delivered to the project site.
8. For any change orders, Contractor shall provide BABA documentation for any new products or materials required by the change.
9. By submitting an application for payment, based in whole or in part on furnishing equipment or materials, Contractor certifies that such equipment and materials, to contractor's knowledge, are compliant with BABA requirements.
10. Contractor shall comply with BABA requirements, including coordination with manufacturers, distributors, and suppliers to correct deficiencies in any BABA documentation.
11. Contractor shall collect manufacturers' certifications on compliance with BABA requirements and shall submit such manufacturers' certifications to the Awarding Body with all applicable submittals.. Manufacturer's certifications shall be on the manufacturer's form and shall certify that the items provided by manufacturer meet the domestic preference requirements of BABA. The Awarding Body shall maintain copies of certifications in project files.
12. Subsequent to completion of the project and prior to release of retention funds, Contractor shall supply certifications of compliance to the best of Contractor's knowledge and belief that all iron and steel products, manufactured products, and construction materials referenced in any technical analysis/report; the plans, specifications, and bidding documents; any bid addenda; and change orders complied with all federal requirements, including BABA. The Awarding Body shall maintain copies of certifications in project files.
13. Contractor shall assist the Awarding Body / Owner, if needed, in due diligence related to any BABA waiver request.

Definitions: Terms not defined in this part shall have the same meaning as provided in 2 CFR part 200, subpart A.

Awarding Body means the entity awarding a construction contract agreement to be paid in whole or in part with federal financial assistance subject to BABA.

Build America, Buy America Act (BABA) means division G, title IX, subtitle A, part I, sections 70901 through 70927 of the Infrastructure Investment and Jobs Act (Pub. L. 117-58).

Buy America Preference means the "domestic content procurement preference" set forth in section 70914 of the Build America, Buy America Act, which requires the head of each Federal agency to ensure that none of the funds made available for a Federal award for an infrastructure project may be obligated unless all of the iron, steel, manufactured products, and construction materials used in the project are produced in the United States.

Construction materials means articles, materials, or supplies incorporated into an infrastructure project that consist of only one or more of the following materials, except as provided in paragraph (2) of this definition:

(1)

(i) Non-ferrous metals;
(ii) Plastic and polymer-based products (including polyvinylchloride, composite building materials, and polymers used in fiber optic cables);
(iii) Glass (including optic glass);
(iv) Fiber optic cable;
(v) Optical fiber;

(vi) Lumber; or

(vii) Drywall.

(2) For an item that consists only of a combination of one or more of the construction materials listed in paragraph (1) of this definition and binding agents, any binding agents shall be disregarded, and each construction material must meet the Buy America Preference standard defined in § 184.6.

Domestic content procurement preference means a requirement that no amounts made available through a program for Federal financial assistance may be obligated for a project unless—

(A) all iron and steel used in the project are produced in the United States;

(B) the manufactured products used in the project are produced in the United States; or

(C) the construction materials used in the project are produced in the United States.

Federal agency means any authority of the United States that is an ''agency'' (as defined in section 3502 of title 44, United States Code), other than an independent regulatory agency (as defined in that section).

Federal financial assistance

(A) In general. The term ''Federal financial assistance" has the meaning given the term in section 200.1 of title 2, Code of Federal Regulations (or successor regulations).

(B) Inclusion. The term ''Federal financial assistance'' includes all expenditures by a Federal agency to a non-Federal entity for an infrastructure project, except that it does not include expenditures for assistance authorized under section 402, 403, 404, 406, 408, or 502 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170a, 5170b, 5170c, 5172, 5174, or 5192) relating to a major disaster or emergency declared by the President under section 401 or 501, respectively, of such Act (42 U.S.C. 5170, 5191) or pre and post disaster or emergency response expenditures.

Financial Assistance Recipients are also known as grantees. Entities (states, counties, cities, and tribes) that receive funds through financial assistance awards under CDBG are financial assistance recipients.

Infrastructure includes, at a minimum, the structures, facilities, and equipment for, in the United States—

(A) roads, highways, and bridges;

(B) public transportation;

(C) dams, ports, harbors, and other maritime facilities;

(D) intercity passenger and freight railroads;

(E) freight and intermodal facilities;

(F) airports;

(G) water systems, including drinking water and wastewater systems;

(H) electrical transmission facilities and systems;

(I) utilities;

(J) broadband infrastructure; and

(K) buildings and real property.

Infrastructure project is any activity related to the construction, alteration, maintenance, or repair of infrastructure in the United States regardless of whether infrastructure is the primary purpose of the project.

Iron or steel products means articles, materials, or supplies incorporated into an infrastructure project that consist wholly or predominantly of iron, steel, or both.

Manufactured products means articles, materials, or supplies incorporated into an infrastructure project that:

(1) Do not consist wholly or predominantly of iron or steel or both; and

(2) Are not categorized as a construction material (as defined in this section).

Produced in the United States means the following, for:

(1) Iron and steel products. All manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States.

(2) Manufactured products.

(i) The product was manufactured in the United States; and

(ii) The cost of the components of the manufactured product that are mined, produced, or manufactured in the United States is greater than 55 percent of the total cost of all components of the manufactured product, unless another standard for determining the minimum amount of domestic content of the manufactured product has been established under applicable law or regulation. The costs of components of a manufactured product are determined according to § 184.5.

(3) Construction materials. All manufacturing processes for the construction material occurred in the United States. See § 184.6 for more information on the meaning of "all manufacturing processes" for specific construction materials.

Project means the construction, alteration, maintenance, or repair of infrastructure in the United States.

Subgrantee and Subrecipient means a non-Federal entity that expends Federal awards received from a pass-through entity to carry out a Federal program but does not include an individual that is a beneficiary of such a program. A subrecipient may also be a recipient of other Federal awards directly from a Federal awarding agency.

Subcontractor and or Vendor means a dealer, distributor, merchant, or other seller providing goods or services procured for the conduct of a Federal program. These goods or services may be procured directly by the federal government or by a financial assistance recipient expending federal dollars to execute a federal program.

DECLARATION OF INTENT TO COMPLY WITH SECTION 3 REQUIREMENTS

return this form with the bid proposal

As a minimum requirement for consideration of contract award, bidders/proposers shall declare their intent to comply with Section 3 (24 CFR 75) of the Housing and Urban Development Act of 1968, as amended. The bidder/proposer is obliged, to the greatest extent feasible, to give opportunities for training and employment to low-income and very low-income persons residing in the service area or neighborhood in which the covered Section 3 project/service is located, and/or to award subcontracts to other Section 3 business concerns that provide economic opportunities for Section 3 workers and Targeted Section 3 workers.

The undersigned bidder/proposer agrees that, as a condition of responsiveness to the solicitation and prior to recommendation for contract award, they will agree to comply with the Section 3 requirements by including the Section 3 contract language in the contract, by meeting the Section 3 benchmarks to the greatest extent feasible, and by reporting all accomplishments and providing all required documentation on a quarterly basis for the duration of the contract.

The Section 3 benchmarks apply to all Section 3 covered contracts as follows:

- Section 3 workers: 25% or more of the total number of labor hours worked by all workers employed on a Section 3 project; and
- Targeted Section 3 workers: 5% or more of the total number of labor hours worked by all workers employed on a Section 3 project (included as part of the 25% Section 3 worker benchmark above)

Failure to agree to comply with the Section 3 requirements and reporting obligations shall be grounds for determining the bidder/proposer non-responsive, and no further consideration for contract award shall be granted.

I declare under penalty of perjury under the laws of the State of California that we agree to comply with the Section 3 requirements as stated above.

☐ **Over 75 percent of the labor hours performed for the business over the prior three-month period were performed by Section 3 workers**

a. Total Number of Labor Hours for the prior three-month period _____

b. Number of Labor Hours for the prior three-month period performed by Section 3 Workers _____

c. b ÷ a = _____ %

(Attach Summary Labor Report Form for the prior three-month period)

☐ **At least 51 percent owned and controlled by current public housing residents or residents who currently live in Section 8-assisted housing**

Number of Section 3 Resident Owners _____ ÷ Number of Owners _____ = _____ %

(Attach Section 3 Worker and Targeted Section 3 Worker Certification for all Section 3 owners claimed)

2. The above-named business is **not** a Section 3 Business Concern, but commits to meeting the Section 3 goal on this project by:

☐ **Making a Written Commitment**

Our company declares its intention to incorporate Section 3 into our normal hiring practices beginning with all openings effective on or after the date of contract award, with the goal of becoming a Section 3 Business Concern; and comply with the employment and training and contracting prioritization efforts of 24 CFR 75.19. On this project, our company and its subcontractors will collectively meet the following Section 3 minimum labor hour benchmarks:

Labor Hour Standard	Ratio Formula	Minimum %
Section 3 Workers	Section 3 Workers ÷ Total Labor Hours	25%
Targeted Section 3 Workers	Targeted Section 3 Workers ÷ Total Labor Hours	5%

We have attached the Statement of Section 3 Qualifications, and Business Certifications for all subcontracts claimed; and agree to conduct and document outreach efforts to hire Section 3 Workers and Targeted Section 3

Workers and collect Section 3 Worker and Section 3 Targeted Worker Certifications, and document their labor hours as well as total labor hours throughout the duration of the project.

The undersigned declares that the above information is complete and correct.

2024 SECTION 3 WORKER CERTIFICATION

FOR

ORANGE COUNTY RESIDENTS
WORKER and TARGETED SECTION 3 WORKER

COMMUNITY DEVELOPMENT FINANCIAL ASSISTANCE

Employee Residing in Orange County

Submit with Bid if Box 1 is checked on Section 3 Business Certification or for New Hires

Employee Name _____ Date Hired (Month/Date/Year) _____

Employee Address _____

I hereby certify that I am a Section 3 Worker based on currently meeting, or meeting when hired within the past five years at least one of the following qualification(s) - check all that apply:

1. ☐ I am a low-income resident of the metropolitan area and:

For new hires:

☐ My current annual income is $88,400 or less	2024 Income Limit

For employees hired within the last five (5) years, please specify if you met the applicable income requirement for the year in which you were hired (based on previous year income): The five-year period for a worker cannot begin before November 30, 2020; therefore, Section 3 workers and Targeted Section 3 workers hired prior to November 30, 2020, may only be certified beginning November 30, 2020.

Year Hired	Applicable Income Limit	Income Standard
2023	☐ My annual income for 2022 was $75,900 or less	2022 Income Limit
2022	☐ My annual income for 2021 was $75,300 or less	2021 Income Limit
2021	☐ My annual income for 2020 was $71,750 or less	2020 Income Limit
2020	☐ My annual income for 2019 was $66,500 or less	2019 Income Limit
2019	☐ My annual income for 2018 was $61,250 or less	2018 Income Limit

2. I am a ☐ YouthBuild participant.

3. I am a ☐ Public Housing Resident.

4. I live in ☐ Section 8 Assisted Housing.

Under the provisions of Title 18, Section 1001 of the U.S. Code, it is a felony for any person to knowingly and willingly make false or fraudulent statements to any department of the United States Government. I, the undersigned, hereby certify that all statements contained herein, are true and correct to the best of my knowledge and belief. I understand the information I provide in this certification is subject to verification, and I agree to provide necessary documentation if requested.

Under penalty of perjury, I certify that the above information is true and correct.

Employee Signature _____ Date _____

EMPLOYER CERTIFICATION

Employee Name: _____

Company Name: _____

Our company: ☐ is a Section 3 Business Concern, or ☐ is not a Section 3 Business Concern

The above-named employee was hired on: _____

The above-named employee's job title is: _____

If the company is not a Section 3 Business Concern and the specified employee does not meet any of the above criteria for designation as a Section 3 Worker, please complete the following:

SECTION 3 WORKER:

☐ The worker's income from our company is below the income limit when based on a projection of the worker's wage rate annualized on a full-time basis, or

☐ The worker's income from our company exceeds the income limit when based on a projection of the worker's wage rate annualized on a full-time basis.

TARGETED SECTION 3 WORKER:

☐ The above specified employee lives within one mile of the location of the Section 3 project for which this certification is being submitted (or if fewer than 5,000 people live within one mile of the project, within a circle centered on the Section 3 project that is sufficient to encompass a population of 5,000 people according to the most recent U.S. Census.)

Under the provisions of Title 18, Section 1001 of the U.S. Code, it is a felony for any person to knowingly and willingly make false or fraudulent statements to any department of the United States Government. I, the undersigned, hereby certify that all statements contained herein, are true and correct to the best of my knowledge and belief. I understand the information I provide in this certification is subject to verification, and I agree to provide necessary documentation if requested.

Employer Certification:

FOR OFFICE USE ONLY

To be determined eligible as a Section 3 Worker, the worker must currently fit or when hired within the past five years fit at least one of the following categories, as documented:

a. The worker's income for the previous or annualized calendar year is below the income limit established by HUD.
b. The worker is employed by a Section 3 business concern.
c. The worker is a YouthBuild participant.

To be determined eligible as a Targeted Section 3 Worker, the worker must meet one the following criteria: a. Be employed by a Section 3 business concern; or

b. Currently fits or when hired fit at least one of the following categories, as documented within the past five years: (i) Living within the service area or the neighborhood of the project [within one mile of the location of the Section 3 project for which this certification is being submitted (or if fewer than 5,000 people live within one mile of the project, within a circle centered on the Section 3 project that is sufficient to encompass a population of 5,000 people according to the most recent U.S. Census.)]; or (ii) A YouthBuild participant.

Based on the information contained herein, the worker identified in this certification qualifies as:

☐ a Section 3 Worker a
☐ Targeted Section 3
☐ Worker

Does not qualify as either a Section 3 Worker or a Targeted Section 3 Worker

SECTION 3 CLAUSE

All Section 3 covered contracts shall include the following Section 3 Clause:

a. This is a Section 3 covered project. Section 3 projects means housing rehabilitation, housing construction, and other public construction projects assisted under HUD programs that provide housing and community development financial assistance when the total amount of assistance to the project exceeds a threshold of $200,000. The threshold is $100,000 where the assistance is from the Lead Hazard Control and Healthy Homes programs, as detailed in 24 CFR 75(a)(2)(i). The project is the site or sites together with any building(s) and improvements located on the site(s) that are under common ownership, management, and financing.

b. The work to be performed under this contract is subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. 1701u (Section 3). The purpose of Section 3 is to ensure that employment and other economic opportunities generated by the U.S. Department of Housing and Urban Development (HUD) assistance or HUD assisted projects covered by Section 3, shall, to the greatest extent feasible, be directed to low- and very low-income persons, particularly persons who are recipients of HUD assistance for housing.

c. The parties to this contract will comply with HUD's regulations as set forth in 24 CFR Part 75, which implement Section 3. As evidenced by their execution of this contract, the parties to this contract certify that they are under no contractual or other impediment that would prevent them from complying with the Part 75 regulations.

d. The Section 3 requirements apply to all contractors and subcontractors performing work in connection with a Section 3 covered project. Contractor means any entity entering into a contract with (a) a recipient to perform work in connection with work in connection with a Section 3 project; or (b) a subrecipient for work in connection with a Section 3 project. Subcontractor means any entity that has a contract with a Contractor to undertake a portion of the contractor's obligation to perform work in connection with a Section 3 project.

e. The contractor agrees to include this Section 3 Clause in every subcontract subject to compliance with regulations in 24 CFR Part 75, and agrees to take appropriate action, as provided in an applicable provision of the subcontract or in this Section 3 Clause, upon a finding that the subcontractor is in violation of the regulations in 24 CFR Part 75. The contractor will not subcontract with any subcontractor where the contractor has notice or knowledge that the subcontractor has been found in violation of regulations under 24 CFR Part 75.

f. The contractor will certify that any vacant employment positions, including training positions, that are filled (1) after the contractor is selected, but before the contract is executed, and (2) with persons other than those to whom the regulations of 24 CFR Part 75 require employment opportunities to be directed, where not filled to circumvent the contractor's obligations under 24 CFR Part 75.

g. Noncompliance with HUD's regulations in 24 CFR Part 75 may result in sanctions, termination of this contract for default, and debarment or suspension from future HUD assisted contracts.

h. Contracts, subcontracts, grants, or subgrants subject to Section 7(b) of the Indian Self Determination and Education Assistance Act (25 U.S.C. 5307(b)) or subject to tribal preference requirements as authorized under 101(k) of the Native American Housing Assistance and Self Determination Act (25 U.S.C. 4111(k)) must provide preferences in employment, training, and business opportunities to Indians and Indian organizations, and are therefore not subject to the Section 3 requirements of 24 CFR Part 75

Statement of Section 3 Qualifications

Contractor name and address		Project number:	Dollar amount of contract:
		Contact person and title:	
		Contact person email address:	
Phone: (include area code)	Contractor's license number and class:	Federal EIN:	Date report submitted:
Date(s) covered:		Do you currently qualify as a Section 3 Business Concern? ☐Yes ☐No	

Part I: Past Performance under Section 3 Projects

Has your firm previously performed work on Section 3 projects? ☐Yes ☐ No

If yes, please complete the attached spreadsheet detailing your Section 3 accomplishments for the last year

Part II: Efforts to Meet Section 3 Worker and Targeted Work Labor Hour Obligations

Please specify the commitments that you have made to meet your Section 3 Worker and Targeted Work Labor Hour Obligations

☐ We have a sufficient number of verifiable Section 3 Workers and Targeted Section 3 Workers currently employed, which based on the labor hour projections for this project, will meet or exceed both of the HUD Minimum Labor Hour Thresholds of 25% for Section Workers and 5% for Targeted Section 3 Workers.

☐ We have contractual commitments with Section 3 Business Concerns, which when combined with labor hour projections for our staff and those of the Section 3 Business Concerns for this project, will meet or exceed both of the HUD Minimum Labor Hour Thresholds of 25% for Section Workers and 5% for Targeted Section 3 Workers.

☐ We will engage in outreach efforts to identify and secure bids from Section 3 Business Concerns, which when combined with labor hour projections for our staff and those of the Section 3 Business Concerns for this project, will meet or exceed both of the HUD Minimum Labor Hour Thresholds of 25% for Section Workers and 5% for Targeted Section 3 Workers.

Statement of Section 3 Qualifications continued on the next page.

☐ We commit to performing the following targeted outreach activities to expand the number of Section 3 Workers and Targeted Section 3 Workers to a level which based on the labor hour projections for this project, will meet or exceed both of the HUD Minimum Labor Hour Thresholds of 25% for Section Workers and 5% for Targeted Section 3 Workers (list all outreach activities to be performed):

☐ We commit to performing the following measures designed to ensure that the labor hours performed by Section 3 Workers and Targeted Section 3 Workers for this project, will meet or exceed both of the HUD Minimum Labor Hour Thresholds of 25% for Section Workers and 5% for Targeted Section 3 Workers (provide a detailed description of the measures to be implemented):

Statement of Section 3 Qualifications continued on the next page.

Part III: Labor Utilization Projections for Section 3 Workers and Targeted Section 3 Workers

Please complete the following information for the project for which this bid proposal is being submitted:

Current Staffing	
Total Number of Personnel that will be working on this Project	
Number of currently employed Section 3 Workers that will be working on this Project	
Number of currently employed Targeted Section 3 Workers that will be working on this Project	

Projected Labor Utilization **Includes Current and New Hires, Subcontractors, and Work performed by Section 3 Business Concerns**	
a. Total Projected Labor Hours for all Project Personnel	
b. Total Projected Labor Hours for Section 3 Workers	
c. Total Projected Labor Hours for Targeted Section 3 Workers	
Projected Labor Hours by Section 3 Workers as a percentage of Total Labor Hours **(b ÷ a)**	%
Projected Labor Hours by Targeted Section 3 Workers as a percentage of Total Labor Hours **(c ÷ a)**	%

Part IV: Efforts performed to generate economic opportunities and assist in meeting Section 3 Labor Hour Requirements

Please indicate which of the following measure have been completed prior to the submission of this bid:
☐ Trained and/or Employed _____ Section 3 Workers and _____ Targeted Section 3 Workers (attach Section 3 Worker Certifications and Targeted Section 3 Worker Certifications)
☐ Awarded subcontracts to ___ Section 3 Business Concern(s). (attach Section 3 Business Concern Certifications)
☐ Attempted to recruit Section 3 Workers through: ☐ Advertising through local media, television, radio, newspaper (attach copy of advertisement) ☐ Signs prominently displayed at the project site ☐ Contacts with Community Organizations (attach correspondence) ☐ Contacted management to notify residents of job availability and posted or distributed flyers at public housing authority (Attach list)
☐ Participated in a HUD program or other program which promotes the training or employment of low income individuals (attach supporting documentation)
☐ Participated in a HUD program or other program which promotes the award of contracts to Section 3 Business Concerns
☐ Contacted agencies administering HUD Youth-Build programs. (Attach correspondence documentation)
☐ Maintained a file of eligible qualified low-income Residents and qualified Section 3 Business Concerns for future employment
☐ OTHER: (Describe and attach supporting documentation)

Sample Qualitative Outreach Efforts for Contractors Seeking to Hire Section 3 Workers and Targeted Section 3 Workers

A Section 3 responsive bidder who commits to hire Section 3 Workers and Targeted Section 3 Workers by directing employment and training opportunities toward low- and very low-income persons, particularly those who are recipients of government assistance for housing, may use any combination of outreach efforts to meet the Section 3 commitment made when a Statement of Section 3 Qualifications is submitted.

REMEMBER: All employees of a business/firm that work on a Section 3 Project count toward meeting your Section 3 goals—Section 3 New Hires do not have to be construction workers, they just have to work on the Section 3 Project.

The following represent sample measures that can be undertaken to expand your Section3 Worker and Targeted Section 3 Worker hiring;

- Engage in outreach efforts to generate job applicants who are Targeted Section 3 workers.
- Provide training or apprenticeship opportunities.
- Provide technical assistance to help Section 3 workers compete for jobs (e.g., resume assistance, coaching).
- Provide or connect Section 3 workers with assistance in seeking employment including: drafting resumes, preparing for interviews, and finding job opportunities connecting residents to job placement services.
- Hold one or more job fairs.
- Provide or refer Section 3 workers to services supporting work readiness and retention (e.g., work readiness activities, interview clothing, test fees, transportation, child care).
- Provide assistance to apply for/or attend community college, a four-year educational institution, or vocational/technical training.
- Assist Section 3 workers in obtaining financial literacy training and/or coaching.
- Engage in outreach efforts to identify and secure bids from Section 3 business concerns.
- Provide technical assistance to help Section 3 business concerns understand and bid on contracts.
- Divide contracts into smaller jobs to facilitate participation by Section 3 business concerns.
- Provide bonding assistance, guaranties, or other efforts to support viable bids from Section 3 business concerns.
- Promote the use of business registries designed to create opportunities for disadvantaged and small businesses.
- Outreach, engagement, or referrals with the state one-stop system as defined in Section 121(e)(2) of the Workforce Innovation and Opportunity Act.

Remember to document all of your efforts for retention within your project files and for submission to the local contracting agency.

Section 3 Summary Labor Report

Submit with Final Certified Payroll Report or on July 1st, whichever occurs first.

Project Name

The labor hours reported in this table must include the total number of labor hours worked with Housing and Community Development financial assistance for the above specified project, including labor hours worked by any contractors and subcontractors.

Labor hours for Section 3 Workers and Targeted Section 3 Workers that are classified as professional services are to be reported within their respective columns; however the total professional services labor hours are not to be included in the "All Workers Total Labor Hours Worked" Column.

Labor Hours Report for the Project funded with Community Development Financial Assistance			
Contractors and Subcontractors **List the names of all contractors and subcontractors performing work on the above specified project. (attach additional pages, if required)**	**All Workers Total Labor Hours Worked**	**Section 3 Workers Total Labor Hours Worked***	**Targeted Section 3 Workers Total Labor Hours Worked**
Totals			

*** Please note that the Section 3 Labor Hours Worked reflected above should also include the Total Labor Hours worked for Targeted Section 3 Workers. This also applies to the Labor Hours Calculation table below for determining compliance with HUD Benchmarks minimums.**

Section 3 Summary Labor Report continued on the next page.

Section 3 Labor Hour Calculations

Based on your entries above, please calculate the following labor hour standards for your Housing and Community Development project:

Labor Hour Calculations			
Labor Hour Standard	**Ratio Formula**	**%**	**2021 HUD Benchmark Minimums**
Section 3 Workers	Section 3 Worker's Labor Hours ÷ Total Labor Hours		25%
Targeted Section 3 Workers	Targeted Section 3 Worker's Labor Hours ÷ Total Labor Hours		5%

Prioritization of Employment and Training, and Contracting

Employment and training

☐ I certify that to the greatest extent feasible, and consistent with existing Federal, state, and local laws and regulations, that we have ensured that employment and training opportunities arising in connection with this Section 3 project are provided to Section 3 workers within the metropolitan area (or nonmetropolitan county) in which the project is located.

☐ I certify that where feasible, priority for opportunities and training described in the above paragraph were given to:

a. Section 3 workers residing within the service area or the neighborhood of the project, and

b. Participants in YouthBuild programs.

Contracting

☐ I certify that to the greatest extent feasible, and consistent with existing Federal, state, and local laws and regulations, that we have ensured that contracts for work awarded in connection with this Section 3 project were provided to business concerns that provide economic opportunities to Section 3 workers residing within the metropolitan area (or nonmetropolitan county) in which the project is located.

☐ I certify that where feasible, priority for contracting opportunities described in the above paragraph were given to:

a. Section 3 business concerns that provide economic opportunities to Section 3 workers residing within the service area or the neighborhood of the project, and

b. YouthBuild programs.

Section 3 Summary Labor Report continued on the next page.

If both of your labor hour percentage calculations for Section 3 Workers and Targeted Section 3 Workers are below the respective 2021 HUD Section 3 Benchmarks and you have met all of the prioritization of employment and training, and contracting requirements, please sign the certification below for the information entered above, and complete Section 2 of this form below.

If both of your labor calculation percentages for Section 3 Workers and Targeted Section 3 Workers meet or exceed the 2021 HUD Benchmark minimums, then please sign the certification below:

Under penalty of perjury, I certify that the above information is true and correct.

SECTION 2

Please indicate which of the following qualitative Section 3 compliance activities that you or your subcontractors have performed:

- ☐ Engaged in outreach efforts to generate job applicants who are Targeted Section 3 workers
- ☐ Provided training or apprenticeship opportunities
- ☐ Provided technical assistance to help Section 3 workers compete for jobs (e.g., resume assistance, coaching)
- ☐ Provided or connected Section 3 workers with assistance in seeking employment including: drafting resumes, preparing for interviews, and finding job opportunities connecting residents to job placement services
- ☐ Held one or more job fairs
- ☐ Provided or referred Section 3 workers to services supporting work readiness and retention (e.g., work readiness activities, interview clothing, test fees, transportation, child care)
- ☐ Provided assistance to apply for/or attend community college, a four-year educational institution, or vocational/technical training
- ☐ Assisted Section 3 workers to obtain financial literacy training and/or coaching
- ☐ Engaged in outreach efforts to identify and secure bids from Section 3 business concerns
- ☐ Provided technical assistance to help Section 3 business concerns understand and bid on contracts
- ☐ Divided contracts into smaller jobs to facilitate participation by Section 3 business concerns
- ☐ Provided bonding assistance, guaranties, or other efforts to support viable bids from Section 3 business concerns
- ☐ Promoted use of business registries designed to create opportunities for disadvantaged and small businesses
- ☐ Outreach, engagement, or referrals with the state one-stop system as defined in Section 121(e)(2) of the Workforce Innovation and Opportunity Act
- ☐ Other (please specify): _____

_____

- ☐ Other (please specify): _____

PLEASE attach documentation that supports the performance of the above specified measures by contractors and subcontractors, and sign the certification below:

Under penalty of perjury, I certify that the above information is true and correct.

Printed Name	Title
Signature	Date

A. APPLICABILITY

The Project or Program to which the construction work covered by this Contract pertains is being assisted by the United States of America, and the following Federal Labor Standards Provisions are included in this Contract pursuant to the provisions applicable to such Federal assistance.

1. Minimum wages and fringe benefits

i. All laborers and mechanics employed or working upon the site of the work (or otherwise working in construction or development of the project under a development statute), will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by regulations issued by the Secretary of Labor under the Copeland Act (29 CFR part 3)), the full amount of basic hourly wages and bona fide fringe benefits (or cash equivalents thereof) due at time of payment computed at rates not less than those contained in the wage determination of the Secretary of Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between the contractor and such laborers and mechanics. As provided in 29 CFR 5.5(d) and (e), the appropriate wage determinations are effective by operation of law even if they have not been attached to the contract. Contributions made or costs reasonably anticipated for bona fide fringe benefits under the Davis-Bacon Act (40 U.S.C. 3141(2)(B)) on behalf of laborers or mechanics are considered wages paid to such laborers or mechanics, subject to the provisions of paragraph (a)(1)(v) of these contract clauses; also, regular contributions made or costs incurred for more than a weekly period (but not less often than quarterly) under plans, funds, or programs which cover the particular weekly period, are deemed to be constructively made or incurred during such weekly period. Such laborers and mechanics must be paid the appropriate wage rate and fringe benefits on the wage determination for the classification(s) of work actually performed, without regard to skill, except as provided in 29 CFR 5.5(a)(4). Laborers or mechanics performing work in more than one classification may be compensated at the rate specified for each classification for the time actually worked therein: *Provided,* That the employer's payroll records accurately set forth the time spent in each classification in which work is performed. The wage determination (including any additional classifications and wage rates conformed under 29 CFR 5.5(a)(1)(iii)) and the Davis-Bacon poster (WH-1321) must be posted at all times by the contractor and its subcontractors at the site of the work in a prominent and accessible place where it can be easily seen by the workers.

ii. Frequently recurring classifications

A. In addition to wage and fringe benefit rates that have been determined to be prevailing under the procedures set forth in 29 CFR part 1, a wage determination may contain, pursuant to § 1.3(f), wage and fringe benefit rates for classifications of laborers and mechanics for which conformance requests are regularly submitted pursuant to 29 CFR 5.5(a)(1)(iii), provided that:

1. The work performed by the classification is not performed by a classification in the wage determination for which a prevailing wage rate has been determined;

2. The classification is used in the area by the construction industry; and

3. The wage rate for the classification bears a reasonable relationship to the prevailing wage rates contained in the wage determination.

B. The Administrator will establish wage rates for such classifications in accordance with 29 CFR 5.5(a)(1)(iii)(A)(3). Work performed in such a classification must be paid at no less than the wage and fringe benefit rate listed on the wage determination for such classification.

iii. Conformance

A. The contracting officer must require that any class of laborers or mechanics, including helpers, which is not listed in the wage determination and which is to be employed under the contract be

classified in conformance with the wage determination. Conformance of an additional classification and wage rate and fringe benefits is appropriate only when the following criteria have been met:

1. The work to be performed by the classification requested is not performed by a classification in the wage determination; and
2. The classification is used in the area by the construction industry; and
3. The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination.

B. The conformance process may not be used to split, subdivide, or otherwise avoid application of classifications listed in the wage determination.

C. If the contractor and the laborers and mechanics to be employed in the classification (if known), or their representatives, and the contracting officer agree on the classification and wage rate (including the amount designated for fringe benefits where appropriate), a report of the action taken will be sent by the contracting officer by email to DBAconformance@dol.gov. The Administrator, or an authorized representative, will approve, modify, or disapprove every additional classification action within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30–day period that additional time is necessary.

D. In the event the contractor, the laborers or mechanics to be employed in the classification or their representatives, and the contracting officer do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits, where appropriate), the contracting officer will, by email to DBAconformance@dol.gov, refer the questions, including the views of all interested parties and the recommendation of the contracting officer, to the Administrator for determination. The Administrator, or an authorized representative, will issue a determination within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30–day period that additional time is necessary.

E. The contracting officer must promptly notify the contractor of the action taken by the Wage and Hour Division under 29 CFR 5.5 (a)(1)(iii)(C) and (D). The contractor must furnish a written copy of such determination to each affected worker or it must be posted as a part of the wage determination. The wage rate (including fringe benefits where appropriate) determined pursuant to 29 CFR 5.5 (a)(1)(iii)(C) or (D) must be paid to all workers performing work in the classification under this contract from the first day on which work is performed in the classification.

iv. Fringe benefits not expressed as an hourly rate

Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly rate, the contractor may either pay the benefit as stated in the wage determination or may pay another bona fide fringe benefit or an hourly cash equivalent thereof.

v. Unfunded plans

If the contractor does not make payments to a trustee or other third person, the contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program, *Provided,* That the Secretary of Labor has found, upon the written request of the contractor, in accordance with the criteria set forth in 29 CFR 5.28, that the applicable standards of the Davis-Bacon Act have been met. The Secretary of Labor may require the contractor to set aside in a separate account assets for the meeting of obligations under the plan or program.

vi. Interest In the event of a failure to pay all or part of the wages required by the contract, the contractor will be required to pay interest on any underpayment of wages.

2. Withholding

i. Withholding requirements

The U. S. Department of Housing and Urban Development may, upon its own action, or must, upon written request of an authorized representative of the Department of Labor, withhold or cause to be withheld from the contractor so much of the accrued payments or advances as may be considered necessary to satisfy the liabilities of the prime contractor or any subcontractor for the full amount of wages and monetary relief, including interest, required by the clauses set forth in 29 CFR 5.5(a) for violations of this contract, or to satisfy any such liabilities required by any other Federal contract, or federally assisted contract subject to Davis-Bacon labor standards, that is held by the same prime contractor (as defined in 29 CFR 5.2). The necessary funds may be withheld from the contractor under this contract, any other Federal contract with the same prime contractor, or any other federally assisted contract that is subject to Davis-Bacon labor standards requirements and is held by the same prime contractor, regardless of whether the other contract was awarded or assisted by the same agency, and such funds may be used to satisfy the contractor liability for which the funds were withheld. In the event of a contractor's failure to pay any laborer or mechanic, including any apprentice or helper working on the site of the work (or otherwise working in construction or development of the project under a development statute) all or part of the wages required by the contract, or upon the contractor's failure to submit the required records as discussed in 29 CFR 5.5(a)(3)(iv), HUD may on its own initiative and after written notice to the contractor, sponsor, applicant, owner, or other entity, as the case may be, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds until such violations have ceased.

ii. Priority to withheld funds

The Department has priority to funds withheld or to be withheld in accordance with 29 CFR 5.5(a)(2)(i) or (b)(3)(i), or both, over claims to those funds by:

- **A.** A contractor's surety(ies), including without limitation performance bond sureties and payment bond sureties;
- **B.** A contracting agency for its reprocurement costs;
- **C.** A trustee(s) (either a court-appointed trustee or a U.S. trustee, or both) in bankruptcy of a contractor, or a contractor's bankruptcy estate;
- **D.** A contractor's assignee(s);
- **E.** A contractor's successor(s); or
- **F.** A claim asserted under the Prompt Payment Act, 31 U.S.C. 3901-3907.

3. Records and certified payrolls

i. Basic record requirements

- **A. Length of record retention.** All regular payrolls and other basic records must be maintained by the contractor and any subcontractor during the course of the work and preserved for all laborers and mechanics working at the site of the work (or otherwise working in construction or development of the project under a development statute) for a period of at least 3 years after all the work on the prime contract is completed.
- **B. Information required** Such records must contain the name; Social Security number; last known address, telephone number, and email address of each such worker; each worker's correct classification(s) of work actually performed; hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in 40 U.S.C. 3141(2)(B) of the Davis-Bacon Act); daily and weekly number of hours actually worked in total and on each covered contract; deductions made; and actual wages paid.
- **C. Additional records relating to fringe benefits**. Whenever the Secretary of Labor has found under 29 CFR 5.5(a)(1)(v) that the wages of any laborer or mechanic include the amount of any

costs reasonably anticipated in providing benefits under a plan or program described in 40 U.S.C. 3141(2)(B) of the Davis-Bacon Act, the contractor must maintain records which show that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and records which show the costs anticipated or the actual cost incurred in providing such benefits.

D. **Additional records relating to apprenticeship** Contractors with apprentices working under approved programs must maintain written evidence of the registration of apprenticeship programs, the registration of the apprentices, and the ratios and wage rates prescribed in the applicable programs.

ii. **Certified payroll requirements**

A. **Frequency and method of submission** The contractor or subcontractor must submit weekly, for each week in which any DBA- or Related Acts-covered work is performed, certified payrolls to HUD if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit the certified payrolls to the applicant, sponsor, owner, or other entity, as the case may be, that maintains such records, for transmission to HUD. The prime contractor is responsible for the submission of all certified payrolls by all subcontractors. A contracting agency or prime contractor may permit or require contractors to submit certified payrolls through an electronic system, as long as the electronic system requires a legally valid electronic signature; the system allows the contractor, the contracting agency, and the Department of Labor to access the certified payrolls upon request for at least 3 years after the work on the prime contract has been completed; and the contracting agency or prime contractor permits other methods of submission in situations where the contractor is unable or limited in its ability to use or access the electronic system

B. **Information required** The certified payrolls submitted must set out accurately and completely all of the information required to be maintained under 29 CFR 5.5(a)(3)(i)(B), except that full Social Security numbers and last known addresses, telephone numbers, and email addresses must not be included on weekly transmittals. Instead, the certified payrolls need only include an individually identifying number for each worker (*e.g.*, the last four digits of the worker's Social Security number). The required weekly certified payroll information may be submitted using Optional Form WH-347 or in any other format desired. Optional Form WH-347 is available for this purpose from the Wage and Hour Division Web site at *https://www.dol.gov/sites/dolgov/files/WHD/legacy/files/wh347.pdf* or its successor website. It is not a violation of this section for a prime contractor to require a subcontractor to provide full Social Security numbers and last known addresses, telephone numbers, and email addresses to the prime contractor for its own records, without weekly submission by the subcontractor to the sponsoring government agency (or the applicant, sponsor, owner, or other entity, as the case may be, that maintains such records).

C. **Statement of Compliance** Each certified payroll submitted must be accompanied by a "Statement of Compliance," signed by the contractor or subcontractor, or the contractor's or subcontractor's agent who pays or supervises the payment of the persons working on the contract, and must certify the following:

1. That the certified payroll for the payroll period contains the information required to be provided under 29 CFR 5.5(a)(3)(ii), the appropriate information and basic records are being maintained under 29 CFR 5.5 (a)(3)(i), and such information and records are correct and complete;
2. That each laborer or mechanic (including each helper and apprentice) working on the contract during the payroll period has been paid the full weekly wages earned, without rebate, either directly or indirectly, and that no deductions have been made either directly or indirectly

from the full wages earned, other than permissible deductions as set forth in 29 CFR part 3; and

3. That each laborer or mechanic has been paid not less than the applicable wage rates and fringe benefits or cash equivalents for the classification(s) of work actually performed, as specified in the applicable wage determination incorporated into the contract.

D. Use of Optional Form WH-347 The weekly submission of a properly executed certification set forth on the reverse side of Optional Form WH-347 will satisfy the requirement for submission of the "Statement of Compliance" required by 29 CFR 5.5(a)(3)(ii)(C).

E. Signature The signature by the contractor, subcontractor, or the contractor's or subcontractor's agent must be an original handwritten signature or a legally valid electronic signature.

F. Falsification The falsification of any of the above certifications may subject the contractor or subcontractor to civil or criminal prosecution under 18 U.S.C. 1001 and 31 U.S.C. 3729.

G. Length of certified payroll retention The contractor or subcontractor must preserve all certified payrolls during the course of the work and for a period of 3 years after all the work on the prime contract is completed.

iii. Contracts, subcontracts, and related documents The contractor or subcontractor must maintain this contract or subcontract and related documents including, without limitation, bids, proposals, amendments, modifications, and extensions. The contractor or subcontractor must preserve these contracts, subcontracts, and related documents during the course of the work and for a period of 3 years after all the work on the prime contract is completed.

iv Required disclosures and access

A. Required record disclosures and access to workers The contractor or subcontractor must make the records required under 29 CFR 5.5(a)(3)(i)–(iii), and any other documents that HUD or the Department of Labor deems necessary to determine compliance with the labor standards provisions of any of the applicable statutes referenced by 29 CFR 5.1, available for inspection, copying, or transcription by authorized representatives of HUD or the Department of Labor, and must permit such representatives to interview workers during working hours on the job.

B. Sanctions for non-compliance with records and worker access requirements If the contractor or subcontractor fails to submit the required records or to make them available, or refuses to permit worker interviews during working hours on the job, the Federal agency may, after written notice to the contractor, sponsor, applicant, owner, or other entity, as the case may be, that maintains such records or that employs such workers, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds. Furthermore, failure to submit the required records upon request or to make such records available, or to permit worker interviews during working hours on the job, may be grounds for debarment action pursuant to 29 CFR 5.12. In addition, any contractor or other person that fails to submit the required records or make those records available to WHD within the time WHD requests that the records be produced will be precluded from introducing as evidence in an administrative proceeding under 29 CFR part 6 any of the required records that were not provided or made available to WHD. WHD will take into consideration a reasonable request from the contractor or person for an extension of the time for submission of records. WHD will determine the reasonableness of the request and may consider, among other things, the location of the records and the volume of production.

C. Required information disclosures Contractors and subcontractors must maintain the full Social Security number and last known address, telephone number, and email address of each covered worker, and must provide them upon request to HUD if the agency is a party to

the contract, or to the Wage and Hour Division of the Department of Labor. If the Federal agency is not such a party to the contract, the contractor, subcontractor, or both, must, upon request, provide the full Social Security number and last known address, telephone number, and email address of each covered worker to the applicant, sponsor, owner, or other entity, as the case may be, that maintains such records, for transmission to HUD, the contractor, or the Wage and Hour Division of the Department of Labor for purposes of an investigation or other compliance action.

4. Apprentices and equal employment opportunity

i. Apprentices

A. Rate of pay Apprentices will be permitted to work at less than the predetermined rate for the work they perform when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Employment and Training Administration, Office of Apprenticeship (OA), or with a State Apprenticeship Agency recognized by the OA. A person who is not individually registered in the program, but who has been certified by the OA or a State Apprenticeship Agency (where appropriate) to be eligible for probationary employment as an apprentice, will be permitted to work at less than the predetermined rate for the work they perform in the first 90 days of probationary employment as an apprentice in such a program. In the event the OA or a State Apprenticeship Agency recognized by the OA withdraws approval of an apprenticeship program, the contractor will no longer be permitted to use apprentices at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

B. Fringe benefits Apprentices must be paid fringe benefits in accordance with the provisions of the apprenticeship program. If the apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for the applicable classification. If the Administrator determines that a different practice prevails for the applicable apprentice classification, fringe benefits must be paid in accordance with that determination.

C. Apprenticeship ratio The allowable ratio of apprentices to journeyworkers on the job site in any craft classification must not be greater than the ratio permitted to the contractor as to the entire work force under the registered program or the ratio applicable to the locality of the project pursuant to 29 CFR 5.5(a)(4)(i)(D). Any worker listed on a payroll at an apprentice wage rate, who is not registered or otherwise employed as stated in 29 CFR 5.5(a)(4)(i)(A), must be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any apprentice performing work on the job site in excess of the ratio permitted under this section must be paid not less than the applicable wage rate on the wage determination for the work actually performed.

D. Reciprocity of ratios and wage rates Where a contractor is performing construction on a project in a locality other than the locality in which its program is registered, the ratios and wage rates (expressed in percentages of the journeyworker's hourly rate) applicable within the locality in which the construction is being performed must be observed. If there is no applicable ratio or wage rate for the locality of the project, the ratio and wage rate specified in the contractor's registered program must be observed.

ii Equal employment opportunity The use of apprentices and journeyworkers under this part must be in conformity with the equal employment opportunity requirements of Executive Order 11246, as amended, and 29 CFR part 30.

5 Compliance with Copeland Act requirements. The contractor shall comply with the requirements of 29 CFR part 3, which are incorporated by reference in this contract.

6 Subcontracts. The contractor or subcontractor must insert in any subcontracts the clauses contained in 29 CFR 5.5(a)(1) through (11), along with the applicable wage determination(s) and such other clauses or contract modifications as the U.S. Department of Housing and
Urban Development may by appropriate instructions require, and a clause requiring the subcontractors to include these clauses and wage determination(s) in any lower tier subcontracts. The prime contractor is responsible for the compliance by any subcontractor or lower tier subcontractor with all the contract clauses in this section. In the event of any violations of these clauses, the prime contractor and any subcontractor(s) responsible will be liable for any unpaid wages and monetary relief, including interest from the date of the underpayment or loss, due to any workers of lower-tier subcontractors, and may be subject to debarment, as appropriate.

7 Contract termination: debarment. A breach of the contract clauses in 29 CFR 5.5 may be grounds for termination of the contract, and for debarment as a contractor and a subcontractor as provided in 29 CFR 5.12.

8 Compliance with Davis-Bacon and Related Act requirements. All rulings and interpretations of the Davis-Bacon and Related Acts contained in 29 CFR parts 1, 3, and 5 are herein incorporated by reference in this contract.

9 Disputes concerning labor standards. Disputes arising out of the labor standards provisions of this contract shall not be subject to the general disputes clause of this contract. Such disputes shall be resolved in accordance with the procedures of the Department of Labor set forth in 29 CFR parts 5, 6, and 7. Disputes within the meaning of this clause include disputes between the contractor (or any of its subcontractors) and the contracting agency, the U.S. Department of Labor, or the employees or their representatives.

10. Certification of eligibility.

i. By entering into this contract, the contractor certifies that neither it nor any person or firm who has an interest in the contractor's firm is a person or firm ineligible to be awarded Government contracts by virtue of 40 U.S.C. 3144(b) or 29 CFR 5.12(a).

ii. No part of this contract shall be subcontracted to any person or firm ineligible for award of a Government contract by virtue of 40 U.S.C. 3144(b) or 29 CFR 5.12(a).

iii. The penalty for making false statements is prescribed in the U.S. Code, Title 18 Crimes and Criminal Procedure, 18 U.S.C. 1001.

11 Anti-retaliation It is unlawful for any person to discharge, demote, intimidate, threaten, restrain, coerce, blacklist, harass, or in any other manner discriminate against, or to cause any person to discharge, demote, intimidate, threaten, restrain, coerce, blacklist, harass, or in any other manner discriminate against, any worker or job applicant for:

- **i.** Notifying any contractor of any conduct which the worker reasonably believes constitutes a violation of the DBA, Related Acts, or 29 CFR parts 1, 3, or 5;
- **ii.** Filing any complaint, initiating or causing to be initiated any proceeding, or otherwise asserting or seeking to assert on behalf of themselves or others any right or protection under the DBA, Related Acts, or 29 CFR parts 1, 3, or 5;
- **iii.** Cooperating in any investigation or other compliance action, or testifying in any proceeding under the DBA, Related Acts, or 29 CFR parts 1, 3, or 5; or
- **iv.** Informing any other person about their rights under the DBA, Related Acts, or 29 CFR parts 1, 3, or 5.

B. Contract Work Hours and Safety Standards Act (CWHSSA)

The Agency Head must cause or require the contracting officer to insert the following clauses set forth in 29 CFR 5.5(b)(1), (2), (3), (4), and (5) in full, or (for contracts covered by the Federal Acquisition Regulation) by reference, in any contract in an amount in excess of $100,000 and subject to the overtime provisions of the Contract Work Hours and Safety Standards Act. These clauses must

be inserted in addition to the clauses required by 29 CFR 5.5(a) or 4.6. As used in this paragraph, the terms "laborers and mechanics" include watchpersons and guards.

1. **Overtime requirements.** No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.
2. **Violation; liability for unpaid wages; liquidated damages.** In the event of any violation of the clause set forth in 29 CFR 5.5(b)(1) the contractor and any subcontractor responsible therefor shall be liable for the unpaid wages and interest from the date of the underpayment. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchpersons and guards, employed in violation of the clause set forth in 29 CFR 5.5(b)(1), in the sum of $31 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in 29 CFR 5.5(b)(1).
3. **Withholding for unpaid wages and liquidated damages**

i. **Withholding process** The U.S Department of Housing and Urban Development or the recipient of Federal assistance may, upon its own action, or must, upon written request of an authorized representative of the Department of Labor, withhold or cause to be withheld from the contractor so much of the accrued payments or advances as may be considered necessary to satisfy the liabilities of the prime contractor or any subcontractor for any unpaid wages; monetary relief, including interest; and liquidated damages required by the clauses set forth in 29 CFR 5.5(b) on this contract, any other Federal contract with the same prime contractor, or any other federally assisted contract subject to the Contract Work Hours and Safety Standards Act that is held by the same prime contractor (as defined in 29 CFR 5.2). The necessary funds may be withheld from the contractor under this contract, any other Federal contract with the same prime contractor, or any other federally assisted contract that is subject to the Contract Work Hours and Safety Standards Act and is held by the same prime contractor, regardless of whether the other contract was awarded or assisted by the same agency, and such funds may be used to satisfy the contractor liability for which the funds were withheld.

ii **Priority to withheld funds** The Department has priority to funds withheld or to be withheld in accordance with 29 CFR 5.5(a)(2)(i) or (b)(3)(i), or both, over claims to those funds by:

- **A.** A contractor's surety(ies), including without limitation performance bond sureties and payment bond sureties;
- **B.** A contracting agency for its reprocurement costs;
- **C.** A trustee(s) (either a court-appointed trustee or a U.S. trustee, or both) in bankruptcy of a contractor, or a contractor's bankruptcy estate;
- **D.** A contractor's assignee(s);
- **E.** A contractor's successor(s); or
- **F.** A claim asserted under the Prompt Payment Act, 31 U.S.C. 3901-3907.

4. ***Subcontracts***. The contractor or subcontractor must insert in any subcontracts the clauses set forth in 29 CFR 5.5(b)(1) through (5) and a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor is responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in 29 CFR 5.5(b)(1) through (5). In the event of any violations of these clauses, the prime contractor and any subcontractor(s) responsible will be liable for any unpaid wages and monetary relief, including interest from the date of the underpayment or loss,

due to any workers of lower-tier subcontractors, and associated liquidated damages and may be subject to debarment, as appropriate.

5 Anti-retaliation It is unlawful for any person to discharge, demote, intimidate, threaten, restrain, coerce, blacklist, harass, or in any other manner discriminate against, or to cause any person to discharge, demote, intimidate, threaten, restrain, coerce, blacklist, harass, or in any other manner discriminate against, any worker or job applicant for:

- **i.** Notifying any contractor of any conduct which the worker reasonably believes constitutes a violation of the Contract Work Hours and Safety Standards Act (CWHSSA) or its implementing regulations in 29 CFR part 5;
- **ii.** Filing any complaint, initiating or causing to be initiated any proceeding, or otherwise asserting or seeking to assert on behalf of themselves or others any right or protection under CWHSSA or 29 CFR part 5;
- **iii.** Cooperating in any investigation or other compliance action, or testifying in any proceeding under CWHSSA or 29 CFR part 5; or
- **iv.** Informing any other person about their rights under CWHSSA or 29 CFR part 5.

C. CWHSSA required records clause In addition to the clauses contained in 29 CFR 5.5(b), in any contract subject only to the Contract Work Hours and Safety Standards Act and not to any of the other laws referenced by 29 CFR 5.1, the Agency Head must cause or require the contracting officer to insert a clause requiring that the contractor or subcontractor must maintain regular payrolls and other basic records during the course of the work and must preserve them for a period of 3 years after all the work on the prime contract is completed for all laborers and mechanics, including guards and watchpersons, working on the contract. Such records must contain the name; last known address, telephone number, and email address; and social security number of each such worker; each worker's correct classification(s) of work actually performed; hourly rates of wages paid; daily and weekly number of hours actually worked; deductions made and actual wages paid. Further, the Agency Head must cause or require the contracting officer to insert in any such contract a clause providing that the records to be maintained under this paragraph must be made available by the contractor or subcontractor for inspection, copying, or transcription by authorized representatives of the (write the name of agency) and the Department of Labor, and the contractor or subcontractor will permit such representatives to interview workers during working hours on the job.

D. Incorporation of contract clauses and wage determinations by reference Although agencies are required to insert the contract clauses set forth in this section, along with appropriate wage determinations, in full into covered contracts, and contractors and subcontractors are required to insert them in any lower-tier subcontracts, the incorporation by reference of the required contract clauses and appropriate wage determinations will be given the same force and effect as if they were inserted in full text.

E. Incorporation by operation of law The contract clauses set forth in this section (or their equivalent under the Federal Acquisition Regulation), along with the correct wage determinations, will be considered to be a part of every prime contract required by the applicable statutes referenced by 29 CFR 5.1 to include such clauses, and will be effective by operation of law, whether or not they are included or incorporated by reference into such contract, unless the Administrator grants a variance, tolerance, or exemption from the application of this paragraph. Where the clauses and applicable wage determinations are effective by operation of law under this paragraph, the prime contractor must be compensated for any resulting increase in wages in accordance with applicable law.

F. HEALTH AND SAFETY

The provisions of this paragraph (F) are applicable where the amount of the prime contract exceeds **$100,000**.

1. No laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous to his or her health and safety, as determined under construction safety and health standards promulgated by the Secretary of Labor by regulation.
2. The contractor shall comply with all regulations issued by the Secretary of Labor pursuant to 29 CFR Part 1926 and failure to comply may result in imposition of sanctions pursuant to the Contract Work Hours and Safety Standards Act, (Public Law 91-54, 83 Stat 96), 40 U.S.C. § 3701 et seq.
3. The contractor shall include the provisions of this paragraph in every subcontract, so that such provisions will be binding on each subcontractor. The contractor shall take such action with respect to any subcontractor as the Secretary of Housing and Urban Development or the Secretary of Labor shall direct as a means of enforcing such provisions.

FEDERAL EQUAL EMPLOYMENT OPPORTUNITY/ AFFIRMATIVE ACTION REQUIREMENTS

1. EQUAL OPPORTUNITY CLAUSE. During the performance of this contract, the contractor agrees as follows:

   a. The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

   b. The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

   c. The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided, advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

   d. The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

   e. The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

   f. In the event of the contractor's noncompliance with the nondiscrimination clause of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part, and the contractor may be declared ineligible for further government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

   g. The contractor will include the provisions of Paragraph 1a through 1g in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance; provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

2. NOTICE OF REQUIREMENT FOR AFFIRMATIVE ACTION TO ENSURE EQUAL EMPLOYMENT OPPORTUNITY (Executive Order 11246).

   a. The Offeror's or Bidder's attention is called to the "Equal Opportunity Clause" and the "Standard Federal Equal Employment Specifications" set forth herein.

   b. The goals and timetables for minority and female participation, expressed in percentage terms for the contractor's aggregate work force in each trade on all construction work in the covered area,

are as follows:

Timetables

Location of Work by Standard Metropolitan Statistical Area (SMSA)	Goals for Minority Participation in Each Trade	Goals for Female Participation in Each Trade
0360 Anaheim-Santa Ana-Garden Grove, CA	11.9%	6.9%
4480 Los Angeles-Long Beach, CA	28.3%	6.9%
6000 Oxnard-Simi Valley-Ventura, CA	21.5%	6.9%
6780 Riverside-San Bernardino-Ontario, CA	19.0%	6.9%
7480 Santa Barbara-Santa Maria-Lompoc, CA	19.7%	6.9%
7320 San Diego, CA	16.9%	6.9%
6920 Sacramento, CA	16.1%	6.9%
8520 Tucson, Pima AZ	24.1%	6.9%
6200 Phoenix, Maricopa AZ	15.8%	6.9%

These goals are applicable to all the contractor's construction work (whether or not it is Federal or federally assisted) performed in the covered area. If the contractor performs construction work in a geographical area located outside of the covered area, it shall apply the goals established for such geographical area where the work is actually performed. With regard to this second area, the contractor also is subject to the goals for both its federally involved and non-federally involved construction.

The contractor's compliance with the Executive Order and the regulations in 41 CFR Part 60-4 shall be based on its implementation of the Equal Opportunity Clause, specific affirmative action obligations required by the specifications set forth in 41 CFR part 60-4.3(a), and its efforts to meet the goals. The hours of minority and female employment and training must be substantially uniform throughout the length of the contract and in each trade, and the contractor shall make a good faith effort to employ minorities and women evenly on each of its projects. The transfer of minority or female employees or trainees from contractor to contractor or from project to project for the sole purpose of meeting the contractor's goals shall be a violation of the contract, the Executive Order, and the regulations of 41 CFR 60-4. Compliance with the goals will be measured against the total work hours performed.

c. The contractor shall provide written notification to the Director of the Office of Federal Contract Compliance Programs within ten working days of award of any construction subcontract in excess of $10,000 at any tier for construction work under the contract resulting from this solicitation. The notification shall list the name, address, and telephone number of the subcontractor; employer identification number of the subcontractor; estimated dollar amount of the subcontract; estimated starting and completion dates of the subcontract; and the geographical area in which the contract is to be performed.

d. As used in this notice, and in the contract resulting from this solicitation, the "covered area" is the Standard Metropolitan Statistical Area of Santa Ana-Anaheim-Irvine, specifically the County of Orange, State of California.

3. STANDARD FEDERAL EQUAL EMPLOYMENT SPECIFICATIONS (Executive Order 11246)

a. As used in these specifications:

(1) "Covered area" means the geographical area described in the solicitation from which this contract resulted;

(2) "Director" means Director, Office of Federal Contract Compliance Programs, United States Department of Labor, or any person to whom the Director delegates authority;

(3) "Employer identification number" means the Federal Social Security Number used on the Employer's Quarterly Federal Tax Return, United States Treasury Department Form 941.

(4) "Minority" includes:

(a) Black (all persons having origins in any of the Black African racial groups not of Hispanic origin);

(b) Hispanic (all persons of Mexican, Puerto Rican, Cuban, Central or Southern American, or other Spanish culture or origin, regardless of race);

(c) Asian and Pacific Islander (all persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands); and

(d) American Indian or Alaskan Native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification).

b. Whenever the contractor or any subcontractor at any tier subcontracts a portion of the work involving any construction trade, it shall physically include in each subcontract in excess of $10,000 the provisions of these specifications and the notice which contains the applicable goals for minority and female participation and which is set forth in the solicitations from which this contract resulted.

c. If the contractor is participating (pursuant to 41 CFR Part 60-4.5) in a Hometown Plan approved by the United States Department of Labor in the covered area either individually or through an association, its affirmative action obligations on all work in the Plan area (including goals and timetables) shall be in accordance with that Plan for those trades which have unions participating in the Plan. Contractors must be able to demonstrate their participation in and compliance with the provisions of any such Hometown Plan. Each contractor or subcontractor participating in an approved Plan is individually required to comply with its obligations under the Equal Opportunity Clause, and to make a good faith effort to achieve each goal under the Plan in each trade in which it has employees. The overall good faith performance by other contractors or subcontractors toward a goal in an approved Plan does not excuse any covered contractor's or subcontractor's failure to make good faith efforts to achieve the Plan goals and timetables.

d. The contractor shall implement the specific affirmative action standards provided in Paragraphs 3g(1) through 3g(15) of these specifications. The goals set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of employment and training or minority and female utilization the contractor should reasonably be able to achieve in each construction trade in which it has employees in the covered area. Covered construction contractors performing construction work in geographical areas where they do not have a Federal or federally assisted construction contract shall apply the minority and female goals established for the geographical area where the work is being performed. Goals are published periodically in the Federal Register in notice form, and such notices may be obtained from any Office of Federal Contract Compliance Programs Office or from Federal procurement contracting officers. The contractor is expected to make substantially uniform progress in meeting its goals in each craft during the period specified.

e. Neither the provisions of any collective bargaining agreement nor the failure by a union with

whom the contractor has a collective bargaining agreement, to refer either minority or women shall excuse the contractor's obligations under these specifications, Executive Order 11246, or the regulations promulgated pursuant thereto.

f. In order for the nonworking training hours of apprentices and trainees to be counted in meeting the goals, such apprentices and trainees must be employed by the contractor during the training period, and the contractor must have made a commitment to employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportunities. Trainees must be trained pursuant to training programs approved by the United States Department of Labor.

g. The contractor shall take specific affirmative actions to ensure equal employment opportunity. The evaluation of the contractor's compliance with these specifications shall be based upon its effort to achieve maximum results from its actions. The contractor shall document these efforts fully, and shall implement affirmative action steps at least as extensive as the following:

(1) Ensure and maintain a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which the contractor's employees are assigned to work. The contractor, where possible, will assign two or more women to each construction project. The contractor shall specifically ensure that all foremen, superintendents, and other on-site supervisory personnel are aware of and carry out the contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.

(2) Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the contractor or its unions have employment opportunities available, and maintain a record of the organizations' responses.

(3) Maintain a current file of the names, addresses, and telephone numbers of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source, or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to the contractor by the union or, if referred, not employed by the contractor, this shall be documented in the file with the reason therefor, along with whatever additional actions the contractor may have taken.

(4) Provide immediate written notification to the Director when the union or unions with which the contractor has a collective bargaining agreement has not referred to the contractor a minority person or woman sent by the contractor, or when the contractor has other information that the union referral process has impeded the contractor's efforts to meet its obligations.

(5) Develop on-the-job training opportunities and/or participate in training programs for the area which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to the contractor's employment needs, especially those programs funded or approved by the Department of Labor. The contractor shall provide notice of these programs to the sources compiled under Paragraph 3g(2), above.

(6) Disseminate the contractor's equal employment opportunity (EEO) policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.

(7) Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment, layoff, termination, or other employment decisions including specific review

of these items with on-site supervisory personnel such as Superintendents, General Foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.

(8) Disseminate the contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing the contractor's EEO policy with other contractors and subcontractors with whom the contractor does or anticipates doing business.

(9) Direct its recruitment efforts, both oral and written, to minority, female, and community organizations; to schools with minority and female students; and to minority and female recruitment and training organizations serving the contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment sources, the contractor shall send written notification to organizations such as the above, describing the opening, screening procedures, and tests to be used in the selection process.

(10) Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after-school, summer, and vacation employment to minority and female youth, both on the side and in other areas of a contractor's work force.

(11) Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR Part 60-3.

(12) Conduct, at least annually, an inventory and evaluation at least of all minority and female personnel for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.

(13) Ensure that seniority practices, job classifications, work assignments, and other personnel practices do not have a discriminatory effect by continually monitoring all personnel and employment-related activities to ensure that the EEO policy and the contractor's obligations under these specifications are being carried out.

(14) Ensure that all facilities and company activities are nonsegregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

(15) Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.

(16) Conduct a review, at least annually, of all supervisors' adherence to and performance under the contractor's EEO policies and affirmative action obligations.

h. Contractors are encouraged to participate in voluntary associations that assist in fulfilling one or more of their affirmative action obligations described in Paragraphs 3g(1) through (16), above. The efforts of a contractor association, joint contractor-union, contractor-community, or other similar group of which the contractor is a member and participant, may be asserted as fulfilling any one or more of its obligations under Paragraphs 3g(1) through (16) of these specifications; provided that the contractor actively participates in the group, makes every effort to ensure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in the contractor's minority and female work force participation, makes a good faith effort to meet its individual goals and timetables, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of the contractor. The obligation to comply, however, is the contractor's, and failure of such a group to fulfill an obligation shall not be a defense for the contractor's noncompliance.

i. A single goal for minorities and a separate single goal for women have been established. The

contractor, however, is required to provide equal employment opportunity and to take affirmative action for all minority groups, both male and female, and all women, both minority and non-minority. Consequently, the contractor may be in violation of the Executive Order if a particular group is employed in a substantially disparate manner (for example, even though the contractor has achieved its goals for women generally, the contractor may be in violation of the Executive Order if a specific minority group of minority women is underutilized).

j. The contractor shall not use the goals and timetables or affirmative action standards to discriminate against any person because of race, color, religion, sex, or national origin.

k. The contractor shall not enter into any subcontract with any person or firm debarred from Government contracts pursuant to Executive Order 11246.

l. The contractor shall carry out such sanctions and penalties for violation of these specifications and of the Equal Opportunity Clause, including suspension, termination, and cancellation of existing subcontracts as may be imposed or ordered pursuant to Executive Order 11246, as amended, and its implementing regulations, by the Office of Federal Contract Compliance Programs. Any contractor who fails to carry out such sanctions and penalties shall be in violation of these specifications and Executive Order 11246, as amended.

m. The contractor, in fulfilling its obligations under these specifications, shall implement specific affirmative action steps, at least as extensive as those standards prescribed in Paragraph 3g of these specifications, so as to achieve maximum results from its efforts to ensure equal employment opportunity. If the contractor fails to comply with the requirements of the Executive Order, the implementing regulations, or these specifications, the Director shall proceed in accordance with 41 CFR Part 60-4.8.

n. The contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports relating to the provisions thereof as may be required by the Government and to keep records. Records shall at least include for each employee the name, address, telephone number, construction trade, union affiliation, if any, employee identification number, and assigned social security number, race, sex, status (*e.g.*, mechanic, apprentice trainee, helper, or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay, and locations at which the work was performed. Records shall be maintained in an easily understandable and retrievable form; however, to the degree that existing records satisfy this requirement, contractors shall not be required to maintain separate records.

o. Nothing herein provided shall be construed as a limitation upon the application of other laws which establish different standards of compliance or upon the application of requirements for the hiring of local or other area residents (*e.g.*, those under the Public Works Employment Act of 1977 and the Community Development Block Grant Program).

p. The Director, from time to time, shall issue goals and timetables for minority and female utilization which shall be based on appropriate work force, demographic or other relevant data and which shall cover construction projects or construction contracts performed in specific geographic areas. The goals, which shall be applicable to each construction trade, shall be published as notices in the Federal Register, and shall be inserted by the contracting officers and applicants, as applicable, in the Notice required by 41 CFR 60-4.2. Covered construction contractors performing construction work in geographical areas where they do not have a Federal or federally assisted construction contract shall apply the minority and female goals established for the geographical area where the work is being performed.

4. SPECIFIC EEO REQUIREMENTS. For a federally assisted construction contract in excess of $10,000, the contractor/subcontractor shall:

a. Forward the following EEO certification forms to the contract awarding authority prior to contract award: Certification of Nonsegregated Facilities and Certification with Regard to the Performance of Previous Contracts or Subcontracts Subject to the Equal Opportunity Clause and the Filing of Required Reports.

b. Submit a notification of subcontracts awarded to the Director, Office of Federal Contract

Compliance Programs, United States Department of Labor – ESA, 200 Constitution Avenue, NW, Room C3325, Washington, DC 20210, within ten working days of award of any subcontract in excess of $10,000, listing the name, address, and telephone number of the subcontractor; employer identification number; estimated dollar amount of the subcontract; estimated starting and completion dates of the subcontract; and the geographical area in which the contract is to be performed.

c. Send a notice of the contractor's commitment to equal employment opportunity to labor unions or representatives of workers prior to commencement of construction work.

d. Display an equal employment opportunity poster in a conspicuous place available to employees and applicants for employment.

e. For contracts in excess of $10,000, bind subcontractors to the Federal equal employment opportunity requirements by including the provisions of Paragraphs 1 through 3, above, in the subcontract.

5. CIVIL RIGHTS ACT OF 1964. Under Title VI of the Civil Rights Act of 1964, no person shall, on the grounds of race, color, national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

6. SECTION 109 OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974. No person in the United States shall on the grounds of race, color, national origin, or sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in part with funds made available under this title.

7. THE AGE DISCRIMINATION ACT OF 1975. No person in the United States shall, on the basis of age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity receiving Federal financial assistance.

8. REHABILITATION ACT OF 1973. No otherwise qualified individual with handicaps in the United States shall, solely by reason of his or her handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

CONTRACTING WITH SMALL AND MINORITY FIRMS, WOMEN'S BUSINESS ENTERPRISE, AND LABOR SURPLUS AREA FIRMS

1. It is national policy to award a fair share of contracts to small and minority business firms. Accordingly, affirmative steps must be taken to assure that small and minority businesses are utilized when possible as sources of supplies, equipment, construction, and services. Affirmative steps shall include the following:

    a. Including qualified small and minority businesses on solicitation lists.

    b. Assuring that small and minority businesses are solicited whenever they are potential sources.

    c. When economically feasible, dividing total requirements into smaller tasks or quantities so as to permit maximum small and minority business participation.

    d. Where the requirement permits, establishing delivery schedules which will encourage participation by small and minority businesses.

    e. Using the services and assistance of the Small Business Administration and the Minority Business Development Agency of the Department of Commerce as required.

    f. If any subcontracts are to be let, requiring the prime contractor to take the affirmative steps in 1a through 1e above.

2. Grantees shall take similar appropriate affirmative action in support of women's business enterprise.

3. Grantees are encouraged to procure goods and services from labor surplus areas.

COMPLIANCE WITH CLEAN AIR AND WATER ACTS

(Applicable to federally assisted construction contracts and related subcontracts exceeding $100,000)

During the performance of this contract, the contractor and all subcontractors shall comply with the requirements of the Clean Air Act, as amended, 42 USC 1857, *et seq.*, the Federal Water Pollution Control Act, as amended, 33 USC 1251, *et seq.*, and the regulations of the Environmental Protection Agency with respect thereto, at 40 CFR Part 15, as amended.

In addition to the foregoing requirements, all nonexempt contractors and subcontractors shall furnish to the owner the following:

1. A stipulation by the contractor or subcontractors that any facility to be utilized in the performance of any nonexempt contract or subcontract is not listed on the List of Violating Facilities issued by the Environmental Protection Agency (EPA) pursuant to 40 CFR 15.20.

2. Agreement by the contractor to comply with all the requirements of Section 114 of the Clean Air Act, as amended (42 USC 1857c-8) and Section 308 of the Federal Water Pollution Control Act, as amended (33 USC 1318) relating to inspection, monitoring, entry, reports, and information, as well as all other requirements specified in said Section 114 and Section 308, and all regulations and guidelines issued thereunder.

3. A stipulation that as a condition for the award of the contract, prompt notice will be given of any notification received from the Director, Office of Federal Activities, EPA, indicating that a facility utilized or to be utilized for the contract is under consideration to be listed on the EPA List of Violating Facilities.

4. Agreement by the contractor that he will include, or cause to be included, the criteria and requirements in paragraph (1) through (4) of this section in every nonexempt subcontract and requiring that the contractor will take such action as the Government may direct as a means of enforcing such provisions.

CERTIFICATION OF NON-SEGREGATED FACILITIES
Federally Assisted Projects

The Federally assisted construction contractor certifies that he does not maintain or provide for his employees any segregated facilities at any of his establishments, and that he does not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. The Federally assisted construction contractor certifies further that he will not maintain or provide for his employees any segregated facilities at any of his establishments, and that he will not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. The Federally assisted construction contractor agrees that a breach of this certification is a violation of the Equal Opportunity clause in this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, creed, color, or national origin, because of habit, local custom, or otherwise. The Federally assisted construction contractor agrees that (except where he has obtained identical certifications from proposed subcontractors for specific time periods) he will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity clause, and that he will retain such certifications in his files.

NOTE: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.

NOTE: The above certification is required by the Equal Employment Opportunity Regulations of the Secretary of Labor (41 CFR 60-1.7(b) (1)), and must be submitted by bidders and proposed subcontractors only in connection with contracts and subcontracts that are subject to the equal opportunity clause. Contracts and subcontracts which are exempt from the equal opportunity clause are set forth in 41 CFR 60-1.5. (Generally, only contracts or subcontracts of $10,000 or under are exempt.)

Proposed prime contractors and subcontractors who have participated in a previous contract or subcontract subject to the Executive Orders and have not filed the required reports should note that 41 CFR 60-1.7(b) (1) prevents the award of contracts and subcontracts unless such contractor submits a report covering the delinquent period or such other period specified by the U.S. Department of the Interior or by the Director, Office of Federal Contract Compliance, U.S. Department of Labor.

FEDERAL LOBBYIST REQUIREMENTS CERTIFICATION

Name of Firm: _____ Date: _____

Address: _____

State: _____ Zip Code: _____ Telephone: _____

Acting on behalf of the above-named firm as its Authorized Official, I make the following Certification to the Department of Housing and Urban Development (HUD):

1) No Federal appropriated funds have been paid, by or on behalf of the above-named firm to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, loan, or cooperative agreement, and any extension, continuation, renewal, amendment, or modification thereof; and

2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee or any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the above-named firm shall complete and submit Standard Form–LLL, "Disclosure Form to Report Lobbying" in accordance with its instructions; and

3) The above-named firm shall require that the language of this certification be included in the award documents for all sub-awards at all tiers (including subcontracts, sub-grants, and contracts under grants, loans, and cooperative agreements) and that all sub-recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into the transaction imposed by Section 1352 Title 31 U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

California Public Contract Code requires every bid on every public works contract of a public entity shall include a declaration under penalty of perjury under the laws of the State of California, in the following form

NONCOLLUSION DECLARATION

TO BE EXECUTED BY BIDDER AND SUBMITTED WITH BID

The undersigned declares:

I am the _____ of _____, the party making the foregoing bid.

The bid is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation. The bid is genuine and not collusive or sham. The bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham bid. The bidder has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham bid, or to refrain from bidding. The bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the bid price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the bid price, or of that of any other bidder. All statements contained in the bid are true. The bidder has not, directly or indirectly, submitted his or her bid price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, to any corporation, partnership, company, association, organization, bid depository, or to any member or agent thereof, to effectuate a collusive or sham bid, and has not paid, and will not pay, any person or entity for such purpose.

Any person executing this declaration on behalf of a bidder that is a corporation, partnership, joint venture, limited liability company, limited liability partnership, or any other entity, hereby represents that he or she has full power to execute, and does execute, this declaration on behalf of the bidder.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on _____[date], at _____[city], _____[state]."

STATEMENT OF COMPLIANCE

CONTRACTOR/SUBCONTRACTOR	CONTRACT NUMBER
FIRST DAY AND DATE OF PAY PERIOD	LAST DAY AND DATE OF PAY PERIOD

I do hereby certify under penalty of perjury:

(1) That I pay or supervise payment to employees of the above-referenced contractor on the above-referenced contract; that all persons employed on said project for the above-referenced time period have been paid their full weekly wages earned; that no rebates have been or will be made either directly or indirectly to or on behalf of said contractor from the full weekly wages earned by any person; and that no deductions have been made either directly or indirectly from the full weekly wages earned by any person other than permissible deductions.

(2) That any payrolls otherwise under this contract required to be submitted for the above period are correct and complete; and that the wage rates for laborers or mechanics contained therein are not less than the applicable wage rates:
   (a) ☐ Specified in the applicable wage determination incorporated into the contract.
   (b) ☐ Determined by the Director of Industrial Relations for the county or counties in which the work is performed.

(3) That any apprentices employed in the above period are duly registered in a bona fide apprenticeship program registered with a State apprenticeship agency.

(4) That fringe benefits as listed in the contract:
   (a) ☐ Have been or will be paid to the approved plan(s), fund(s), or program(s) for the benefit of listed employee(s), except as noted below.
   (b) ☐ Have been paid directly to the listed employee(s), except as noted below.
   (c) ☐ See exceptions noted below.

EXCEPTION CRAFT	EXPLANATION

REMARKS:

NAME (PLEASE PRINT)	TITLE

On federally funded projects, permissible deductions are defined in regulations, Part 3 (29 CFR Subtitle A), issued by the Secretary of Labor under the Copeland Act, as amended (48 Stat. 948, 63 Start. 108, 72 Stat. 967; 76 Stat. 357; 40 U.S.C. § 3145),

weekly wages earned by any person and that no deductions have been made either directly or indirectly from the full wages earned by any person, other than permissible deductions as defined in Regulations, Part 3 (29 C.F.R. Subtitle A), issued by the Secretary of Labor under the Copeland Act, as amended (48 Stat. 948, 63 Start. 108, 72 Stat. 967; 76 Stat. 357; 40 U.S.C. § 3145), and described below:

The willful falsification of any of the above statements may subject the contractor or subcontractor to civil or criminal prosecution (see Section 1001 of Title 18 and Section 231 of Title 31 of the United States Code).

INSTRUCTIONS FOR PREPARATION OF STATEMENT OF COMPLIANCE

This statement of compliance meets the needs of the state and federal payroll requirements to pay fringe benefits in addition to payment of minimum rates. The contractor's obligation to pay fringe benefits may be met by payment of the fringes to the various preapproved plans, funds, or programs or by making these payments to the employees as part of their weekly wage payments.

The contractor must **show on the face of his or her payroll all monies paid to the employees** whether as basic rates or as total hourly wage amounts in lieu of fringes. The contractor shall report in the statement of compliance that **he or she is paying to others** fringes required by the contract and not paid directly to the employees in lieu of fringes.

Detailed instructions follow:

Contractors required to pay Federal Wage Rates:

Such a contractor shall check paragraph 2(a) of the statement to indicate that the wage rates for laborers or mechanics contained in the payroll are not less than the applicable wage rates specified in the applicable wage determination incorporated into the contract.

Contractors required to pay the State Prevailing Wage Rates as determined by the Director of Industrial Relations:

Such a contractor shall check paragraph 2(b) of the statement to indicate that the wage rates for laborers or mechanics contained in the payroll are not less than the applicable wage rates determined by the Director of Industrial Relations for the county or counties in which the work is performed.

Contractors who pay all required fringe benefits:

A contractor who pays fringe benefits to approved plans, funds, or programs in amounts not less than were determined in the applicable wage decisions shall continue to show on the face of his or her payroll the basic hourly rate and overtime rate paid to his or her employees, just as he or she has always done. Such a contractor shall check paragraph 4(a) of the statement to indicate that he or she is also paying approved plans, funds, or programs within the time required from the receipt of those sums, not less than the amount predetermined as fringe benefits for each craft. Any exception shall be noted in Section 4(c).

Contractors who pay no fringe benefits:

A contractor who does not pay fringe benefits to an approved plan shall pay a like amount to the employee. This payment can be reported by inserting in the straight time hourly rate column of his or her payroll an amount not less than the predetermined rate for each classification plus the amount of fringe benefits determined for each classification in the applicable wage decision. Inasmuch as it is not necessary to pay time and one-half on wages paid in lieu of fringes, the overtime rate shall be not less than one and one-half the basic predetermined rate, plus the required cash in lieu of fringes at the straight-time rate. To simplify computation of overtime, it is suggested that the straight-time basic rate and payment in lieu of fringes be separately stated in the hourly rate column, thus $14.56/5.11. In addition, the contractor shall check paragraph 4(b) of the statement to indicate that he or she is paying fringe benefits directly to his or her employees. Any exceptions shall be noted in Section 4(c).

Use of Section 4(c) Exceptions

Any contractor who is making payment to approved plans, funds, or programs in amounts less than the wage determination requires is obligated to pay the deficiency directly to the employees as wages in lieu of fringes. Any exceptions to Section 4(a) or 4(b), whichever the contractor may check, shall be entered in Section 4(c). Enter in the Exception column the craft, and enter in the Explanation column the hourly amount paid the employees as wages in lieu of fringes, and the hourly amount paid to plans, funds, or programs as fringes.

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
REPORT OF ADDITIONAL CLASSIFICATION AND RATE

HUD FORM 4230A

OMB Approval Number 2501-0011
(Exp. 01/31/2010)

1. FROM (*name and address of requesting agency)*

2. PROJECT NAME AND NUMBER

3. LOCATION OF PROJECT (City, County and State)

4. BRIEF DESCRIPTION OF PROJECT

5. CHARACTER OF CONSTRUCTION

☐ **Building** ☐ **Residential**
☐ **Heavy** ☐ **Other (specify)**
☐ **Highway**

6. WAGE DECISION NO. (include modification number, if any)

☐ **COPY ATTACHED**

7. WAGE DECISION EFFECTIVE DATE

8. WORK CLASSIFICATION(S)	**HOURLY WAGE RATES**	
	BASIC WAGE	**FRINGE BENEFIT(S) (if any)**

9. PRIME CONTRACTOR (name, address)

10. SUBCONTRACTOR/EMPLOYER, IF APPLICABLE (name, address)

Check All That Apply:

☐ The work to be performed by the additional classification(s) is not performed by a classification in the applicable wage decision.

☐ The proposed classification is utilized in the area by the construction industry.

☐ The proposed wage rate(s), including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage decision.

☐ The interested parties, including the employees or their authorized representatives, agree on the classification(s) and wage rate(s).

☐ Supporting documentation attached, including applicable wage decision.

Check One:

☐ **Approved, meets all criteria. DOL confirmation requested.**

☐ **One or more classifications fail to meet all criteria as explained in agency referral. DOL decision requested.**

HUD-4230A (8-03) PREVIOUS EDITION IS OBSOLETE

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining data needed, and completing and reviewing the collection of information. The information is considered non-sensitive and does not require special protection. This information is required to obtain benefits. This agency may not collect this information, and you are not required to complete this form, unless it displays a currently valid OMB control number.

Employers engaged on HUD-assisted construction projects subject to Davis-Bacon wage requirements must pay no less than the wages determined to be prevailing by the Secretary of Labor to all laborers and mechanics engaged on the construction work. On occasion, the applicable Davis-Bacon wage decision does not contain all of the work classifications and wage rates needed to complete the construction work. This information collection facilitates the addition of needed work classifications and wage rates for the construction work involved. This form is used by HUD and local agencies administering HUD programs to report employer request(s) for additional classification and wage rates so that an appropriate wage rate can be approved by the Department of Labor for the construction work. This information collection is required by Department of Labor regulations at 29 CFR 5.5. While no assurances of confidentiality are pledged to respondents, HUD generally discloses these data only in response to a Freedom of Information request.

Instructions

General:

Contractors/Employers: Do not need to complete this form. Submit a written, signed request to the responsible contracting agency naming the work classifications and the wage rates, including any fringe benefits, that are proposed.

Local Agency Staff: Complete items 2 through 10. Submit one copy of this form to the responsible HUD Labor Relations Office with a copy of the applicable Davis-Bacon wage decision and the written request form the employer naming the work classifications and wage rates that are proposed. (The employer's request must be made in writing and must be signed.)

1. For HUD or State CDBG Office use. Enter the name and address of HUD Office (or State CDBG office) submitting the report and to which the DOL reply should be sent.
2. Enter the name and number of the project or contract involved.
3. Enter the location of the project involved: city, county and state.
4. Describe the construction involved, e.g., new construction or rehabilitation, number and type of buildings, number of stories, number of units (as applicable). For example: New construction: 3 – 4-story buildings; 120 units.
5. Enter the character of construction as defined by DOL for Davis-Bacon prevailing wage rate purposes.
6. Enter the number of the Davis-Bacon wage decision applicable to the construction work. Include the number of wage decision modifications (if any) applicable to the work.
7. Enter the effective date of the wage decision for the project. (See DOL regulations at 20 CFR 1.6.)
8. Enter the work classifications and corresponding hourly basic wage rates and fringe benefit rates (if any) requested.
9. Self-explanatory.
10. If the requesting employer is not the prime contractor, enter the name and address of the subcontractor/employer making the request.

Remainder of Form: HUD Labor Relations/State CDBG use.

HUD Labor Relations/State CDBG Staff: Evaluate the employer's request against the criteria for approval (see DOL Regulations, 29 CFR Part 5, and related contract labor standards provisions). The criteria are reflected in "checklist" form to ensure that each factor is considered and to ensure that supporting documentation, including a copy of the applicable wage decision, is attached. Check the box next to each criterion that is met; do not check the box next to any criterion that is not met.

If the request meets all criteria, check the appropriate box, enter the name and telephone number of the HUD/State CDBG agency representative, and sign and date the form. Submit one copy of the completed form to the DOL with a copy of the applicable Davis-Bacon wage decision and the written request from the employer involved.

If the request fails to pass all criteria, check the appropriate box, enter agency contact information, and sign and date the form. Submit one copy of the completed form to the DOL with a copy of the applicable Davis-

Bacon wage decision, the written request from the employer involved, *and* a cover letter explaining how the employer's request failed to meet one or more of the criteria.

Submission of Report

Completed forms shall be sent to: Branch of Construction Wage Determinations, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room S-3014, Washington, DC 20210.

"General Decision Number: CA20240024 10/18/2024

Superseded General Decision Number: CA20230024

State: California

Construction Types: Building, Heavy (Heavy and Dredging) and Highway

County: Orange County in California.

BUILDING CONSTRUCTION PROJECTS; DREDGING PROJECTS (does not include hopper dredge work); HEAVY CONSTRUCTION PROJECTS (does not include water well drilling); HIGHWAY CONSTRUCTION PROJECTS

Note: Contracts subject to the Davis-Bacon Act are generally required to pay at least the applicable minimum wage rate required under Executive Order 14026 or Executive Order 13658. Please note that these Executive Orders apply to covered contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but do not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(1).

If the contract is entered into on or after January 30, 2022, or the contract is renewed or extended (e.g., an option is exercised) on or after January 30, 2022:	. Executive Order 14026 generally applies to the contract. . The contractor must pay all covered workers at least $17.20 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in 2024.
If the contract was awarded on or between January 1, 2015 and January 29, 2022, and the contract is not renewed or extended on or after January 30, 2022:	. Executive Order 13658 generally applies to the contract. . The contractor must pay all covered workers at least $12.90 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on that contract in 2024.

The applicable Executive Order minimum wage rate will be adjusted annually. If this contract is covered by one of the Executive Orders and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must still submit a conformance request.

Additional information on contractor requirements and worker protections under the Executive Orders is available at http://www.dol.gov/whd/govcontracts.

Workers required to suit up and work in a hazardous material environment: $2.00 per hour additional. Combination mixer and compressor operator on gunite work shall be classified as a concrete mobile mixer operator.

SEE ZONE DEFINITIONS AFTER CLASSIFICATIONS

POWER EQUIPMENT OPERATORS CLASSIFICATIONS

GROUP 1: Bargeman; Brakeman; Compressor operator; Ditch Witch, with seat or similar type equipment; Elevator operator-inside; Engineer Oiler; Forklift operator (includes loed, lull or similar types under 5 tons; Generator operator; Generator, pump or compressor plant operator; Pump operator; Signalman; Switchman

GROUP 2: Asphalt-rubber plant operator (nurse tank operator);Coil Tubing Rig Operator, Concrete mixer operator-skip type; Conveyor operator; Fireman; Forklift operator (includes loed, lull or similar types over 5 tons; Hydrostatic pump operator; oiler crusher (asphalt or concrete plant); Petromat laydown machine; PJU side dum jack; Screening and conveyor machine operator (or similar types); Skiploader (wheel type up to 3/4 yd. without attachment); Tar pot fireman; Temporary heating plant operator; Trenching machine oiler

GROUP 3: Asphalt-rubber blend operator; Bobcat or similar type (Skid steer); Equipment greaser (rack); Ford Ferguson (with dragtype attachments); Helicopter radioman (ground); Stationary pipe wrapping and cleaning machine operator

GROUP 4: Asphalt plant fireman; Backhoe operator (mini-max or similar type); Boring machine operator; Boxman or mixerman (asphalt or concrete); Chip spreading machine operator; Concrete cleaning decontamination machine operator; Concrete Pump Operator (small portable);Direct Push Operator (Geoprobe or similar types) Drilling machine operator, small auger types (Texoma super economatic or similar types - Hughes 100 or 200 or similar types - drilling depth of 30' maximum); Equipment greaser (grease truck); Guard rail post driver operator; Highline cableway signalman; Hydra-hammer-aero stomper; Micro Tunneling (above ground tunnel); Power concrete curing machine operator; Power concrete saw operator; Power-driven jumbo form setter operator; Power sweeper operator; Rock Wheel Saw/Trencher; Roller operator (compacting); Screed operator (asphalt or concrete); Trenching machine operator (up to 6 ft.); Vacuum or much truck

GROUP 6: Articulating material hauler; Asphalt plant engineer; Batch plant operator; Bit sharpener; Concrete joint machine operator (canal and similar type); Concrete planer operator; Dandy digger; Deck engine operator; Derrickman (oilfield type); Drilling machine operator, bucket or auger types (Calweld 100 bucket or similar types - Watson 1000 auger or similar types - Texoma 330, 500 or 600 auger or similar types - drilling depth of 45' maximum); Drilling machine operator; Hydrographic seeder

machine operator (straw, pulp or seed), Jackson track maintainer, or similar type; Kalamazoo Switch tamper, or similar type; Machine tool operator; Maginnis internal full slab vibrator, Mechanical berm, curb or gutter(concrete or asphalt); Mechanical finisher operator (concrete, Clary-Johnson-Bidwell or similar); Micro tunnel system (below ground); Pavement breaker operator (truck mounted); Road oil mixing machine operator; Roller operator (asphalt or finish), rubber-tired earth moving equipment (single engine, up to and including 25 yds. struck); Self-propelled tar pipelining machine operator; Skiploader operator (crawler and wheel type, over 3/4 yd. and up to and including 1-1/2 yds.); Slip form pump operator (power driven hydraulic lifting device for concrete forms); Tractor operator-bulldozer, tamper-scraper (single engine, up to 100 h.p. flywheel and similar types, up to and including D-5 and similar types); Tugger hoist operator (1 drum); Ultra high pressure waterjet cutting tool system operator; Vacuum blasting machine operator

GROUP 8: Asphalt or concrete spreading operator (tamping or finishing); Asphalt paving machine operator (Barber Greene or similar type); Asphalt-rubber distribution operator; Backhoe operator (up to and including 3/4 yd.), small ford, Case or similar types; Cable Bundling Machine Operator (excluding handheld); Cable Trenching Machine Operator (Spider Plow or similar types) Cast-in-place pipe laying machine operator; Combination mixer and compressor operator (gunite work); Compactor operator (self-propelled); Concrete mixer operator (paving); Crushing plant operator; Drill Doctor; Drilling machine operator, Bucket or auger types (Calweld 150 bucket or similar types - Watson 1500, 2000 2500 auger or similar types - Texoma 700, 800 auger or similar types - drilling depth of 60' maximum); Elevating grader operator; Grade checker; Gradall operator; Grouting machine operator; Heavy-duty repairman; Heavy equipment robotics operator; Kalamazoo balliste regulator or similar type; Kolman belt loader and similar type; Le Tourneau blob compactor or similar type; Loader operator (Athey, Euclid, Sierra and similar types); Mobark Chipper or similar; Ozzie padder or similar types; P.C. slot saw; Pneumatic concrete placing machine operator (Hackley-Presswell or similar type); Pumpcrete gun operator; RCM Cementing Unit Operator, Rail/Switch Grinder Operator (Harsco or similar types) Rock Drill or similar types; Rotary drill operator (excluding caisson type); Rubber-tired earth-moving equipment operator (single engine, caterpillar, Euclid, Athey Wagon and similar types with any and all attachments over 25 yds. up to and including 50 cu. yds. struck); Rubber-tired earth-moving equipment operator (multiple engine up to and including 25 yds. struck); Rubber-tired scraper operator (self-loading paddle wheel type-John Deere, 1040 and similar single unit); Self- propelled curb and gutter machine operator; Shuttle buggy; Skiploader operator (crawler and wheel type over 1-1/2 yds. up to and including 6-1/2 yds.); Soil remediation plant operator; Surface heaters and planer operator; Tractor compressor drill combination operator; Tractor operator (any type larger than D-5 - 100 flywheel h.p. and over, or similar-bulldozer, tamper, scraper and push tractor single engine); Tractor operator (boom attachments), Traveling pipe wrapping, cleaning and bendng machine operator; Trenching machine operator (over 6 ft. depth capacity, manufacturer's rating); trenching Machine with Road Miner attachment (over 6 ft depth capacity): Ultra high pressure

waterjet cutting tool system mechanic; Water pull (compaction) operator

GROUP 10: Drilling machine operator, Bucket or auger types (Calweld 200 B bucket or similar types-Watson 3000 or 5000 auger or similar types-Texoma 900 auger or similar types-drilling depth of 105' maximum); Dual drum mixer, dynamic compactor LDC350 (or similar types); Monorail locomotive operator (diesel, gas or electric); Motor patrol-blade operator (single engine); Multiple engine tractor operator (Euclid and similar type-except Quad 9 cat.); Rubber-tired earth-moving equipment operator (single engine, over 50 yds. struck); Pneumatic pipe ramming tool and similar types; Prestressed wrapping machine operator; Rubber-tired earth-moving equipment operator (single engine, over 50 yds. struck); Rubber tired earth moving equipment operator (multiple engine, Euclid, caterpillar and similar over 25 yds. and up to 50 yds. struck), Tower crane repairman; Tractor loader operator (crawler and wheel type over 6-1/2 yds.); Woods mixer operator (and similar Pugmill equipment)

GROUP 12: Auto grader operator; Automatic slip form operator; Drilling machine operator, bucket or auger types (Calweld, auger 200 CA or similar types - Watson, auger 6000 or similar types - Hughes Super Duty, auger 200 or similar types - drilling depth of 175' maximum); Hoe ram or similar with compressor; Mass excavator operator less tha 750 cu. yards; Mechanical finishing machine operator; Mobile form traveler operator; Motor patrol operator (multi-engine); Pipe mobile machine operator; Rubber-tired earth- moving equipment operator (multiple engine, Euclid, Caterpillar and similar type, over 50 cu. yds. struck); Rubber-tired self- loading scraper operator (paddle-wheel-auger type self-loading - two (2) or more units)

GROUP 13: Rubber-tired earth-moving equipment operator operating equipment with push-pull system (single engine, up to and including 25 yds. struck)

GROUP 14: Canal liner operator; Canal trimmer operator; Remote- control earth-moving equipment operator (operating a second piece of equipment: $1.00 per hour additional); Wheel excavator operator (over 750 cu. yds.)

GROUP 15: Rubber-tired earth-moving equipment operator, operating equipment with push-pull system (single engine, Caterpillar, Euclid, Athey Wagon and similar types with any and all attachments over 25 yds. and up to and including 50 yds. struck); Rubber-tired earth-moving equipment operator, operating equipment with push-pull system (multiple engine-up to and including 25 yds. struck)

GROUP 16: Rubber-tired earth-moving equipment operator, operating equipment with push-pull system (single engine, over 50 yds. struck); Rubber-tired earth-moving equipment operator, operating equipment with push-pull system (multiple engine, Euclid, Caterpillar and similar, over 25 yds. and up to 50 yds. struck)

GROUP 17: Rubber-tired earth-moving equipment operator, operating equipment with push-pull system (multiple engine, Euclid, Caterpillar and similar, over 50 cu. yds. struck); Tandem tractor operator (operating crawler type tractors in tandem - Quad 9 and similar type)

GROUP 18: Rubber-tired earth-moving equipment operator, operating in tandem (scrapers, belly dumps and similar types in any combination, excluding compaction units - single engine, up to and including 25 yds. struck)

GROUP 19: Rotex concrete belt operator (or similar types); Rubber-tired earth-moving equipment operator, operating in tandem (scrapers, belly dumps and similar types in any combination, excluding compaction units - single engine, Caterpillar, Euclid, Athey Wagon and similar types with any and all attachments over 25 yds.and up to and including 50 cu. yds. struck); Rubber-tired earth-moving equipment operator, operating in tandem (scrapers, belly dumps and similar types in any combination, excluding compaction units - multiple engine, up to and including 25 yds. struck)

GROUP 20: Rubber-tired earth-moving equipment operator, operating in tandem (scrapers, belly dumps and similar types in any combination, excluding compaction units - single engine, over 50 yds. struck); Rubber-tired earth-moving equipment operator, operating in tandem (scrapers, belly dumps, and similar types in any combination, excluding compaction units - multiple engine, Euclid, Caterpillar and similar, over 25 yds. and up to 50 yds. struck)

GROUP 21: Rubber-tired earth-moving equipment operator, operating in tandem (scrapers, belly dumps and similar types in any combination, excluding compaction units - multiple engine, Euclid, Caterpillar and similar type, over 50 cu. yds. struck)

GROUP 22: Rubber-tired earth-moving equipment operator, operating equipment with the tandem push-pull system (single engine, up to and including 25 yds. struck)

GROUP 23: Rubber-tired earth-moving equipment operator, operating equipment with the tandem push-pull system (single engine, Caterpillar, Euclid, Athey Wagon and similar types with any and all attachments over 25 yds. and up to and including 50 yds. struck); Rubber-tired earth-moving equipment operator, operating with the tandem push-pull system (multiple engine, up to and including 25 yds. struck)

GROUP 24: Rubber-tired earth-moving equipment operator, operating equipment with the tandem push-pull system (single engine, over 50 yds. struck); Rubber-tired earth-moving equipment operator, operating equipment with the tandem push-pull system (multiple engine, Euclid, Caterpillar and similar, over 25 yds. and up to 50 yds. struck)

GROUP 25: Concrete pump operator-truck mounted; Rubber-tired earth-moving equipment operator, operating equipment with the tandem push-pull system (multiple engine, Euclid, Caterpillar and similar type, over 50 cu. yds. struck); Spyder Excavator Operator, with all attachments

CRANES, PILEDRIVING AND HOISTING EQUIPMENT CLASSIFICATIONS

GROUP 1: Engineer oiler; Fork lift operator (includes loed, lull or similar types)

GROUP 2: Truck crane oiler

GROUP 3: A-frame or winch truck operator; Ross carrier operator (jobsite)

GROUP 4: Bridge-type unloader and turntable operator; Helicopter hoist operator

GROUP 5: Hydraulic boom truck; Stinger crane (Austin-Western or similar type); Tugger hoist operator (1 drum)

GROUP 6: Bridge crane operator; Cretor crane operator; Hoist operator (Chicago boom and similar type); Lift mobile operator; Lift slab machine operator (Vagtborg and similar types); Material hoist and/or manlift operator; Polar gantry crane operator; Self Climbing scaffold (or similar type); Shovel, backhoe, dragline, clamshell operator (over 3/4 yd. and up to 5 cu. yds. mrc); Tugger hoist operator

GROUP 7: Pedestal crane operator; Shovel, backhoe, dragline, clamshell operator (over 5 cu. yds. mrc); Tower crane repair; Tugger hoist operator (3 drum)

GROUP 8: Crane operator (up to and including 25 ton capacity); Crawler transporter operator; Derrick barge operator (up to and including 25 ton capacity); Hoist operator, stiff legs, Guy derrick or similar type (up to and including 25 ton capacity); Shovel, backhoe, dragline, clamshell operator (over 7 cu. yds., M.R.C.)

GROUP 9: Crane operator (over 25 tons and up to and including 50 tons mrc); Derrick barge operator (over 25 tons up to and including 50 tons mrc); Highline cableway operator; Hoist operator, stiff legs, Guy derrick or similar type (over 25 tons up to and including 50 tons mrc); K-crane operator; Polar crane operator; Self erecting tower crane operator maximum lifting capacity ten tons

GROUP 10: Crane operator (over 50 tons and up to and including 100 tons mrc); Derrick barge operator (over 50 tons up to and including 100 tons mrc); Hoist operator, stiff legs, Guy derrick or similar type (over 50 tons up to and including 100 tons mrc), Mobile tower crane operator (over 50 tons, up to and including 100 tons M.R.C.);

GROUP 11: Crane operator (over 100 tons and up to and including 200 tons mrc); Derrick barge operator (over 100 tons up to and including 200 tons mrc); Hoist operator, stiff legs, Guy derrick or similar type (over 100 tons up to and including 200 tons mrc); Mobile tower crane operator (over 100 tons up to and including 200 tons mrc) ; Tower crane operator and tower gantry

GROUP 12: Crane operator (over 200 tons up to and including 300 tons mrc); Derrick barge operator (over 200 tons up to and including 300 tons mrc); Hoist operator, stiff legs, Guy derrick or similar type (over 200 tons, up to and including 300 tons mrc); Mobile tower crane operator (over 200 tons, up to and including 300 tons mrc)

GROUP 13: Crane operator (over 300 tons); Derrick barge operator (over 300 tons); Helicopter pilot; Hoist operator, stiff legs, Guy derrick or similar type (over 300 tons); Mobile tower crane operator (over 300 tons)

TUNNEL CLASSIFICATIONS

GROUP 1: Skiploader (wheel type up to 3/4 yd. without attachment)

GROUP 2: Power-driven jumbo form setter operator

GROUP 3: Dinkey locomotive or motorperson (up to and including 10 tons)

GROUP 4: Bit sharpener; Equipment greaser (grease truck); Slip form pump operator (power-driven hydraulic lifting device for concrete forms); Tugger hoist operator (1 drum); Tunnel locomotive operator (over 10 and up to and including 30 tons)

GROUP 5: Backhoe operator (up to and including 3/4 yd.); Small Ford, Case or similar; Drill doctor; Grouting machine operator; Heading shield operator; Heavy-duty repairperson; Loader operator (Athey, Euclid, Sierra and similar types); Mucking machine operator (1/4 yd., rubber-tired, rail or track type); Pneumatic concrete placing machine operator (Hackley-Presswell or similar type); Pneumatic heading shield (tunnel); Pumpcrete gun operator; Tractor compressor drill combination operator; Tugger hoist operator (2 drum); Tunnel locomotive operator (over 30 tons)

GROUP 6: Heavy Duty Repairman

GROUP 7: Tunnel mole boring machine operator

ENGINEERS ZONES

$1.00 additional per hour for all of IMPERIAL County and the portions of KERN, RIVERSIDE & SAN BERNARDINO Counties as defined below:

That area within the following Boundary: Begin in San Bernardino County, approximately 3 miles NE of the intersection of I-15 and the California State line at that point which is the NW corner of Section 1, T17N,m R14E, San Bernardino Meridian. Continue W in a straight line to that point which is the SW corner of the northwest quarter of Section 6, T27S, R42E, Mt. Diablo Meridian. Continue North to the intersection with the Inyo County Boundary at that point which is the NE corner of the western half of the northern quarter of Section 6, T25S, R42E, MDM. Continue W along the Inyo and San Bernardino County boundary until the intersection with Kern County, as that point which is the SE corner of Section 34, T24S, R40E, MDM. Continue W along the Inyo and Kern County boundary until the intersection with Tulare County, at that point which is the SW corner of the SE quarter of Section 32, T24S, R37E, MDM. Continue W along the Kern and Tulare County boundary, until that point which is the NW corner of T25S, R32E, MDM. Continue S following R32E lines to the NW corner of T31S, R32E, MDM. Continue W to the NW corner of T31S, R31E, MDM. Continue S to the SW corner of T32S, R31E, MDM. Continue W to SW corner of SE quarter of Section 34, T32S, R30E, MDM. Continue S to SW corner of T11N, R17W, SBM. Continue E along south boundary of T11N, SBM to SW corner of T11N, R7W, SBM. Continue S to SW corner of T9N, R7W, SBM. Continue E along south boundary of T9N, SBM to SW corner of T9N, R1E, SBM. Continue S along west boundary of R1E, SMB to Riverside County line at the SW corner of T1S, R1E, SBM. Continue E along south boundary of T1s, SBM (Riverside County Line) to SW corner of

T1S, R10E, SBM. Continue S along west boundary of R10E, SBM to Imperial County line at the SW corner of T8S, R10E, SBM. Continue W along Imperial and Riverside county line to NW corner of T9S, R9E, SBM. Continue S along the boundary between Imperial and San Diego Counties, along the west edge of R9E, SBM to the south boundary of Imperial County/California state line. Follow the California state line west to Arizona state line, then north to Nevada state line, then continuing NW back to start at the point which is the NW corner of Section 1, T17N, R14E, SBM

$1.00 additional per hour for portions of SAN LUIS OBISPO, KERN, SANTA BARBARA & VENTURA as defined below:

That area within the following Boundary: Begin approximately 5 miles north of the community of Cholame, on the Monterey County and San Luis Obispo County boundary at the NW corner of T25S, R16E, Mt. Diablo Meridian. Continue south along the west side of R16E to the SW corner of T30S, R16E, MDM. Continue E to SW corner of T30S, R17E, MDM. Continue S to SW corner of T31S, R17E, MDM. Continue E to SW corner of T31S, R18E, MDM. Continue S along West side of R18E, MDM as it crosses into San Bernardino Meridian numbering area and becomes R30W. Follow the west side of R30W, SBM to the SW corner of T9N, R30W, SBM. Continue E along the south edge of T9N, SBM to the Santa Barbara County and Ventura County boundary at that point whch is the SW corner of Section 34.T9N, R24W, SBM, continue S along the Ventura County line to that point which is the SW corner of the SE quarter of Section 32, T7N, R24W, SBM. Continue E along the south edge of T7N, SBM to the SE corner to T7N, R21W, SBM. Continue N along East side of R21W, SBM to Ventura County and Kern County boundary at the NE corner of T8N, R21W. Continue W along the Ventura County and Kern County boundary to the SE corner of T9N, R21W. Continue North along the East edge of R21W, SBM to the NE corner of T12N, R21W, SBM. Continue West along the north edge of T12N, SBM to the SE corner of T32S, R21E, MDM. [T12N SBM is a think strip between T11N SBM and T32S MDM]. Continue North along the East side of R21E, MDM to the Kings County and Kern County border at the NE corner of T25S, R21E, MDM, continue West along the Kings County and Kern County Boundary until the intersection of San Luis Obispo County. Continue west along the Kings County and San Luis Obispo County boundary until the intersection with Monterey County. Continue West along the Monterey County and San Luis Obispo County boundary to the beginning point at the NW corner of T25S, R16E, MDM.

$2.00 additional per hour for INYO and MONO Counties and the Northern portion of SAN BERNARDINO County as defined below:

That area within the following Boundary: Begin at the intersection of the northern boundary of Mono County and the California state line at the point which is the center of Section 17, T10N, R22E, Mt. Diablo Meridian. Continue S then SE along the entire western boundary of Mono County, until it reaches Inyo County at the point which is the NE corner of the Western half of the NW quarter of Section 2, T8S, R29E, MDM. Continue SSE along the entire western boundary of Inyo County, until the intersection with Kern County at the point which is the SW corner of the SE 1/4 of Section 32, T24S, R37E, MDM. Continue E along the Inyo and Kern County boundary until the intersection with San Bernardino County at that point which is the SE corner of section 34, T24S, R40E, MDM. Continue E along the Inyo and San Bernardino County boundary until the point

which is the NE corner of the Western half of the NW quarter of Section 6, T25S, R42E, MDM. Continue S to that point which is the SW corner of the NW quarter of Section 6, T27S, R42E, MDM. Continue E in a straight line to the California and Nevada state border at the point which is the NW corner of Section 1, T17N, R14E, San Bernardino Meridian. Then continue NW along the state line to the starting point, which is the center of Section 18, T10N, R22E, MDM.

GROUP 5	$ 39.39	21.04

LABORER CLASSIFICATIONS

GROUP 1: Cleaning and handling of panel forms; Concrete screeding for rough strike-off; Concrete, water curing; Demolition laborer, the cleaning of brick if performed by a worker performing any other phase of demolition work, and the cleaning of lumber; Fire watcher, limber, brush loader, piler and debris handler; Flag person; Gas, oil and/or water pipeline laborer; Laborer, asphalt-rubber material loader; Laborer, general or construction; Laborer, general clean-up; Laborer, landscaping; Laborer, jetting; Laborer, temporary water and air lines; Material hose operator (walls, slabs, floors and decks); Plugging, filling of shee bolt holes; Dry packing of concrete; Railroad maintenance, repair track person and road beds; Streetcar and railroad construction track laborers; Rigging and signaling; Scaler; Slip form raiser; Tar and mortar; Tool crib or tool house laborer; Traffic control by any method; Window cleaner; Wire mesh pulling - all concrete pouring operations

GROUP 2: Asphalt shoveler; Cement dumper (on 1 yd. or larger mixer and handling bulk cement); Cesspool digger and installer; Chucktender; Chute handler, pouring concrete, the handling of the chute from readymix trucks, such as walls, slabs, decks, floors, foundation, footings, curbs, gutters and sidewalks; Concrete curer, impervious membrane and form oiler; Cutting torch operator (demolition); Fine

grader, highways and street paving, airport, runways and similar type heavy construction; Gas, oil and/or water pipeline wrapper - pot tender and form person; Guinea chaser; Headerboard person - asphalt; Laborer, packing rod steel and pans; Membrane vapor barrier installer; Power broom sweeper (small); Riprap stonepaver, placing stone or wet sacked concrete; Roto scraper and tiller; Sandblaster (pot tender); Septic tank digger and installer(lead); Tank scaler and cleaner; Tree climber, faller, chain saw operator, Pittsburgh chipper and similar type brush shredder; Underground laborer, including caisson bellower

GROUP 3: Buggymobile person; Concrete cutting torch; Concrete pile cutter; Driller, jackhammer, 2-1/2 ft. drill steel or longer; Dri-pak-it machine; Gas, oil and/or water pipeline wrapper, 6-in. pipe and over, by any method, inside and out; High scaler (including drilling of same); Hydro seeder and similar type; Impact wrench multi-plate; Kettle person, pot person and workers applying asphalt, lay-kold, creosote, lime caustic and similar type materials (""applying"" means applying, dipping, brushing or handling of such materials for pipe wrapping and waterproofing); Operator of pneumatic, gas, electric tools, vibrating machine, pavement breaker, air blasting, come-alongs, and similar mechanical tools not separately classified herein; Pipelayer's backup person, coating, grouting, making of joints, sealing, caulking, diapering and including rubber gasket joints, pointing and any and all other services; Rock slinger; Rotary scarifier or multiple head concrete chipping scarifier; Steel headerboard and guideline setter; Tamper, Barko, Wacker and similar type; Trenching machine, hand-propelled

GROUP 4: Asphalt raker, lute person, ironer, asphalt dump person, and asphalt spreader boxes (all types); Concrete core cutter (walls, floors or ceilings), grinder or sander; Concrete saw person, cutting walls or flat work, scoring old or new concrete; Cribber, shorer, lagging, sheeting and trench bracing, hand-guided lagging hammer; Head rock slinger; Laborer, asphalt- rubber distributor boot person; Laser beam in connection with laborers' work; Oversize concrete vibrator operator, 70 lbs. and over; Pipelayer performing all services in the laying and installation of pipe from the point of receiving pipe in the ditch until completion of operation, including any and all forms of tubular material, whether pipe, metallic or non-metallic, conduit and any other stationary type of tubular device used for the conveying of any substance or element, whether water, sewage, solid gas, air, or other product whatsoever and without regard to the nature of material from which the tubular material is fabricated; No-joint pipe and stripping of same; Prefabricated manhole installer; Sandblaster (nozzle person), water blasting, Porta Shot-Blast

GROUP 5: Blaster powder, all work of loading holes, placing and blasting of all powder and explosives of whatever type, regardless of method used for such loading and placing; Driller: All power drills, excluding jackhammer, whether core, diamond, wagon, track, multiple unit, and any and all other types of mechanical drills without regard to the form of motive power; Toxic waste removal

TUNNEL LABORER CLASSIFICATIONS

GROUP 1: Batch plant laborer; Changehouse person; Dump

person; Dump person (outside); Swamper (brake person and switch person on tunnel work); Tunnel materials handling person; Nipper; Pot tender, using mastic or other materials (for example, but not by way of limitation, shotcrete, etc.)

GROUP 2: Chucktender, cabletender; Loading and unloading agitator cars; Vibrator person, jack hammer, pneumatic tools (except driller); Bull gang mucker, track person; Concrete crew, including rodder and spreader

GROUP 3: Blaster, driller, powder person; Chemical grout jet person; Cherry picker person; Grout gun person; Grout mixer person; Grout pump person; Jackleg miner; Jumbo person; Kemper and other pneumatic concrete placer operator; Miner, tunnel (hand or machine); Nozzle person; Operating of troweling and/or grouting machines; Powder person (primer house); Primer person; Sandblaster; Shotcrete person; Steel form raiser and setter; Timber person, retimber person, wood or steel; Tunnel Concrete finisher

GROUP 4: Diamond driller; Sandblaster; Shaft and raise work

TRUCK DRIVERS CLASSIFICATIONS

GROUP 1: Truck driver

GROUP 2: Driver of vehicle or combination of vehicles - 2 axles; Traffic control pilot car excluding moving heavy equipment permit load; Truck mounted broom

GROUP 3: Driver of vehicle or combination of vehicles - 3 axles; Boot person; Cement mason distribution truck; Fuel truck driver; Water truck - 2 axle; Dump truck, less than 16 yds. water level; Erosion control driver

GROUP 4: Driver of transit mix truck, under 3 yds.; Dumpcrete truck, less than 6-1/2 yds. water level

GROUP 5: Water truck, 3 or more axles; Truck greaser and tire person ($0.50 additional for tire person); Pipeline and utility working truck driver, including winch truck and plastic fusion, limited to pipeline and utility work; Slurry truck driver

GROUP 6: Transit mix truck, 3 yds. or more; Dumpcrete truck, 6-1/2 yds. water level and over; Vehicle or combination of vehicles - 4 or more axles; Oil spreader truck; Dump truck, 16 yds. to 25 yds. water level

GROUP 7: A Frame, Swedish crane or similar; Forklift driver; Ross carrier driver

GROUP 8: Dump truck, 25 yds. to 49 yds. water level; Truck repair person; Water pull - single engine; Welder

GROUP 9: Truck repair person/welder; Low bed driver, 9 axles or over

GROUP 10: Dump truck - 50 yds. or more water level; Water pull - single engine with attachment

GROUP 11: Water pull - twin engine; Water pull - twin engine with attachments; Winch truck driver - $1.25 additional when operating winch or similar special attachments

GROUP 12: Boom Truck 17K and above

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

==========

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours

they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at https://www.dol.gov/agencies/whd/government-contracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the

wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

State Adopted Rate Identifiers

Classifications listed under the ""SA"" identifier indicate that the prevailing wage rate set by a state (or local) government was adopted under 29 C.F.R ◆1.3(g)-(h). Example: SAME2023-007 01/03/2024. SA reflects that the rates are state adopted. ME refers to the State of Maine. 2023 is the year during which the state completed the survey on which the listed classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 01/03/2024 reflects the date on which the classifications and rates under the ?SA? identifier took effect under state law in the state from which the rates were adopted.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

* an existing published wage determination
* a survey underlying a wage determination
* a Wage and Hour Division letter setting forth a position on a wage determination matter
* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.

Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

THIS CDBG STREET IMPROVEMENTS ON MAPLE STREET, SPECIFICATION NO. CIP 24/25-04 AGREEMENT ("AGREEMENT") is made and entered into for the above-stated project this __ day of December, 2024 *(Council Action Date Here)*, BY AND BETWEEN the City of Los Alamitos, a municipal corporation, hereafter designated as "AGENCY", and CONTRACTOR'S BUSINESS NAME, a _____ (State) _____ (corporation, partnership, limited liability company, or other business form), hereafter designated as "CONTRACTOR."

WITNESSETH that AGENCY and CONTRACTOR have mutually agreed as follows:

ARTICLE I: Contract Documents

The contract documents for the CDBG STREET IMPROVEMENTS ON MAPLE STREET, SPECIFICATION NO. CIP 24/25-04 shall consist of the Notice Inviting Electronic Bids, Instructions To Bidders, Bid Proposal, Bid Schedule, Standard Specifications, Special Provisions, and all referenced specifications, details, standard drawings, and appendices; together with two signed copies of the AGREEMENT, two signed copies of required bonds; one copy of the insurance certificates, permits, notices, and affidavits; and also including any and all addenda or supplemental agreements clarifying, amending, or extending the work contemplated as may be required to ensure its completion in an acceptable manner (collectively referred to herein as the "Contract Documents"). All of the provisions of the Contract Documents are made a part hereof as though fully set forth herein.

ARTICLE II: Scope of Work

For and in consideration of the payments and agreements to be made and performed by AGENCY, CONTRACTOR agrees to furnish all materials and equipment and perform all work required for the above-stated project, and to fulfill all other obligations as set forth in the aforesaid contract documents.

AGENCY hereby employs CONTRACTOR to provide the materials, do the work, and fulfill the obligations according to the terms and conditions herein contained and referred to, for the prices provided herein, and hereby contracts to pay the same at the time, in the manner, and upon the conditions set forth in this AGREEMENT.

In entering into a public works contract or a subcontract to supply goods, services, or materials pursuant to this AGREEMENT, CONTRACTOR offers and agrees to assign to the AGENCY all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 U.S.C. Sec. 15) or under the Cartwright Act (Chapter 2 (Section 16700, et seq.) of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, services, or materials pursuant to the public works contract or the subcontract. This assignment shall be made and become effective at the time the awarding

body tenders final payment to CONTRACTOR, without further acknowledgment by the parties.

ARTICLE III: Compensation

A. CONTRACTOR agrees to receive and accept the prices set forth in the Bid Proposal and Bid Schedule as full compensation for furnishing all materials, performing all work, and fulfilling all obligations hereunder. In no event shall the total compensation and costs payable to CONTRACTOR under this Agreement exceed the sun of Dollars ($____ _____,) unless specifically approved in advance and in writing by AGENCY

Such compensation shall cover all expenses, losses, damages, and consequences arising out of the nature of the work during its progress or prior to its acceptance including those for well and faithfully completing the work and the whole thereof in the manner and time specified in the aforesaid Contract Documents; and also including those arising from actions of the elements, unforeseen difficulties or obstructions encountered in the prosecution of the work, suspension or discontinuance of the work, and all other unknowns or risks of any description connected with the work.

B. This AGREEMENT is subject to the provisions of Article 1.7 (commencing at Section 20104.50) of Division 2, Part 3 of the Public Contract Code regarding prompt payment of contractors by local governments. Article 1.7 mandates certain procedures for the payment of undisputed and properly submitted payment requests within 30 days after receipt, for the review of payment requests, for notice to Contractor of improper payment requests, and provides for the payment of interest on progress payment requests which are not timely made in accordance with that Article. This AGREEMENT hereby incorporates the provisions of Article 1.7 as though fully set forth herein.

C. At the request and expense of CONTRACTOR, securities equivalent to the amount withheld shall be deposited with AGENCY, or with a state or federally chartered bank in this state as the escrow agent, who shall then pay those moneys to CONTRACTOR upon Agency's confirmation of CONTRACTOR'S satisfactory completion of this AGREEMENT. At any time during the term of this AGREEMENT CONTRACTOR may, at its own expense, substitute securities for funds otherwise withheld as retention (or the retained percentage) in accordance with Public Contract Code § 22300.

ARTICLE IV: Labor Code

AGENCY and CONTRACTOR acknowledge that this AGREEMENT is subject to the provisions of Division 2, Part 7, Chapter 1 (commencing with Section 1720) of the California Labor Code relating to public works and public agencies and agree to be bound by all the provisions thereof as though set forth fully herein. Full compensation for conforming to the requirements of the Labor Code and with other Federal, State and local laws related to labor, and rules, regulations and ordinances which apply to any work performed pursuant to this AGREEMENT is included in the price for all contract items of work involved.

This AGREEMENT is further subject to prevailing wage law, including, but not limited to, the following:

A. The CONTRACTOR shall pay the prevailing wage rates for all work performed under the AGREEMENT. When any craft or classification is omitted from the general prevailing wage determinations, the CONTRACTOR shall pay the wage rate of the craft or classification most closely related to the omitted classification. The CONTRACTOR shall forfeit as a penalty to AGENCY $200.00 or any greater penalty provided in the Labor Code for each Calendar Day, or portion thereof, for each worker paid less than the prevailing wage rates for any work done under the AGREEMENT in violation of the provisions of the Labor Code whether such worker is employed in the execution of the work by CONTRACTOR or by any Subcontractor under CONTRACTOR. In addition, CONTRACTOR shall pay each worker the difference between such prevailing wage rates and the amount paid to each worker for each Calendar Day, or portion thereof, for which each worker was paid less than the prevailing wage rate.

B. CONTRACTOR shall comply with the provisions of Labor Code Section 1777.5 concerning the employment of apprentices on public works projects, and further agrees that CONTRACTOR is responsible for compliance with Section 1777.5 by all of its subcontractors.

C. Pursuant to Labor Code § 1776, CONTRACTOR and any subcontractor shall keep accurate payroll records, showing the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, or other employee employed by him or her in connection with this AGREEMENT. Each payroll record shall contain or be verified by a written declaration that it is made under penalty of perjury, stating both of the following: (1) The information contained in the payroll record is true and correct; and (2) The employer has complied with the requirements of Labor Code §§ 1811, and 1815 for any work performed by his or her employees on the public works project. The payroll records enumerated under subdivision (a) shall be certified and shall be available for inspection at all reasonable hours as required by Labor Code § 1776.

D. This AGREEMENT is further subject to 8-hour work day and wage and hour penalty law, including, but not limited to, Labor Code Sections 1810 and 1813, as well as California nondiscrimination laws, as follows:

CONTRACTOR shall strictly adhere to the provisions of the Labor Code regarding the 8-hour day and the 40-hour week, overtime, Saturday, Sunday and holiday work and nondiscrimination on the basis of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex or sexual orientation, except as provided in Section 12940 of the Government Code. Pursuant to the provisions of the Labor Code, eight hours' labor shall constitute a legal day's work. Work performed by CONTRACTOR's employees in excess of eight hours per day, and 40 hours during any one week, must include compensation for all hours worked in excess of eight hours per day, or 40 hours during any one week, at not less than one and one-half times the basic rate of pay. CONTRACTOR shall forfeit as a penalty to AGENCY $25.00 or any greater penalty set forth in the Labor Code for each worker employed in the execution of the work by CONTRACTOR or by any Subcontractor of CONTRACTOR, for each Calendar Day during which such worker is required or permitted to the work more than eight hours in one Calendar Day or more than 40 hours in any one calendar week in violation of the Labor Code.

E. This AGREEMENT is subject to Public Contract Code Section 6109: CONTRACTOR shall be prohibited from performing work on this project with a subcontractor who is ineligible to perform work on the project pursuant to Sections 1777.1 or 1777.7 of the Labor Code.

ARTICLE V: Work Site Conditions

A. In compliance with and pursuant to Government Code Section 4215, AGENCY shall assume the responsibility, as between the parties to this AGREEMENT, for the timely removal, relocation, or protection of existing main- or trunk-line utility facilities located on the site of any construction project that is a subject of this AGREEMENT, if such utilities are not identified by AGENCY in the plans and specifications made a part of the invitation for bids. The Contract Documents shall include provisions to compensate CONTRACTOR for the costs of locating, repairing damage not due to the failure of CONTRACTOR to exercise reasonable care, and removing or relocating such utility facilities not indicated in the plans and specifications with reasonable accuracy, and for equipment on the project necessarily idled during such work. CONTRACTOR shall not be assessed liquidated damages for delay in completion of the project, when such delay was caused by the failure of AGENCY or the owner of a utility to provide for removal or relocation of such utility facilities.

B. To the extent that the work requires trenches in excess of five feet (5') and is estimated to cost more than $25,000, prior to any excavation, CONTRACTOR must provide the AGENCY, or a registered civil or structural engineer employed by the AGENCY to whom authority has been delegated to accept such plans, a detailed plan showing the design of shoring, bracing, sloping, or other provisions to be made for worker protection from the hazard of caving ground during the excavation of such trench or trenches. If such plan varies from the shoring system standards, the plan shall be prepared by a registered civil or structural engineer. Nothing in this section shall be deemed to allow the use of a shoring, sloping, or protective system less effective than that required by the Construction Safety Orders.

C. This AGREEMENT is further subject to Public Contract Code Section 7104 with regard to any trenches deeper than four feet (4') involved in the proposed work as follows:

CONTRACTOR shall promptly, and before the following conditions are disturbed, notify AGENCY, in writing, of any:

(1) Material that CONTRACTOR believes may be hazardous waste, as defined in Section 25117 of the Health and Safety Code, which is required to be removed to a Class I, Class II, or Class III disposal site in accordance with existing law.

(2) Subsurface or latent physical conditions at the site differing from those indicated by all available information provided prior to the deadline for submission of bids.

(3) Unknown physical conditions at the site of any unusual nature, different materially from those ordinarily encountered and generally recognized as inherent in work of the character provided for in the contract.

AGENCY shall promptly investigate the conditions, and if it finds that the conditions do materially so differ, or involve hazardous waste, and cause a decrease or increase in

CONTRACTOR's cost of, or the time required for, performance of any part of the work, AGENCY shall issue a change order under the procedures described in this AGREEMENT.

In the event that a dispute arises between AGENCY and CONTRACTOR whether the conditions materially differ, or involve hazardous waste, or cause a decrease or increase in CONTRACTOR's cost of, or time required for, performance of any part of the work, CONTRACTOR shall not be excused from any scheduled completion date provided in the AGREEMENT, but shall proceed with all work to be performed under the AGREEMENT. CONTRACTOR shall retain any and all rights provided either by contract or by law which pertain to the resolution of disputes and protests between the contracting parties.

ARTICLE VI: Insurance

A. With respect to performance of work under this AGREEMENT, CONTRACTOR shall maintain, and shall require all of its subcontractors to maintain, insurance as required by Section E "Standard Specifications" of the Contract Documents.

B. This AGREEMENT is further subject to Workers' Compensation obligations, including, but not limited to, California Labor Code Sections 1860 and 1861 as follows:

CONTRACTOR shall take out and maintain, during the life of this contract, Worker's Compensation Insurance for all of CONTRACTOR's employees employed at the site of improvement; and, if any work is sublet, CONTRACTOR shall require the subcontractor similarly to provide Worker's Compensation Insurance for all of the latter's employees, unless such employees are covered by the protection afforded by CONTRACTOR. CONTRACTOR and any of CONTRACTOR's subcontractors shall be required to provide AGENCY with a written statement acknowledging its obligation to secure payment of Worker's Compensation Insurance as required by Labor Code § 1861; to wit: 'I am aware of the provisions of Section 3700 of the Labor Code which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the work of this contract.' If any class of employees engaged in work under this AGREEMENT at the site of the Project is not protected under any Worker's Compensation law, CONTRACTOR shall provide and shall cause each subcontractor to provide adequate insurance for the protection of employees not otherwise protected. CONTRACTOR shall indemnify and hold harmless AGENCY for any damage resulting from failure of either CONTRACTOR or any subcontractor to take out or maintain such insurance.

ARTICLE VII: Indemnification

To the fullest extent permitted by law, CONTRACTOR shall, at its sole cost and expense, fully defend, indemnify and hold harmless AGENCY, its authorized representatives and their respective subsidiaries, affiliates, members, directors, officers, employees and agents (collectively, the "Indemnitees") from and against any and all claims, actions, demands, costs, judgments, liens, penalties, liabilities, damages, losses, and expenses, including but not limited to any fees of accountants, attorneys or other professionals (collectively "Liabilities"), arising out of, in connection with, resulting from or related to, any act, omission, fault or negligence of CONTRACTOR, CONTRACTOR's Representative, or any of its officers, agents, employees, Subcontractors or Suppliers, or any person or organization directly or indirectly employed by any of them (Collectively, the "Indemnitors"), in connection with or

relating to or claimed to be in connection with or relating to the work performed under this AGREEMENT.

If CONTRACTOR is a joint venture or partnership, each venturer or partner shall be jointly and severally liable for any and all of the duties and obligations of CONTRACTOR that are assumed under or arise out of this AGREEMENT. Each of such venturers or partners waives notice of the breach or non-performance of any undertaking or obligation of CONTRACTOR contained in, resulting from or assumed under this AGREEMENT, and the failure to give any such notice shall not affect or impair such venturer's or partner's joint and several liability hereunder.

ARTICLE VIII: Binding Effect

AGENCY and CONTRACTOR each binds itself, its partners, successors, assigns, and legal representatives to the other party hereto and to its partners, successors, assigns, and legal representatives in respect of all covenants, agreements, and obligations contained in the Contract Documents. This AGREEMENT is not assignable nor the performance of either party's duties delegable without the prior written consent of the other party. Any attempted or purported assignment or delegation of any of the rights of obligations of either party without the prior written consent of the other shall be void and of no force and effect.

ARTICLE IX: Dispute Resolution

A. In the event of a dispute arising out of the terms of this AGREEMENT, including any action brought to declare the rights granted herein or to enforce any of the terms of this AGREEMENT, the party prevailing in such dispute shall be entitled to all reasonable costs and litigation expenses actually incurred, including fees of attorneys and expert witnesses. Any court action arising out of this AGREEMENT shall be filed in the Orange County Superior Court. Any alternative dispute resolution proceeding arising out of this AGREEMENT shall be heard in the City of Los Angeles or the City of Los Alamitos, California.

B. AGENCY shall have full authority to compromise or otherwise settle any claim relating to this AGREEMENT or any part hereof at any time. AGENCY shall provide timely notification to CONTRACTOR of the receipt of any third-party claim relating to this AGREEMENT. AGENCY shall be entitled to recover its reasonable costs incurred in providing the notification required by this section.

C. This AGREEMENT is further subject to the provisions of Article 1.5 (commencing at Section 20104) of Division 2, Part 3 of the Public Contract Code regarding the resolution of public works claims of less than $375,000. Article 1.5 mandates certain procedures for the filing of claims and supporting documentation by Contractor, for the response to such claims by the Agency, for a mandatory meet and confer conference upon the request of Contractor, for mandatory nonbinding mediation in the event litigation is commenced, and for mandatory judicial arbitration upon the parties' failure to resolve the dispute through mediation. This AGREEMENT hereby incorporates the provisions of Article 1.5 as though fully set forth herein.

ARTICLE X: Independent Contractor

CONTRACTOR is and shall at all times remain as to AGENCY, a wholly independent contractor. Neither AGENCY nor any of its agents shall have control of the conduct of CONTRACTOR or any of CONTRACTOR's employees, except as herein set forth. CONTRACTOR shall not at any time or in any manner represent that it or any of its agents or employees are in any manner agents or employees of AGENCY.

ARTICLE XI: Taxes

CONTRACTOR is responsible for paying all retail, sales and use, transportation, export, import, special or other taxes and duties applicable to, and assessable against any work, materials, equipment, services, processes and operations incidental to or involved in this AGREEMENT. The CONTRACTOR is responsible for ascertaining and arranging to pay such taxes and duties. The prices established in this AGREEMENT shall include compensation for any taxes the CONTRACTOR is required to pay by laws and regulations in effect as of the execution of this AGREEMENT.

ARTICLE XII: Notices

All notices and communications shall be sent in writing to the parties at the following addresses:

AGENCY: Chris Kelley	CONTRACTOR: [INSERT CONTACT]
CITY OF LOS ALAMITOS	CONTRACTOR'S BUSINESS NAME
3191 Katella Avenue	Mailing Street Address
Los Alamitos, CA 90720	City, State Zip Code

ARTICLE XIII: Entire Agreement

This AGREEMENT supersedes any and all other agreements, either oral or written, between the parties and contains all of the covenants and agreements between the parties pertaining to the work of improvements described herein. Each party to this AGREEMENT acknowledges that no representations, inducements, promises or agreements, orally or otherwise, have been made by any party, or anyone acting on behalf of any party, which are not embodied herein, and that any other agreement, statement or promise not contained in this AGREEMENT shall not be valid or binding. Any modification of this AGREEMENT will be effective only if signed by the party to be charged.

The benefits and obligations of this AGREEMENT shall inure to and be binding upon the representatives, agents, partners, heirs, successors and assigns of the parties hereto. This AGREEMENT shall be construed pursuant to the laws of the State of California.

ARTICLE XIV: Authority to Contract

The signatories hereto represent that they are authorized to sign on behalf of the respective parties they represent and are competent to do so, and each of the parties hereto hereby irrevocably waives any and all rights to challenge signatures on these bases.

ARTICLE XV: General Provisions

A. All reports, documents or other written material ("written products" herein) developed by CONTRACTOR in the performance of this Agreement shall be and remain the property of AGENCY without restriction or limitation upon its use or dissemination by AGENCY. CONTRACTOR may take and retain copies of such written products as desired, but no such written products shall be the subject of a copyright application by CONTRACTOR.

B. In the performance of this Agreement, CONTRACTOR shall not discriminate against any employee, subcontractor, or applicant for employment because of race, color, creed, religion, sex, marital status, sexual orientation, national origin, ancestry, age, physical or mental disability, medical condition or any other unlawful basis.

C. The captions appearing at the commencement of the sections hereof, and in any paragraph thereof, are descriptive only and for convenience in reference to this Agreement. Should there be any conflict between such heading, and the section or paragraph at the head of which it appears, the section or paragraph hereof, as the case may be, and not such heading, shall control and govern in the construction of this Agreement. Masculine or feminine pronouns shall be substituted for the neuter form and vice versa, and the plural shall be substituted for the singular form and vice versa, in any place or places herein in which the context requires such substitution(s).

D. The waiver by AGENCY or CONTRACTOR of any breach of any term, covenant or condition herein contained shall not be deemed to be a waiver of such term, covenant or condition or of any subsequent breach of the same or any other term, covenant or condition herein contained. No term, covenant or condition of this Agreement shall be deemed to have been waived by AGENCY or CONTRACTOR unless in writing.

E. Each right, power and remedy provided for herein or now or hereafter existing at law, in equity, by statute, or otherwise shall be cumulative and shall be in addition to every other right, power, or remedy provided for herein or now or hereafter existing at law, in equity, by statute, or otherwise. The exercise, the commencement of the exercise, or the forbearance of the exercise by any party of any one or more of such rights, powers or remedies shall not preclude the simultaneous or later exercise by such party of any of all of such other rights, powers or remedies.

IN WITNESS WHEREOF the parties hereto for themselves, their heirs, executors, administrators, successors, and assigns do hereby agree to the full performance of the covenants herein contained and have caused this AGREEMENT to be executed in duplicate by setting hereunto their names, titles, hands, and seals this __ day of December, 2024 *(Council Action Date Here)*

PAYMENT BOND

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04

IN THE CITY OF LOS ALAMITOS, CALIFORNIA

WHEREAS, the City of Los Alamitos, as AGENCY has awarded to Contractor's Business Name, as CONTRACTOR, a contract for the above-stated project;
AND WHEREAS, CONTRACTOR is required to furnish a bond in connection with the contract, to secure the payment of claims of laborers, mechanics, material persons, and other persons as provided by law;
NOW THEREFORE, we, the undersigned CONTRACTOR and SURETY, are held and firmly bound unto AGENCY in the sum of **[DESCRIBE VERBALLY; 100% OF TOTAL CONTRACT AMOUNT—TO BE INSERTED BY CONTRACTOR]**Dollars ($XXX,XXX.XX) which is one hundred percent (100%) of the total contract amount for the above-stated project, for which payment well and truly to be made we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.
THE CONDITIONS OF THIS OBLIGATION IS SUCH that if CONTRACTOR, its heirs, executors, administrators, successors, assigns or subcontractors, shall fail to pay any of the persons named in Civil Code Section 3181, or amounts due under the Unemployment Insurance Code with respect to work or labor withheld, and to pay over to the Employment Development Department from the wages of employees of the CONTRACTOR and its subcontractors pursuant to Section 13020 of the Unemployment Insurance Code, with respect to such work and labor, that the surety or sureties herein will pay for the same in an amount not exceeding the sum specified in this bond, otherwise the above obligation shall be void. In case suit is brought upon this bond, SURETY will pay reasonable attorneys' fees to the plaintiffs and AGENCY in an amount to be fixed by the court.
This bond shall inure to the benefit to any of the persons named in Civil Code Section 3181 as to give a right of action to such persons or their assigns in any suit brought upon this bond.
The SURETY hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the contract or the specifications accompanying it shall in any manner affect SURETY's obligations on this bond. The SURETY hereby waives notice of any such change, extension, alteration or addition and hereby waives the requirements of Section 2845 of the Civil Code as a condition precedent to any remedies AGENCY may have.

FAITHFUL PERFORMANCE BOND

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

KNOW ALL PERSONS BY THESE PRESENTS That Contractor's Business Name, hereinafter referred to as "CONTRACTOR" as PRINCIPAL, and , a corporation duly organized and doing business under and by virtue of the laws of the State of California and duly licensed for the purpose of making, guaranteeing, or becoming sole surety upon bonds or undertakings as Surety, are held and firmly bound unto the CITY OF LOS ALAMITOS, CALIFORNIA, hereinafter referred to as the "AGENCY" in the sum of **[DESCRIBE VERBALLY; 100% OF TOTAL CONTRACT AMOUNT—TO BE INSERTED BY CONTRACTOR]**Dollars ($XXX,XXX.XX); which is one hundred percent (100%) of the total contract amount for the above stated project; lawful money of the United States of America for the payment of which sum, well and truly to be made, we bind ourselves, our heirs, executors, administrators, assigns and successors, jointly and severally, firmly by these presents.

THE CONDITIONS OF THIS OBLIGATION ARE SUCH, that whereas CONTRACTOR has been awarded and is about to enter into a Contract with AGENCY to perform all work required pursuant to the contract documents for the project entitled: CDBG STREET IMPROVEMENTS ON MAPLE STREET, SPECIFICATION NO. CIP 24/25-04 CONTRACT which Contract is by this reference incorporated herein, and is required by AGENCY to give this Bond in connection with the execution of the Contract;

NOW, THEREFORE, if CONTRACTOR and his or her Subcontractors shall well and truly do and perform all the covenants and obligations of the Contract on his or her part to be done and performed at the times and in the manner specified herein including compliance with all Contract specifications and quality requirements, then this obligation shall be null and void, otherwise it shall be and remain in full force and effect;

PROVIDED, that any alterations in the work to be done, or in the material to be furnished, which may be made pursuant to the terms of the Contract, shall not in any way release CONTRACTOR or the Surety thereunder, nor shall any extensions of time granted under the provisions of the Contract release either CONTRACTOR or said Surety, and notice of such alterations of extensions of the Contract is hereby waived by said Surety.

In the event suit is brought upon this Bond by AGENCY and judgment is recovered, said Surety shall pay all costs incurred by AGENCY in such suit, including a reasonable attorney's fee to be fixed by the Court.

MAINTENANCE BOND

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

KNOW ALL PERSONS BY THESE PRESENTS THAT WHEREAS, the City of Los Alamitos, as AGENCY has awarded to Contractor's Business Name, as CONTRACTOR, a contract for the above-stated project.

AND WHEREAS, CONTRACTOR is required to furnish a bond in connection with the contract guaranteeing maintenance thereof;

NOW, THEREFORE, we, the undersigned CONTRACTOR and SURETY, are held firmly bound unto AGENCY in the sum of **DESCRIBE VERBALLY; 50% OF TOTAL CONTRACT AMOUNT—TO BE INSERTED BY CONTRACTOR]**Dollars ($XXX,XXX.XX), which is fifty percent (50%) of the total contract amount for the above-stated project to be paid to AGENCY, its successors and assigns, for which payment well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITIONS OF THIS OBLIGATION ARE SUCH that if CONTRACTOR shall remedy without cost to AGENCY any defects which may develop during a period of one (1) year from the date of recordation of the Notice of Completion of the work performed under the contract, provided such defects are caused by defective or inferior materials or work, then this obligation shall be void; otherwise it shall be and remain in full force and effect. In case suit is brought upon this bond, SURETY will pay reasonable attorneys' fees to the AGENCY in an amount to be fixed by the court.

ENDORSEMENTS TO INSURANCE POLICY

Name of Insurance Company:

Policy Number:

Effective Date:

The following endorsements are hereby incorporated by reference into the attached Certificate of Insurance as though fully set forth thereon:

1. The naming of an additional insured as herein provided shall not affect any recovery to which such additional insured would be entitled under this policy if not named as such additional insured, and
2. The additional insured named herein shall not be held liable for any premium or expense of any nature on this policy or any extensions thereof, and
3. The additional insured named herein shall not by reason of being so named be considered a member of any mutual insurance company for any purpose whatsoever, and
4. The provisions of the policy will not be changed, suspended, canceled or otherwise terminated as to the interest of the additional insured named herein without first giving such additional insured twenty (20) days' written notice.
5. Any other insurance held by the additional insured shall not be required to contribute anything toward any loss or expense covered by the insurance, which is referred to by this certificate.
6. **The company provided insurance for this certificate is a company licensed to do business in the State of California with a Best's rating of A+ VIII or greater.**

It is agreed that the City of Los Alamitos, its officers and employees, are included as Additional Insureds under the contracts of insurance for which the Certificate of Insurance is given.

STATEMENT REGARDING CONTRACTOR'S LICENSING LAWS

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

[Business & Professions Code § 7028.15]
[Public Contract Code § 20103.5]

I, the undersigned, certify that I am aware of the following provisions of California law and that I, or the entity on whose behalf this certification is given, hold a currently valid California contractor's license as set forth below:

Business & Professions Code § 7028.15:

a) **It is a misdemeanor for any person to submit a bid to a public agency to engage in the business or act in the capacity of a contractor within this state without having a license therefor,** except in any of the following cases:

(1)The person is particularly exempted from this chapter.

(2)The bid is submitted on a state project governed by Section 10164 of the Public Contract Code or on any local agency project governed by Section 20104 [now § 20103.5] of the Public Contract Code.

b) If a person has been previously convicted of the offense described in this section, the court shall impose a fine of 20 percent of the price of the contract under which the unlicensed person performed contracting work, or four thousand five hundred dollars ($4,500), whichever is greater, or imprisonment in the county jail for not less than 10 days nor more than six months, or both.

In the event the person performing the contracting work has agreed to furnish materials and labor on an hourly basis, "the price of the contract" for the purposes of this subdivision means the aggregate sum of the cost of materials and labor furnished and the cost of completing the work to be performed.

c) This section shall not apply to a joint venture license, as required by Section 7029.1. However, at the time of making a bid as a joint venture, each person submitting the bid shall be subject to this section with respect to his/her individual licenser.

d) This section shall not affect the right or ability of a licensed architect, land surveyor, or registered professional engineer to form joint ventures with licensed contractors to render services within the scope of their respective practices.

e) Unless one of the foregoing exceptions applies, a bid submitted to a public agency by a contractor who is not licensed in accordance with this chapter shall be considered nonresponsive and shall be rejected by the public agency. Unless one of the foregoing exceptions applies, a local public agency shall, before awarding a contract or issuing a purchase order, verify that the contractor was properly licensed when the contractor submitted the bid. Notwithstanding any other provision of law, unless one of the foregoing exceptions applies, the registrar may issue a citation to any public officer or employee of a public entity who knowingly awards a contract or issues a purchase order to a contractor who is not licensed pursuant to this chapter. The amount of civil penalties, appeal, and finality of such citations shall be subject to Sections 7028.7 to 7028.13, inclusive. **Any contract awarded to, or any purchase order issued to, as contractor who is not licensed pursuant to this chapter is void.**

f) Any compliance or noncompliance with subdivision (e) of this section, as added by Chapter 863 of the Statutes of 1989, shall not invalidate any contract or bid awarded by a public agency during which time that subdivision was in effect.

g) A public employee or officer shall not be subject to a citation pursuant to this section if the public employee, officer, or employing agency made an inquiry to the board for the purposes of verifying the license status of any person or contractor and the board failed to respond to the inquiry within three business days. For purposes of this section, a telephone response by the board shall be deemed sufficient.

Public Contract Code § 20103.5:

In all contracts subject to this part where federal funds are involved, no bid submitted shall be invalidated by the failure of the bidder to be licensed in accordance with the laws of this state. However, at the time the contract is awarded, the contractor shall be properly licensed in accordance with the laws of this state. The first payment for work or material under any contract shall not be made unless and until the Registrar of Contractors verifies to the agency that the records of the Contractors' State License Board indicate that the contractor was properly licensed at the time the contract was awarded. Any bidder or contractor not so licensed shall be subject to all legal penalties imposed by law, including, but not limited to, any appropriate disciplinary action by the Contractors' State License Board. The agency shall include a statement to that effect in the standard form of pre-qualification questionnaire and financial statement. **Failure of the bidder to obtain proper and adequate licensing for an award of a contract shall constitute a failure to execute the contract and shall result in the forfeiture of the security of the bidder.**

SECTION E

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

STANDARD SPECIFICATION

STANDARD SPECIFICATIONS

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

0-1 STANDARD SPECIFICATIONS

Except as hereinafter amended, the provisions of the 2021 Edition of the "Green Book," Standard Specifications for Public Works Construction ("SSPWC"), with the latest Supplements, prepared and promulgated by the Southern California Chapters of the American Public Works Association and the Associated General Contractors of America, and these modifications thereto are adopted as the "Standard Specifications" for the Agency. These Standard Specifications will be numbered as Sections 0 through 800 per the SSPWC.

0-2 NUMBERING OF SECTIONS

The numbering of sections and subsections in these amendments and modifications are compatible with the numbering of sections in the SSPWC.

0-3 AMENDMENTS AND MODIFICATIONS

The following sections of the SSPWC are amended as provided herein. In the event of any inconsistencies between the amendments outlined herein and the SSPWC, these amendments shall control.

1-2 TERMS AND DEFINITIONS

Add the following:

Agent—Shall include persons and companies, other than the Contractor, retained by the City to perform design and construction services in relation to the Work.

Acceptance—The Agency's formal written acceptance of a project that has been completed in all respects in accordance with the plans and specifications and any modifications thereof.

City—The City of Los Alamitos, California, as the Agency and Owner.

City Council—City Council of the City of Los Alamitos, California.

Construction Manager—Persons and/or company retained by the City to perform construction management services.

Design Engineer—Persons and/or company retained by the City to perform engineering design services.

Due Notice—A written notification, provided in due time, of a proposed action, where the contract requires such notification within a specified time (usually 48 hours or two working days) prior to the commencement of the contemplated action.

Engineer—The City Engineer of the City of Los Alamitos, or his/her authorized representative.

Geotechnical Engineer—Person licensed to practice Soils Engineering or Geotechnical Engineering pursuant to the laws of the State of California and retained by the Agency during construction.

Prompt—The briefest interval of time required for a considered reply, including time required for approval by a governing body.

Standard Plans—"Standard Plans for Public Works Construction" - Latest edition of the Southern California Chapter of the American Public Works Association.

State Standard Specifications ("SSS")—Standard Specifications prepared by the State of California, Business and Transportation Agency, Department of Transportation.

State Standard Plans ("SSP")—Standard Plans prepared by State of California, Business and Transportation Agency, Department of Transportation.

Working Days—Any days, except: (1) Saturdays, Sundays, legal holidays on which Los Alamitos City Hall is closed for business; (2) days when work is suspended by the Engineer for reasons unrelated to the performance of the contractor, and provided in Subsections 6-3 and 6-3.1; and (3) days determined to be non-working in accordance with Section 6-3 "Time of Completion".

1-3.3 INSTITUTIONS

Add the following:

AGCA	Associated General Contractors of America
ASME	American Society of Mechanical Engineers
CRSI	Concrete Reinforcing Steel Institute
CSI	Construction Specifications Institute
NFPA	National Fire Protection Association
SSS	State of California Standard Specifications, latest edition, Department of Transportation
SSP	State of California Standard Plans, latest edition, Department of Transportation.
SSPWC	Standard Specifications for Public Works Construction, as specified in Subsection 0-1

1-6 BIDDING AND SUBMISSION OF THE BID

1-6.2 SUBCONTRACTOR LISTING

Replace the third paragraph with the following:

Subcontracting of more than one-half of one percent of the work for which no Subcontractor was designated in the original Bid will be allowed only in cases of public emergency or necessity and only after the Engineer makes a written finding of circumstances constituting public emergency or necessity.

Delete the fourth paragraph and replace with the following:

The Contractor must obtain written consent of the City Council to substitute a Subcontractor designated in the original Bid, to permit any subcontract to be assigned or transferred, or to otherwise allow a subcontract to be performed by anyone other than the originally designated Subcontractor.

Delete the fifth paragraph and replace with the following:

A violation of any of the above provisions will be considered a violation of the Contract, and the City may cancel the Contract and collect appropriate damages or assess the Contractor a penalty of not more than ten (10) percent of the subcontract involved.

Add the following:

If subcontracted work is not being performed in a satisfactory manner, the City will notify the Contractor of the need to take corrective action and the Engineer may report the facts to the City Council. Upon order by City Council and the Contractor's receipt of written instructions from the Engineer, the Subcontractor shall immediately be removed from the Work and may not again be employed on the Work.

1-7 AWARD AND EXECUTION OF THE CONTRACT

1-7.1 GENERAL

Add the following:

The City reserves the right to reject any or all proposals.

The Contract will be awarded, if at all, to the lowest responsible and responsive Bidder determined as provided on the Proposal Form, whose proposal complies with all the requirements prescribed. Such award, if made, will be made within the number of days stated in the proposal form. Refusal or failure to deliver the executed contract, bonds, or insurance in the form provided in the Contract and approved by the Agency's attorney within the time provided herein shall be cause, at the Agency's option, for the annulment of the award and forfeiture of the bid security. In such event, the Agency may successively award the Contract to the next lowest responsible and responsive Bidder until a properly executed Contract, bonds, and insurance is obtained, or it may at any time reject all remaining bids and proceed as provided by law. The refusal or failure of a successive lowest responsible and responsive Bidder to execute the Contract may, at the Agency's option, result in an annulment of the award to that Bidder and the forfeiture of that Bidder's bid security. The periods of time specified above within which the award of the Contract may be made shall be subject to extension for such further period as may be agreed upon in writing between the Agency and the concerned Bidder.

The Agency reserves the right to waive any irregularities.

Within ten (10) calendar days after the date of the Notice of Award, the Contractor shall execute and return the following contract documents to the Agency:

Contract Agreement (in duplicate)
Faithful Performance Bond (in duplicate)
Maintenance Bond (in duplicate)
Payment Bond (in duplicate)
Public Liability and Property Damage Insurance Certificate (two original)
Additionally Insured Endorsement

Workers' Compensation Insurance Certificate (two original)

A corporation to which an award is made may be required, before the Contract agreement is executed by the Agency, to furnish evidence of its corporate existence, of its right to enter into contracts in the State of California, and that the officers signing the contract and bonds for the corporation have the authority to do so.

1-7.2 CONTRACT BONDS

Add the following:

The PAYMENT BOND shall remain in force until thirty-five (35) days after the date of recordation of the Notice of Completion. The FAITHFUL PERFORMANCE BOND shall remain in force until the date of recordation of the Notice of Completion. The MAINTENANCE BOND shall remain in force until one (1) year after the date of recordation of the Notice of Completion.

All bonds must be accompanied by a Power of Attorney

SECTION 2 – SCOPE OF THE WORK

2-1 WORK TO BE DONE

Add the following:

Any plan or method of work suggested by the Agency or the Engineer to the Contractor but not specified or required, if adopted or followed by the Contractor in whole or in part, shall be used at the risk and responsibility of the Contractor; and the Agency and the Engineer shall assume no responsibility therefore and in no way be held liable for any defects in the work which may result from or be caused by use of such plan or method of work.

The work includes, but is not necessarily limited to, the following items as shown on the plans and specified in these Special Provisions:

The City of Los Alamitos proposes to cold mill and overlay pavement with asphalt rubber hot mix (ARHM) and remove and construct sidewalk, curb, gutter, curb ramps, curb drains, and full depth asphalt concrete pavement. Additional items of work include installing detectable warning surface, signing, and striping and adjusting manhole frames and utility valves to grade. Existing private facilities will be protected in place within the limits of the project unless otherwise shown.

2-2 PERMITS

Replace first paragraph with the following:

Prior to the start of any work, the Contractor shall apply for and receive any applicable City, County, State, and Federal permits.

2-3 RIGHT-OF-WAY

Add the following:

When the Contractor arranges for additional work areas and facilities temporarily required by him/her, he/she shall provide the Agency with proof that the additional work areas and/or facilities have been left in a condition satisfactory to the owner(s) of said work areas and/or facilities prior to acceptance of the work.

2-4 COOPERATION AND COLLATERAL WORK

Add the following:

Contractor shall coordinate his/her work so as to minimize disruption to ongoing or scheduled private development projects in the project area.

2-7 CHANGES INITIATED BY THE AGENCY

2-7.1 GENERAL

Add the following:
All final locations determined in the field, and any deviations from the Plans and Specification, shall be marked in red on the documents to show the as-built conditions. Contractor shall maintain a complete and accurate record of all changes of construction from that shown in these plans and specifications for the purpose of providing a basis for construction record drawings. No changes shall be made without prior written approval of the Engineer. Upon completion of the Project, Contractor shall deliver this record of all construction changes to the Engineer along with a letter which declares that other than these noted changes "the Project was constructed in conformance with the Contract Documents". Final payment will not be made until this requirement is met.

As the figured dimensions shown on the drawings and in the specifications of the Contract may not in every case agree with scaled dimensions, the figured dimensions shall be followed in preference to the scaled dimensions, and drawings to a large scale shall be followed in preference to the drawings to a small scale. Should it appear that the work to be performed, or any related matter, are not sufficiently detailed or explained in the Contract documents, the Contractor shall apply to the Engineer for such further explanations as necessary, and shall conform to such further explanations provided by the Engineer as part of the Contract to the extent that it is consistent with the terms of the Contract.

Caution: The engineer preparing these plans will not be responsible or liable for unauthorized changes to or uses of these plans. All changes to the plans must be approved in writing by the Engineer.

SECTION 3 – CONTROL OF THE WORK

3-3 SUBCONTRACTORS

Replace the first paragraph with the following:

All persons engaged in the Work, including Subcontractors and their employees, will be considered employees of the Contractor. The Contractor will be held responsible for their work. The Agency will deal directly and solely with the Contractor and make all payments to the Contractor.

3-5 INSPECTION

Add the following:

The Agency shall inspect for compliance with requirements for 8-hour days and 40-hour weeks on normal working days. The Contractor shall reimburse the Agency, at rates established by the Agency, for any additional inspection, including inspection on legal holidays.

3-10 SURVEYING

3-10.1 GENERAL

Add the following:

The Contractor shall be responsible for all survey and layout of work.

The line and grades for construction will be parallel to and offset from the position of the work. From the established lines and grades, the Contractor shall extend the necessary lines and grades for construction of the work and shall be responsible for the correctness of same.

3-12 WORK SITE MAINTENANCE

3-12.1 General

Add the following Subsection:

3-12.1.1 WORK AREA APPEARANCE

The Contractor shall maintain a neat appearance to the Work.

All unsuitable construction materials and rubbish and debris shall be regularly removed from the job site, be transported to a suitable location, and be disposed of in a proper and legal manner.

In any area visible to the public, the following shall apply:

1. Broken concrete and debris developed during clearing and grubbing shall be disposed of weekly.
2. The Contractor shall furnish trash bins for all debris from structure construction. All debris shall be placed in trash bins daily.
3. Forms or false work that are to be re-used shall be neatly stacked concurrent with their removal.
4. Forms and false work that are not to be re-used shall be disposed of with their removal.
5. Wash down from concrete trucks shall be at one location. Concrete from wash down procedures shall be removed from the site weekly.

3-12.3 NOISE CONTROL

Add the following:

A noise level limit of 85 dba at a distance of fifty (50) feet shall apply to all construction equipment on or related to the job, whether owned by the Contractor or not. The use of excessively loud warning signals shall be avoided except in those cases where required for the protection of personnel.

The Contractor shall arrange and maintain a secure storage site for all equipment and materials. All equipment and unused materials shall be returned to this site at the end of each work day.

3-12.6 WATER POLLUTION CONTROL

3-12.6.1 General

Add the following:

This item shall consist of preparation, implementation and compliance with a storm water pollution prevention plan (SWPPP) for the project, if applicable.

3-12.6.2 BEST MANAGEMENT PRACTICES (BMPs)

Add the following:

All storm water pollution prevention measures shall be in accordance with the submitted SWPPP. In the event circumstances during the course of construction require changes to the original SWPPP, a revised plan shall be promptly submitted to the Agency's representative in each instance. No responsibility shall accrue to the Agency as a result of the plan or as a result of knowledge of the plan. All work installed by the Contractor in connection with the SWPPP but not specified to become a permanent part of the project shall be removed and the site restored in so far as practical to its original condition prior to completion of construction or when directed by the Agency's representative.

3-12.6.5 PAYMENT

Add the following:

Unless otherwise indicated in the Special Provision, measurement and payment for Storm Water Pollution Prevention Measures, as described herein, shall be included in the bid item Site Maintenance. Such payment shall be considered full compensation for all labor, materials, tools, and equipment for completion, and implementation and compliance with the SWPPP.

3-13 COMPLETION, ACCEPTANCE, AND WARRANTY

3-13.3 WARRANTY

Add the following:

The Contractor shall warrant and guarantee the entire Work and all parts thereof, including that performed and constructed by subcontractors, and others employed directly or indirectly on the Work, against faulty or defective materials, equipment or workmanship for the maximum period provided by law. In addition thereto, for a period of one (1) year commencing on the date of acceptance of the Work, the Contractor shall, upon the receipt of notice in writing from the Agency, promptly make all repairs arising out of defective materials, workmanship or equipment and bear the cost thereof. The Agency is hereby authorized to make such repairs and the Contractor and Surety shall bear the cost thereof if, ten (10) days after the giving of such notice to the Contractor, the Contractor has failed to make or undertake with due diligence the repairs; provided, however, that, in the case of an emergency where, in the opinion of the Agency, delay could cause serious loss or damage, repairs may be made without notice being sent to the Contractor or Surety, and all expense in connection therewith shall be charged to the Contractor and Surety.

For the purpose of this article "Acceptance of the Work" shall mean the acceptance of the Work by the Agency in accordance with Subsection 3-13.2 but not for the purpose of extinguishing any covenant or agreement or agreement on the part of the Contractor to be performed or fulfilled under this Contract, which has not in fact been performed or fulfilled at the time of such acceptance all of such covenants and agreements, shall continue to be binding on the Contractor until they have been fulfilled.
The effective date of Acceptance of the Work and commencement of the Guarantee shall be the date of acceptance of the Notice of Completion by the City Council.

Add the following subsection to Subsection 3-13:

3-13.3.4 General Guaranty

The Contractor shall remedy any defects in the Work and pay for any damage to other work resulting therefrom, which shall appear within a period of one year from the date of final acceptance of the Work unless a longer period is specified. The Agency will give notice of observed defects with reasonable promptness.

SECTION 4 – CONTROL OF MATERIALS

4-1 GENERAL

Add the following:

The Contractor and all subcontractors, suppliers, and vendors, shall guarantee that the entire Work will meet all requirements of this Contract as to the quality of materials, equipment, and workmanship. The Contractor, at no cost to the Agency, shall make any repairs or replacements made necessary by defects in materials, equipment, or workmanship that become evident within one year after the date of recordation of the Notice of Completion. Within this one year period, the Contractor shall also restore to full compliance with the requirements of this Contract any portion of the Work which is found not to meet those requirements. The Contractor shall defend, indemnify, and hold the Agency, its officers, agents, and employees harmless from claims of any kind due to injuries or damages arising, directly or indirectly, from said defects or noncompliance.

The Contractor shall make all repairs, replacements, and restorations within thirty-five (35) days after the date of the Engineers' written notice.

If, in the opinion of the Engineer, the defective work is not of sufficient magnitude or importance to make the work dangerous or undesirable, or if, in the opinion of the Engineer, the removal of such work is impractical or will create conditions which are dangerous or undesirable, the Agency shall have the right and authority to retain such work instead of requiring it to be removed and reconstructed, but will make such deductions thereof in the payments due or to become due to the Contractor as the Agency may deem just and reasonable.

4-4 TESTING

Replace the third and fourth sentences of the first paragraph with the following:

Except as elsewhere specified, the Agency will bear the cost of testing material and/or workmanship which meet or exceed the requirements indicated in the Standard Specifications and the Special Provisions. The Contractor shall bear the cost of all other tests, including the retesting of material or workmanship that fails to pass the first test.

4-6 TRADE NAMES

Replace the third sentence of the second paragraph with the following:

Approval of equipment and materials offered as equivalents to those specified must be obtained prior to the opening of bids as set forth in the Instructions to Bidders.

Add the following:

Along with information supplied by the Contractor regarding equivalency of the proposed item, the Contractor shall clearly identify all deviations from the specified item. Deviations discovered by the Engineer after acceptance of an "or equal" item which were not identified by the Contractor with his/her submittal shall be cause for rejection of the "or equal" item. Contractor shall be due no additional compensation in time or money for acceptance or rejection of a proposed "or equal" item and subsequent replacement with the item specified. Contractor shall pay cost to Agency for items requiring more than two submittals and analysis of any shop drawing which requires more than a general review of an "or equal" item.

SECTION 5 – LEGAL RELATIONS AND RESPONSIBILITIES

5-3 LABOR

5-3.1 General

Add the following:

The Contractor shall ensure unlimited access to the job site for all Equal Opportunity Compliance officers.

Every Contractor and Subcontractor shall keep an accurate record showing the name, occupation, and the actual per diem wages paid to each worker employed by him/her in connection with the public work. The record shall be kept open at all reasonable hours to the inspection of the body awarding the Contract and to the Division of Labor Law Enforcement.

Add the following Subsection:

5-3.4.1 OVERTIME AND SHIFT WORK

The Contractor may establish overtime and shift work as a regular procedure only with the written permission of the Engineer. Such permission may be revoked at any time. No work other than overtime and shift work established as a regular procedure shall be done between the hours of 4:30 p.m. and 8:30 a.m., nor on Saturdays, Sundays or legal holidays, except such work as is necessary for the proper care and protection of the work already performed or except in case of an emergency.

All costs for overtime inspection, except those occurring as a result of overtime and shift work established as a regular procedure, shall be paid by the Contractor. Overtime inspection shall include inspection required during holidays observed by the AGC and Trade Unions, Saturdays, Sundays, and any weekday between the hours of 4:30 p.m. and 8:30 a.m.. Such costs will include but will not necessarily be limited to engineering, inspection, general supervision and other overhead expenses that are directly chargeable to the overtime work. The Agency shall deduct all such charges from payments due the Contractor.

5-4.2 GENERAL LIABILITY INSURANCE

Replace Subsection 5-4.2 with the following:

5-4.2.1 GENERAL. CONTRACTOR and AGENCY agree that Agency, its employees, agents and officials should, to the extent permitted by law, be fully protected from any loss, injury, damage, claim, lawsuit, cost, expense, attorneys fees, litigation costs, defense costs, court costs or any other cost arising out of or in any way related to the performance of this Agreement. Accordingly, the provisions of this indemnity provision are intended by the parties to be interpreted and construed to provide the fullest protection possible under the law to the Agency. CONTRACTOR acknowledges that AGENCY would not have entered into this Agreement in the absence of the commitment of CONTRACTOR to indemnify and protect AGENCY as set forth here.

5-4.2.2 To the full extent permitted by law, CONTRACTOR shall defend, indemnify and hold harmless AGENCY, its employees, agents and officials, from any liability, claims, suits, actions, arbitration proceedings, administrative proceedings, regulatory proceedings, losses, expenses or costs of any kind, whether actual, alleged, or threatened, actual attorneys fees incurred by AGENCY, court costs, interest, defense costs including expert witness fees and any other costs or expenses of any kind whatsoever without restriction or limitation incurred in relation to, as a consequence of, arising out of or in any way attributable actually, allegedly or impliedly, in whole or in part to the performance of this Agreement. All obligations under this provision are to be paid by CONTRACTOR as they are incurred by the AGENCY.

5-4.2.3 Without affecting the rights of AGENCY under any provision of this agreement or this section, CONTRACTOR shall not be required to indemnify and hold harmless AGENCY as set forth above for liability attributable to the sole fault of AGENCY, provided such sole fault is determined by agreement between the parties or the findings of a court of competent jurisdiction.

This exception will apply only in instances where the AGENCY is shown to have been solely at fault and not in instances where CONTRACTOR is solely or partially at fault or in instances where AGENCY's fault accounts for only a percentage of the liability involved. In those instances, the obligation of CONTRACTOR will be all-inclusive and AGENCY will be indemnified for all liability incurred, even though a percentage of the liability is attributable to the conduct of the AGENCY.

5-4.2.4 CONTRACTOR acknowledges that its obligation pursuant to this section extends to liability attributable to AGENCY, if that liability is less than the sole fault of AGENCY. CONTRACTOR has no obligation under this Agreement for liability proven in a court of competent jurisdiction or by written agreement between the parties to be the sole fault of AGENCY.

5-4.2.5 The obligations of CONTRACTOR under this or any other provision of this Agreement will not be limited by the provisions of any workers compensation act or similar act. CONTRACTOR expressly waives its statutory immunity under such statutes or laws as to AGENCY, its employees, agents and officials.

5-4.2.6 CONTRACTOR agrees to obtain executed indemnity agreements with provisions identical to those as set forth here in this section from each and every subcontractor, sub-tier contractor or any other person or entity involved by, for, with or on behalf of CONTRACTOR in the performance or subject matter of this Agreement. In the event CONTRACTOR fails to obtain such indemnity obligations from others as required here, CONTRACTOR agrees to be fully responsible according to the terms of this section.

5-4.2.7 Failure of AGENCY to monitor compliance with these requirements imposes no additional obligations on AGENCY and will in no way act as a waiver of any rights hereunder. This obligation to indemnify and defend AGENCY as set forth herein is binding on the successors, assigns or heirs of CONTRACTOR and shall survive the termination of this Agreement or this section.

5-4.2.8 CONTRACTOR agrees to provide insurance in accordance with the requirements as set forth here. If CONTRACTOR uses existing coverage to comply with these requirements and that coverage

does not meet the requirements set forth herein, CONTRACTOR agrees to amend, supplement or endorse the existing coverage to do so. The following coverages will be provided by CONTRACTOR and maintained on behalf of AGENCY and in accordance with the requirements set forth herein.

5-4.2.9 Commercial General Liability/Umbrella Insurance. Primary insurance shall be provided on ISO-CGL form No. CG 00 01 11 85 or 88. Total limits shall be not less than two million dollars ($2,000,000.00) per occurrence for all coverages and two million dollars ($2,000,000.00) general aggregate. AGENCY and its officers, agents and employees shall be named as additional insureds using ISO additional insureds endorsement form CG 20 10 11 85 (in no event will AGENCY accept an endorsement form with an edition date later than 1990). Coverage shall apply on a primary non-contributing basis in relation to any other insurance or self-insurance, primary or excess, available to AGENCY or any employee or agent of AGENCY. Coverage shall not be limited to the vicarious liability or supervisory role of any additional insured. Umbrella Liability Insurance (over primary) shall apply to bodily injury/property damage, personal injury/advertising injury, at a minimum, and shall include a "drop down" provision providing primary coverage above a maximum of $25,000.00 self-insured retention for liability not covered by primary policies but covered by the umbrella policy. Coverage shall be following form to any underlying coverage. Coverage shall be provided on a "pay on behalf" basis, with defense costs payable in addition to policy limits. There shall be no cross-liability exclusion. Policies shall have concurrent starting and ending dates.

Each policy of insurance shall contain a clause prohibiting cancellation, modification or lapse without thirty (30) days prior written notice having been given to the City. All insurance policies shall be subject to approval by the City Attorney and certificates evidencing such policies shall be provided to the City concurrently with the filing of all required bonds.

5.4.2.10 Business Auto/Umbrella Liability Insurance. Primary coverage shall be written on ISO Business Auto Coverage form CA 00 01 06 92 including symbol 1 (Any Auto). Limits shall be no less than two million dollars ($2,000,000.00) per accident. Starting and ending dates shall be concurrent. If CONTRACTOR owns no autos, a non-owned auto endorsement to the General Liability policy drafted above is acceptable.

5-4.3 WORKERS' COMPENSATION INSURANCE

Replace Subsection 5-4.3 with the following:

5-4.3.1 Workers' Compensation/Employers' Liability shall be written on a policy form providing workers' compensation statutory benefits as required by law. Employers' liability limits shall be no less than one million dollars per accident or disease. Employers' liability coverage shall be scheduled under any umbrella policy described above. Unless otherwise agreed, this policy shall be endorsed to waive any right of subrogation as respects the AGENCY, its officers, agents or employees.

5-4.3.2 CONTRACTOR and AGENCY further agree as follows:

5-4.3.2.1 This Section supersedes all other sections and provisions of this Agreement to the extent that any other section or provision conflicts with or impairs the provisions of this Section.

5-4.3.2.2 Nothing contained in this Section is to be construed as affecting or altering the legal status of the parties to this Agreement. The insurance requirements set forth in this Section are intended to be separate and distinct from any other provision in this Agreement and shall be interpreted as such.

5-4.3.2.3 All insurance coverage and limits provided pursuant to this Agreement shall apply to the full extent of the policies involved, available, or applicable. Nothing contained in this Agreement or any other agreement relating to the AGENCY or its operations limits the application of each insurance coverage.

5-4.3.2.4 Requirements of specific coverage features or limits contained in this Section are not intended as a limitation on coverage, limits or other requirements, or a waiver of any coverage normally provided by any insurance. Specific reference to a given coverage feature is for purposes of clarification only and is not intended by any party to be all-inclusive, or to the exclusion of other coverage, or a waiver of any type.

5-4.3.2.5 For purposes of insurance coverage only, this Agreement shall be deemed to have been executed immediately upon any party hereto taking any steps that can be deemed to be in furtherance of or towards performance of this Agreement.

5-4.3.2.6 All general or auto liability insurance coverage provided pursuant to this Agreement, or any other agreements pertaining to the performance of this Agreement, shall not prohibit CONTRACTOR, and CONTRACTOR's agents, officers or employees from waiving the right of subrogation prior to a loss. Contractor hereby waives all rights of subrogation against AGENCY.

5-4.3.2.7 Unless otherwise approved by AGENCY, CONTRACTOR's insurance shall be written by insurers authorized to do business in the State of California and with a minimum "Best's" Insurance Guide rating of "A+VIII." Self-insurance will not be considered to comply with these insurance specifications.

5-4.3.2.8 In the event any policy of insurance required by this Agreement does not comply with these requirements or is canceled and not replaced, AGENCY has the right but not the duty to obtain the insurance it deems necessary and any premium paid by AGENCY will be promptly reimbursed by CONTRACTOR. Upon CONTRACTOR's failure to make such reimbursement within 30 days of written demand, AGENCY may deduct that sum from any monies due CONTRACTOR hereunder or otherwise.

5-4.3.2.9 CONTRACTOR agrees to provide evidence of the insurance required herein, satisfactory to AGENCY, consisting of certificate(s) of insurance evidencing all of the coverages required and an additional insured endorsement to CONTRACTOR's general liability and umbrella liability policy (if any) using ISO form CG 20 10 11 85. Certificate(s) are to reflect that the insurer will provide 30 days' notice of any cancellation of coverage. CONTRACTOR agrees to require its insurer to modify such certificates to delete any exculpatory wording stating that failure of insurer to mail written notice of cancellation imposes no obligation, and to delete the word "endeavor" with regard to any notice provisions. CONTRACTOR agrees to provide complete copies of policies to AGENCY upon request.

5-4.3.2.10 CONTRACTOR shall provide proof that policies of insurance required herein expiring during the term of this Agreement have been renewed or replaced with other policies providing at least the same coverage. Such proof shall be furnished within 72 hours of the expiration of the coverages.

5-4.3.2.11 Any actual or alleged failure on the part of AGENCY or any other additional insured under these requirements to obtain proof of insurance required under this Agreement in no way waives any right or remedy of AGENCY or any additional insured, in this or any other regard.

5-4.3.2.12 CONTRACTOR agrees to require all subcontractors or other parties hired for this project to provide general liability insurance naming as additional insureds all parties to this Agreement. CONTRACTOR agrees to obtain certificates evidencing such coverage and make reasonable efforts to ensure that such coverage is provided as required here. CONTRACTOR agrees to require that no contract used by any subcontractor, or contracts CONTRACTOR enters into on behalf of AGENCY, will reserve the right to charge back to AGENCY the cost of insurance required by this Agreement. CONTRACTOR agrees that upon request, all agreements with subcontractors or others with whom CONTRACTOR contracts on behalf of AGENCY will be submitted to AGENCY for review. Failure of AGENCY to request copies of such agreement will not impose any liability on AGENCY, its officers, agents, or employees.

5-4.3.2.13 If CONTRACTOR is a Limited Liability Company, general liability coverage must be amended so that the Limited Liability Company and its Managers, Affiliates, employees, agents and other persons necessary or incidental to its operations are insureds.

5-4.3.2.14 CONTRACTOR agrees to provide immediate notice to AGENCY of any claim or loss against CONTRACTOR that includes AGENCY as a defendant. AGENCY assumes no obligation or liability by such notice, but has the right (but not the duty) to monitor the handling of any such claim or claims.

5-7 SAFETY

Add the following:

At the pre-construction meeting, the Contractor shall submit his/her complete construction schedule to the Engineer for approval. The Contractor shall submit requests for changes in the schedule to the Engineer for approval at least forty eight (48) hours prior to the scheduled Work.

Add the following Subsection 5-8 Project Information Sign:

5-8 PROJECT INFORMATION SIGN

Work specified in this section includes providing all materials and performing all operations to fabricate, install, modify and/or relocate Project Information Signs, and as specified in these Special Provisions.

Submit a shop drawings for all sign panels, and the Manufacturer's data for the Sign Panels.

MATERIALS

A. Project Information Signs shall be constructed per Caltrans specifications for aluminum single sheet and laminated panel signs.

B. Sign Posts shall be constructed of wood and shall conform to the provisions of section 56-2.02B, Caltrans.

C. Mounting Hardware shall be furnished by the Contractor and shall conform to the provisions of section 56-2.02D, Caltrans.

D. To properly provide for changing traffic conditions, the Contractor shall be prepared to furnish on short notice (within 48 hours) additional sign panels, posts and mounting hardware. The Contractor shall make arrangements with a supplier who is able, on a daily basis, to furnish such items on short notice.

INSTALLATION

A. For this contract, **<u>One (1) Project Information shall be installed</u>**, relocated or modified as directed by the City Engineer and shall conform to the provisions of sections 56-2.03, and 56-2.04, Caltrans.

B. All signs shall have breakaway features as detailed in Standard Plan RS2, "Roadside Sign Details," Caltrans.

C. Signs to be removed and/or relocated as directed by the City Engineer shall be installed at the new location on the same day said sign is removed from its previous location.

D. The location of each sign shall be as directed by the City Engineer or his designee.

Project information sign should be installed in a way to have bottom of sign at least 7 feet above the ground.

The project information signs shall be erected five (5) working days prior to the start of work.

The sign shall show the project name, funding source, and City logo. The sign shall list the names of the City Manager, City Council, Director of Development Services, and City Engineer. Contractor shall submit a mock-up to the City for review prior to manufacturing sign. The Contractor shall revise all misspellings and any other corrections on the sign at no extra cost to the City.

Upon completion of the project, City shall keep all of the Project Information Signs.

Measurement and payment for **Project Information Sign** shall be at the unit bid price per **each (EA)** and shall include full compensation for furnishing all labor, materials, tools, equipment, and incidentals for doing all work involved in construction of these items and no additional compensation will be allowed therefore.

SECTION 6 – PROSECUTION AND PROGRESS OF THE WORK

6-1 CONSTRUCTION SCHEDULE AND COMMENCEMENT OF THE WORK

Add the following:

Prior to issuing the Notice to Proceed, the Engineer will schedule and conduct a pre-construction meeting with the Contractor to review the proposed construction schedule and delivery dates, arrange utility coordination, discuss construction methods, and clarify inspection procedures.

6-2 PROSECUTION OF THE WORK

Replace the last sentence of first paragraph with the following:

Should the Contractor fail to take the necessary steps to fully accomplish said purposes, after orders of the Engineer to do so, the Agency may suspend the work in whole or in part, until the Contractor takes said steps at no cost to the Agency.

Add the following:

The Contractor shall submit monthly progress reports to the Engineer by the tenth day of each month. The report shall include an updated construction schedule. Any deviations from the original schedule shall be explained. Progress payments will be withheld pending receipt of any outstanding reports.

The Contractor shall provide the following:

(1) The Contractor must place concrete within 3 working days after the removal of existing concrete. Asphalt Concrete pavement replacement at driveways shall be installed within 3 calendar days of pouring concrete.

(2) AC pavement replacement shall be installed the same day as removals are performed.

(3) The Contractor shall clean up all rubble/debris piles daily.

(4) The Contractor shall not commence any cold milling operation more than 3 calendar days ahead of paving.

(5) Cat track striping shall be performed within 24 hours of paving on all streets. Permanent striping shall be performed within 72 hours of cat tracking

(6) Manhole frames and covers to be raised shall be raised and patched with ARHM within 3 calendar days of final day of ARHM overlay paving.

FAILURE OF THE CONTRACTOR TO COMPLY WITH THE AFOREMENTIONED WORK SCHEDULING REQUIREMENTS, (1)-(7), DUE TO CONDITIONS UNDER HIS CONTROL WILL RESULT IN DAMAGES BEING SUSTAINED BY THE AGENCY. SUCH DAMAGES ARE, AND WILL CONTINUE TO BE, IMPRACTICAL AND EXTREMELY DIFFICULT TO DETERMINE. FOR EACH DAY THE CONTRACTOR FAILS TO CONFORM TO THESE REQUIREMENTS, THE CONTRACTOR SHALL PAY TO THE AGENCY, OR HAVE WITHHELD MONIES DUE TO HIM THE SUM OF ONE THOUSAND THREE HUNDRED DOLLARS ($1,300.00), AS LIQUIDATED DAMAGES FOR EACH CALENDAR DAY.

6-3 TIME OF COMPLETION

Add the following subsection:

6-3.3 WORKING DAY

The Contractor's activities shall be confined to the hours between 8:30 a.m. and 4:30 p.m. Monday through Friday. In addition, the Contractor shall not perform any Work on Saturday, Sunday, or on Agency-designated holidays. Agency-designated holidays are listed in **TABLE 1 – AGENCY-DESIGNATED HOLIDAYS** below. Deviation from these hours will be permitted upon approval of the Engineer, except in emergencies involving immediate hazard to persons or property.

Deviations from these hours will not be permitted without the prior consent of the Engineer, except in emergencies involving immediate hazard to persons or property. In the event of either a requested or emergency deviation, inspection service fees will be charged against the Contractor. Service fees will be calculated at overtime rates including benefits, overhead, and travel time; and will be deducted from the amounts due the Contractor.

Failure of the Contractor to adhere to working day requirements will result in damages being sustained by the City. Such damages are, and will continue to be, impracticable and extremely difficult to determine. For each OCCURRENCE of a working day or hours violation, as provided herein, the Contractor shall pay to the Agency, or have withheld from monies due to it, the sum of $1,000.00.

TABLE 1 – AGENCY-DESIGNATED HOLIDAYS

New Year's Day
Martin Luther King, Jr. Day
President's Day
Memorial Day
Independence Day
Juneteenth Day
Labor Day

Veteran's Day
Thanksgiving Day
Day after Thanksgiving
Christmas Eve
Christmas Day

EXECUTION OF THE CONTRACT SHALL CONSTITUTE AGREEMENT BY THE AGENCY AND CONTRACTOR THAT $1,000 PER VIOLATION IS THE MINIMUM VALUE OF THE COST AND ACTUAL DAMAGED CAUSED BY FAILURE OF THE CONTRACTOR TO LIMIT PERFORMANCE OF THE WORK BETWEEN THE ALLOTTED TIMES, THAT SUCH SUM SHALL NOT BE CONSTRUED AS A PENALTY, AND THAT SUCH SUM MAY BE DEDUCTED FROM PAYMENTS DUE THE CONTRACTOR IF SUCH DELAY OCCURS.

6-4 DELAYS AND EXTENSION OF TIME

6-4.1 GENERAL

Add the following Subsections:

6-4.1.1 Notice of Delays

Whenever the Contractor foresees any delay in the prosecution of the work, and in any event immediately upon the occurrence of any delay which the Contractor regards as unavoidable, he/she shall notify the Engineer in writing of the probability of the occurrence of such delay and its cause so that the Engineer may take immediate steps to prevent, if possible, the occurrence or continuance of the delay, or, if prevention is not possible, may determine whether the delay is to be considered avoidable or unavoidable, how long it continues, and to what extent it will delay the prosecution and completion of the work. It will be concluded that any and all delays which have occurred in the prosecution and completion of the work have been avoidable delays, except such delays as shall have been called to the attention of the Engineer at the time of their occurrence and found by him/her to have been unavoidable. The Contractor shall make no claims for any delay not called to the attention of the Engineer at the time of its occurrence as an unavoidable delay.

6-4.1.2 Avoidable Delays

Avoidable delays in the prosecution or completion of the work shall include all delays which in the opinion of the Engineer would have been avoided by the exercise of care, prudence, foresight, and diligence on the part of the Contractor of his/her subcontractors. The following shall be considered avoidable delays within the meaning of the contract: 1) Delays in the prosecution of parts of the work which may in themselves be unavoidable but do not necessarily prevent or delay the prosecution of other parts of the work or the completion of the whole work within the time herein specified; 2) Reasonable loss of time resulting from the necessity of submitting samples of materials and drawings to the Engineer for approval and from performing tests of materials, measurements, and inspections; 3) Reasonable interference of other contractors employed by the Agency and/or other contractors working in the area which do not necessarily prevent the completion of the whole work within the time agreed upon; 4) Delays resulting from inaccurate or incomplete shop drawing submittals; and 5) Interference of other contractors performing concurrent work.

6-4.1.3 Extension of Time

In case the work is not completed in the time specified, including such extensions of time as may have been granted for unavoidable delays, the Contractor will be assessed damages for delay in accordance with Paragraph 6-9. The Agency, however, shall have the right to grant an extension of time for avoidable delay if it is deemed in his/her best interest to do so. During such extension of time, the

Contractor will be charged for engineering and inspection services and other costs as provided in Paragraph 6-4.2.1 but will not be assessed damages pursuant to Paragraph 6-9.

6-4.2 EXTENSIONS OF TIME

Add the following Subsection:

6-4.2.1 Compensation to Agency for Extension of Time

Compensation for extension of time for avoidable delay granted pursuant to Paragraph 6-4.1.3 shall be the actual cost to the Agency for engineering, inspection, general supervision, and overhead expenses which are directly chargeable to the work and which accrue during the period of such extension, except that the cost of final inspection and preparation of the final estimate shall not be included.

6-4.4 WRITTEN NOTICE AND REPORT

Replace Subsection 6-4.4 with the following:

Requests for an extension of time must be delivered to the Agency within ten (10) consecutive calendar days following the date of the occurrence that caused the delay. The request must be submitted in writing and must state the cause of the delay, the date of the occurrence causing the delay, and the amount of additional time requested. This shall be included as part of a revised construction schedule required in Section 6-1. Requests for extensions of time shall be supported by all evidence reasonably available or known to the Contractor, which would support the extension of time requested. Requests for extensions of time, which are not received within the time specified above, shall result in the forfeiture of the Contractor's right to receive any extension of time requested.

If the Contractor is requesting an extension of time because of weather, he/she shall supply daily written reports to the Agency's representative describing such weather, and the work that could not be performed that day because of such weather or conditions resulting therefrom and that he/she otherwise would have performed.

6-9 LIQUIDATED DAMAGES

Replace Subsection 6-9 Liquidated Damages with the following:

6-9 FORFEITURE DUE TO DELAY

The Contractor shall complete all or any designated portion of the Work called for under the Contract within the time set forth in Part C (Proposal) of these Specifications.

In accordance with Government Code 53069.85, and all other applicable law, the Contractor agrees to forfeit and pay the Agency the amount of Five Hundred Dollars ($500.00) per day for each and every day of unauthorized delay beyond the completion date, which shall be deducted from any monies due the Contractor. This payment shall be considered liquidated damages. Contractor agrees that such liquidated damages are reasonable under the circumstances existing at the time of execution of the contract, that such liquidated damages are to compensate Agency for losses that are difficult to measure and that such damages are not a penalty.

Failure of the Contractor to perform any covenant or condition contained in the Contract Documents within the time period specified shall constitute a material breach of this Contract entitling the Agency to terminate the Contract unless the Contractor applies for, and receives, an extension of time in accordance with the procedures set forth in Section 6-4.

Failure of the Agency to insist upon the performance of any covenant or conditions within the time period specified in the Contract Documents shall not constitute a waiver of the Contractor's duty to complete performance within the designated periods unless the Agency has executed a waiver in writing.

The Agency's agreement to waive a specific time provision or to extend the time for performance shall not constitute a waiver of any other time provision contained in the Contract Documents.

Failure of the Contractor to complete performance promptly within the additional time authorized in a waiver or extension of time agreement shall constitute a material breach of this Contract entitling the Agency to terminate this agreement.

The Contractor shall not be deemed in breach of this Contract and no forfeiture due to delay shall be made because of any delays in the completion of the Work due to unforeseeable causes beyond the control and without the fault or negligence of the Contractor provided the Contractor requests an extension of time in accordance with the procedures set forth in Section 6-4. Unforeseeable causes of delay beyond the control of the Contractor shall include acts of God, acts of a public enemy, acts of the government, acts of the Agency, or acts of another contractor in the performance of a contract with the Agency, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and weather, or delays of subcontractors due to such causes, or delays caused by failure of the owner of a utility to provide for removal or relocation of existing utility facilities. Delays caused by actions or neglect of Contractor or his/her agents, servants, employees, officers, subcontractors, directors, or of any party contracting to perform part of all of the Work or to supply any equipment or materials shall not be excusable delays. Excusable delays (those beyond the Contractor's control) shall not entitle the Contractor to any additional compensation. The sole recourse of the Contractor shall be to seek an extension of time.

Add the following Subsections:

6-10 DISPUTES AND CLAIMS

6-10.1 GENERAL

Any and all decisions made on appeal pursuant to this Subsection 6-10 shall be in writing. Any "decision" purportedly made pursuant to this Subsection 6-10 that is not in writing shall not be binding upon the Agency and should not be relied upon by the Contractor.

Nothing in this subsection shall be considered as relieving the Contractor from his/her duty to file the notice required under Subsection 6-11 or other duties required by the Contract Documents.

6-10.2 ADMINISTRATIVE REVIEW

Request for review made to the Construction Inspector or Project Engineer may be either oral or written. Request for review made to the City Engineer shall be made in writing with supporting evidence attached.

The Contractor shall submit each request for review within twenty-one (21) calendar days of receipt of the decision that he/she is requesting.

Prior to demand for arbitration, the Contractor shall exhaust his/her administrative remedies by attempting to resolve his/her dispute or claim with Agency`s staff in the following sequence:

1. Project Engineer
2. City Engineer

Should the Project Engineer fail to address the Contractor's request for review of a disputed decision within fourteen (14) calendar days after receiving such request, the Contractor may proceed directly to the City Engineer. At the option of the Agency, the person to whom the request for review is directed may elect to take such request to a higher level and the Contractor's request shall be deemed to be properly submitted to such higher level.

The City Engineer shall address disputes or claims within twenty eight (28) calendar days after receiving such request and all necessary supporting data. The City Engineer's decision on the dispute or claim shall be the Agency's final decision.

6-10.3 ARBITRATION

Claims and disputes arising under or related to the performance of the contract shall be resolved in arbitration unless the Agency and the Contractor agree in writing, after the claim or dispute has arisen, to waive arbitration and to have the claim or dispute litigated in court of competent jurisdiction. Arbitration shall be conducted, to the extent feasible, pursuant to Chapter 3 (Sections 301-393, inclusive) of Division 2 of Title 1 of the California Code of Regulations except that references therein to the "State Contract Act" shall be construed to mean "applicable law" and "Public Agency", or "Department" shall be construed to mean "Agency" as defined in Subsection 1.2. The arbitration decision shall be decided under and in accordance with California law, supported by substantial evidence, and in writing, contain the basis for the decision, findings of fact, and conclusions of law.

Arbitration shall be initiated by a Demand for Arbitration. The Contractor shall request a Demand for Arbitration not later than one hundred eighty (180) calendar days after the date of the final written decision of the Agency on the claim or dispute.

All contracts valued at more than $15,000 between the Contractor and his/her Subcontractors and Suppliers shall include a provision that the Subcontractors and Suppliers shall be bound to the Contractor to the same extent that the Contractor is bound to the Agency by all terms and provisions of the Contract, including these arbitration provisions.

6-11 NOTICE OF POTENTIAL CLAIM

The Contractor shall not be entitled to the payment of any additional compensation for any cause, including any act, or failure to act, by the Engineer, or the happening of any event, thing or occurrence, unless the Contractor shall have given the Engineer due notice in writing, of the potential claim as hereinafter specified, provided, however, that compliance with this Subsection 6-11 shall not be a prerequisite as to any claim that is based on differences in measurements or errors of computation as to the Contract quantities.

Additionally, this Subsection 6-11 shall not supersede the specific notice and protest requirements of Subsection 2-9 "Changed Conditions" and Subsection 6-3.2 "Contract Time Accounting" respectively.

A written notice of potential claim shall set forth the reasons the Contractor believes additional compensation will or may be due, the nature of the costs involved, and, insofar as possible, the amount of the potential claim. A notice as above required must have been given to the Engineer prior to the time that the Contractor shall have performed the Work giving rise to the potential claim for additional compensation, if based on an act or failure to act by the Engineer, or in all other cases within fifteen (15) days after the happening of the event, thing or occurrence giving rise to the potential claim.

It is the intention of this Subsection 6-11 that differences between the parties arising under and by the virtue of the Contract be brought to the attention of the Engineer at the earliest possible time in order that such matters may be settled, if possible, or other appropriate action promptly taken. The Contractor hereby agrees that he/she shall have no right to additional compensation for any claim that may be based

on any such act, failure to act, event, thing or occurrence for which no written notice of potential claim as herein required was filed.

SECTION 7 – MEASUREMENT AND PAYMENT

7-3 PAYMENT

7-3.2 PARTIAL AND FINAL PAYMENT

Replace the last paragraph of this subsection with the following:

The closure date for period progress payments will be the twenty-fifth day of each month. Authorization to pay is commonly received on the second Wednesday of the following month. The Agency requires four to six weeks to review all progress payments, issue payment checks, present progress payment to Council for approval, and release payment to contractor. However, payments will be withheld pending receipt of any outstanding reports required by the Contract Documents. In addition, the final progress payment will not be released until the Contractor returns the control set of plans and specifications showing the as-built conditions.

The full five (5) percent retention will be deducted from all payments. The final retention will be authorized for payment thirty five (35) days after the date of recordation of the Notice of Completion.

The Contractor may substitute securities for any monies withheld by the Agency to ensure performance under the Contract as provided in Public Contract Code Sections 10263 and 22300.

7-3.3 DELIVERED MATERIALS

Replace Subsection 7-3.3 with the following:

Materials and equipment delivered but not incorporated into the Work will not be included in the estimate for progress payment.

7-3.4 Mobilization

Replace Subsection 7-3.4 with the following:

Mobilization and demobilization shall consist of preparatory work and operations including, but not limited to, those necessary for the movement of personnel, equipment, materials, and incidentals to the project site necessary for work on the project and for all other work and operations which must be performed or costs incurred including bonds, insurance, and financing prior to beginning work on the various contract items on the project site. Mobilization shall also include the time, materials, and labor to move the necessary construction equipment to and from the site, supervisory time on the job by the Contractor's personnel to keep the construction site in a safe condition, and all other related work as required at all times and for all non-working days during the construction period. The Contractor is responsible for securing an adequate storage site for equipment and materials.

Contractor shall provide traffic control per California Temporary Traffic Control Handbook. Contractor must maintain access for visitors to the properties. One driveway must always remain open and accessible.

Payment for **Mobilization** shall be included in the other items of work and shall be considered full compensation and include but not be limited to, obtaining all business licenses and permits, as

required for the entire project, from all related agencies, including, but not limited to, utility companies, private and public agencies and the City of Los Alamitos; and complying with the requirements specified in those licenses and permits; coordination, field office facility, implementation of Best Management Practices, and incidentals necessary to perform all related items of work.

SECTION F

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

SPECIAL PROVISIONS

SPECIAL PROVISIONS

Except as hereinafter amended, the provisions of the 2021 Edition of the "Green Book," Standard Specifications for Public Works Construction ("SSPWC"), with the latest Supplements, prepared and promulgated by the Southern California Chapters of the American Public Works Association and the Associated General Contractors of America, and these modifications thereto are adopted as the "Standard Specifications" for the Agency. These Standard Specifications will be numbered as Sections 0 through 800 per the SSPWC.

PART 2 - CONSTRUCTION MATERIALS

SECTION 201 - CONCRETE, MORTAR, AND RELATED MATERIALS

201-1 PORTLAND CEMENT CONCRETE

201-1.1 Requirements

201-1.1.1 General.

Add the following:

The same brand, type, and source of cement and aggregate shall be used for all portland cement concrete.

Fly ash shall not be used.

201-1.2 Materials.

201-1.2.4 Chemical Admixtures**.**

Add the following:

1. Retarding Densifier. The material shall be of the hydroxylated carboxylic acid type in liquid form and shall not entrain air or cause foaming. The retarding densifier shall be used in strict compliance with the printed recommendations of the manufacturer. There shall be no reduction in the cement content of the concrete mix because of the addition of the retarding densifier.

The admixture shall be such that its addition to the concrete mix will:

a. Decrease drying shrinkage;
b. Increase compressive strength for all concrete strength for all concrete ages from 3 days to 1 year;
c. Increase flexural strengths, modulus of elasticity and abrasion resistance;
d. Increase the slump and placement workability;
e. Retard the initial set and increase the density; and
f. Shall contain no calcium or tri-ethanolamine.

At the discretion of the Engineer, the Contractor may be required to submit proof that the admixture he proposed to use meets the foregoing requirements. Such proof shall be in the form of comparative tests of plain and admixture containing mixes performed by an acceptable local laboratory with testing based on use of the project materials and in accordance with the requirements of ASTM C 157. An approved admixture conforming to these requirements is plastiment retarding densifier in liquid form.

201-3 EXPANSION JOINT FILLER AND JOINT SEALANTS

201-3.1 General.

Add the following:

Contractor shall submit materials to Engineer for approval.

201-3.4 Type "A" Sealant (Two-Part Polyurethane Sealant).

Replace the first paragraph with the following:

Type A Sealant shall be two component silicone sealant and shall be furnished and placed in accordance with Specifications for "Two Component, Machine Mixed, Type A Sealant" (State Specification 8030-61J-01). Submit two samples to the Engineer for approval.

201-4 CONCRETE CURING MATERIALS

201-4.1 Membrane Curing Compounds

201-4.1.1 General.

Add the following:

Concrete curing compound shall be Type 2.

SECTION 203 - BITUMINOUS MATERIALS

203-6 ASPHALT CONCRETE

203-6.1 General.

Add the following:

Asphalt concrete material used for remove and replace repairs within the roadway shall be Class and Grade B-PG 64-10.

203-11 ASPHALT-RUBBER HOT MIX (ARHM)

Subsection 203-11 ASPHALT RUBBER HOT MIX is amended by adding thereto the following paragraphs:

203-11.2 Materials.

Add the following:

Contractor shall maintain a minimum quality control plans as follows:

a) Perform sieve analysis test Caltrans Test 202 on a sample taken immediately after 300 tons of production and every 500 tons thereafter.

b) Perform binder content test Caltrans Test 382 on a sample taken immediately after 300 tons production and every 1,000 tons thereafter.

Tests shall be performed and completed without interruption directly after samples are procured at the production plant laboratory.

A copy of test results shall be provided to the Engineer immediately upon completion of each test or upon request thereafter if Engineer is not present at time of the test.

Adjustments shall be made immediately if test results indicate a need for adjustment.

203-11.2.3 Crumb Rubber Modifier (CRM)**.**

Replace the first paragraph with the following:

The material shall consist of a combination of scrap tire CRM and high natural CRM meeting the requirements of this subsection. Scrap tire CRM shall consist of ground or granulated rubber derived from any combination of automobile tires, truck tires or tire buffing. Whole scrap tire rubber shall be derived from scrap tires generated entirely within the State of California, and the certification of compliance shall so certify.

The high natural rubber shall be a single source material and not a blend of more than one source.

The high natural CRM and CRM rubber components shall not be pre-mixed prior to mixing with paving asphalt.

The percentage of high natural CRM shall be equal to 1000 divided by the percentage of natural rubber in the high natural CRM (using whole number percentages), e.g., 1000/40% equals 25 percent. The remainder of CRM shall be scrap tires.

The maximum value for Natural Rubber Content in Table 203-11.2.3.1(B) is hereby deleted.

Delete the sixth (last) paragraph of Subsection 203-11.2.3.1.

203-11.2.4 Aggregate**.**

Replace this section with the following:

The aggregate for ARHM shall conform to the "quality requirements" for asphalt concrete Type A as specified in Caltrans Standard Specifications.

All aggregate used for ARHM shall be crushed aggregate.

Any change in source of aggregate supply requires 2 weeks advance notice in writing to the Engineer, and submittals and testing in conformance with specifications for a new mix design. No single bin shall receive aggregate from more than one source. Contractor shall provide a copy of aggregate delivery tickets for aggregate delivered for use on the project.

203-11.3 Composition and Grading.

Add the following:

Asphalt-rubber hot-mix shall be type and class ARHM-GG-C.

Optimum binder content shall be based on Caltrans 367 procedure without modification using air voids of 4%. Once full compliance with specifications is established at 4% air voids, the binder content shall thereafter be increased to provide 3.5% voids to conform

to the residential traffic in the project, all other factors being within specification.

Variations of percent air voids below the minimum specified will be cause to terminate paving operations until changes to conform to the specified percent air voids are demonstrated and approved by the Engineer.

The gradation ranges shown in Table 203-11.3, including the ¾" sieve range added herein, shall be considered the Contract Compliance Range. The Operating Range for the ½" sieve shall be 94% to 99%. The Operating Range for all other sieves, except the 200 sieve, shall be 2 percentage points inside the Contract Compliance Range. If gradation test results do not meet the Operating Range requirements but meet the Contract Compliance Range, placement of ARHM may be continued for the remainder of the day. However, another day's work shall not be started until tests, or other information, indicate to the satisfaction of the Engineer that the next material to be used in the work will comply with the requirements specified for Operating Range.

203-11.4 Mixing Asphalt and CRM.

Add the following:

The required mixing/reaction time is hereby modified to 75 minutes minimum. The minimum reaction period shall be the time from complete incorporation of materials into the mix to the time that the asphalt-rubber meets all specifications for reacted material. Reaction shall be considered complete only after the second of two viscosity readings taken 15 minutes apart is less than the first. The Engineer's decision shall be final for determination of the minimum reaction period.

All material shall be tested for viscosity and verified as to completer reaction prior to transfer to any storage tank or use of the reaction tank for feet to the hot mix plant. Material reacted lower than specified temperature, but above 185 degrees C (365 F), or transferred to a storage tank prior to completion of reaction as specified, shall be reacted for a total period of 3 hours prior to use. Any such transfer shall be described in the comments column of the Asphalt Rubber Batch Log.

Each batch of binder shall be tested for viscosity after the minimum reaction time has passed and the following information shall be recorded:

-Temperature of stored asphalt cement material at time of loading
-Time at which the reaction tank is fully loaded
-Tons of asphalt rubber added to the tank for the batch
-Total asphalt rubber in the tank after loading
-The beginning time of reaction (Fully loaded and above 375° F)
-Binder temperature at time of sampling
-Temperature of tested material
-Viscosity reading
-Time of viscosity test (All test results must be completed prior to use.)

A copy of the Asphalt Rubber Batch Log shall be provided to the Engineer upon request. A copy of the batch log sheet and all circle charts for the day shall be faxed to the Engineer within 12 hours of ending production of ARHM for the day.

(A log sheet form will be provided at the preconstruction meeting.)

Construction shall be considered unauthorized until Contractor has faxed the log to the Engineer as arranged at the preconstruction meeting and has in his possession a fax confirmation sheet with a time and date conforming to specification. Under any circumstances, Engineer must be contacted for clearance to pave.

203-11.5 Equipment for production of Asphalt-Rubber.

Add the following to Item C) of 203-11.5:

Reaction Tank. The asphalt-rubber material shall be held in a reaction tank separate from the storage tank feeding the ARHM plant, until the reaction is complete. The reaction tank shall have agitation sufficient to increase the viscosity of the mixture to a peak viscosity reading at least 20 percent higher than the viscosity reading of the material measured at a time that the material otherwise meets specifications for reacted material. The time of reaction may be extended as needed to produce this result. It shall be the responsibility of the Contractor to demonstrate to the Engineer through viscosity readings at appropriate times that the equipment conforms to these requirements. If this cannot be demonstrated, the reaction time shall be 3 hours. Once established, the reaction time shall be the minimum time for reaction unless there are changes in materials or equipment, in which case a new reaction time shall be established per specifications. The Engineer's decision shall be final.

The reaction tank shall have a functioning paper circle chart thermometer device, which shall record tank temperatures whenever asphalt rubber is in any stage of production. Seven days before production of asphalt rubber starts, the Contractor shall provide the Engineer approximately double the number of charts estimated to be needed to produce the necessary binder quantity. These charts will be numbered and signed by the Engineer and returned to the Contractor prior to start of production. These signed and numbered charts shall be used throughout production of the asphalt rubber binder. Charts shall be used in the consecutive order as numbered by the Engineer beginning with number one, and shall be returned weekly after use to the Engineer. Charts will be identified with the date they were used by the Contractor at time of installing on the equipment, and shall be identified as to the tank to which they were attached. Production of asphalt rubber shall be terminated if this procedure is not followed and will not be restarted until Contractor demonstrates to the Engineer that it is capable of complying with this requirement.

At the start of each production day, the paper chart shall be replaced with a new signed, dated and numbered sheet, the lead scribe shall be sharpened or ink well filled, and the circle chart shall be calibrated against a sample of material drawn early from the first batch of the day. Any calibration adjustments shall be recorded in the appropriate space provided on the batch log sheet. A spare functional circle chart device shall be at the plant at all times for immediate installation should failure occur on a circle chart device being used. Calibration shall be performed as part of such installation. The lack of a functional circle chart device on the reaction tank shall be cause to terminate production of asphalt rubber binder. A blunt lead scribe or low ink, or a paper chart used on a prior day will be considered to render the device non-functional.

Storage Tank. After a complete reaction is verified by viscosity readings acceptable to the Engineer, the material shall be held in a storage tank that is fully isolated from material that is not fully reacted. This tank shall be the only tank feeding the ARHM

plant. No material shall be transferred to the storage tank feeding the plant until reaction is complete in the reaction tank.

SECTION 211 - MATERIAL TESTS

211-1 COMPACTION TESTS.

211-1.1 Laboratory Maximum Density.

Add the following:

Laboratory maximum density tests shall be performed in accordance with Test Method No. Calif. 216G, Part II. The correction for oversized material as stated in Test Method No. Calif. 216 shall be replaced with Note 2 of ASTM D1557.

211-1.2 Field Density.

Add the following:

Field density tests will be made by the Engineer during the course of construction at the expense of the CITY. If field density tests indicate that any portion of the compacted subgrade has density lower than that specified, the Contractor shall rework that portion until the specified density is obtained. Retest of areas which have failed compaction will be performed by the Engineer at the Contractor's expense.

PART 3 - CONSTRUCTION METHODS

SECTION 300 - EARTHWORK

300-1 CLEARING AND GRUBBING

300-1.1 General.

.1 General.

Add the following:

In addition to the work outlined in Subsection 300-1 of the Standard Specifications, the following items of work are included in other bid items and no additional payment will be made therefore.

(1) Maintain dust control at all times by watering; including developing a water supply and furnishing and placing all water required for work done in the contract, including water used for extra work and water used for irrigation purposes.

(2) Protection of utilities, trees, fences, walls and other facilities within the construction zone, except those specifically directed by the Engineer to be removed or relocated.

(3) Clearing and removal of debris from site of work.

(4) Removal of structures, as directed by Engineer to be removed or abandoned.

(5) Delay in work necessary to accommodate utility relocations by others.

(6) Other items of work as directed in Appendix Part II, Mitigation Monitoring and Reporting Program.

(7) Other items of work as directed in these specifications. 300-1.3 Removal and Disposal of Material.

300-1.2 Root Pruning and Tree Trimming.

Add the following:

Tree branches which hang within 13.5 feet above finished roadway grade or within 9 feet above finished sidewalk or parkway grade shall be removed to the branch collar in accordance with the current pruning standards of the International Society of Arboriculture (ISA). The Contractor shall remove additional tree branches, under the direction of the Engineer, in such a manner that the tree will present a balanced appearance. No paint or tree sealant shall be applied to the resulting scars. All pruning shall be done under the supervision of an ISA Certified Arborist in the Contractor's employ.
ll be done under the supervision of an ISA Certified Arborist in the Contractor's employ.
l be done under the supervision of an ISA Certified Arborist in the Contractor's employ.

All the root pruning required to place or replace walks, or other permanent facilities shall be limited to the minimum amount necessary to set forms.

All roots 2 inches and larger shall be cut with sharp tool such as axe or chainsaw. No roots shall be broken off by trenching or other heavy equipment.

No root shall be removed within five (5) diameters of the tree trunk measured at 4 feet, 9 inches above grade without the express written permission of the City. Any such root removed without the City's written permission may create a hazardous condition for which the Contractor shall be liable.

Should the Contractor create a hazardous condition in the sole judgment of the Engineer the Contractor shall remove the tree and replace it with a specimen of the same species and value at the Contractor's expense.

All significant root pruning (3-inch diameter and larger) shall be performed under the direct supervision of an ISA Certified Arborist in the Contractor's employ.

All trees noted on the drawings for tree pruning shall have crown reduction and crown thinning performed in accordance with standards published by the Western Chapter of the International Society of Arboriculture (ISA). All pruning shall be performed by ISA certified tree workers under direct supervision of an ISA certified arborist. The Contractor shall furnish such credentials to the Engineer prior to commencement of any tree work.

Add the following Subsection 300-1.2.1:

300-1.2.1 Protection of Existing Trees to Remain.

All trees to remain in place within the limits of work shall be protected from damage by workmen, equipment, and operations. Insofar as prosecution of the work allows, following removal of surrounding pavements, etc., the root area beneath the tree drip line shall be protected from damage, including compaction. Protection shall include temporary fencing, barricades, etc. Warning tape will not be considered sufficient.

300-2 UNCLASSIFIED EXCAVATION

300-2.1 General.

Replace the first paragraph with the following:

Unclassified excavation shall consist of all excavation, including roadways, all types of bituminous pavement, and concrete pavement, curb, walk, gutters, cross gutters, driveways, and access ramps. Removals shall be in accordance with Section 401 Removals.

300-2.9 Payment.

Replace the first sentence with the following:

Payment for unclassified excavation performed as part of the work for "remove and construct" bid items, shall be paid for as part of the work for that item, and no additional compensation will be allowed.

300-4 UNCLASSIFIED FILL

300-4.1 General.

Add the following:

The site shall be graded to the limit lines and elevations shown on the drawings with such allowances as may be required for the construction of walks, and other site improvements. Tolerance for rough grading is 1/10th of a foot (30mm), plus or minus, at drainage swales, building pads, and paved areas. At other areas, appearance shall be the governing factor.

Finish grades shall slope to drain without water pockets or irregularities and shall conform to the intent of all plans and sections, after thorough settlement, and compaction of the soil. Finished grades shall meet all existing or established controls of sidewalks, curbs, and walls and shall be of uniform slope and grade between points of fixed elevations or elevation controls from such point to established grades. Tolerance for finish grading is ¼ inch (6mm), plus or minus.

Make-up fill material in landscaped areas shall be Class A topsoil for the upper 12 inches of fill.

300-4.10 Payment.

Replace this subsection with the following:

Full compensation for furnishing all labor, materials, tools and equipment, and doing all the work involved in unclassified fill construction shall be considered as included in the price paid for "construct" bid item and shall include full compensation for the cost of all grading, shaping, compacting or consolidating and extra fill, if required, or other work that is required under this subsection. No additional payment will be made for unclassified fill.

SECTION 302 -ROADWAY SURFACING

302-5 ASPHALT CONCRETE PAVEMENT

302-5.1 General.

Add the following:

Cracks, joints, and holes to be filled shall be cleaned after cold milling.

AC for AC pavement repairs and for PCC pavement repairs shall be placed the same day as removals are performed.

Add the following Subsection:

302-5.1.1 Preparation Crack Treatment.

A singular crack shall be considered to be a crack on the perimeter of an otherwise uncracked asphalt pavement area, a pavement block, exceeding 4 feet in minimum dimension. Such pavement area is defined by the cracks forming its perimeter. If asphalt concrete pavement is being constructed directly upon an existing asphalt concrete pavement: 1) Contractor shall spray all weeds in cracks with an approved herbicide, such as brand Roundup, a minimum of 1 week prior to paving. All weeds shall be resprayed if rain occurs within 48 hours after application; 2) all holes and cracks exceeding 1.5 inches deep by 5 inches wide by 7 inches long in all 3 dimensions shall be cleaned, tacked and filled with temporary 3/8" (cutback) asphalt concrete compacted level with the top of the existing pavement; 3) all cracks and holes with weeds shall be routed clear to a depth of one-inch; 4) All cracks and joints 1/4 inch or greater in width shall be blown clear with high pressure air; and 5) all singular cracks and joints shall be filled with **Crafco Polyflex Type III** or equal. Crack and joint filling shall **utilize a banding type applicator** (Crack banding machine or equivalent) **or a "shoe" attachment on a wand**, capable of spreading a band 2 to 3 inches wide over the crack, while at the same time striking off the crackfiller at a uniform thickness between 3/32 and 5/32-inch. Thickness shall not exceed 5/32-inch, but if so, crackfiller shall be reheated and replaned to the specified thickness by a method approved by the Engineer.

To ensure awareness of the specification by crackfill crew, the foreman on the crackfill work shall fill out the following certificate, have the certificate at the site of the work, and present the certificate to the inspector on request.

CRACKFILL CREW - CERTIFICATE OF PROCEDURES

*****No work shall begin without this certificate on site, signed by the foreman.*****

As the on-site supervisor of the crackfill crew, I hereby certify that I am aware of and will provide for proper labor and equipment for the work as specified: " capable of spreading a band 2 to 3 inches wide over the crack, while at the same time striking off the crackfiller at a uniform thickness between 3/32 and 5/32-inch thick."

I also certify that I have verified that the crackfill material is the same material shown on the Certification of Compliance, or is the precise product identified in the specifications: Crafco Polyflex Type III

Print Name:

Signed Date

All crack preparation shall be performed after cold milling, and cracks in cold milled areas.

Engineer shall be notified in writing 24 to 48 hours prior to performing crack filling.

Contractor shall seal the largest singular cracks in the quantity specified below for each street segment listed herein respectively, within 15 percent above or below that amount. Quantities more than 15 percent above the amounts shown will not be paid without written authorization from the Engineer. Actual lineal footage sealed will be paid at the bid item price, subject to these provisions.

STREET	LIMITS	TOT. CRK LG
	TOTAL	

302-5.4 Tack Coat.

Add the following:

This item shall consist of a Bituminous Surface Pavement Tack Coat composed of a blend of elastic Polymer modified asphalts, thermoplastic resins and digested whole tire rubber. The Material is applied at 325 to 425 degrees F with a distributor truck at

typical application rates of 0.08 to 0.15 gal/square yard. The exact application rate will be determined by surface conditions at time of application.

Asphalt tack coat material shall be Thermoplastic Polymer Modified HPS No Track Tack (No Track Tack) by Marathon Petroleum, or an approved equal.

This item shall consist of full coverage of No Track Tack to be applied as tack coat between all contact surfaces for patch repairs. The Material is to be applied at 325 to 425 degrees F with a distributor truck at typical application rates of 0.08 to 0.15 gal/square yard. The exact application rate will be determined by surface conditions at time of application.

The Thermoplastic Polymer Modified HPS No Track Tack shall meet the following criteria:

Test	Method	Typical Properties	Specification
Digested whole tire rubber		**2**	**1-3**
Softening Point Degree F	**D36**	**165**	**160 Min**
Penetration @ 77 Deg. F 100g, 5 sec, Dmm	**D-5**	**16**	**10 Min**
Brookfield Viscosity @ 275 Deg. F cPs*	**D4402**	**975**	**3000 Max**
Brookfield Viscosity @ 350 Deg. F cPs*	**D4402**	**185**	**300 Max**

*BKF LV II, spdl #21 @ 20 RPM

The tack coat shall be applied to the existing pavement on the areas to receive the ARHM or AC, or slurry where specified. The Engineer shall approve the exact rate and number of applications. Two heavy coats of SS 1h shall be applied to vertical joints for patching. All contact surfaces with new asphalt shall be painted tack coat immediately before the asphalt concrete is placed.

The tack coat shall be applied as specified in Subsection 302-5.4 of the Standard specifications and these special Provisions. Thermoplastic Polymer Modified No Track Tack shall be applied only when the existing surface is dry and the atmospheric temperature is 50 deg. F and rising. NO material shall be applied when rain is imminent.

The Thermoplastic Polymer Modified No Track Tack shall be heated slowly to 325-425 degrees F. At no time shall the product be heated above 450 degrees F. The

product shall be applied through a distributor truck equipped with a heating unit and shall maintain tack coat at or above 325 degrees F. It shall be equipped with a full circulating spreader bar and pumping system capable of applying the Thermoplastic Polymer Modified No Track Tack material within + 0.01 gallons per square yard tolerance of specified application rate and give uniform covering of the surface to be treated. The distributor shall also include a tachometer, pressure gauge, and volume measuring device and thermometer. The application rates shall be 0.20 gallons per square yard for all slurry seal (where specified) or as otherwise directed by the Engineer.

Paving asphalt shall not be applied until the preparation of the existing surface has been completed and thoroughly cleaned, and then only so far in advance of placing the RAP Slurry as permitted by the Engineer. The No Track Tack shall not be left exposed overnight.

Existing concrete curb faces and all concrete not to be overlaid shall be protected against disfigurement from the asphalt tack coat. Residue of the material shall be removed from concrete surfaces to return the concrete to its original condition unless otherwise directed by the Engineer.

Excessive tracking of tack coat onto adjacent pavements will require immediate clean-up. If significant amounts of asphalt tack coat are tracked onto existing adjacent pavements, the contractor shall be required to clean it off to the satisfaction of the City Engineer or provide a slurry seal to restore the pavement at their own expense. This shall apply to the entirety of asphalt haul routes to and from the project sites.

On all vertical joins of AC patching, apply SS-1H tack coat uniformly in two coats of .20 gallons per square yard each with full "break" in between, or .20 gallons per square yard of HPS No Track Tack uniformly in one coat. Tack coat shall not be applied when the temperature of the surface to be tacked is below 40º F in the shade. A tack coat shall be applied at the following:

1. Pavement joins;

2. Areas where new pavement meets existing pavements;

3. Areas where lift sections from pavement placed on different days meet;

4. Trenches;

5. Areas where existing striping has been sandblasted; and

6. Raised valves and manhole covers.

Payment for tack coat shall be included with the item requiring the tack coat, and no additional compensation will be made therefor.

302-5.5 Distribution and Spreading.

Add the following:

Each paving machine used will require a paving foreman for each machine along with a full set of rollers as specified and two rakers and one shoveler laborer at a minimum.

302-5.6 Rolling.

302-5.6.1 General.

Add the following:

Rolling along a joint shall be such that the widest part of the roller is on the hot side of the joint.

Rubber tire rollers shall be used on any leveling course.

Three rollers shall be provided for installation of AC greater than 200 tons per hour, regardless of thickness.

302-5.7 Joints.

Replace the first sentence of the first paragraph with the following:

Join lines between successive runs shall be within 6 inches of lane lines or center of street or a minimum of 14 feet outside of the outer most lane line or center of street, or 5 to 6 feet from a lane line or center of street and within a lane. The joint pattern for all pavement layers shall be submitted in writing to the Engineer for review and approval 2 weeks in advance of the first lift of pavement to be placed. No exceptions to the specified requirements for joints shall be anticipated, and the Engineer's decision shall be final.

302-5.9 Measurement and Payment.

Add the following:

Compensation to provide all of the equipment to the site and operated as specified, including all rollers specified regardless of rolling pattern elected by Contractor, shall be considered included in the bid item price for AC material.

Payment **Remove Existing AC/AB, Subgrade and Construct 6-Inch Full Depth AC** shall be paid at the contract price per **square foot (SF)** and include full compensation for all labor, materials, tools, equipment and incidentals required to construct full depth AC pavement. This bid item will include furnishing the material, placement, compaction, saw cutting, excavation, hauling, disposal, prime coat, tack coat, asphaltic emulsion coating on vertical surfaces to abut the new pavement, grading and compaction of subgrade, and all other work required to result in an asphalt pavement meeting the requirements of the specifications.

302-9 ASPHALT-RUBBER HOT MIX (ARHM).

302-9.1 General.

Add the following:

All PCC surfaces, to be crossed by trucks used to haul ARHM, that are within 500 feet of the work limits shall be covered with sand or other durable covering prior to applying tack coat.

Contractor shall have sufficient power brooms on site during all periods of distribution and spreading to provide for cleanup of haul routes and work areas. Power broom shall provide miscellaneous cleanup of ARHM spoils as directed by the Engineer.

Power brooms used ahead of paving operations after acceptance of cold milling shall only sweep areas that are accepted as completed for cold milling. Power brooms shall not be operated more than 80 percent full of sweepings. Power brooms that have swept areas not accepted as completed for cold milling shall not enter onto areas that are accepted as completed for cold milling.

302-9.3 Distribution and Spreading.

Add the following:

The temperature of ARHM shall be high enough upon delivery that pavement temperature after two passes with the breakdown roller exceeds 290 degrees Fahrenheit (143 degrees Celsius).

To avoid picking up loose rock in the overlay area, the tires of all trucks must be lightly oiled with linseed oil or soybean oil or approved equal. Diesel fuel will not be allowed on the project at all for oil down of any equipment.

Raking of ARHM shall be eliminated as much as possible. ARHM material shall not be cast across the mat under any circumstance. Raking shall be just enough to set up edges for uniform joins without casting material. Screed controls shall be the predominant means of controlling material at joins. In areas where paving machines cannot be used due to space constraints, material shall not be thrown by shovels. Material shall be removed directly from the paving machine hopper and shall be placed directly in its final location, to be distributed with minimal raking. Material may be dumped directly from a truck, but further material distribution shall be by shovel directly to its final location with minimal raking. A small rubber tire tractor with a screed type attachment may be used to spread a pile dumped from a truck, but raking shall be minimized after spreading.

The paving machine screed shall not be pulled across an area already paved with ARHM, even adjacent to narrow areas to be paved. Such narrow areas shall have ARHM distributed by methods specified by shovel or rubber tire tractor, unless the adjacent area has hardened enough and will not be significantly marred by passing the screed over it. Even if hardened adequately, Contractor shall spread rock dust by hand tools to avoid cohesion of the ARHM in the screed to the existing surface of such areas of freshly cured ARHM.

Contractor shall maintain a functioning infrared heat measurement device in close proximity to each paving machine at all times. The infrared device shall be correlated by thermometer to the actual mat temperature prior to use. The correlation difference shall

be applied to all readings thereafter. Contractor shall provide a pavement temperature reading, with an infrared heat measurement instrument, when requested by the Engineer. Inaccessibility of a heat measurement shall be cause for termination of paving operations.

Transverse cold joints shall be provided such that longitudinal joints are not left exposed at the end of the workday.

302-9.4 Rolling.

Add the following:

Initial breakdown rolling shall be vibratory. Rolling in vibratory mode shall not be performed after ARHM material temperature falls below 290 degrees F (143 degrees C), due to disturbance of the bonds beginning to set up in the binder at lower temperatures.

An intermediate roller of the same or greater width than the breakdown roller shall be rolling directly behind the breakdown roller at all times, and paving shall cease if intermediate rolling is terminated for any reason. Additional intermediate rollers may be necessary depending on production rates.

Once a rolling pattern is elected by Contractor, the rolling pattern shall remain consistent, unless conditions change and/or a modified rolling pattern is needed to conform to specification.

All finish rolling shall be performed by a separate finish roller.

To ensure optimum quality control, the use of more than one paver will require notification 3 days in advance to the Engineer, and will generally require one foreman, one sweeper, and a full complement of rollers per Subsection 302-5 of the Standard Specifications and this Subsection 302-9.4 for each paving machine.

An extra breakdown roller shall be on site at all times, free of defects.

Add the following Subsections:

302-9.4.1 Density and Smoothness. Density and smoothness shall conform to Subsection 302-5.6.2, except the second and third paragraph of Subsection 302-5.6.2 shall not apply to ARHM.

The compaction after rolling shall be 95 percent of density obtained with the California Kneading Compactor, California Test 304 as modified and measured in conformance to this Subsection 302-9.4.1.

The field density of compacted ARHM shall be determined by:

1) A nuclear asphalt testing device, calibrated in conformance with California Test 375, except as modified in this Subsection 302-9.4.1, in the field designed to measure the density of pavement of the thickness being constructed; or

2) Core with density determined as follows:

a) Saw the ARHM lift of pavement from the top of the core approximately perpendicular to the axis of the core, just above any underlying pavement or as necessary to obtain a clean flat surface at the bottom of the sample.

b) Clean and dry the sample as described in ASTM 1188.

c) Perform California DOT Test 308 Method A step a.

d) Prior to proceeding to steps 308A b., 308A c., 308A d. and 308A e., place the core, top surface down, firmly into a flat pan of hot liquid paraffin approximately 1/4 inches deep. Allow the sample and paraffin to cool to firm solid state and remove the sample from the pan by cutting around the perimeter. Trim the edges of paraffin parallel to the side of the sample cylinder, and weigh the cylinder to obtain:

G = Mass in grams of level sealed paraffin-treated specimen in air.

e) Perform 308A b., 308A c., and 308A d on the sample from D) above.

f) Complete the remainder of Test 308A, except replace the formula in 308A e. with the following:

$$\text{Bulk Specific Gravity} = \frac{A}{(D - E) - (D - G) / F}$$

In case of dispute, 1) shall be used, except Contractor may elect to use 2), but all costs for such procedures shall be borne by the Contractor to provide the full set of coring, tests and documentation in conformance with the Standard Specifications, except all test methods shall be modified as specified in these Special Provisions. Also, Contractor shall notify the Engineer at least 3 days in advance of coring operations, and immediately after core testing is complete Contractor shall deliver cores to the Agency for verification.

Nuclear test procedures, including correlation with core densities, shall be in conformance with California Test 375, except as follows:

If a test section is placed and compacted for that purpose, rolling shall be provided as follows: 1) 2 passes with a vibratory breakdown roller above 290 degrees F; and 2) 4 passes with a static roller above 200 degrees F. Core locations for correlation with cores shall be selected based on appearance of relatively tight surface texture, and the test strip shall be selected on this basis. If a test location is determined to have a significantly open texture relative to other areas within the test strip, the location shall not be used. This selection criteria are not to be considered significant to the outcome of, but only as a guideline towards obtaining samples that are relatively well compacted to yield results with minimum standard deviation. The locations shall be well clear of grade breaks and joints. One core centered on the gauge will be used instead of two at each location. Use method 2) in this Subsection 302-9.4.1 to determine density of cores. Surface voids shall not be filled with sand.

Contractor will be notified in writing at least 5 days in advance of such correlation testing and will be invited to have a nuclear gauge onsite to correlate a second gauge. If not independently calibrating at that time, Contractor shall bear the full expense of performing correlation for his nuclear gauge under the specified procedures, but shall notify the City 5 days in advance of such correlation testing, such that the City can correlate with the Contractor's gauge, if Contractor disagrees with City's test results.

TABLE 302-9.4.1A
REDUCED COMPENSATION FACTORS

Relative Compaction (Percent)	Reduced Compensation Factor	Relative Compaction (Percent)	Reduced Compensation Factor
95.0	0.000	93.4	0.062
94.9	0.002	93.3	0.068
94.8	0.004	93.2	0.075
94.7	0.006	93.1	0.082
94.6	0.009	93.0	0.090
94.5	0.012	92.9	0.098
94.4	0.015	92.8	0.108
94.3	0.018	92.7	0.118
94.2	0.022	92.6	0.129
94.1	0.026	92.5	0.142
94.0	0.030	92.4	0.157
93.9	0.034	92.3	0.175
93.8	0.039	92.2	0.196
93.7	0.044	92.1	0.225
93.6	0.050	92.0	0.300
93.5	0.056		

302-9.4.2 Compaction Payment Reductions.

Based on laboratory tests on AC pavements revealing a highly significant loss of life span for each 1 percent reduction of compaction, and the well known catastrophic effect of oxidation and stripping of asphalt products due to interconnected voids that develop below 95 percent compaction, and the extreme expense of removing and replacing pavement not compacted to the specified minimum, a nominal deduction of payment will be applied for under-compacted ARHM pavement. The bidder in submitting a bid fully accepts the provisions in this Subsection 302-9.4.2 and agrees that the nominal payment deduction is acceptable and reasonable for these purposes.

Payment reductions will be applied to ARHM compacted less than 95 percent of maximum density, the specified minimum, and greater than 91.9 percent of the maximum density based on nuclear testing with Part 3 Test Site Selection of California Test 375 modified as follows:

A lot will be one day's production or other lesser area of paving as determined by the Agency to be deficient in terms of compaction, and a pull will be the width between joints or edge of pavement as the lot is placed.

Test site selection will conform to California Test 375 Part 3, except the number of tests shall be the area of the lot in square feet divided by 400 and any test site within .5m of a grade break or pavement joint shall be relocated laterally towards the center of the pull to .5m from such joint or grade break.

The mathematical mean average of percent of maximum density represented by all these tests shall be calculated, except any test results outside of this mean plus two standard deviations based on all tests, shall be rejected. The mean average shall be calculated directly from the remaining values. A compensation reduction in conformance with Table 302-9.4.1A will be applied to the contract unit price for ARHM for material within any lot determined to be below minimum relative compaction, except any lot with tests indicating compaction 91.9 percent or less shall be removed and replaced at Contractor's expense.

302-9.7 Rock Dust Blotter.

Add the following:

Lack of uniformity of application of rock dust shall be cause to terminate paving operations. Rock dust blotter shall not be applied until intermediate rolling is complete, except as approved by the Engineer based on a fine uniform layer of rock dust, or at major intersections and access points.

302-9.9 Payment.

Replace the first sentence of the first paragraph with the following:

Payment for **Construct ARHM Overlay Thickness per plan (GG-C PG 64-16)** shall be paid at the contract price per **ton (TN)** and shall include, but not limited to, full compensation for furnishing all labor, materials, tools, equipment, transportation, crack sealing, tack coat, rock dust blotter, and other incidentals for doing all work, complete, and in place, involved in constructing ARHM overlay as indicated in the contract documents and no additional compensation will be allowed therefor.

SECTION 303 - CONCRETE AND MASONRY CONSTRUCTION

303-5 CONCRETE CURBS, WALKS, GUTTERS, CROSS GUTTERS, ALLEY INTERSECTIONS, ACCESS RAMPS, AND DRIVEWAYS

303-5.1 Requirements.

303-5.1.1 General.

Replace the second paragraph with the following:

Concrete areas behind sidewalks, driveways and right-of-way shall be considered as walks. The Contractor shall protect all new concrete installations from damage by others (subcontractors or the general public such as, blemishes, water stains, stress cracks, graffiti markings, etc.). The removal and replacement of damaged

concrete work shall be performed and no additional cost to the Agency (City). Concrete sidewalk shall be a minimum 4" thick over native soil compacted to a minimum of 95 % relative compaction.

Actual limit of concrete removal shall extend to nearest score mark or joint, if nearest score mark or joint is within 30" limit of removal. Residual from any saw-cutting shall be removed by vacuum. The downstream drain inlet shall be protected. In no case shall the residual be allowed to enter the storm drain system.

Sawcutting shall be accomplished by the use of a power driven saw. The depth of the cut shall be deep enough to provide a clean, straight break without loosening, cracking, or damaging adjoining asphalt or concrete. A clean sawcut edge shall be maintained until new concrete sidewalk is constructed. The exact location of sidewalk removal shall be approved by the City Engineer in the field. Generally, sawcuts shall be on existing joints or score mark.

All necessary sawcutting of existing concrete sidewalks shall be to the lines as required by the City Engineer. Sawcutting shall be included in the unit price and no further compensation shall be made.

It is Contractor's responsibility to protect all existing adjacent features such as landscaping, irrigation system, property's fence/wall/gates, curb and gutter, pull boxes, utility boxes, and etc. in place per Section 400. All damages to these items shall be fixed to the satisfaction of City Engineer without any additional compensation.

Concrete sidewalk shall be constructed to the line, grades and designs shown on the plans or as ordered by the City Engineer. Existing surfaces to be joined shall be sawcut on a neat, straight line at the join location. The Contractor shall remove and replace any new concrete work with graffiti markings and blemishes at no additional cost to the City.

Unless otherwise specified, soil in subgrade for curb and gutter shall be compacted to a relative compaction of ninety-five (95) percent in the top six (6) inches of subgrade.

Detectable warning surface (truncated domes) for curb ramps shall be Cast-in-Place System per Armor Tile Part No. ADA-C-3648 or approved equal, unless otherwise noted. Color shall be yellow.

Payment of detectable warning surface for new ramps shall be included in the unit price bid for removal and construction of new curb ramps per SPPWC STD Plan 111-5.

303-5.1.2 Drainage Outlets Through Curb.

Replace the second paragraph with the following:

Prior to removal of concrete curb and gutter, Contractor shall identify all curb

drains that will be disturbed by the removal and construction of curb and gutter and shall provide locations and quantity of curb drains to the City inspector. Approximate locations of impacted curb drains are shown on the plans but do not represent locations of all impacted curb drains. Contractor is responsible to replace all impacted curb drains, whether shown or not shown on plans. Any curb and gutter that is poured without prior approval from the City inspector may be subject to removal and replacement at the Contractor's expense and no additional compensation will be allowed.

303-5.9 Measurement and Payment.

Add the following:

Payment for **Remove and Construct Curb Ramp per SPPWC STD Plan 111-5 (Case and Type per Plan)** shall be paid at the contract price per **each (EA)** and shall include full compensation and include but not limited to furnishing all labor, materials, tools, cast-in-place truncated domes, equipment, saw cutting, hauling, disposing, curb, gutter, and incidentals for the removal of existing surface and construction of curb ramps per SPPWC STD Plan 111-5 and no additional compensation will be made therefor.

Payment for **Remove and Construct Curb and Gutter per SPPWC STD Plan 120-3, Type A2-6** shall be paid at the contract price per **linear foot (LF)** and shall include full compensation and include but not limited to furnishing all labor, materials, tools, equipment, saw cutting, hauling, disposing, restoring landscape and irrigation, and incidentals, for the removal of existing curb and gutter and construction of curb and gutter per SPPWC STD Plan 120-3 and no additional compensation will be made therefor.

Payment for **Remove and Construct 4-inch Thick PCC Sidewalk per SPPWC STD Plan 113-2** shall be paid at the contract price per **square foot (SF)** and shall include full compensation and include but not limited to furnishing all labor, materials, tools, equipment, saw cutting, hauling, disposing, restoring landscape and irrigation, and incidentals for the removal of existing surface and construction of 4-inch thick PCC sidewalk per SPPWC STD Plan No. 113-2 and no additional compensation will be made therefor.

Payment for **Remove and Construct Cross/ Longitudinal Gutter and/or spandrel per SPPWC STD Plan 122-3** shall be paid at the contract price per **square foot (SF)** and shall include full compensation and include but not limited to furnishing all labor, materials, tools, equipment, saw cutting, hauling, disposing, restoring landscape and irrigation, and incidentals for the removal of existing surface and construction of cross/longitudinal gutter per SPPWC STD Plan No. 122-3 and no additional compensation will be made therefor.

Payment for **Remove and Construct Curb Drain per SPPWC STD Plan 150-4. Match Existing Case, Slope, N And Material. Connect To Existing Drain Behind Curb Face And/Or Back Of Walk** shall be paid at the contract price per **each (EA)** and shall include full compensation and include but not limited to furnishing all labor, materials, tools, equipment, sidewalk replacement, saw cutting, hauling, disposing, and incidentals for the removal of existing curb drain and construction of curb drain in-kind per SPPWC STD Plan 150-4 and no additional compensation will be made therefor.

Payment for **Install Surface Applied Truncated Domes Per SPPWC STD Plan 111-5** shall be paid at the contract price per **each (EA)** and shall include full compensation and include but not limited to furnishing all labor, materials, tools, equipment, hauling, saw cutting, disposing and incidentals for the installation of surface applied truncated domes per SPPWC STD Plan 111-5 and no additional compensation will be made therefor.

PART 4 – EXISTING IMPROVEMENTS

400 PROTECTION AND RESTORATION

401-1 GENERAL

Replace the second paragraph with the following:

The Contractor shall relocate, repair, replace or reestablish all existing improvements within the project limits (e.g., curbs, sidewalks, driveways, fences, walls, sprinkler systems, signs, utility installations, pavements, structures, survey monuments, landscaping, etc.) that are damaged or removed as a result of the Contractor's operations or as required by the plans and specifications.

All existing improvements, either within the right-of-way or not, including irrigation lines that are damaged by actions of the Contractor, shall be restored by the Contractor to their original or better condition at the Contractor's expense.

The Contractor shall mark, as approved by the Engineer, all survey monuments, manholes, valves, substructures, or other items that are visible on the surface and will be covered by his operations. This shall be completed prior to the start of that operation and approved by the Engineer.

Existing traffic striping, pavement markings, and curb markings shall also be considered as existing improvements and the Contractor shall repaint or replace, at the Contractor's expense, such striping or markings (except for traffic striping and pavement markings within the limits of the Work) if damaged or if their reflectivity is reduced due to construction operations.

400-3 PAYMENT

Replace the last sentence of the first paragraph with the following:

All costs to the Contractor for protecting, removing, restoring, relocating, repairing, replacing, or reestablishing existing improvements shall be included in the Bid.

SECTION 401 – REMOVAL

401-2 ASPHALT CONCRETE PAVEMENT

Add the following:

Bituminous pavement shall be removed to neatly sawed edges. Saw cuts shall be to a minimum depth of 3 inches. Where only the surface of existing bituminous pavement is to be removed, the method of removal shall be approved by the Engineer, and a minimum laying depth of 1 inch of new pavement material shall be provided at the join line. Where bituminous pavement adjoins a trench, the edges adjacent to the trench shall be saw cut to neat straight lines before resurfacing to ensure that all areas to be resurfaced are accessible to the rollers used to compact the subgrade or paving materials.

Bituminous pavement on curb and gutter, sidewalk or drive approaches shall be removed by heating with a torch to soften the pavement without creating smoke. Softening shall be performed until the bituminous material can be easily scraped away down to the underlying PCC surface. The blade used for scraping shall be maintained straight along its edge and clean. Bituminous material shall be scraped in this manner until it is completely removed.

401-3 CONCRETE AND MASONRY IMPROVEMENTS.

401-3.1 Concrete Pavement.

Replace this subsection with the following:

Concrete pavement shall be removed to neatly sawed edges. Saw cuts shall be made to a minimum depth of 3 inches. If a saw cut in concrete pavement falls within 3 feet of a construction joint, cold joint, expansion joint or edge, the concrete shall be removed to the joint or edge. The edges of existing concrete pavement adjacent to trenches, where damaged subsequent to saw cutting of the pavement, shall again be saw cut to neat straight lines for the purpose of removing the damaged pavement areas.

401-3.2 Concrete Curb, Walk, Gutters, Cross Gutters, Curb Ramps, Driveway, and Alley Intersections.

Replace this subsection with the following:

Concrete shall be removed to neatly sawed edges with saw cuts made to a minimum depth of 1½-inches. Concrete sidewalk, or driveway to be removed shall be neatly sawed in straight lines either parallel to the curb or at right angles to the alignment of the sidewalk. No section to be replaced shall be smaller than 30 inches in either length or width. If the saw cut in sidewalk, access ramp, or driveway would fall within 30 inches of a construction joint, expansion joint, or edge, the concrete shall be removed to the joint or edge, except that where the saw cut would fall within 12 inches of a score mark, the saw cut shall be made in and along the score mark. Curb and gutter shall be sawed to a depth of 1½-inches on a neat line at right angles to the curb face.

402 UTILITIES

Add the following Subsections:

402-1.1.1 MANDATORY NOTIFICATION PRIOR TO EXCAVATION

The Contractor's attention is direct to Section 4215.5 through 4217 of the Government Code of the State of California. This requires that two (2) working days prior to commencing any excavation "Underground Service Alert of Southern California" (USA) shall be notified by phone, toll free 1-800-227-2600, for the assignment of an Inquiry Identification Number.

Construction Contractor shall contact all utility companies (e.g. gas company, electric company, telephone company, cable company, water company, and refuse collectors) at least five (5) working days prior to commencing work and shall verify the location of any known utilities and determine whether or not a representative of each company will be present during excavation:

Additionally, the Contractor shall also notify local entities of his/her schedule fourteen (14) days prior to commencing work, including, local law enforcement agencies, the Post Office, Public Schools, and Bus Companies.

No excavation shall commence unless the Contractor has obtained the USA Inquiry Identification Number.

402-1.1.2 ACCURACY OF UTILITIES INFORMATION

The locations of known existing major utilities, whether above ground or underground, are indicated on the plans. Information and data reflected in the Contract Documents with respect to underground and above ground utilities at or contiguous to the site is based upon information and data furnished to the City and the Engineer by the owners of such utilities, and the City does not assume responsibility for the accuracy or completeness thereof. The Contractor shall take all possible precautions for the protection of unforeseen utility lines to provide for uninterrupted service and to provide such special protection as may be necessary.

The Contractor shall be responsible for determining the location and depth of all underground facilities, including service connections, which may affect or be affected by his/her operations and he/she shall include the cost to pothole all utilities within the limits of work in his/her bid. If an existing utility line, which has been marked by Underground Service Alert or is shown on the plans, is damaged by the Contractor, the Contractor shall repair the line and bear the cost thereof.

Contractor shall be aware that electrical conduits between street and traffic lights may exist beneath pavement and/or sidewalk in areas where such lights are in place and that said conduits are not shown on these plans.

In the event that the Contractor damages any existing utility lines that are not shown, shown incorrectly or the locations of which are not made known to the Contractor prior to excavation, a telephone call and written report shall be made immediately to the Utility owner, the Engineer, and to the City. If directed by the City, the Contractor shall make repairs under the provisions for changes and extra work contained in **SECTION 3 – CONTROL OF THE WORK** of the SSPWC Standard Specification.

402-2 PROTECTION

Delete the following text from the last sentence of the fourth paragraph of Section 402-2:

"if located in accordance with 402-1".

402-4 RELOCATION

Replace the second sentence of the fourth paragraph with the following:

When not otherwise required by the plans and specifications and when directed by the Engineer, the Contractor shall arrange for the relocation of service connections as necessary between the meter and property line, or between the meter and limits of construction.

402-5 DELAYS DUE TO UTILITY CONFLICTS

Delete the last paragraph of this section.

403 MANHOLE ADJUSTMENT AND RECONSTRUCTION

403-1 GENERAL

Add the following Subsections:

403-1.1 Adjustment of Los Angeles County Flood Control District Manhole Frame and Cover Sets to Grade.

Adjustments to grade of Los Angeles County Flood Control District Manhole

Frame and Cover sets do not require a District permit. However, the Contractor shall notify the Inspection Department at (818) 458-3129, 24 hours in advance of any work in the area of the manhole.

403-1.2 Adjustment of Water Valve Box Frame and Cover.

Water valve box frame and cover within the area to be paved or graded shall be set to finish grade with a concrete collar by the Contractor as required by the Plans and Specifications. In the case of portland cement concrete pavement, water valve box frame and cover shall be set to finish grade by the Contractor before paving.

403-3 MANHOLES IN ASPHALT CONCRETE PAVEMENT

Add the following:

Pavement patch material around all frame and covers shall conform to the finish pavement layer specifications; PG 64-16 ARHM GG-C.

403-5 PAYMENT

Add the following:

Payment for protection of existing surface utilities shall be included in other items of work and no additional payment will be made therefore, unless separate bid item is provided

Payment for **Adjust Manhole to Grade** shall be paid at the contract price per **each (EA)** and shall include full compensation and include but not limited to furnishing all labor, materials, tools, equipment, and incidentals for Adjust Manhole Frame and Cover to Grade and no additional compensation will be made therefor.

Payment for **Adjust Water Valve to Grade** shall be paid at the contract price per **each (EA)** and shall include full compensation and include but not limited to furnishing all labor, materials, tools, equipment, and incidentals for Adjust Water Valve to Grade and no additional compensation will be made therefor.

SECTION 404 – COLD MILLING

404-2 MILLING MACHINES

Add the following

Milling depth shall be measured 3/8-inch above edge of gutter.

404-2.2 Milling to a Specified Elevation.

Add the following:

b) The straight edge grade along the edge of the cold plane area shall not deviate more than ¼-inch below nor 1/8-inch above the grade specified in the Plans or Specifications.

404-7 WORK SITE MAINTENANCE

Add the following:

Cold milling will not be considered complete until all loosened material is removed from the project site. Paving shall not commence until the day after cold milling is complete.

Cold milled streets shall be approved by the Engineer as completed for cold milling prior to paving. Sweepers used for cold mill sweeping shall not enter on the streets approved as completed for cold milling.

404-11 PAYMENT

Add the following:

Payment for **Cold Mill Existing Pavement 2-Inch Uniform Depth** shall be paid at the contract price per **square foot (SF)** and include full compensation for all labor, materials, tools, equipment, and incidentals required to Cold Mill Existing Asphalt Concrete Pavement. This bid item will shall include, but not limited to, full compensation for furnishing all labor, materials, tools, equipment, transportation, hauling, disposal, and other incidentals for doing all work, complete, and in place, involved in cold milling as indicated in the contract documents, and no additional compensation will be allowed therefor.

PART 6 – TEMPORARY TRAFFIC CONTROL

600 ACCESS

600-1 General

Add the following:

The Contractor will be required to maintain at least one lane of traffic in each direction through the project area at all times in a manner satisfactory to the Engineer in the form of an engineered traffic control plan. The engineered traffic control plans must be signed by a California registered civil and/or traffic engineer. The plan is a required submittal for review at the pre-construction meeting.

All traffic control on the project shall be implemented by a sub-contractor who specializes in Traffic Control and is approved by the City Engineer.

All drop-offs on the pavement over 1 inch in height that are perpendicular to the direction of traffic, including driveway approach, and will remain overnight shall be ramped with temporary AC pavement. The cost to construct temporary AC pavement shall be included in price paid for other items of work, and no additional payment thereof.

All open trenches shall be covered with non-skid steel plates or temporary asphalt pavement before and after work hours, unless otherwise directed by the Engineer.

Add the following Subsection:

600-1.1 Parking Restrictions and Posting for Tow Away

No Parking signs, posted by the Contractor, shall be of heavy card stock and not less than 1.75 square feet of surface area on the face. Background color shall be white and letters shall be printed in red water resistant ink except day, date, and time of restriction may be printed in black water resistant ink. The signs shall be printed with the words "Tow Away" and "No Parking" with a character height of not less than 2.75 inches and a stroke width of not less than 0.5 inches. The day, dated, and time of the particular restriction shall be printed or attached below the above mentioned wording in characters of not less than 2.0 inches in height and 0.4 inches in stroke width. The day of the week shall be written out or properly abbreviated with three to four letters; date or dates or restriction shall be listed completely; the beginning and ending times shall be clearly listed on the sign.

Signs shall be mounted such that the wording "No Parking" are at an elevation at least three feet above the adjacent flowline. Signs may be tied with string to trees and power poles, taped to existing sign poles, or mounted to stakes or barricades as provided by the Contractor. The signs shall be placed as needed to control the parking of cars within the construction zone; signs shall be placed at intervals of 75 feet or less along each side of the roadway.

Signs shall be posted and maintained by the Contractor for a period of 72 hours prior to the restrictions becoming effective. The Contractor may only post parking restrictions that are effective for the duration of the Work. Upon completion of the Work, the Contractor shall promptly and completely remove and dispose all signs, stakes, and barricades. The Contractor shall promptly reset or replace all damaged or defective signs.

The Contractor shall be fully responsible for the adequate removal of all parked cars. The Contractor shall coordinate the removal of all vehicles with the Sheriff Department. The Contractor shall notify the Sheriff Communications Center upon posting of the parking restrictions for a particular street. For removal of parked vehicles, the Contractor shall notify the Sheriff Communications Center not less than two hours prior to the needed removal, stating the address nearest the parked vehicle, make, model, color and license number. The City shall not be responsible for any delay or additional costs associated with the removal of parked cars that obstruct the construction operation.

If a vehicle owner successfully contests a towing citation in court, and their citation is dismissed for causes related to the Contractor's failure to perform the requirements of this section, the Contractor shall reimburse the City for the cost of any claims associated with the towing citation.

DEVIATIONS FROM THE REQUIREMENTS OF THIS SUBSECTION WILL BE PERMITTED ONLY ON PRIOR CONSENT OF THE ENGINEER. FAILURE OF THE CONTRACTOR TO ADHERE TO THE REQUIREMENTS OF THIS SUBSECTION, OR FAILURE OF THE CONTRACTOR TO COMPLETE HIS DAILY SCHEDULE ONCE "TEMPORARY NO PARKING" SIGNS HAVE BEEN POSTED, WILL RESULT IN DAMAGES BEING SUSTAINED BY THE CITY. SUCH DAMAGES ARE, AND WILL CONTINUE TO BE, IMPRACTICABLE AND EXTREMELY DIFFICULT TO DETERMINE. FOR EACH OCCURRENCE OF A VIOLATION, AS PROVIDED HEREIN, THE CONTRACTOR SHALL PAY TO THE AGENCY, OR HAVE WITHHELD FROM MONIES DUE TO IT, THE SUM OF $1,000.00.

EXECUTION OF THE CONTRACT SHALL CONSTITUTE AGREEMENT BY THE AGENCY AND CONTRACTOR THAT $1,000.00 PER VIOLATION IS THE MINIMUM VALUE OF THE COST AND ACTUAL DAMAGE CAUSED, THAT SUCH SUM SHALL NOT BE CONSTRUED AS A PENALTY, AND THAT SUCH SUM MAY BE DEDUCTED FROM PAYMENTS DUE THE CONTRACTOR.

600-1.2 STREET CLOSURE, DETOURS, BARRICADES

Add the following:

All traffic control barricades, signs and devices used by the Contractor shall, as a minimum, conform to the "Manual of Traffic Controls for Construction and Maintenance Work Zones," adopted by and in current use by the State of California, Department of Transportation. Channelization devices shall be spaced no greater than fifty (50) feet apart. The Contractor shall take additional precautions as he/she may find necessary under the circumstances.

Should the Contractor fail to provide adequate traffic control or safety barricades, and in the event a responsible individual cannot be located or refuses to perform, the Agency will at its option place needed devices or engage a private firm to place and maintain said barricades, which will be charged to the Contractor directly.

Temporary traffic channelization shall be accomplished with delineators. Temporary striping will not be allowed unless specifically permitted by the Engineer. The Contractor shall prepare any plans that may be required for temporary striping to the satisfaction of the Engineer. In no event will temporary striping be allowed on finished pavement surfaces which are to remain.

Full street closures will not be allowed prior to City Council approval.

601-1.3 Measurement and Payment.

Measurement and Payment for **Implement Traffic Control** shall be **Not to Exceed (NTE) $10,000 Ten thousand Dollars** as listed in the bid schedule and shall be considered full compensation and include but not limited to furnishing all labor, tools, material, equipment, signage, TTC zone devices, channelizing devices, changeable message sign, and incidentals for doing all work involved in preparing traffic control plans and implementing traffic control, and no additional compensation will be allowed therefore.

SECTION G

CDBG STREET IMPROVEMENTS ON MAPLE STREET
SPECIFICATION NO. CIP 24/25-04
IN THE CITY OF LOS ALAMITOS, CALIFORNIA

SPECIAL PROVISIONS

SIGNING, STRIPING, AND PAVEMENT MARKERS

All equipment, materials, and components for signing and striping, and the installation thereof, shall conform to the 2023 Caltrans Standard Plans, and Standard Specifications, Section 81, "Miscellaneous Traffic Control Devices," Section 82 "Signs and Markers", and Section 84, "Markings", unless otherwise noted in these Special Provisions and on the Plans. These Plans and Specifications are hereinafter referred to as State Standard Plans and State Standard Specifications. Copies of these documents are available from Caltrans, District 12 office at 7150 e 4TH St #100, Santa Ana, California 92705 or from Caltrans, 6002 Folsom Boulevard, Sacramento, California 95819, (916) 445-3520.

All materials required for the completion of work as shown on the Plans shall be provided by the Contractor.

SECTION 81 - MISCELLANEOUS TRAFFIC CONTROL DEVICES

81-3 PAVEMENT MARKERS

81-3.02 Materials.

81-3.02E Epoxy Adhesive. Adhesive for raised pavement markers shall be rapid set type epoxy.

Removal of pavement markers shall be per Section 81-8.03B, "Remove Pavement Markers," of the State Standard Specifications.

81-3.04 Payment. Payment for pavement markers shall be included in the lump-sum price bid for signing and striping, and no additional compensation will be allowed therefor.

SECTION 82 – SIGNS AND MARKERS

82-3 ROADSIDE SIGNS

82-3.03 Construction. Relocated signs shall be installed using existing posts at new locations and shall be set at a minimum 30-inch depth and at a minimum 12-inch square portland cement concrete (PCC). The post depth of the concrete footing shall be sufficient to extend at least 6-

inches below the bottom of the posts. ¼-inch expansion paper shall be placed between the sign foundation and sidewalk.

New signs shall be installed using metal posts set at a minimum of 30-inch depth in a minimum 12-inch square PCC, except as specified otherwise, the metal post shall be 2-inch square "Qwik Punch" posts. The length of the metal post shall be sufficient to extend from the top of the sign to 30-inches below the top of the concrete footing and provide a 7-foot clearance between the finished grade and the bottom of the sign. The depth of the concrete footings shall be sufficient to extend at least 6-inches below the bottom of the posts. ¼-inch expansion paper shall be placed between the sign foundation and sidewalk.

Drill holes for bolts, threaded rods, or expansion anchorage devices drilled in existing concrete by a method that will not shatter the concrete adjacent to the holes.

Repair any spalling or chipping of concrete structures at contractor's expense.

Marker and delineators shall conform to the provision in Section 81, "Miscellaneous Traffic Control Devices."

82-3.04 Payment. Payment for signing shall be included in the lump sum price bid for signing and striping, and no additional compensation will be allowed therefor.

SECTION 84 - MARKINGS

84-2 TRAFFIC STRIPES AND PAVEMENT MARKINGS

84-2.02 Materials.

84-2.02A General. Traffic stripes, pavement markings, crosswalks, and arrow markings shall be thermoplastic. Curb markings shall be paint, two (2) coats. Contractor shall repaint all curb markings within the project limits.

84-2.02C Paint. Curb markings shall be paint. Paint shall be ready-mixed rapid dry type.

Ready-mixed paints shall be suitable for use on either asphalt concrete or Portland cement concrete.

84-2.02E Thermoplastic Traffic Stripes and Pavement Markings shall be thermoplastic including glass beads for striping, crosswalks and pavement markings.

84-2.03 Construction.

84-2.03A General. The Contractor shall furnish the necessary control points for all striping and markings and shall be responsible for the completeness and accuracy thereof to the satisfaction of the Engineer.

The Contractor shall establish all traffic striping between these points by stringline or other method to provide striping that will vary less than ½-inch in 50-feet from the specified alignment.

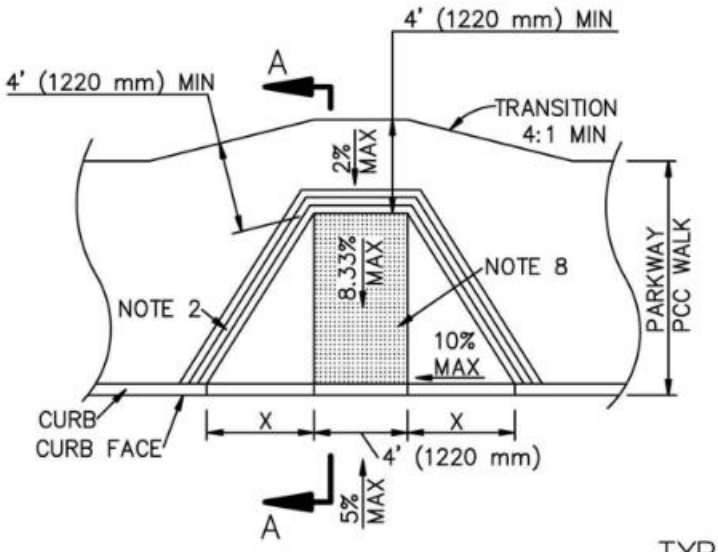
When no previously applied figures, markings, or traffic striping are available to serve as a guide, suitable layouts shall be spotted in advance of the permanent paint application. Traffic lines may be spotted by using a rope as a guide for marking spots every 5-feet, by using a marking wheel mounted on a vehicle, or by any other means satisfactory to the Engineer.

The Contractor shall mark or otherwise delineate the traffic lanes in the new roadway or portion of roadway, or detour before opening it to traffic.

The Contractor shall provide an experienced technician to supervise the location, alignment, layout, dimensions, and application of the paint.

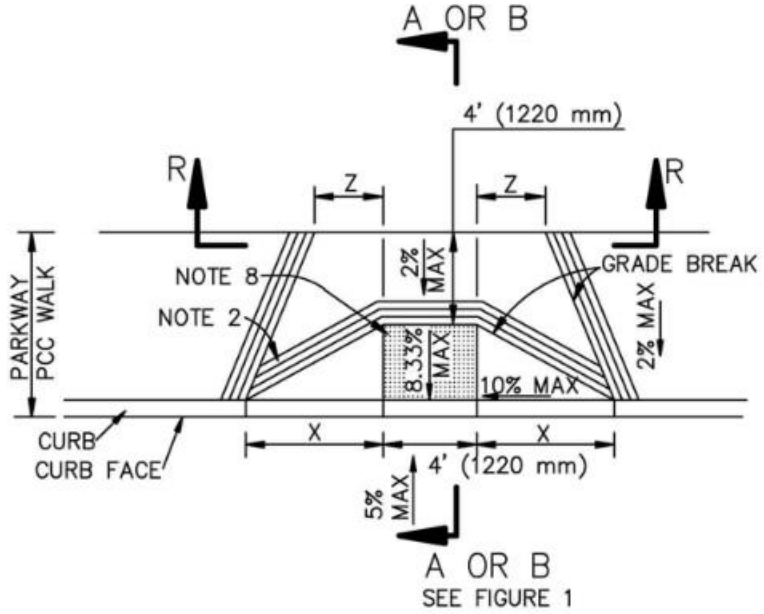
Spotting shall be completed prior to the removal of any existing stripes. Existing stripes and markings shall be removed prior to painting new stripes and markings, but in no case shall any section of street be left without the proper striping for more than 24 hours, or over weekends or holidays.

The installation of traffic stripes includes placement of raised pavement markers when called for on the plans.



Adhesive for raised pavement markers shall be per Section 81, “Pavement Markers.”

Existing traffic stripes (including raised pavement markers), pavement legends, and markings that do not conform to the plans shall be removed by grinding method per Section 81-8.03B, “Remove Pavement Markers,” and Section 84-9.03B, "Remove Traffic Stripes and Pavement Markings" of the State Standard Specifications.



84-2.04 Payment. Payment for striping details, pavement markings, and curb markings shall be included in the lump sum price bid for signing and striping, and no additional compensation will be allowed.

APPENDIX – PART 2

Construction Contractor BABA Self-Certification Form

Note: the form below will be required to be submitted from all participating contractors at the end of the project, along with the section 3 and m/wbe reports

Construction Contractor BABA Self-Certification Form

The undersigned acknowledges that the Build America, Buy America Act (BABA) requires that the U.S. Department of Housing and Urban Development will not provide federal financial assistance for "infrastructure" projects "unless all of the iron, steel, manufactured products, and construction materials used in the project are produced in the United States" (Section 70914 of Public Law No. 117-58, §§ 70901-52). The undersigned certifies that for the _____ (Project Name and Location) that the iron, steel, manufactured products, and construction materials used in this contract are in full compliance with BABA requirements, including:

- All iron and steel used in the project were produced in the United States. This means all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States.
- All manufactured products purchased with U.S. Department of Housing and Urban Development financial assistance were produced in the United States. For a manufactured product to be considered produced in the United States, the cost of the components of the manufactured product that are mined, produced, or manufactured in the United States is greater than 55% of the total cost of all components of the manufactured product, unless another standard for determining the minimum amount of domestic content of the manufactured product has been established under applicable law or regulation.
- All construction materials were manufactured in the United States. This means that all manufacturing processes for the construction material occurred in the United States.

The Contractor or Subcontractor, _____, certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the Contractor or Subcontractor understands and agrees that the provisions of 31 U.S.C. Chap. 38, Administrative Remedies for False Claims and Statements, apply to this certification and disclosure, if any.

SHEET SCHEDULE

SHEET NO.	DESCRIPTION
1	TITLE SHEET AND NOTES
2	DETAIL SHEET
3	STREET IMPROVEMENT PLANS

GENERAL NOTES:

1. ALL WORK SHALL CONFORM TO THE REQUIREMENTS OF THE CITY OF LOS ALAMITOS, STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, 2021 EDITION, ORANGE COUNTY PF&RD STANDARD PLANS, LATEST EDITION, AS SPECIFIED, AND SPPWC STANDARD PLANS, LATEST EDITION, AS SPECIFIED.
2. THE CONSTRUCTION AREA SHALL BE PROPERLY POSTED AND LIGHTED IN CONFORMANCE WITH THE STATE OF CALIFORNIA MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (CA MUTCD) AND WATCH BOOK, LATEST EDITION.
3. CONTRACTOR SHALL OBTAIN ALL NECESSARY PERMITS AND SHALL NOTIFY THE CITY ENGINEER, (562) 431-3538, AT LEAST 24 HOURS PRIOR TO ANY REQUIRED INSPECTIONS.
4. CONTRACTOR SHALL ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THIS PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY, THAT THIS REQUIREMENT SHALL APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS AND THAT THE CONTRACTOR SHALL DEFEND, INDEMNIFY AND HOLD THE CITY AND THE ENGINEER HARMLESS FROM ANY AND ALL LIABILITY, REAL OR ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT, EXCEPTING FOR LIABILITY ARISING FROM THE SOLE NEGLIGENCE OF THE CITY OR THE ENGINEER.
5. THE EXISTENCE AND LOCATION OF ANY UNDERGROUND UTILITY PIPES OR STRUCTURES SHOWN ON THESE PLANS WERE OBTAINED BY A SEARCH OF THE AVAILABLE RECORDS. TO THE BEST OF OUR KNOWLEDGE THERE ARE NO EXISTING UTILITY LINES EXCEPT AS SHOWN ON THIS PLAN. THE CONTRACTOR IS REQUIRED TO TAKE DUE PRECAUTIONARY MEASURES TO PROTECT THE UTILITY LINES SHOWN AND ANY OTHER LINES NOT OF RECORD OR NOT SHOWN ON THIS PLAN.
6. THE CONTRACTOR SHALL MAKE A PHYSICAL INSPECTION OF THE PROJECT SITE AND REPORT ALL VARIATIONS, INCONSISTENCIES, OR CHANGED CONDITIONS TO THE ENGINEER PRIOR TO ANY CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY ASSUMPTIONS, REMEDIAL ACTIONS, OR ADAPTATIONS MADE IN THE FIELD WITHOUT THE WRITTEN APPROVAL OF THE ENGINEER.
7. REPAIR OR REPLACE ALL DAMAGES OR ALTERATIONS TO EXISTING PUBLIC IMPROVEMENTS TO THE SATISFACTION OF THE CITY ENGINEER AT NO COST TO THE CITY.
8. ALL DIMENSIONS SHALL BE VERIFIED BY PLANS OR FIELD INSPECTION. AT NO TIME SHALL ANY DIMENSIONS BE SCALED FROM PLANS. CONTRACTOR SHALL NOTIFY THE ENGINEER OF ALL VARIATIONS IN DIMENSIONS PRIOR TO COMMENCEMENT OF CONSTRUCTION.
9. ALL JOINTS AND JOIN LOCATIONS AND UNDERGROUND UTILITY LOCATIONS SHALL BE FIELD VERIFIED.
10. AT ALL TIMES, CURB FACE DIMENSIONS AND GUTTER AND SWALE GRADES SHALL BE MAINTAINED, UNLESS OTHERWISE NOTED.
11. CONTRACTOR SHALL NOTIFY ALL AFFECTED UTILITY COMPANIES AND AFFECTED AGENCIES AT LEAST 72 HOURS PRIOR TO COMMENCEMENT OF CONSTRUCTION.
12. ALL ASPHALT PAVEMENT IMPROVEMENTS INDICATED TO BE REMOVED SHALL BE SAWCUT AT THE LINE OF REMOVAL.

SIGNING AND STRIPING GENERAL NOTES:

1. SIGNING STRIPING, AND LOOP REPLACEMENT AND THE INSTALLATION THEREOF SHALL CONFORM TO THE LATEST CALTRANS STANDARD PLANS AND SPECIFICATIONS, LATEST EDITION, THE CALIFORNIA MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (CA MUTCD), LATEST EDITION, THIS PLAN AND THE SPECIAL PROVISIONS.
2. ALL STRIPING AND MARKINGS SHALL BE INSTALLED AND REMOVED BY THE CONTRACTOR.
3. REMOVAL OF ALL CONFLICTING LINES AND MARKINGS SHALL BE BY GRINDING METHOD AND INCLUDES REMOVAL OF RAISED PAVEMENT MARKERS.
4. ALL LANE STRIPING AT INTERSECTION APPROACHES WITHOUT CROSSWALK OR LIMIT LINES SHALL END 10 FEET FROM THE EXTENSION OF THE INTERSECTION CURB LINES.
5. ALL STRIPING DETAILS AND PAVEMENT LEGENDS SHALL BE THERMOPLASTIC, UNLESS OTHERWISE NOTED.
7. CONTRACTOR SHALL REPAINT ALL EXISTING CURB MARKING THROUGHOUT PROJECT LIMITS. CURB MARKINGS SHALL BE PAINT, TWO (2) COATS. CONTRACTOR SHALL SCRAPE SPALLED AND CHIPPED CURB MARKING PRIOR TO REPAINTING.
8. NEW SIGNS SHALL BE HIGH INTENSITY SHEETING WITH GRAFFITI FILM.
9. ALL SIGNS ARE EXISTING TO REMAIN, UNLESS OTHERWISE NOTED.
10. INSTALL TWO-WAY BLUE REFLECTIVE MARKERS AT EVERY FIRE HYDRANT.

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 11G**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Ron Noda, Development Services Director**

Subject: **Authorize the Purchase and Installation of a Modular Office Building**

SUMMARY

This item is for purchasing a modular office directly from the KYA Group through a cooperative purchasing agreement via the California Multiple Award Schedule (CMAS). The purchase and installation of a 6-office modular building will provide offices for employees and contractors. The purchase of the modular would enable cost savings and assurance that the timeline to provide work areas for employees would be met in a timely manner. The modular building will be located where the former LATV/PW Break Room building was located. The existing electrical, water, and sewer infrastructure will be connected to the modular office building where it will be able to accommodate 6–8 employees.

RECOMMENDATION

1. Authorize the Mayor to use a cooperative purchasing agreement, in a form approved by the City Attorney, for the installation and purchase of a modular building from the KYA Group n the amount of $289,106.00; and,

2. Authorize a contingency of 15% of the bid amount not to exceed $43,365.90.

BACKGROUND

The City's goal is to provide best-in-class service to our community. Each Department has achieved several markers established to meet this goal. In order to continue providing exemplary service to the community, employees need an adequate area to ensure high productivity and provide customer service, and the purchase of the modular building will accomplish this. It is recommended that a cooperative purchasing agreement be utilized for the installation and purchase of the 6-office modular building.

DISCUSSION

Cooperative purchase agreements enable cities to maximize cost savings and staff resources by sharing contracting (piggyback) and purchasing efforts with other government agencies. Utilizing cooperative purchasing agreements is advantageous to the City because it allows the City to obtain lower pricing through volume purchasing. It is often more cost-effective to eliminate the cost and time spent on these administrative processes and purchase items and services through a cooperative purchasing program. As cooperative agreements reach expiration, they are automatically renewed, allowing government agencies to continue to leverage cost savings. California Multiple Award Schedule (CMAS) is among the leading

national government purchasing cooperatives, providing world-class government procurement resources and solutions to local and state government agencies, school districts (K-12), higher education institutions, and nonprofits looking for the best overall supplier government pricing. CMAS Partners works with many governmental agencies to offer cooperative purchasing contracts to other governmental agencies to create a more economical means of procuring services and supplies, an ability to pay less for products and services, and reduce the administrative costs of developing contracts.

Under Section 2.60.110 of the Los Alamitos Municipal Code (LAMC), the City's purchasing ordinance allows the City to "piggyback" off another public agency or government entity that has selected the vendor using competitive bidding procedures substantially the same as or similar to those normally utilized by the City for the acquisition of such materials, supplies, equipment, or services. If such a determination is made, the City Manager or City Council, as applicable, may proceed to purchase the materials, supplies, equipment, or services at a price equivalent to that offered to the acquiring agency.

As a member of CMAS, the City can utilize its service of awarded contracts, including unlimited expert assistance to answer any questions, help connect the City directly to suppliers, and help find solutions that will best suit the City's needs. CMAS is currently used by several city agencies regionally throughout the state and locally across Orange County.

FISCAL IMPACT

This project would require an allocation of $332,471.90 (bid amount plus 15% contingency) from the General Fund be appropriated into account number 10.544.5260 (Development Services - Facility Contractual Agreement) to fund this project. If approved, the amount would be transferred during the mid-year budget process for FY 2024-25.

Attachment: 1. Quote - Community Center Site - Portable Office Trailer

City of Los Alamitos

Community Center Site - Portable Office Trailer

Scope of Work

- **Lease Option** **$276,465.00**
  - 36 Month Lease of (1) 24x60 Refurbished Building with (6) total offices and (1) Restroom & (1) Kitchenette
- Includes
  - Electrical
    - Reconnect power to portable office
    - Run conduit underground (2 in.)
    - Reconnect 2 panels
    - 125 AMPS
    - 60 AMPS
  - Plumbing
    - Tie into existing sanitary sewer located by inspector.
    - Extend new sewer lateral to trailer points of connections.
    - Clean outs as needed.
    - Tie into existing water service down stream of existing water meter.
    - Using a saddle connection on main line to eliminate down time to existing buildings.
    - Extend 3⁄4" water service to new portable unit using schedule 80 PVC material.
    - Hook up water service to trailer at stub left at exterior of unit.
    - Saw cut driveway from point of connection to cross existing driveway.
    - Patch back 6" saw cut opening with concrete to finished surface.
    - After completion flush water line as needed.

*** Includes warranty for the entire leasing contract*

- **Purchase Option** **$289,106.00**
  - (1) 24x60 Refurbished Building with (6) total offices with windows and (1) Restroom with VCT Flooring & (1) Kitchenette
- Includes
  - Electrical
    - Reconnect power to portable office
    - Run conduit underground (2 in.)
    - Reconnect 2 panels
    - 125 AMPS
    - 60 AMPS
  - Plumbing
    - Tie into existing sanitary sewer located by inspector.
    - Extend new sewer lateral to trailer points of connections.
    - Clean outs as needed.
    - Tie into existing water service down stream of existing water meter.

    - Hook up water service to trailer at stub left at exterior of unit.
    - Saw cut driveway from point of connection to cross existing driveway.
    - Patch back 6" saw cut opening with concrete to finished surface.
    - After completion flush water line as needed.

*** Includes 1 year waranty*

Disclaimer

- *Lot must be level and ready to install HCD/DSA buildings or the bid is subject to additional cost.*
- *Lots must be prepared and be free of debris or subject to additional cost.*
- *Client to ensure daily access to job sites or subject to additional cost (waiting time - labor cost @ prevailing wages).*

Excludes the following:

- Irrigation
- Electrical Work not mentioned above
- Concrete Work not mentioned above
- Pavement striping, markings, or bumpers not mentioned above.
- Maintenance and maintenance equipment.
- Engineering, surveying, inspection, or permit fees.
- Any Testing for Irrigation, soil, or anything not mentioned.
- Removal, disposal, and/or relocation of any obstructions, stockpiles, debris, or excavated materials generated by others.
- Temporary Fencing or permanent fencing
- Traffic/pedestrian control and street sweeping services.
- Removal of any hazardous materials
- Any work not specifically listed above

*All work above quoted under standard working hours
*All work above is assuming standard access and does not include maintenance to improve access.

**Please be advised: Upon Contract Award, a DIR Project Registration number will be required prior to scheduling.
*Tax Included in total

Pricing is for budgetary purposes and is subject to change upon a formal proposal.

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 11H**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Ron Noda, Development Services Director**

Subject: **Award of Bid for the Installation/Upgrade of the City's Access Control System (RFP No. 2025-02) to Spectrum Security Group, LLC**

SUMMARY

This item proposes awarding Spectrum Security Group LLC an agreement to install and/or upgrade the existing access control system at designated City facilities (RFP No. 2025-02).

RECOMMENDATION

1. Award the proposal for RFP No. 2025-02 for the installation/upgrade of the City's Access Control System Services to Spectrum Security Group LLC for the amount of $114,589.24; and,

2. Authorize the Mayor to execute the Access Control System Services Agreement with Spectrum Security Group, LLC; and,

3. Authorize the City Manager to execute amendments for any unforeseen issues, with the total amount not to exceed thirty-five percent (35%) of the proposal amount or $40,105.

BACKGROUND

Several security measures have been taken recently to enhance the security on the Civic Center campus. These include cameras, pedestrian gates, and panic buttons. The next step is to implement an advanced access control system to minimize security risks, ensure proper personnel verification, and restrict access to sensitive departments and confidential information while allowing public access to designated areas. This project seeks to modernize and upgrade the existing security framework with a modern, reliable, and scalable access control solution to ensure facility operations' safety and efficiency.

The current access control system must be updated as replacement parts and software upgrades are no longer available. The system is limited to the areas surrounding City Hall 1, City Hall 2, the Council Chamber, the Police Department building, and entry/exit vehicle gates to the Public Works Yard. The Public Works Garage, Community Center 1, Community Center 2, and Preschool do not have access control systems.

The City Council approved a request for proposal (RFP) for access control in November 2022, but the award was eventually rejected in 2023. Research and several meetings with vendors provided staff with additional information on cost, supplies, best practices, etc. Therefore, on September 23, 2024, the Council approved the request to release a more comprehensive RFP for an access control system. The public bid opening was made on October 17, 2024.

DISCUSSION

Notices announcing the solicitation of proposals for this project were posted in the local publication on September 25, 2024, and October 2, 2024. RFP 2025-02 was publicly opened on the online portal BidNet, on September 24, 2024. On October 3, 2024, a mandatory site visit was conducted for interested vendors to assess each facility and its current condition before submitting proposals for the access control system. The deadline for submitting proposals was October 17, 2024. From the three (3) proposals received, it was determined that the lowest, most responsible proposal submitted was from Spectrum Security Group LLC, with a total amount of $77,469.20. The results are provided below:

- Spectrum Security Group - $77,469.20
- CRB Security Solutions - $142,247.29
- Am-tec Security - $146,873.70

Spectrum Security Group LLC DBA Los Alamitos Locks is a qualified local vendor with a history of successfully completing various projects for the city. Their proposal includes the installation of access readers, door contacts, and the Genetec Security Center software control system, which supports a wide range of hardware to enhance operational efficiency. Genetec Security Center is highly regarded as one of the few access control systems that fully meet the Criminal Justice Information Services CJIS compliance standards. Additionally, this software has no annual or maintenance subscription fees, as it operates on an on-premises server. The new access control system will be installed in the Council Chamber, City Hall 1, City Hall 2, Police Department, Community Center 1, Community Center 2, Preschool, Public Works, and fleet gates.

The agreement is for a three-year term with the option of two additional one-year extensions. The total amount for the first year is $77,469.20, which includes hardware, labor for installation, and the software. For Year 2, the cost will increase by 10%, and for Year 3, it will increase by 12%, bringing the total additional cost to $19,168.55. This increase covers licensing renewal and software maintenance. In addition, there will be a $6,000 annual charge for maintenance services. The not-to-exceed amount for this three-year agreement, including all renewals and maintenance, is $114,589.24.

FISCAL IMPACT

Funds for this project have yet to be designated in the adopted Fiscal Year 2024-25 budget. Staff is requesting that the amount of $154,694.24 (bid amount plus contingency) from the General Fund be appropriated into account No. 10-544-5293 (Development Services Building Maintenance) to fund the project. If approved, the amount would be transferred during the mid-year process for FY 2024-2025.

Attachment:
1. RFP No. 2025-02 Access Control System Services Agreement
2. Spectrum Security Group Proposal

ACCESS CONTROL SYSTEM SERVICES AGREEMENT
SPECTRUM SECURITY GROUP LLC

THIS AGREEMENT FOR ACCESS CONTROL SYSTEM SERVICES ("Agreement") is made and entered into, to be effective this 18th day of November 2024 ("Effective Date"), by and between the CITY OF LOS ALAMITOS, a California charter city and municipal corporation, ("City") and SPECTRUM SECURITY GROUP LLC, a California Limited Liability Company, ("Contractor"). City and Contractor are sometimes hereinafter individually referred to as "Party" and are hereinafter collectively referred to as the "Parties."

RECITALS

A. City has determined that it requires the services of a qualified contractor to provide access control system services.

B. In response to City's formal Request for Proposals No. 2025-02 (RFP), dated September 24, 2024, Contractor has submitted to City a written proposal, dated October 16, 2024, to provide the desired access control system services.

D. City desires to engage Contractor to provide such access control system services subject to the terms and conditions set forth in this Agreement.

NOW, THEREFORE, in consideration of the promises and mutual obligations, covenants, and conditions contained herein, and other valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

AGREEMENT

1. SERVICES OF CONTRACTOR

1.1 Scope of Services and Standard of Performance. Contractor shall provide those services set forth in the Access Control System Services Proposal, dated October 16, 2024, attached hereto as Exhibit "A" ("Scope of Services" and/or "Project Services"). Contractor shall provide the Project Services in compliance with all terms and conditions of this Agreement. Contractor warrants that all Project Services shall be performed in a skillful, competent, professional and satisfactory manner in accordance with all standards prevalent in the same profession in the State of California. Contractor represents and warrants that it and all employees, subconsultants and subcontractors providing any services pursuant to this Agreement shall have sufficient skill and experience to perform the Project Services. All Project Services shall be completed to the reasonable satisfaction of City.

1.1.1 Contract Documents. This Agreement shall consist of the following: (1) the main body of this Agreement; (2) RFP No. 2025-02, dated September 24, 2024; and (3) Contractor's Proposal, Exhibit "A". Should any conflict or inconsistency exist in the Contract Documents, the conflict or inconsistency shall be resolved by applying the provisions in the highest

priority document, which shall be determined in the following order of priority: (1st) the main body of this Agreement; (2rd) the RFP, and (3rd) Contractor's Proposal.

1.2 Compliance with Law. All Project Services shall be provided in accordance with all laws, ordinances, resolutions, statutes, rules, and regulations of City and any federal, state or local governmental agency of competent jurisdiction. Contractor shall be liable for all violations of such laws, ordinances, resolutions, statutes, rules and regulations in connection with performance of the Project Services. If Contractor performs any Project Services in violation of such laws, ordinances, resolutions, statutes, rules or regulations, Contractor shall be solely responsible for all penalties and costs arising therefrom. Contractor shall defend, indemnify, and hold City, its officials, officers, employees, agents and volunteers, free and harmless from and against any claim or liability arising out of any failure or alleged failure to comply with such laws, ordinances, resolutions, statutes, rules or regulations.

1.3 Licenses and Permits. Prior to performing any Project Services, Contractor shall obtain all licenses, permits, qualifications, and approvals of whatever nature that are legally required to practice its profession and perform the Project Services. Contractor represents and warrants to City that Contractor shall, at its sole cost and expense, keep in effect at all times during the term of this Agreement and any extension, any license, permit, qualification, or approval that is legally required for Contractor to perform the Project Services. Contractor shall have the sole obligation to pay for any fees, assessments, and taxes, plus applicable penalties and interest, which may be imposed by law and arise from or are necessary for the Contractor's performance of the Project Services, and shall defend, indemnify, and hold the City, its officials, officers, employees, agents and volunteers, free and harmless from and against any claim or liability arising out of any failure or alleged failure to obtain such license, permits, qualifications, and approvals of whatever nature that are legally required to practice its profession and perform the Project Services.

1.4 Familiarity with Work. By executing this Agreement, Contractor warrants that Contractor (a) has thoroughly investigated and considered the Project Services to be performed, (b) has carefully considered how the Project Services should be performed, and (c) fully understands the facilities, difficulties and restrictions attending performance of the Project Services under this Agreement.

1.5 Care in Performance of Project Services. Contractor shall adopt reasonable methods during the term of the Agreement to prevent losses or damage to materials, papers or other components of the Project Services, and shall be responsible for all such damages, to persons or property, until acceptance of the Project Services by the City, except such losses or damages as may be caused by City's own negligence.

1.6 Non-Exclusive Agreement. Contractor acknowledges that City may enter into agreements with other Contractors, contractors, consultants, or vendors for services similar to the services that are the subject of this Agreement. Contractor further acknowledges that City may have its own employees perform services similar to the services that are the subject of this Agreement.

2. COMPENSATION

2.1 Maximum Contract Amount. Contractor shall be compensated for the Project Services performed, including authorized reimbursements, if any, in accordance with the hourly rates and charges set forth in the Scope of Services in an amount not to exceed One Hundred Fourteen Thousand Five Hundred Eighty-Nine Dollars and Twenty-Four Cents ($114,589.24). The maximum payment obligation of the City under this Agreement shall not exceed the amount specified in this section.

2.2 Method of Payment. In any month in which Contractor wishes to receive payment, Contractor shall no later than first working day of such month, submit to the City, in a form approved by the City Manager or his designee, an invoice for services rendered prior to the date of the invoice. Such requests shall be based upon the amount and value of the services performed by Contractor and accompanied by such reporting data including an itemized breakdown of all costs incurred and tasks performed during the period covered by the invoice, as may be required by the City. Within thirty (45) calendar days of receipt of invoice, City shall pay all undisputed amounts included on the invoice.

2.3 Changes in Scope. In the event any change or changes in the Scope of Services is requested by the City, the Parties shall execute a written amendment to this Agreement, signed by an individual authorized to formally bind the Party for which he/she is signing, setting forth with particularity all terms of such amendment, including, but not limited to, any additional professional fees. An amendment may be entered into: (a) to provide for revisions or modifications to documents or other work product when documents or other work product or work is required by the enactment or revision of law subsequent to the preparation of any documents, other work product, or work; and/or, (b) to provide for additional services not included in this Agreement or not customarily furnished in accordance with generally accepted practice in Contractor's profession.

2.4 Appropriations. This Agreement is subject to and contingent upon funds being appropriated therefore by the Los Alamitos City Council for each fiscal year covered by the term of this Agreement. If such appropriations are not made, this Agreement shall automatically terminate without penalty to the City.

3. SCHEDULE OF PERFORMANCE

3.1 Time of Essence. Time is of the essence in the performance of this Agreement. The time for completion of the Project Services to be performed by Contractor is an essential condition of this Agreement.

3.2 Schedule of Performance. Contractor shall prosecute regularly and diligently the Project Services according to the periods specified in the Scope of Services. When requested by Contractor, extensions of the time period(s) specified in the Scope of Services may be approved in writing by the Contract Officer; however, the City shall not be obligated to grant any such extension.

3.3 Force Majeure. The time for performance of the Project Services may be extended because of any delays due to unforeseeable causes beyond the control and without the fault or negligence of the Contractor (financial inability excepted), including, but not limited to, acts of God or of the public enemy, unusually severe weather, fires, earthquakes, floods, epidemics, quarantine restrictions, riots, strikes, freight embargoes, wars, and/or acts of any governmental agency, including the City, if Contractor, within ten (10) calendar days of the commencement of such delay, notifies the City Manager in writing of the causes of the delay. The City Manager shall ascertain the facts and the extent of delay, and extend the time for performing the Services for the period of the enforced delay when and if in the judgment of the City Manager such delay is justified. The City Manager's determination shall be final and conclusive upon the Parties to this Agreement. In no event shall Contractor be entitled to recover damages against the City for any delay in the performance of this Agreement, however caused, Contractor's sole remedy being extension of the Agreement pursuant to this section.

3.4 Term. Unless earlier terminated as provided elsewhere in this Agreement, this Agreement shall commence upon the Effective Date and shall continue in full force and effect for an initial term of three (3) years and may thereafter be extended by mutual written agreement of the Parties for up to two additional one (1) year terms.

4. COORDINATION OF PROJECT SERVICES

4.1 Contractor's Representative. The following principal of Contractor is hereby designated as being the principal and representative of Contractor authorized to act on its behalf with respect to the Project Services and to make all decisions in connection therewith: Robert Albert, President/Project Lead. It is expressly understood that the experience, knowledge, education, capability, expertise, and reputation of the foregoing principal is a substantial inducement for City to enter into this Agreement. Therefore, the foregoing principal shall be responsible during the term of this Agreement for directing all activities of Contractor and devoting sufficient time to personally supervise the Project Services performed hereunder. The foregoing principal may not be changed by Contractor without prior written approval of the Contract Officer.

4.2 City's Contract Officer. The City's Contract Officer shall be such person as may be designated by the City Manager, and is subject to change by the City Manager. It shall be the Contractor's responsibility to ensure that the Contract Officer is kept fully informed of the progress of the performance of the Project Services, and the Contractor shall refer any decisions which must be made by City to the Contract Officer. Unless otherwise specified herein, any approval of City required hereunder shall mean the approval of the Contract Officer. The Contract Officer shall have authority to sign all documents on behalf of the City required hereunder to carry out the terms of this Agreement.

4.3 Prohibition Against Subcontracting or Assignments. The experience, knowledge, capability, expertise, and reputation of Contractor, its principals and employees, were a substantial inducement for City to enter into this Agreement. Therefore, Contractor shall not assign the performance of this Agreement, nor any part thereof, nor any monies due hereunder, voluntarily or by operation of law, without the prior written consent of City. Contractor shall not contract with any other entity to perform the Project Services without prior written consent of City.

If Contractor is permitted by City to subcontract any part of this Agreement, Contractor shall be responsible to City for the acts and omissions of its subcontractor(s) in the same manner as it is for persons directly employed. Nothing contained in this Agreement shall create any contractual relationships between any subcontractor and City. All persons engaged in the performance of Project Services will be considered employees of Contractor. City will deal directly with and will make all payments to Contractor. In addition, neither this Agreement nor any interest herein may be transferred, assigned, conveyed, hypothecated, or encumbered voluntarily or by operation of law, whether for the benefit of creditors or otherwise, without the prior written consent of City. Transfers restricted hereunder shall include the transfer to any person or group of persons acting in concert of more than twenty five percent (25%) of the present ownership and/or control of Contractor, taking all transfers into account on a cumulative basis. In the event of any such unapproved transfer, including any bankruptcy proceeding, this Agreement shall be void. No approved transfer shall release Contractor or any surety of Contractor from any liability hereunder without the express written consent of City.

4.4 Independent Contractor.

4.4.1 The legal relationship between the Parties is that of an independent contractor; nothing herein shall be deemed to make Contractor a City employee. During the performance of this Agreement, Contractor and its officers, employees, and agents shall act in an independent capacity and shall not act as City officers or employees. Contractor will determine the means, methods and details of performing the Project Services subject to the requirements of this Agreement. The personnel performing the Project Services on behalf of Contractor shall at all times be under Contractor's exclusive direction and control. Neither City nor any of its officials, officers, employees, agents or volunteers shall have control over the conduct of Contractor or any of its officers, employees, or agents, except as set forth in this Agreement. Contractor, its officers, employees or agents, shall not maintain a permanent office or fixed business location at City's offices. City shall have no voice in the selection, discharge, supervision, or control of Contractor's officers, employees, or agents or in fixing their number, compensation, or hours of service. Contractor shall pay all wages, salaries, and other amounts due its employees in connection with the performance of Project Services and shall be responsible for all reports and obligations respecting them, including but not limited to social security income tax withholding, unemployment compensation, workers' compensation, and other similar matters. City shall not in any way or for any purpose be deemed to be a partner of Contractor in its business or otherwise a joint venturer or a member of any joint enterprise with Contractor.

4.4.2 Contractor shall not incur or have the power to incur any debt, obligation, or liability against City, or bind City in any manner.

4.4.3 No City benefits shall be available to Contractor, its officers, employees, representatives, agents, subconsultants or subcontractors in connection with the performance of any Project Services. Except for fees paid to Contractor as provided for in this Agreement, City shall not pay salaries, wages, or other compensation to Contractor for the performance of any Project Services. City shall not be liable for compensation or indemnification to Contractor, its officers, employees, representatives, agents, subconsultants or subcontractors, for injury or sickness arising out of the performance of any Project Services. If for any reason any court or

governmental agency determines that the City has financial obligations, other than pursuant to Section 2 herein, of any nature relating to salary, taxes, or benefits of Contractor's officers, employees, representatives, agents, or subconsultants or subcontractors, Contractor shall defend, indemnify, and hold harmless City from and against all such financial obligations.

4.5 PERS Eligibility Indemnification.

4.5.1 In the event that Contractor or any officer, employee, representative, agent, subconsultant or subcontractor of Contractor providing any Project Services claims or is determined by a court of competent jurisdiction or the California Public Employee Retirement System (PERS) to be eligible for enrollment in PERS as an employee of the City, Contractor shall indemnify, defend, and hold harmless City against (1) all such claims and determinations, (2) for the payment of any employee and/or employer contributions for PERS benefits on behalf of Contractor or its officers, employees, representatives, agents, subconsultants or subcontractors, and (3) the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of the City.

4.5.2 Notwithstanding any other agency, state or federal policy, rule, regulation, law or ordinance to the contrary, Contractor and any of its officers, employees, representatives, agents, subconsultants or subcontractors providing any Project Services shall not qualify for or become entitled to, and hereby agree to waive any claims to, any compensation, benefit, or any incident of employment by City, including but not limited to eligibility to enroll in PERS as an employee of City and entitlement to any contribution to be paid by City for employer contribution and/or employee contributions for PERS benefits.

5. INSURANCE

5.1 Compliance with Insurance Requirements. Contractor shall obtain, maintain, and keep in full force and effect during the term of this Agreement, at its sole cost and expense, and in a form and content satisfactory to City, all insurance required under this section. Contractor shall not commence any Project Services unless and until it has provided evidence satisfactory to City that it has secured all insurance required under this section. If Contractor's existing insurance policies do not meet the insurance requirements set forth herein, Contractor agrees to amend, supplement or endorse the policies to do so.

5.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement, and without limiting the indemnity provisions set forth in this Agreement, Contractor shall obtain and maintain in full force and effect during the term of this Agreement, including any extension thereof, the following policies of insurance:

5.2.1 Commercial General Liability Insurance. Contractor shall obtain and maintain, in full force and effect throughout the term of this Agreement, a policy of Commercial General Liability Insurance (CGL). Coverage shall be at least as broad as ISO Form CG 00 01 written on a per occurrence basis, including products and completed operations, property damage, bodily injury and personal & advertising injury with limits of no less than One Million Dollars ($1,000,000.00) per occurrence and Two Million Dollars ($2,000.000.00) in the general aggregate.

The policy shall not contain any endorsements or provisions limiting coverage for (1) contractual liability, (2) cross liability exclusion for claims or suits by one insured against another, or (3) contain any other exclusion contrary to the Agreement.

5.2.2 Automobile Liability Insurance. Contractor shall obtain and maintain, in full force and effect throughout the term of this Agreement, a policy of Automobile Liability Insurance. Coverage shall be at least as broad as ISO Form CA 00 01 written on a per occurrence basis, covering Code 1 (any auto), or if the Contractor has no owned autos, Code 8 (hired) and Code 9 (non-owned), with limits of no less than One Million Dollars ($1,000,000.00) for each occurrence covering bodily injury and property damage.

5.2.3 Workers' Compensation Insurance. Contractor shall obtain and maintain, in full force and effect throughout the term of this Agreement, a policy of Workers' Compensation Insurance in at least the minimum statutory amounts, and in compliance with all other statutory requirements, as required by the State of California. Contractor agrees to waive and obtain endorsements from its workers' compensation insurer waiving all subrogation rights under its workers' compensation insurance policy against the City, its officials, officers, employees, agents and volunteers, and to require each of its subconsultants and subcontractors, if any, to do likewise under their workers' compensation insurance policies. Contractor shall also obtain and maintain, in full force and effect throughout the term of this Agreement, a policy of Employer's Liability Insurance written on a per occurrence basis with limits of at least One Million Dollars ($1,000,000.00) per accident for bodily injury or disease. Notwithstanding the foregoing, Contractor shall not be required to procure either Worker's Compensation Insurance or Employer's Liability Insurance if Contractor provides written verification to the City that Contractor does not have any employees.

5.3 Acceptability of Insurers. Insurance required by this section shall be issued by a licensed company authorized to transact business in the state by the Department of Insurance for the State of California with a current rating of A-:VII or better (if an admitted carrier), or a current rating of A:X or better (if offered by a non-admitted insurer listed on the State of California List of Approved Surplus Lines Insurers (LASLI)), by the latest edition of A.M. Best's Key Rating Guide, except that the City will accept workers' compensation insurance from the State Compensation Fund. In the event the City determines that the work or Project Services to be performed under this Agreement creates an increased or decreased risk of loss to the City, the Contractor agrees that the minimum limits of the insurance policies may be changed accordingly upon receipt of written notice from the City. Contractor shall immediately substitute any insurer whose A.M. Best rating drops below the levels specified herein.

5.4 Specific Insurance Provisions and Endorsements. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for written approval. Required insurance policies shall contain the following provisions, or Contractor shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

5.4.1 CGL and Auto Liability Endorsements. The policy or policies of insurance required by this section for CGL and Automobile Liability Insurance shall be endorsed as follows:

5.4.1.1 Additional Insured. The City, its officials, officers, employees, agents and volunteers, shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement; and

5.4.1.1.1 Additional Insured Endorsements. Additional insured endorsements shall not (1) be restricted to "ongoing operations", (2) exclude "contractual liability", (3) restrict coverage to "sole" liability of Contractor, or (4) contain any other exclusions contrary to the Agreement; and, the coverage shall contain no special limitations on the scope of protection afforded to additional insureds.

5.4.1.2 Primary and Non-Contributing Insurance. Each CGL and Automobile Liability Insurance policy shall be endorsed to be primary, and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents or volunteers, shall not contribute with this primary insurance.

5.4.1.3 Waiver of Subrogation. Each CGL and Automobile Liability Insurance policy shall contain or be endorsed to waive subrogation against the City, its officials, officers, employees, agents and volunteers, or shall specifically allow Contractor or others providing insurance evidence in compliance with the requirements set forth in this section to waive their right to recovery prior to a loss. Contractor hereby agrees to waive its own right of recovery against the City, its officials, officers, employees, agents and volunteers, and Contractor hereby agrees to require similar written express waivers and insurance clauses from each of its subconsultants or subcontractors.

5.4.2 Notice of Cancellation. Each policy of any type shall be endorsed to provide that coverage shall not be suspended, voided, cancelled, or modified, or reduced in coverage or in limits, except after thirty (30) calendar days prior written notice has been provided to the City. Notwithstanding the foregoing, if coverage is to be suspended, voided, or cancelled because of Contractor's failure to pay the insurance premium, the notice provided by the insurer to City shall be by not less than ten (10) calendar days prior written notice. (A statement that notice will be provided "in accordance with the policy terms" or words to that effect is inadequate to meet the requirements of this section.)

5.5 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City in advance. The decision whether to approve or withhold approval of a deductible or self-insured retention shall be made by the City in the City's sole and absolute discretion.

5.6 Evidence of Coverage. Concurrently with the execution of the Agreement, Contractor shall deliver certificates of insurance together with original endorsements affecting each of the insurance policies required by this section. Contractor shall promptly furnish, at City's request, copies of actual policies including all declaration pages, endorsements, exclusions and any other policy documents City may require to verify coverage.

5.6.1 Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for written approval.

5.6.2 **Authorized Signatures.** The certificates of insurance and original endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf.

5.6.3 **Renewal/Replacement Policies.** At least fifteen (15) calendar days prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Contractor shall, within ten (10) calendar days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies meeting all requirements of this Agreement.

5.7 **Requirements Not Limiting.** Requirement of specific coverage or minimum limits contained in this section are not intended as a limitation on coverage, limits, or other requirements, or a waiver of any coverage normally provided by any insurance. Nothing in this section shall be construed as limiting in any way the indemnification provision contained in this Agreement, or the extent to which Contractor may be held responsible for payments of damages to persons or property.

5.8 **Enforcement of Agreement (Non-Estoppel).** Contractor acknowledges and agrees that actual or alleged failure on the part of the City to inform Contractor of any non-compliance with any of the insurance requirements set forth in this section imposes no additional obligation on the City nor does it waive any rights hereunder.

5.9 **Insurance for Subconsultants.** Contractor shall either: (1) include all subconsultants or subcontractors engaged in the performance of Project Services on behalf of Contractor as additional named insureds under the Contractor's insurance policies; or (2) Contractor shall be responsible for causing its subconsultants or subcontractors to procure and maintain the appropriate insurance in compliance with the terms of the insurance requirements set forth in this section, including adding the City, its officials, officers, employees, agents and volunteers, as additional insureds to their respective policies. Contractor shall not allow any subconsultant or subcontractor to commence any work or services relating to this Agreement unless and until it has provided evidence satisfactory to City that the subconsultant or subcontractor has secured all insurance required under this section.

5.10 **Other Insurance Requirements.** The following terms and conditions shall apply to the insurance policies required of Contractor and its subconsultants and subcontractors, if any, pursuant to this Agreement:

5.10.1 Contractor shall provide immediate written notice to City if (1) any of the insurance policies required herein are terminated, cancelled or suspended, (2) the limits of any of

the insurance coverages required herein are reduced, or (3) the deductible or self-insured retention is increased.

5.10.2 All insurance coverage and limits provided by Contractor and available or applicable to this Agreement are intended to apply to each insured, including additional insureds, against whom a claim is made or suit is brought to the full extent of the policies. Nothing contained in this Agreement or any other agreement relating to the City or its operations shall limit the application of such insurance coverage.

5.10.3 None of the insurance coverages required herein will be in compliance with the requirements of this section if they include any limiting endorsement which substantially impairs the coverages set forth herein (e.g., elimination of contractual liability or reduction of discovery period), unless the endorsement has first been submitted to the City and approved in writing.

5.10.4 Certificates of insurance will not be accepted in lieu of required endorsements, and submittal of certificates without required endorsements may delay commencement of the Project. It is Contractor's obligation to ensure timely compliance with all insurance submittal requirements as provided herein.

5.10.5 Contractor agrees to ensure that subconsultants and subcontractors, if any, and any other parties involved with the Project who are brought onto or involved in the Project by Contractor, provide the same minimum insurance coverage required of Contractor. Contractor agrees to monitor and review all such coverage and assumes all responsibility for ensuring that such coverage is provided in conformity with the requirements of this section. Contractor agrees that upon request, all agreements with subcontractors and others engaged in the provision of Project Services will be submitted to the City for review.

5.10.6 Contractor agrees to provide immediate written notice to City of any claim, demand or loss against Contractor arising out of the work or Project Services performed under this Agreement and for any other claim, demand or loss which may reduce the insurance available to pay claims, demands or losses arising out of this Agreement.

6. INDEMNIFICATION

To the fullest extent permitted by law, Contractor shall defend (at Contractor's sole cost and expense with legal counsel reasonably acceptable to City), indemnify and hold the City, its officials, officers, employees, agents and volunteers, free and harmless from any and all claims, demands, orders, causes of action, costs, expenses, liabilities, losses, penalties, judgments, arbitration awards, settlements, damages or injuries of any kind, in law or in equity, including but not limited to property or persons, including wrongful death, (collectively "Claims") in any manner arising out of, pertaining to, related to, or incident to any alleged acts, errors or omissions, or willful misconduct of Contractor, its officers, directors, employees, subconsultants, subcontractors, agents or invitees in connection with performance under this Agreement, or in any manner arising out of, pertaining to, related to, or incident to an alleged breach of this Agreement, including without limitation the payment of all consequential damages, expert witness fees and

attorneys' fees and other related costs and expenses.

Notwithstanding the foregoing, and only to the extent that the Project Services performed by Contractor are subject to California Civil Code Section 2782.8, the above indemnity shall be limited, to the extent required by Civil Code Section 2782.8, to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Contractor.

Under no circumstances shall the insurance requirements and limits set forth in this Agreement be construed to limit Contractor's indemnification obligation or other liability hereunder. Notwithstanding the foregoing, such obligation to defend, hold harmless and indemnify the City, its officials, officers, employees, agents and volunteers, shall not apply to the extent that such Claims are caused by the sole negligence or willful misconduct of that indemnified party.

The Contractor's indemnification obligation shall survive termination of this Agreement.

7. REPORTS AND RECORDS

7.1 Records. Contractor shall keep complete, accurate, and detailed accounts of all time, costs, expenses, and expenditures pertaining in any way to this Agreement. Contractor shall keep such books and records as shall be necessary to properly perform the Project Services required by this Agreement and to enable the Contract Officer to evaluate the performance of such Project Services. The Contract Officer shall have full and free access to such books and records at all reasonable times, including the right to inspect, copy, audit, and make records and transcripts from such records.

7.2 Reports. Contractor shall periodically prepare and submit to the Contract Officer such reports concerning the performance of the Project Services as the Contract Officer shall require.

7.3 Ownership of Documents. All drawings, specifications, reports, records, documents, memoranda, correspondence, computations, and other materials prepared by Contractor, its employees, subconsultants, subcontractors and agents in the performance of this Agreement shall be the property of City and shall be promptly delivered to City upon request of the Contract Officer or upon the termination of this Agreement, and Contractor shall have no claim for further employment or additional compensation as a result of the exercise by City of its full rights of ownership of the documents and materials hereunder. Contractor may retain copies of such documents for its own use. Contractor shall have an unrestricted right to use the concepts embodied therein. Contractor shall ensure that all of its subconsultants and subcontractors shall provide for assignment to City of any documents or materials prepared by them, and in the event Contractor fails to secure such assignment, Contractor shall indemnify City for all damages resulting therefrom.

7.4 Release of Documents. Except to the extent otherwise required by law, no drawing, specification, report, record, document, or other material prepared by Contractor, its employees, subconsultants, subcontractors and agents in the performance of Project Services shall

not be released publicly without the prior written approval of the Contract Officer.

8. ENFORCEMENT OF AGREEMENT

8.1 California Law and Venue. This Agreement shall be construed and interpreted both as to validity and as to performance of the Parties in accordance with the laws of the State of California. Legal actions concerning any dispute, claim, or matter arising out of or in relation to this Agreement shall be instituted in the Superior Court of the County of Orange, State of California, or any other appropriate court in such County, and Contractor covenants and agrees to submit to the personal jurisdiction of such court in the event of such action.

8.2 Waiver. No delay or omission in the exercise of any right or remedy of a non-defaulting Party on any default shall impair such right or remedy or be construed as a waiver. No consent or approval of City shall be deemed to waiver or render unnecessary City's consent to or approval of any subsequent act of Contractor. Any waiver by either Party of any default must be in writing and shall not be a waiver of any other default concerning the same or any other provision of this Agreement.

8.3 Rights and Remedies Cumulative. Except with respect to rights and remedies expressly declared to be exclusive in this Agreement, the rights and remedies of the Parties are cumulative and the exercise by either Party of one or more of such rights or remedies shall not preclude the exercise by it, at the same or different times, of any other rights or remedies for the same default or any other default by the other Party.

8.4 Legal Action. In addition to any other rights or remedies, either Party may take legal action, in law or in equity, to cure, correct or remedy any default, to recover damages for any default, to compel specific performance of this Agreement, to obtain declaratory or injunctive relief, or to obtain any other remedy consistent with the purposes of this Agreement.

8.5 Termination Prior to Expiration of Term. City reserves the right to terminate this Agreement, at any time, with or without cause, upon thirty (30) calendar days written notice to Contractor, except that where the continuation of services would constitute a danger to health, safety or general welfare, the period of notice shall be such shorter time as may be appropriate. Upon receipt of the notice of termination, Contractor shall immediately cease all Project Services, except as may be specifically approved by the Contract Officer. Contractor shall be entitled to compensation for all Project Services rendered prior to receipt of the notice of termination and for any Project Services authorized by the Contract Officer thereafter.

8.6 Termination for Default of Contractor.

8.6.1 Contractor's failure to comply with any provision of this Agreement shall constitute a default.

8.6.2 If the Contract Officer determines that Contractor is in default in the performance of any of the terms or conditions of this Agreement, he/she shall notify Contractor in writing of such default. If such default is capable of being cured, Contractor shall have ten (10)

calendar days, or such longer period as City may designate, to cure the default by rendering satisfactory performance. In the event Contractor fails to cure its default within such period of time, or if such default is not capable of being cured, City shall have the right, notwithstanding any other provision of this Agreement, to terminate this Agreement without further notice and without prejudice of any remedy to which City may be entitled at law, in equity, or under this Agreement. Contractor shall be liable for any and all reasonable costs incurred by City as a result of such default. Compliance with the provisions of this section shall not constitute a waiver of any City right to take legal action in the event that the dispute is not cured, provided that nothing herein shall limit City's right to terminate this Agreement without cause pursuant to Section 8.5.

8.6.3 If termination is due to the failure of Contractor to fulfill its obligations under this Agreement, City may, after compliance with the provisions of Section 8.6.2, take over the Project Services and prosecute the same to completion by contract or otherwise, and Contractor shall be liable to the extent that the total direct and indirect costs for completion of the Project Services required hereunder exceeds the Maximum Contract Amount, and City may withhold any payments to Contractor for the purpose of set-off toward the cost of completion of the Project Services. The withholding or failure to withhold payments to Contractor shall not limit Contractor's liability for completion of the Project Services as provided herein.

8.7 Attorneys' Fees. In the event any dispute between the Parties with respect to this Agreement results in litigation or any non-judicial proceeding, the prevailing Party shall be entitled, in addition to such other relief as may be granted, to recover from the non-prevailing Party all reasonable costs and expenses, including but not limited to reasonable attorneys' fees, expert witness fees, court costs and all fees, costs, and expenses incurred in any appeal or in collection of any judgment entered in such proceeding. To the extent authorized by law, in the event of a dismissal by the plaintiff or petitioner of the litigation or non-judicial proceeding within thirty (30) calendar days of the date set for trial or hearing, the other Party shall be deemed to be the prevailing Party in such litigation or proceeding. For purposes of this section, "Reasonable attorney fees" shall be calculated by multiplying the actual number of hours reasonably expended by the attorney(s) handling the dispute on behalf of the prevailing Party by the hourly rate actually paid by the prevailing Party, but in no case shall the hourly rate exceed Two Hundred and Fifty Dollars ($250.00) per hour.

9. CITY OFFICERS AND EMPLOYEES: NON-DISCRIMINATION

9.1 Non-liability of City Officers and Employees. No officer or employee of the City shall be personally liable to the Contractor, or any successor-in-interest, in the event of any default or breach by the City or for any amount which may become due to the Contractor or to its successor, or for breach of any obligation of the terms of this Agreement.

9.2 Covenant Against Discrimination. Contractor covenants that, by and for itself, its heirs, executors, assigns, subcontractors, subconsultants and all persons claiming under or through them, that there shall be no discrimination or segregation in the performance of or in connection with this Agreement regarding any person or group of persons on account of race, disability, medical condition, color, creed, religion, sex, sexual orientation, marital status, age, national origin, or ancestry. Contractor shall take affirmative action to insure that applicants and

employees are treated without regard to their race, disability, medical condition, color, creed, religion, sex, sexual orientation, marital status, national origin, or ancestry.

10. MISCELLANEOUS PROVISIONS

10.1 Notices. Any notice, demand, request, consent, approval, or communication either Party desires or is required to give to the other Party or any other person shall be in writing and either served personally during normal hours of operation of the Party receiving the notice, or sent by pre-paid, first-class mail to the address set forth below. Either Party may change its address by notifying the other Party of the change of address in writing. Notice shall be deemed communicated on the day personally served, or two (2) business days from the date of mailing if mailed as provided in this section. Additionally, notices by email will be considered legal notice if such communications include the following text in the Subject field: FORMAL LEGAL NOTICE – SPECTRUM SECURITY GROUP LLC.

10.2 Entire Agreement; Amendments in Writing. This Agreement constitutes the entire agreement between the Parties and is intended as an integrated agreement, superseding all prior negotiations, arrangements, agreements, representations, and understandings, if any, made by or among the Parties with respect to the subject matter hereof. No amendments or other modifications of this Agreement shall be binding unless executed in writing by both Parties hereto, or their respective successors, assigns, or grantees.

10.3 Severability. In the event that any one or more of the phrases, sentences, clauses, paragraphs, or sections contained in this Agreement shall be declared invalid or unenforceable by valid judgment or decree of a court of competent jurisdiction, such invalidity or unenforceability shall not affect any of the remaining phrases, sentences, clauses, paragraphs, or sections of this Agreement, which shall be interpreted to carry out the intent of the Parties hereunder.

10.4 Successors in Interest. This Agreement shall be binding upon and inure to the benefit of the Parties' successors and assignees.

10.5 Third Party Beneficiary. Except as expressly provided herein, nothing contained in this Agreement is intended to confer, nor shall this Agreement be construed as conferring, any rights, including, without limitation, any rights as a third-party beneficiary or otherwise, upon any entity or person not a party hereto.

10.6 Recitals. The above-stated Recitals are hereby incorporated into the Agreement as though fully set forth herein and each Party acknowledges and agrees that such Party is bound, for purposes of this Agreement, by the same.

10.7 Prevailing Wages. Contractor is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"). Contractor agrees to fully comply with all applicable federal and state labor laws (including, without limitation, if applicable, the Prevailing Wage Laws). It is agreed by the Parties that, in connection with the work or Project Services provided pursuant to this Agreement, Contractor shall bear all risks of payment or non-payment of prevailing wages under California law, and Contractor hereby agrees to defend, indemnify, and hold the City, its officials, officers, employees, agents and volunteers, free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws. The foregoing indemnity shall survive termination of this Agreement.

10.8 Corporate Authority. Each of the undersigned represents and warrants that (i) the Party for which he/she is executing this Agreement is duly authorized and existing, (ii) he/she is duly authorized to execute and deliver this Agreement on behalf of the Party for which he/she is signing, (iii) by so executing this Agreement, the Party for which he/she is signing is formally bound to the provisions of this Agreement, and (iv) the entering into this Agreement does not violate any provision of any other agreement to which the Party for which he/she is signing is bound.

[SIGNATURES ON NEXT PAGE]

IN WITNESS WHEREOF, the Parties have executed and entered into this Agreement as of the date first written above.

Accepted Date

Comprehensive Parts and Labor Warranty Agreement

Scope of Coverage
This warranty covers both parts and labor for all hardware components provided and installed as part of the access control system for the City of Los Alamitos. The warranty begins on the date of installation and includes coverage for years 1, 2 and 3 with additional optional coverage for years 4 through 5.

Warranty Coverage Periods and Rates

1. **Year 1**: Full parts and labor warranty is included at no additional cost.
2. **Year 2**: Full parts and labor warranty for an additional cost of 10% of the original invoiced amount ($77,420.69). This totals $7742.07 for year 2.
3. **Year 3**: Full parts and labor warranty for an additional cost of 12% of the original invoiced amount ($77,420.69). This totals $9290.48. for year 3.
4. **Optional Years 4 and 5**: The City may choose to extend the warranty for both parts and labor for each year at a cost of10% of the original invoiced amount ($77,420.69). This totals $7.742.07 per year for years 4 and 5.

Terms and Conditions

- **Claim Process**: All warranty claims must be submitted within 14 days of identifying a defect. Claims should include a description of the issue, and City staff must provide access for on-site assessment.
- **Exclusions**: This warranty does not cover damage from external factors, such as environmental conditions, unauthorized modifications, or misuse. Also excluded are parts repurposed from original KERI system, such as wire, electric locks and power supplies.
- **Labor and Parts Replacement**: All labor and parts covered under this warranty are included for the specified warranty extension years. Parts will be replaced in a timely manor, considering reasonable order lead times. Parts may at times be replaced with alternatives if original part is either not available in a timely manner or is out of production for any reason.

Limitations
This warranty exclusively covers hardware and installation labor as described. It does not cover software, network-related issues, or services outside the installed access control system.

Service Level Agreement (SLA) for Access Control System

1. Scope of Services
This SLA outlines the service expectations for maintenance, support, and operational standards related to the access control system provided to the City of Los Alamitos. This agreement applies only to the access control hardware, software, and systems installed as part of the project.

2. Service Hours and Availability

- **Standard Support**: Monday through Friday, 8:00 AM – 4:00 PM PST, excluding public holidays. Available by phone, email and text.
- **After-Hours Message Delivery**: Outside of regular business hours noted above, email, along with a call forwarding service that will relay after-hours voice and text messages to our staff, is available for your night and holiday staff to deliver messages that will get addressed the next business day.
- **Escalation for Urgent Needs**: In cases of critical urgency, the City may reach out via a designated emergency cell phone number(s) provided upon request. Please note that while we strive to respond promptly, response times outside of normal business hours will be as noted below:

3. Response Times
Service requests are classified into three levels of priority. Our commitment is to respond and resolve issues to the best of our abilities within the following timeframes:

- **Level 3 - High Priority (Critical Impact)**
    - **Examples**: Complete system outage, access control breach at a sensitive facility (e.g., Police Department).
    - **Response Time**: Within 6 hours for call response. If a truck roll is necessary, technician has up to 4 hours from time of his/her response to the call to be present on site.
    - **Contact Method:** Emergency cell phone number will be provided.
    - **Fees:** Additional service fees may apply depending on services required for resolution and time of day/Holiday - See rate sheet for Level 3 hours and rates.
- **Level 2 - Medium Priority (Moderate Impact)**
    - **Examples**: Partial system failure, individual access point issues at non-sensitive facilities.
    - **Response Time**: Within 16 hours for call and/or on site response.
    - **Contact Method:** Normal channels of business landline, email or text during normal business hours. Emergency cell phone number for after hours.
    - **Fees:** Additional service fees may apply depending on services required for resolution and time of day/Holiday - See rate sheet for Level 2 hours and rates.

- **Low Priority (Routine Maintenance)**
    - **Examples**: Non-urgent repairs, routine software updates, or system checks.
    - **Response Time**: Within 24 business hours
    - **Contact Method:** Normal channels of business landline, email or text during normal business hours. Additional service fees may apply depending on services required for resolution and time of day/Holiday - See rate sheet for Level 1 hours and rates.

Rate Sheet

TIME FRAME	RATES FOR SERVICES
LEVEL 1: Normal Business Hours: 8am-4pm M-F, excluding Holidays	$150/hr
LEVEL 2: After Hours: 5am-8am and 4pm-8pm M-F 8am-8pm Weekends, excluding Holidays	$225/hr
LEVEL 3: Emergency Hours: 8pm-5am M-F 8pm-8am Weekends Any time on Holidays	$300/hr

4. Preventive Maintenance

- **Frequency**: Quarterly preventive maintenance checks to ensure system integrity.
- **Scope**: Includes hardware inspections, software updates, testing of access points, and verification of network connections where applicable to ensure proper system functionality. Minor repairs and parts replacements will be made on an as needed basis as provided for in the Warranty Agreement.
- **Recommendations:** Technician will provide responses to findings and make recommendations that the City may choose to act upon or not. This may include pre-emptive changes and additions to the system that will incur parts and labor costs above and beyond the SLA and/or Warranty contract agreements.
- **Repairs:** Any findings covered under the Warranty will be addressed and resolved at the time of the quarterly maintenance visit, or within a reasonable amount of time dependent on parts and technician availability and the urgency of the need for repair.

5. Exclusions
This SLA does not cover:

- Issues arising from third-party hardware or software not provided under this agreement.
- Damages due to unauthorized modifications, misuse, or environmental conditions outside of the system's specified operating range.

7. Annual SLA Review
This SLA will be reviewed annually to ensure it aligns with the City's needs and any changes in service requirements. Adjustments may be made with mutual consent.

PROPOSAL COVERSHEET - ATTACHMENT A

A. Company Information

Contractor Name: SPECTRUM SECURITY GROUP

Physical Address: 10804 LOS ALAMITOS BLVD. LOS ALAMITOS, CA 90720

Name of Authorized Representative: ROBERT ALBERT

Title of Authorized Representative: PRESIDENT

Representative's Email Address: SOCALSPECTRUM@GMAIL.COM

Representative Office Phone # 562-431-0047

Representative Cell Phone # 562-900-9172

Company Website Address: losallock.com

Company Type: ☐ Agency ☒ LLC ☐ Partnership ☐ Sole Proprietorship ☐ Joint Venture

Date Company was Established: 2016 - JAN. 1

Years of Experience: Respondent has 20 years of experience as a contractor in Access Control Services

B. Acknowledgement & Assurances

(a) Respondent has examined copies of all the Contract Documents, including without limitation the Agreement (Exhibit A) wherein each of the other Contract Documents is identified, and accepts all the terms and conditions thereof.

(b) Respondent proposes and agrees, if this bid is accepted, to enter into an agreement with City in the form included in the Contract Documents to complete all work as specified in the Agreement for the contract price and within the contract time indicated in this bid and in accordance with the Contract Documents.

(c) Respondent has examined the site and locality where the work is to be performed and the legal requirements and conditions affecting the cost,

progress and performance of the work in strict accordance with the Contract Documents.

(d) The cost proposal must include a firm unit price for each Access Control System Services for three (3) years, that incorporates all aspects of the work plan and covers all tasks identified in the Scope of Work.

(e) It is expected that general, overhead, and administrative costs are included in the monthly fee. It will be assumed that all contingencies and/or anticipated escalations are included.

(f) Respondent is fully qualified to perform the work.

(g) The undersigned agrees that the City reserves the right to reject any or all bids and reserves the right to waive informalities in a bid or bids not affected by law, if to do so seems to best serve the public interest.

A signature by a principal or officer having the authority to negotiate and contractually bind and extend the terms of the written proposals is required.

RATE AND SERVICES STRUCTURE FORM - ATTACHMENT B

Rate and Services Structure

For an actual service compensation system, a copy of the Contractor's current rate schedule as relevant to the fee proposal.

Provide the following information as relevant to the fee proposal:

Job Description	ACCESS CONTROL SYSTEM INSTALL
Estimated total hours	≈ 80
Estimated out-of-pocket expenses	MATERIALS ≥ $50K LABOR ≥ $10K
The hourly rate by staff classification	TECH - PREVAILING WAGE: $63.01/HR ADMIN - $30/HR
The all-inclusive maximum fee and out-of-pocket expenses, which will not be exceeded	$60,000
The frequency and timing of the Contractor's billing process	10% DEPOSIT, FINAL DUE ON COMPLETION
Cost of additional related services (if applicable)	N/A

Proposal A Schedule Total: $ Approx $60,000.00

The Contractor shall be responsible for calculating and providing unit prices for the schedule. The Proposal Schedule shall include all costs for services, labor, materials, equipment, and installation associated with completing the work in place per the plans, specifications and details.

Proposal Schedule Total (in word):

TOTAL MATERIALS COST, INCLUDING PARTS and MATERIALS REQUIRED TO INSTALL AND DELIVER A FUNCTIONING SYSTEM ARE ESTIMATED TO BE ROUGHLY $50,000.00 AND LABOR AS A BLEND OF ON-SITE, PREVAILING WAGE AND IN-OFFICE ADMIN-RATE LABOR IS ESTIMATED TO TOTAL ROUGHLY 80 HOURS OVERALL AT A COST OF APPROXIMATELY $10,000.00.

RESPONSE TO TECHNICAL QUESTIONS - ATTACHMENT C

Section 1: Company Experience & Qualification

a) Provide company experience and qualification to meet the scope of work and standard of performance.

Spectrum Security Group (SSG) has been a trusted provider of comprehensive access control and security systems solutions for over 8 years. During this time, our team has successfully implemented advanced security systems for a diverse range of clients, including school districts, healthcare facilities, and large corporations. This experience has equipped us with a deep understanding of the unique security needs across various sectors and the technical expertise to execute complex projects with precision.

Our leadership is backed by the extensive industry experience of our President, Robert Albert, who has been at the forefront of the security and access control industry for over 20 years. Additionally, our technicians bring decades of collective experience, with over 30 years of hands-on expertise in installing, maintaining, and upgrading security systems.

In the local context, SSG operates under the DBA “Los Alamitos Lock Service”, a name synonymous with reliability in locksmithing and security services in the City of Los Alamitos. We have served as a vetted contractor for the City for decades now, which underscores our commitment to quality, compliance, and strong working relationships within the community. Our continued partnership with the City positions us uniquely to deliver high-quality services while understanding the specific security requirements of its facilities.

b) Identify principals of the company.

SSG’s President, Robert Albert, is the sole principal of the company.

c) State company’s financial condition and identify any condition (e.g. bankruptcy, pending litigation, planned office closures, merger, etc. that may impede the Respondent from providing services).

SSG is in sound financial standing and has no plans to make any significant changes in the near or distant future.

d) Describe your company’s experience in providing Access Control Services to like-sized public agencies and/or private companies.

Spectrum Security Group (SSG) has extensive experience providing Access Control Services to public agencies and private entities of similar size and scope to the City of Los

Alamitos. Our work spans across various sectors, including educational institutions, healthcare facilities, community associations, and municipal infrastructures, which positions us well to meet the specific needs of the City's access control system.

We have successfully delivered comprehensive access control solutions for:

- **School Districts**: (Specifically Los Alamitos, Lynwood, Norwalk/La Mirada, Long Beach and others) Implementing scalable access control systems for major school districts, managing high user volumes and multiple site integrations.
- **Healthcare Facilities:** (Specifically Los Alamitos Hospital, Los Alamitos Medical Buildings, Katella Senior Living and others) Equipping medical buildings with robust access control systems that meet stringent security and regulatory requirements.
- **Community Associations:** Serving large-scale residential communities with 500+ users by providing secure, streamlined access control systems across multiple properties and locations within a large property size.
- **Government and Municipal Facilities:** (Specifically JFTB Los Alamitos, Seal Beach Naval Weapons Station, Navy Federal Credit Union and others) Handling access control projects for high-security environments, ensuring secure and efficient entry systems for critical infrastructure.

Our projects involve the integration of access control with multiple other technologies, ensuring a cohesive and future-proof solution tailored to the specific needs of each client. Our solutions include:

- **CCTV Integrations:** Merging video surveillance with access control for real-time monitoring and enhanced security.
- **Visitor Entry Management:** Streamlining visitor access and enhancing security with advanced entry systems.
- **Vehicle Entry Systems:** Integrating vehicle access control with automated entry systems for seamless management.
- **System Database Sharing:** Enabling data consistency across multiple access points and locations for better management and security.
- **Area of Refuge Emergency Call Systems:** Integrating emergency communication systems in compliance with safety regulations.
- **IP/VoIP/SIP Protocol Intercom and Phone Systems:** Implementing cutting-edge communication solutions integrated with access control systems.

This experience demonstrates our ability to manage complex, multi-site projects with diverse technological requirements, ensuring both security and operational efficiency for our clients.

e) State all instances of being disqualified, removed, or otherwise prevented from completing the terms of any previous contracts over the past five (5) years. Give names, street addresses, and phone numbers and explain the circumstances.

There are none. We have completed all projects under contract both as lead and sub contractor through our entire existence as a company.

Section 2: Personnel

a) Attach an organizational chart for your company or the local office servicing this contract.

(No chart attached as it's only as simple as the below itemized description)

Our organization is streamlined, allowing for efficient communication and quick decision-making—key advantages in successfully delivering this project. Given our smaller team structure, I will outline our organizational chart here:

- **President / Project Lead: Robert Albert**
  As President, Robert brings over 20 years of experience in access control and security systems. He will oversee both project management and field operations, ensuring that every phase of the installation meets the City's standards.
- **Operations / Project Management: Zack Smith**
  Zack manages daily operations and coordinates the project timeline, ensuring smooth communication between our team and the City.
- **Technicians:**
  - **Thomas Faulkner - Lead**, 30 years experience
  - James Edwards
  - Chris McDermott
  - Oliver Taylor
    Our team of highly experienced technicians, each with extensive experience in access control systems, will handle the on-site installation and maintenance. Their technical expertise ensures precision and efficiency at every step.

b) List personnel handling the day-to-day management of the contract. List their certifications, specialty, and licenses.

Robert Albert – **Primary Contact and Project Manager**

- **Certifications & Specialty**: **SALTO Certified** (the proposed system), licensed under **C28 (Lock and Security Systems) in California**, with over **20 years of industry experience**. Other system Certifications include: Brivo, Eagle Eye Networks, CDVI, Software House and Gallagher. Robert specializes in locksmithing, access control, and providing custom security system solutions, including IP-based systems, CCTV, intercoms, and network infrastructure. His extensive hands-on experience makes him a

versatile leader capable of overseeing both the technical and managerial aspects of the project. Rober also holds a BA in Business Administration from Cal State Fullerton.

Zack Smith – **Assistant Project Manager**

- **Certifications & Specialty**: **SALTO Certified**, with **10 years of industry experience**. Zack brings valuable project management experience gained during his tenure with Unlimited Technology, a global security industry firm. During his tenure there, he oversaw projects on a national scale for customers such as Google (data center build-outs), Tesla (service center build-outs), Sony Entertainment and Amazon Web Services data centers to name a few. His familiarity with the City of Los Alamitos as a customer of Los Alamitos Lock Service (SSG's DBA) adds a layer of local insight, ensuring smooth coordination throughout the project. Zack will assist in the day-to-day management, focusing on timelines, resource allocation, and client communication.

Thomas Faulkner – **Lead Technician**

- **Certifications & Specialty**: Industry veteran with nearly **30 years of experience** in locksmithing, alarms, CCTV, access control, and network equipment. Thomas is a **second-generation locksmith** and holds a **California Locksmith License from BSIS**, as well as multiple industry certifications for various security systems. His deep familiarity with the Keri system currently in use across the City's buildings ensures a seamless transition and integration with the new access control systems. Thomas has a long history of working with locking hardware and advanced security systems, making him a valuable asset to the technical team.

Section 3: Approach

a) Describe your approach to the Scope of Services and Standard of Performance and any special ideas, techniques, or suggestions that you think might make the Scope of Services and Standard of Performance implemented smoothly.

Our approach to delivering the Scope of Services and Standard of Performance focuses on providing a flexible, responsive, and client-centered solution. As a small, agile business, we minimize bureaucratic layers, allowing us to adapt quickly and ensure the project runs smoothly from start to finish.

Key elements of our approach include:

- Direct Communication: Our streamlined organizational structure allows for open and direct communication with the client, ensuring that all concerns, changes, and updates are handled swiftly and clearly, with no delay or confusion.
- Agility and Responsiveness: With fewer layers of management, we are able to quickly adjust to any project challenges or client preferences. This flexibility allows us to

maintain a high standard of performance without the delays that often occur with larger firms.

Integrating Salto Space Platform:

To enhance this approach, we utilize the Salto Space platform, which brings significant technical advantages. The data-on-card technology allows for a more efficient, decentralized system, ensuring that:

- Seamless Access Control: With data-on-card, user credentials are updated directly on their access cards rather than requiring constant real-time connection to a central server. This allows for faster updates and more efficient system management, particularly across multiple sites or locations, which is critical for large projects like this one.
- Reduced Downtime: The Salto Space system's decentralized nature means that even if there are network disruptions, the access control system continues to function seamlessly, providing uninterrupted service.
- Scalability: The platform is highly scalable, which allows us to implement systems that can grow with the City's needs. Whether adding new buildings or integrating other technologies, the system's modular design ensures flexibility.

Additional Techniques for Smooth Implementation:

- Proactive Planning: Our team conducts thorough pre-project planning, including detailed site assessments and early-stage consultations with the City to identify any potential challenges before they arise. This minimizes unexpected delays during the implementation phase.
- Tailored Solutions: We customize the access control system to meet the specific needs of each site. The Salto Space platform offers the flexibility to easily integrate with existing infrastructure, ensuring a smooth transition from legacy systems to the new setup.
- Continuous Feedback Loop: We actively seek feedback from the client throughout the project to ensure all expectations are met. By incorporating client input in real time, we can adjust our approach and ensure the highest level of satisfaction.

By combining our nimble, client-focused approach with the advanced features of the Salto Space platform, we ensure the implementation of the Scope of Services is both efficient and scalable, meeting the City's immediate needs while allowing for future growth and flexibility.

b) Describe your company's ability to address complaints or deficiencies.

Our company is committed to addressing complaints or deficiencies quickly and effectively, thanks to our direct communication structure and proximity to the City of Los Alamitos. With no layers between the client and the company's President, we can tackle issues

head-on, ensuring swift resolutions. Our brick-and-mortar storefront, located less than a mile from City Hall, is open from 9 AM to 4 PM, Monday through Friday, allowing for easy access to in-person support when needed.

In terms of delivering solutions, we pride ourselves on being highly responsive, trustworthy, and professional. This reputation is backed by numerous 5-star reviews on Yelp, positive customer feedback, and the trust we've earned from clients of all sizes—many of whom are typically served by much larger security integrators. Despite our smaller size, we have consistently demonstrated that we can deliver the same, if not better, service and responsiveness as larger firms, without the bureaucracy and overhead costs.

Our ability to quickly address any deficiencies is a direct result of our client-centered approach and strong focus on customer satisfaction.

c) Describe your communication plan between your representative and City's representative.

Communication can be conducted via phone, email or text to any of the above-mentioned representatives. We will be available during the duration of the project and beyond during all normal business hours, and can be reached through many channels, through many representatives.

d) Describe communication within your company.

Due to the smaller size of the company, much of our daily communication is face-to-face and when that's not an option a phone call or text. There is little-to-no delay in communication because of this.

e) Describe your employee training program.

Employees receive training on existing and new systems as we implement them into our service offernings. Online training courses are a part of the monthly routine, and morning meetings are held amongst the technicians to create an environment of shared knowledge and experience from the prior days/weeks projects and experiences.

f) Describe your safety program.

All employees are held to a strict standard of best practices and safety regulations, conforming to all OSHA standards on any and all projects and service calls, regardless of size or location. Weekly safety meetings are a part of our typical operation, in which we review best practices and discuss PPE use and individual employee needs for upgraded PPE equipment as older PPE wears out or reaches its end of life.

NON-COLLUSION AFFIDAVIT - ATTACHMENT D

The undersigned declares:

I am the PRESIDENT of SPECTRUM SECURITY GROUP, the party making the foregoing bid.

The bid is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation. The bid is genuine and not collusive or sham. The bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham bid. The bidder has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham bid, or to refrain from bidding. The bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the bid price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the bid price, or of that of any other bidder. All statements contained in the bid are true. The bidder has not, directly or indirectly, submitted his or her bid price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, to any corporation, partnership, company, association, organization, bid depository, or to any member or agent thereof, to effectuate a collusive or sham bid, and has not paid, and will not pay, any person or entity for such purpose.

Any person executing this declaration on behalf of a bidder that is a corporation, partnership, joint venture, limited liability company, limited liability partnership, or any other entity, hereby represents that he or she has full power to execute, and does execute, this declaration on behalf of the bidder.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on 10/16/24 [date], at Los Alamitos [city], CA [state].

Signature of Declarant

ROBERT ALBERT

Printed Name of Declarant

SPECTRUM SECURITY GROUP LLC

Dear City of Los Alamitos,

I would like to express my sincere gratitude for the opportunity to submit a proposal for the city of Los Alamitos' access control system. As a local business based in this wonderful community, we are particularly excited about the chance to contribute to the security and well-being of our city.

Initially, we submitted a bid featuring the Salto access control system. However, we encountered some unforeseen challenges regarding the system's CJIS compliance, of which we were previously assured of, prompting us to revise our proposal. Our updated submission now features the Security Center solution from Genetec, which is widely recognized as one of the few access control systems that genuinely meet CJIS compliance standards.

The Genetec Security Center stands out as a top-tier access control solution. This system integrates advanced cybersecurity measures, ensuring the protection of sensitive data while allowing for seamless access management across multiple locations. Its open architecture facilitates interoperability with existing security infrastructure, making it adaptable to the unique needs of the city. Moreover, Security Center supports a wide range of hardware, which not only enhances operational efficiency but also streamlines compliance reporting, ensuring that public safety officials can meet regulatory requirements effortlessly

I would like to highlight that we need to clarify the terms of the 5-year Service Level Agreement (SLA) before we can provide our final pricing proposal.

We are looking forward to our conversation this week and are excited about the potential to collaborate with the city.

- Robert Albert, Owner

 10/29/2024

Genetec Security Center's compliance with the Criminal Justice Information Services (CJIS) Security Policy v5.95 involves meeting rigorous standards set by the FBI to protect sensitive Criminal Justice Information (CJI). This policy applies to organizations handling CJI data, such as law enforcement, and mandates technical, administrative, and physical security requirements. Here's a how Genetec Security Center addresses key CJIS requirements:

1. Authentication and Access Control

- **User Authentication:** Genetec Security Center uses multi-factor authentication (MFA) to comply with CJIS requirements, ensuring that only authorized personnel can access CJI. MFA combines two or more factors (such as passwords and biometrics) to provide layered security.

- **Role-Based Access Control (RBAC):** Genetec Security Center offers RBAC, enabling administrators to assign specific access permissions to different roles. This limits access to CJI based on job responsibilities, ensuring compliance with CJIS's principle of least privilege.

- **Account Management:** The platform includes tools to enforce password policies, manage account expiration, and log out idle sessions. This aligns with CJIS policies for user identification and authentication management.

2. Data Encryption

- **Encryption in Transit and at Rest:** Genetec Security Center encrypts data in transit and at rest to protect CJI from unauthorized access. This includes using protocols like HTTPS/TLS for data in transit and AES-256 encryption for data at rest, which comply with CJIS encryption requirements.

- **Key Management:** Encryption keys are securely managed and rotated according to CJIS standards, ensuring that data encryption is resilient to potential attacks.

3. Audit and Accountability

- **Comprehensive Logging:** Genetec Security Center records all system and user activity, including access attempts and modifications to CJI. This meets CJIS requirements for audit logs and accountability.

- **Audit Log Retention:** Logs are retained and stored securely in compliance with CJIS requirements, enabling audits and investigations. Administrators can review logs to detect and respond to unauthorized access attempts.

- **Real-Time Monitoring**: The platform supports real-time monitoring and alerting suspicious activities, such as repeated login failures or unauthorized access attempts, enhancing incident response.

4. Incident Response and Reporting

- **Incident Handling Procedures:** Genetec Security Center provides tools for incident detection, reporting, and response to comply with CJIS requirements for incident handling. This allows administrators to quickly respond to security incidents involving CJI.

- **Reporting Capabilities:** In case of a security incident, Genetec enables efficient reporting mechanisms, helping organizations meet CJIS requirements for notifying affected parties and authorities.

5. Physical Security and Personnel Security

- **Access Controls for Physical Locations:** Genetec Security Center provides physical access controls, such as surveillance, door access management, and intrusion detection, for facilities housing CJI data to meet CJIS physical security requirements.

- **Personnel Background Checks**: CJIS requires background checks for individuals accessing CJI. Genetec Security Center does not conduct these checks directly but provides mechanisms for user tracking and accountability, supporting compliance by organizations.

6. Network Security and Configuration Management

- **Secure Network Architecture:** Genetec implements a secure network architecture that meets CJIS guidelines, including firewalls and segmentation to protect against unauthorized access. Network access controls help isolate systems processing CJI from non-CJI systems.

- **Configuration Control:** The platform provides configuration management capabilities to enforce secure settings and restrict modifications to configurations related to CJI data protection, as required by CJIS.

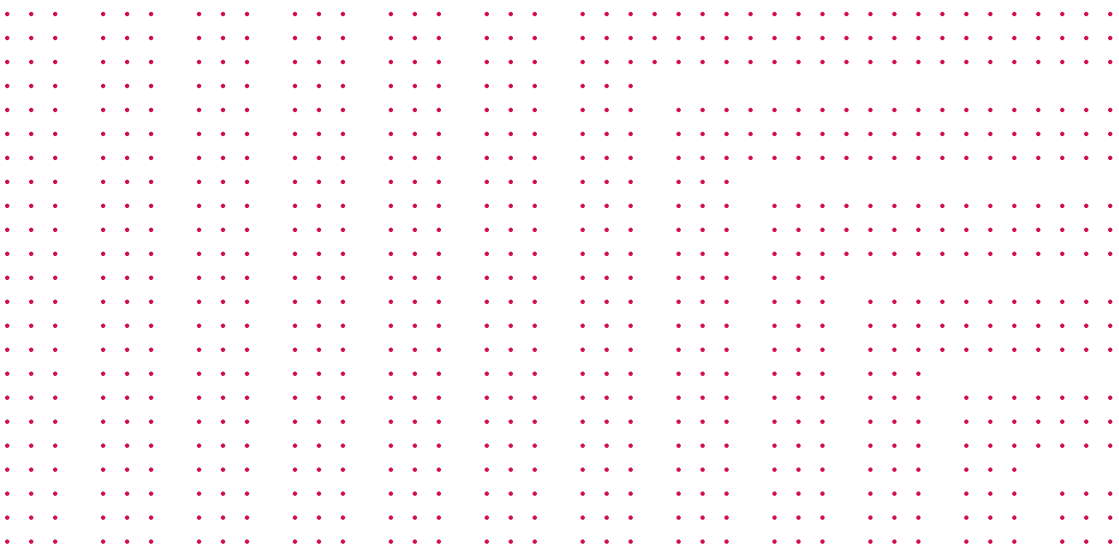
7. Data Integrity and Protection Against Malware

- **Anti-Malware and Threat Detection:** Genetec Security Center supports integration with anti-malware solutions, which helps detect and prevent malware threats targeting CJI data.

- **Data Integrity Verification:** The system includes tools to verify the integrity of CJI, ensuring that data has not been tampered with, meeting CJIS integrity requirements.

8. Training and Awareness

- **User Training Tools:** Genetec Security Center offers features and support resources for user training on security policies and best practices. This helps agencies meet CJIS requirements for training personnel on the importance of protecting CJI.



9. Policy and Documentation Compliance

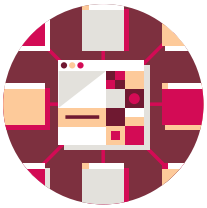
- **CJIS Policy Documentation Support:** Genetec Security Center offers documentation and implementation guidance for agencies to support compliance with CJIS requirements and maintain policy documentation.

By meeting these standards, Genetec Security Center ensures that it can securely manage and protect CJI data, helping organizations maintain CJIS compliance and strengthen your security posture.

Security Center Synergis™

Complete access control

Security Center Synergis™ is an IP access control system that heightens your organization's security, introduces you to non-proprietary hardware choices, and lets you go about your day knowing that your team is equipped to respond to any threat.



Genetec™

Key benefits

Respond with confidence through unification

When you unify Synergis with video surveillance, intercom, and intrusion systems, you make a clearer, more timely decision compared to standalone systems.

Choose your hardware based on your needs

Unlike proprietary systems, Synergis allows you to choose the best access control hardware. From leading manufacturers of IP door controllers to wireless and PoE locks – the choice is yours.

Make your move to an adaptable access control system

Synergis offers the clearest path to an IP access control system that uses your network and existing access control infrastructure.

Advanced cybersecurity at every level of your system

Advanced encryption and claims-based authentication ensures secure communications, protects your cardholders' identities, and keeps the integrity of your system a priority.

Move to a single card

Centrally manage all your cardholders and credentials, even between multiple independent systems. Automatically synchronize changes from one system to another.

Maintain less infrastructure and reduce your total cost of ownership

Deploy Synergis Cloud Link appliances at all sites and establish real-time connectivity to your main server, whether it resides on your premises or in the cloud.

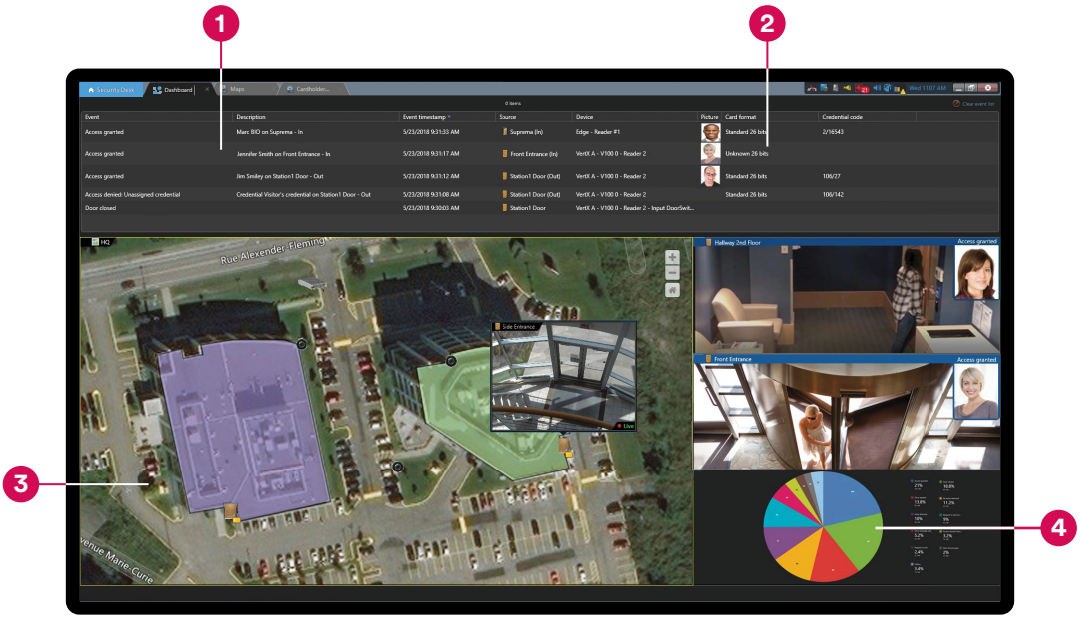
Security that revolves around you

From single-building installations to complex multi-site deployments, Synergis is engineered to handle the needs of growing organizations. From managing cardholders and visitors, printing badges, and running investigations, Synergis will meet your everyday needs. Built-in failover options let you go about your day-to-day operations uninterrupted and with the confidence of knowing that your people and assets are protected during critical situations.

Designed to scale

Whether you need to secure a multi-site facility or a small location, Synergis has the flexibility needed to adapt to your security environment.

All your needs in one



Get a full-featured solution with embedded badge design, cardholder and visitor management, advanced visual reporting, and more.

Connect anywhere, any time

No matter their location, personnel can lock or unlock doors, review access control events, and change threat levels through a suite of mobile and web apps.

Start your day with confidence

As part of the Security Center unified platform, Synergis allows you to heighten efficiency and security by unifying your access control system with other security and business systems. Operators will have the tools to make informed and timely security and operation decisions with a unified approach to your security. Move away from independent systems that were never designed to work together and take advantage of a unified view of all your security information.

1 Multi-task view

Keep multiple tasks open at the same time, allowing operators to see and do more. Monitor video, search archives, and pull reports, all at the same time.

2 Cardholder video verification

Verify cardholder pictures against live or recorded video associated to access control events for every door within any monitoring or reporting task.

3 Dynamic interactive maps

Efficiently monitor and manage all your sites with interactive maps that provide a dynamic view of all security devices, alarms, and system statuses.

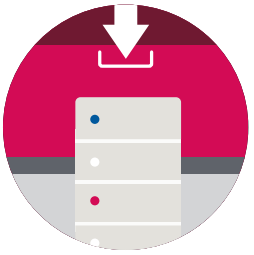
4 Visual reporting

Capture timely insights into your day-to-day operations and view the flow of people within your premises without the need for heavy spreadsheets.

Choose your deployment and purchase options

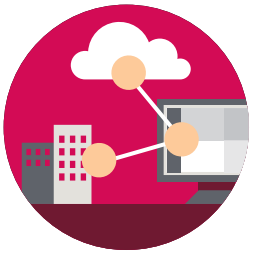
Select how you own, deploy and maintain your access control system

Whether your system is deployed on-premises, in the cloud, or somewhere in between, Synergis delivers a steady flow of innovation that provides ongoing value to help you focus on your business. You choose whether you pay upfront or on a termed basis bringing flexibility to your budget with Synergis SaaS edition.



Fully hosted

The Synergis SaaS edition is an Access Control as a Service (ACaaS) that lets you move your system entirely to the cloud, simplifying the deployment and maintenance of an enterprise-class system. Choose between monthly or yearly payments and reduce your infrastructure management.



Hybrid

If you're not ready to fully transition to the cloud, the Synergis SaaS edition lets you deploy some or all of your system on-premises and enhances your security with value-added services in the cloud.

On-premises

For many years, Synergis has been deployed on-premises. With all your infrastructure in your possession, you can either subscribe to the service or pay entirely in advance.

An appliance for either option

The Synergis Cloud Link appliance reliably and securely connects your existing on-premises controllers, modules, and electronic locks to either the cloud or to your main access control server on-premises.

Synergis key features

Complete access control features for your day-to-day operations

Threat level management
Quickly change the behavior of your security system in response to changing security conditions and potential threats. Pre-built threat levels can be built based on your corporate security policies.

Global cardholder management
Synchronize cardholders, cardholder groups, credentials, and badge templates across multiple independent Synergis systems through multi-server synchronization.

Visitor management
Modernize your approach to visitor management and become more efficient by enrolling visitors in Synergis, assigning physical access rights, and tracking their movements with ease.

Badge design and issuance
Issue cardholder and visitor ID badges so that your staff can easily identify those who should and should not have access to your facilities. With advanced card request workflow, you determine who can create, view, and print badges.

Dynamic interactive maps
Better visualize and manage your security environment by dynamically navigating through facilities and managing a greater number of doors, cameras, intrusion areas, and other security devices.

Failover and redundancy
Count on the availability of your access control system to run reports or make access changes whenever you need them. Get ease of mind with built-in failover and redundancy mechanisms that protect against hardware failure or network interruptions.

Microsoft Active Directory (AD) sync
Synchronize your Windows users with Security Center users and cardholders. Adding Windows users in AD will automatically create Security Center users and cardholders along with their groups, credentials, and custom fields.

Elevator destination dispatch
Effectively manage elevator traffic based on cardholder's assigned access and schedules in Synergis. Optimize your building operations through orderly travel of cardholders.

Federation
Facilitate centralized monitoring, reporting, and alarm management across multiple independent sites by synchronizing door entities and related events and alarms between sites in real time.

End-to-end data security and privacy
Ensure that your servers, communications, and devices are secured with the latest cryptographic protocols so that your access control system is protected against emerging cyber threats.

Comprehensive feature list

Core access control functions

Cardholder management with advanced filtering options to quickly locate, assign minimum security clearances

Badge issuance workflow and activity trails to issue credentials, request badge screening and more.

Visitor Management with check-in/out process, print badge or paper credentials and visitor escort mode

Elevator control without PLCs
(Destination dispatch integrations available)

Mobile credentials supported: Issue or revoke mobile credentials.

Resend or cancel email invitations.

View the status of your mobile credential subscription and license count.

Directly integrated with HID Origo Management Portal.

License plate as a credential

People counting for mustering

Advanced access control measures

Antipassback (Soft, hard, on schedule, forgive APB)

Threat level management

First-Person-In rule for triggering unlock schedules

First-Person-In rule for activating access rights

Two-Person rule

Visitor Escort mode

Duress PIN support

Double-badge activation

Door interlocks without requiring PLCs to ensure only one door can be open at any given time in secured area

Maximum occupancy

Evacuation Assistant to account for personnel during routine and emergency evacuations

Supported hardware

Synergis Cloud Link supporting:

- HID VertX interface modules: V100, V200, V300
- Mercury EP and LP controllers
- Assa Abloy WiFi, PoE, and Aperio locks (AH30, AH40)
- Wireless locks (SVN plugin available)
- Allegion Schlage AD-Series, Legacy LE and NDE Locks (through Mercury EP and LP Panels)
- Allegion Schlage NDE, LE, and Control locks (through ENGAGE Gateway)
- SimonsVoss SmartIntego Locks (through Mercury EP and LP Panels)
- Axis A1001 and A1601 Network Door Controllers
- OSDP-enabled readers over RS-485

HID Vertx and Edge EVO controllers supported

Morpho, Suprema, Invixium, and Stonelock biometric readers through plugin

User interface

Unified access control and video in one software package

State of the art task-based interface

Cardholder verification and additional info in display tile

Unified alarm management (access, video, intrusion)

Advanced reporting

Embedded reporting engine

View access control events and alarms through graphs and charts

Customizable reports without third party tool needed

Activity and Configuration reports

Export reports to CSV, EXCEL, and PDF

Automatically email reports to specific users

Time and attendance and area presence reporting

Multi-site management

Advanced distributed architecture to manage multiple sites reducing total cost of ownership (TCO)

Centralized cardholder management and syncs between independent sites

Global reporting and monitoring of independent sites through Federation™

Security measures

Configurable user-access privileges

Secure remote access capabilities

Secure protocols and communications from card to software

Password protected export

Authenticated user logins

Password management for Synergis Cloud Link

Certificate authentication

View communication protocol encryption

Security score widget

Industry gold standard EAL6+ rated

Separate data partition

Secure boot

Failover and redundancy

Native Access Manager and Directory failover

Failover and redundant archiving (hot-standby to minimize downtime)

Virtualization support

Distributed architecture

Peer-to-peer communications across Synergis Cloud Link appliances for Global IO linking and antipassback

System configuration

Available for deployment on-premise, SaaS, and hybrid

Copy configuration

Silent installation for mass deployment and upgrades

Auto-discovery of access control devices

Bulk Import of cardholders, credentials and custom fields

Centralized multi-device firmware upgrade

Security Center Synergis editions

Synergis access control software is available in a variety of packages designed to fit the size and needs of your security applications. You can easily modify your package with a simple license update as your requirements evolve.

Package overview	Standard	Pro	Enterprise	SaaS
Maximum number of readers	64	256	Unrestricted	Unrestricted
Maximum number of monitoring clients (5 included)	5	10	Unrestricted	Unrestricted
Number of access managers	1	2	Unrestricted	Unrestricted
Badge designer and custom fields	●	●	●	●
Alarm management	●	●	●	●
Dynamic graphical maps	●	●	●	●
Custom reports and email notifications	●	●	●	●

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 11I**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Ron Noda, Development Services Director**

Subject: **Notice of Completion (NOC) for the Demolition of Los Alamitos Television Production (LATV)/Public Works (PW) Building at 10921 Oak Street Project (CIP No. 22/23-04)**

SUMMARY

The Demolition project of the Los Alamitos Television Production (LATV)/Public Works (PW) Building at 10921 Oak Street (CIP No. 22/23-04) has been completed.

Staff recommends that the Council accept the work as completed, direct filing of the Notice of Completion (NOC), and authorize retention release as prescribed by the California Public Contract Code.

RECOMMENDATION

1. Accept as complete the construction by Unlimited Environmental, Inc. for the LATV Building Demo at 10921 Oak Street (CIP No. 22/23-04); and,

2. Authorize the City Clerk to record the Notice of Completion/Final Report with the County Recorder's Office; and,

3. Authorize Staff to release the 5% retention to the contractor in the amount of $5,233.55, thirty-five (35) days after recordation of the Notice of Completion.

BACKGROUND

The City Council approved the Award of Bid to Unlimited Environmental, Inc. on November 20, 2023. Construction was completed on September 19, 2024. The work consisted of demolishing the existing deteriorated LATV/PW building.

DISCUSSION

Work on this project is now complete and found acceptable by the City Engineer. Staff recommends acceptance of the work in conjunction with the processing of the Notice of Completion/Final Report and release of the retention as prescribed by the California Public Contract Code.

FISCAL IMPACT

The project had a total funding budget of $150,000.00 with the following breakdown of funding sources:

Budget Fiscal Year	Source	Amount
2024-25	General Fund	$150,000.00

The project was within the overall funding budget and came in under budget due to a bid from the contractor that was lower than anticipated. The following is a breakdown of the costs:

Construction Costs	$104,671.00
Design, Inspection, & Construction Management	$ 31,961.40
Total Project Price	$136,632.40

Attachment: 1. Notice of Completion - LATV Demo Project

RECORDING REQUESTED BY
AND MAIL TO:

City Clerk
City of Los Alamitos
3191 Katella Avenue
Los Alamitos, CA 90720

No Consideration SPACE ABOVE THIS LINE FOR RECORDER

NOTICE OF COMPLETION NO RECORDING FEE PURSUANT TO GOVERNMENT CODE SECTION 6103

for

Los Alamitos Television Production (LATV) Building at 10921 Oak Street (CIP No. 22/23-04)

NOTICE IS HEREBY GIVEN THAT:

1. The undersigned are owners or corporate officers of the interest or estates stated below in property hereinafter described.

2. The full name of the owner is: City of Los Alamitos, 3191 Katella Avenue, Los Alamitos, CA 90720

3. The work consisted of :

Work on this project is now complete and found acceptable by the City Engineer. The City of Los Alamitos hired a contractor for the said work. The work consisted of the demolition of the existing LATV building at the City Hall campus located at 10921 Oak Street.

4. The work was completed on 09/19/2024

5. The contractor was: Unlimited Environmental, Inc.

Dated 09/19/2024

Chris Kelley, City Engineer, City of Los Alamitos

VERIFICATION BY CORPORATION OWNER

STATE OF CALIFORNIA)
) SS
COUNTY OF ORANGE)

I, Chris Kelley, City Engineer of Los Alamitos, a Municipal Corporation, and that he executed the foregoing Notice of the aforesaid interest or estates in the property therein described; and verify on behalf of the City of Los Alamitos; that the contents thereof, and the the facts therein stated are true.

Chris Kelley, City Engineer

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 12A**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Ron Noda, Development Services Director**

Subject: **Survey Results for Potential Name Change of Apartment Row**

SUMMARY

This discussion item proposes renaming the Apartment Row neighborhood.

RECOMMENDATION

1. Evaluate the survey results and discuss the options for the name change of the Apartment Row neighborhood; and,

2. Determine the new name for the Apartment Row neighborhood.

BACKGROUND

The City of Los Alamitos is approximately two square miles, excluding the Joint Forces Training Base, and is divided into 16 neighborhoods. Los Alamitos residents frequently identify themselves according to their neighborhood and are generally very proud of where they live. The Apartment Row Neighborhood is the largest and most dense residential neighborhood in Los Alamitos. It is bounded by Farquhar Avenue to the south, Lexington Drive to the east, and commercial uses along Katella Avenue and Los Alamitos Boulevard to the north and west. The neighborhood consists of approximately 1,900 units and over 4,000 residents.

It is identifiable within the Neighborhood Map shown below:

City records indicate that the area was once called "City Gardens" circa 1924. However, no historical records exist on how and when this area became known as "Apartment Row." Earlier this year, Council Member Doby requested that the City Council consider polling the residents of Apartment Row regarding a potential name change.

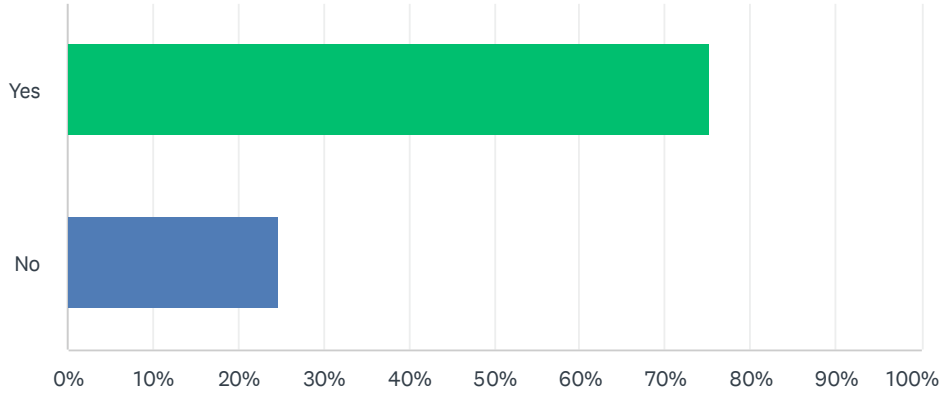
On March 18, 2024, the City Council selected three potential names for the neighborhood revision and authorized staff to conduct an online survey to gather feedback. The options included: Cottonwood, Midtown, and Cottonwood _____ (with a fill-in option).

DISCUSSION

The online survey was made available on the City's public engagement platform, GoVocal, from June 17, 2024, to August 2, 2024. Staff communicated with residents through the weekly e-newsletter, local newspaper, mailers, and social media posts. A total of 89 residents from Apartment Row completed the survey. 75 percent of the Apartment Row respondents favored a neighborhood name change.

Of the three name choice options provided ("Cottonwood _____", "Cottonwood", and "Midtown"), "Cottonwood _____" received the highest number of votes. However, consensus for the desired associated suffix (eg, Cottonwood Place, Cottonwood Cove, Cottonwood Row, etc.) was generally mixed, with Cottonwood Cove garnering the most significant number of votes.

The second favored choice “Cottonwood” received more votes than any single “Cottonwood ____” option. “Midtown” was the least popular of the three options provided. Respondents were also able to elect “none of the above” and/or provide “write in options”. A complete breakdown of all the survey responses is attached to this report.

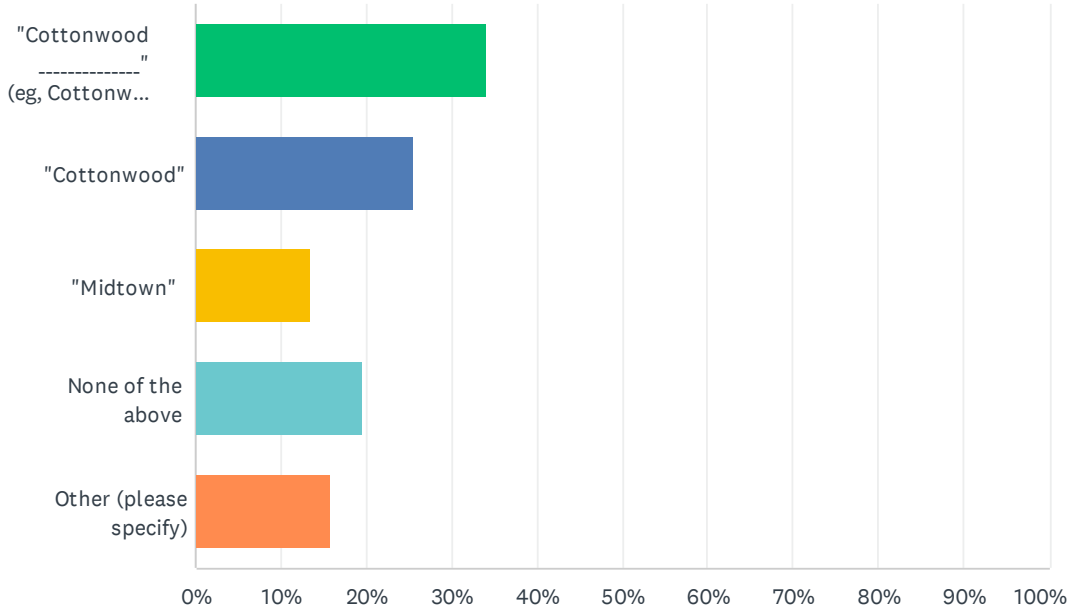


FISCAL IMPACT

None.

Attachment: 1. Apartment Row Survey Data

Q2 Do you think that the "Apartment Row" name should be changed?



Answered: 77 Skipped: 12

ANSWER CHOICES	RESPONSES	
Yes	75.32%	58
No	24.68%	19
TOTAL		77

Q3 Which of the below names do you like? Check all that apply.

Answered: 82 Skipped: 7

ANSWER CHOICES	RESPONSES	
"Cottonwood _____" (eg, Cottonwood Place, Cottonwood Cove, etc.)	34.15%	28
"Cottonwood"	25.61%	21
"Midtown"	13.41%	11
None of the above	19.51%	16
Other (please specify)	15.85%	13
Total Respondents: 82		

#	OTHER (PLEASE SPECIFY)	DATE
1	Cottonwood Cove	8/2/2024 6:34 PM
2	Alamitos Row	7/12/2024 12:18 PM

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 12B**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Windmera Quintanar, City Clerk**

Subject: **Council Member Requested Agenda Item: Electronic Delivery of Financial Information**

SUMMARY

During the September 23, 2024, adjourned regular meeting, Council Member Hibard made a motion requesting that the City Council discuss the electronic delivery of financial information. Council Member Murphy supported the motion. The motion passed 3-1-1, with Mayor Pro Tem Hasselbrink voting no and Council Member Doby abstaining. This informational staff report is the first step in the two-step process for placing items of the Agenda for consideration by the Council. The item was first introduced at the October 21, 2024, Council meeting and continued until tonight without any discussion.

RECOMMENDATION

In accordance with the City Council's adopted Agenda Policy, this informational staff report does not request action, but seeks Council's direction. By a majority vote of the City Council Members present, staff may be directed to place this item on a future Agenda for consideration by the Council.

BACKGROUND

During the September 23, 2024, adjourned regular meeting, Council Member Hibard made the following motion:

> *"In an effort to show the residents of Los Alamitos that this Council values financial transparency and accountability, I move to direct staff to electronically deliver any and all financial information and legal invoices, unredacted, to any Member of Council, upon request."*

The City Council Adopted Accelerated Warrant Policy allows Council Members to ask questions before the meeting so staff and Council can have the appropriate information available to them before the Council meeting. The Limited Printing Policy adopted within the Council Handbook restricts printing to essential documents only and encourages the use of digital alternatives wherever possible.

The Council has been advised that Staff is diligently working toward digitizing the warrant process. Once the process is complete, providing digital copies will be quick and efficient. To date, processing warrants remains a physical paper process. Pulling and copying invoices is labor-intensive and exceeds the small print job (10 pages or fewer) outlined in the Council

policy; therefore, staff has not been able to comply with the voluminous request for copies of invoices at this time.

Council is encouraged to make an appointment through the City Clerk's office to review the physical copies of any warrants/invoices and discuss questions and concerns with Staff. Council Member Hibard met with staff on September 23, 2024, for three hours to address her concerns regarding the warrants at that time.

Redacted copies of City Attorney invoices, itemizing the amount of fees billed and hours worked, are public records available upon request. However, City Attorney invoices contain confidential billing descriptions that are subject to the attorney-client privilege and are therefore protected from disclosure. (*See*, County of Los Angeles Bd. of Supervisors v. Superior Court, (2017) 12 Cal. App.5th 1264 ("Billing entries or portions of invoices that describe the work performed for a client therefore fall directly in the heartland protected by the privilege."). The attorney-client privilege is held collectively by all five members of the City Council. A majority of the City Council must determine how to safeguard confidential and privileged attorney invoices, whether underacted attorney invoices should be made available upon request to individual Council Members, and whether to waive the attorney-client privilege with respect to such invoices.

DISCUSSION

The City Council's adopted Agenda Policy allows individual Council Members to place an item on the Agenda utilizing a two-step process. A Council Member may request an item be placed on a future Agenda during Council Announcements. Once a request is made, the item is then brought back to the City Council at a regularly scheduled meeting with an informational staff report (step one). A majority vote of the City Council members present is required to direct staff to place the item on a future Agenda for consideration by the Council (step two).

FISCAL IMPACT

None.

City of Los Alamitos
CITY COUNCIL AGENDA REPORT

MEETING DATE: November 18, 2024 **ITEM NUMBER: 13A**

To: **Mayor Jordan B. Nefulda & Members of the City Council**

Presented By: **Ron Noda, Development Services Director**

Subject: **Site Development Permit 22-02: 4665 Lampson Project (APN 130-012-35)**

SUMMARY

The City Council will consider resolutions to certifiy an Environmental Impact Report pursuant to the California Environmental Quality Act, adopt a Statement of Overriding Considerations, adopt a Mitigation Monitoring and Reporting Plan, approve a Tentative Parcel Map 2022-133 (For Finance and Conveyance Purposes), approve a Vesting Tentative Tract Map No. 19263 (For Condominium Purposes), approve an Affordable Housing Unit Application, and approve a Site Development Permit – Major for the 4665 Lampson Project Located at 4665 Lampson Avenue (APN 130-012-35) to Allow Redevelopment of the Project Site with 246 Residential Units consisting of a variety of housing product types, including 55 single-family detached homes, 114 townhomes, and 77 for-rent multifamily apartment homes comprised of 76 units restricted to lower income and one unrestricted manager's unit (the "Project").

RECOMMENDATION

1. Open the Public Hearing; and,

2. Take testimony; and,

If appropriate,

3. Adopt Resolution No. 2024-44, entitled "A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, CERTIFYING THE FINAL ENVIRONMENTAL IMPACT REPORT, ADOPTING A STATEMENT OF OVERRIDING CONSIDERATIONS, AND ADOPTING A MITIGATION MONITORING AND REPORTING PLAN FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS (APPLICANT: LAMPSON PARK PLACE, LLC)"; and,

4. Adopt Resolution No. 2024-45, entitled "A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, APPROVING TENTATIVE PARCEL MAP 2022-133 (FOR FINANCE AND CONVEYANCE PURPOSES) AND VESTING TENTATIVE TRACT MAP NO. 19263 (FOR CONDOMINIUM PURPOSES) FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS (APPLICANT: LAMPSON PARK PLACE, LLC)"; and,

5. Adopt Resolution No. 2024-46, entitled “A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, APPROVING AN AFFORDABLE HOUSING UNIT APPLICATION FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE, IN THE MULTI-FAMILY RESIDENTIAL (R-3) ZONING DISTRICT (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS, INCLUDING 76 AFFORDABLE MULTI-FAMILY APARTMENT HOMES (APPLICANT: LAMPSON PARK PLACE, LLC)”; and,

6. Adopt Resolution No. 2024-47, entitled “A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, APPROVING A SITE DEVELOPMENT PERMIT – MAJOR FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE, IN THE MULTI-FAMILY RESIDENTIAL (R-3) ZONING DISTRICT (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS (APPLICANT: LAMPSON PARK PLACE, LLC)”.

BACKGROUND

Applicant:	Lampson Park Place, LLC
Project Location:	4665 Lampson Avenue, APN 130-012-35
Notice:	On November 6, 2024, a Notice of Public Hearing was posted at City Hall. It was also published in the Event News Enterprise and public notices were mailed out to all property owners and tenants within 1,000 feet of the property and all of the College Park East neighborhood of Seal Beach on this same date.
Environmental:	The City has complied with the California Environmental Quality Act (CEQA). Pursuant to the provisions of the CEQA, an Environmental Impact Report (“EIR”) was prepared, which led to the conclusion that a Statement of Overriding Considerations be prepared for the Project due to potentially significant and unavoidable impacts related to transportation.

As stated by the CEQA Guidelines §15002, the basic purpose of CEQA is to:

- Inform governmental decision-makers and the public about the potential significant environmental effects of proposed activities involving discretionary government actions (including the approval of development projects);
- Identify the ways that environmental damage can be avoided or significantly reduced;
- Prevent significant, avoidable damage to the environment by requiring changes in

projects by alternatives or mitigation measures when the governmental agency finds the changes to be feasible and;
- Disclose to the public the reasons why a governmental agency approved the project in the manner the agency chose if significant environmental effects are involved.

An EIR is an informational document prepared in compliance with CEQA that informs government decision-makers and the public in general about potentially significant environmental impacts that could result from a project. The final EIR represents the independent judgment of the City of Los Alamitos (as the CEQA Lead Agency) and objectively evaluates the physical environmental effects that could result from the construction and operation of the proposed 4665 Lampson Avenue Project.

The purpose of an environmental impact report is to identify potential effects on the environment of the Project and to indicate the manner in which those potentially significant effects can be avoided or mitigated. A primary function of the environmental impact report is to disclose and evaluate the project's impacts and inform decision makers. To meet the 45-day circulation requirement, a notice of availability regarding the draft EIR was published on April 24, 2024, and the draft EIR was circulated from April 24 to June 10, 2024 (SCH#2022090476).

Together, the draft Environmental Impact Report (“DEIR”), its revisions, the comments of persons and organizations commenting on the DEIR and a list of all such persons and organizations, the responses to the comments, and other information added by the City constitute the final Environmental Impact Report (“FEIR”) on the Project.

The EIR prepared for the Project demonstrates that the proposed Project will not cause any significant on-site environmental damage. This project is on property that has already been designated as an area for residential units, and there is no sensitive fish or wildlife habitat on site. The site was previously graded for the construction of the existing commercial building.

Regarding potential off-site traffic or transportation impacts, project components and mitigation measures available to reduce vehicle miles traveled (VMT) include developing pedestrian network improvements and implementing travel demand model (TDM) measures such as those listed in Mitigation Measure MM 4.15-1. Even where the TDM measures are implemented to their maximum effectiveness of 10%, the Project would still not be able to reduce its VMT impact to a level of less than significant, which requires a 31.8% reduction for baseline (2022) conditions and 27.7% for buildout (2045) conditions. Therefore, the Project is found to have a significant and unavoidable VMT impact on a direct and cumulatively considerable basis. All feasible mitigation measures were incorporated to reduce VMT impacts per measures identified in the 2021 California Air Pollution Control Officers Association (CAPCOA) Handbook; however, even with the incorporation of all feasible mitigation measures, impacts would remain significant and unavoidable.

As described above, even with the incorporation of mitigation measures from the EIR into the conditions of project approval, this potential VMT impact remains significant and unavoidable and would not be mitigated to a less than-significant level. Per Public Resources Code section 21081(a)(3) and CEQA Guidelines Section 15093, specific economic, legal, social, technological, or other considerations make infeasible additional mitigation. Pursuant to the

CEQA, with respect to the identified significant unavoidable environmental effects of the Project, the Planning Commission would weigh the economic, legal, social, technological, and other benefits, including region-wide and statewide environmental benefits, of the Project against its unavoidable significant environmental impacts in determining whether to recommend approval of the Project. The Planning Commission would need to find that the benefits of the Project outweigh its unavoidable adverse environmental effects such that the adverse environmental effects may be considered "acceptable."

Despite the potentially significant impacts, it is the City's considered judgment that the benefits offered by the proposed 4665 Lampson Avenue Project outweigh the potentially adverse effects. Each of the overriding considerations and Project benefits identified below separately and individually outweighs the unavoidable adverse environmental effect (VMT) identified in the EIR, and the City, therefore, finds the impact to be acceptable. Substantial evidence in the record demonstrates that approval and implementation of the Project will provide the benefits as described in detail in the Statement of Overriding Considerations, which is incorporated by reference herein. Each of the separate benefits listed below provides a separate and independent ground for the City's decision that the Project's benefits outweigh the significant and unavoidable environmental impact identified in the EIR:

- The Project furthers the City's housing goals and contributes to the City's RHNA requirements in accordance with State Housing Law. The Project site is identified within the City's 2021-2029 Housing Element, and the Project would provide 246 units (including 76 affordable), approximately 32% of the City's total RHNA allocation of 769 units and 24.6% of the City's affordable housing allocation. This would also be the first affordable housing Project the City has approved in approximately 30 years.
- The Project would reduce commute travel and in turn reduce VMT and GHG Emissions consistent with SCAG Connect SoCal and the City's General Plan Goals and Policies.
- The Project implements green and sustainable building practices, including the installation of solar photovoltaic rooftops (generating up to 1,229,520 kWh/annually).
- The Project will provide community and social benefits. In addition to the high-quality architectural design, site programming, and on-site amenities for residents, the Project includes dedicating or granting an easement area of approximately 10,000 sf of the Project site to provide parking for Arbor Park and Arbor Dog Park.
- The Project will provide economic benefits, including a positive net fiscal impact on the City's annual General Fund operating budget and an increase in local and regional tax revenues, including sales and property taxes.

If approved, a Notice of Determination will be prepared for the proposed Project in accordance with the CEQA.

Prior CEQA Review:
The Project site is located within the geographical limits of the City of Los Alamitos and is covered by the City's 2035 General Plan Update (GPU), which provides the fundamental basis for the City's land use and development policies. The City's GPU was the subject of a review under CEQA (State Clearinghouse Number 2013121055). The City of Los Alamitos approved the GPU and certified its Final Program EIR on March 23, 2015. The Program EIR contains information relevant to the Project site. Thus, the Program EIR for the City's GPU is herein

incorporated by reference pursuant to CEQA Guidelines Section 15150 and is available for public review at the City of Los Alamitos, Planning Division, 3191 Katella Avenue, Los Alamitos, CA 90720.

On February 21, 2023, the Los Alamitos City Council adopted the comprehensive update of the City's Housing Element for the reporting period of 2021-2029 (Resolution No. 2023-02). Upon adoption of the City's 2021-2029 Housing Element Update, the City Council adopted Resolution No. 2023-01 approving General Plan Amendment (GPA) 22-02 to ensure that the zoning code updates in Ordinance 2023-1 will maintain internal consistency with the actions, goals, objectives, and policies of the General Plan and will not create any inconsistencies therein. A Negative Declaration was prepared for the 2021-2029 Housing Element Update pursuant to the provisions of CEQA, and the record of the approval is available to the general public at the address stated above.

On March 20, 2023, the City Council adopted Ordinance 2023-01 which approved a Multi-Family Residential - 36 Zone (R-4) Zoning District in the City, amended the Town Center Mixed Use Zone, and rezoned certain properties to the R-3 and new R-4 Districts. Following adoption of the resolution and ordinance in connection with the 2021–2029 Housing Element update, the Project site land use designation was changed from Community & Institutional to Multi-Family Residential-25 and was rezoned from C-F (Community Facilities) to Multi-Family Residential-25 Zone (R-3).

Project and Applications Summary:
Lampson Park Place, LLC, has submitted applications for a Tentative Parcel Map (TPM 2022-133), a Vesting Tentative Tract Map (VTTM No. 19263), Affordable Housing Units, and a Site Development Permit – Major for the 4665 Lampson Project located at 4665 Lampson Avenue (APN 130- 12- 35) to allow redevelopment of the Project site with 246 residential units (see attached site plan).

The Project Applicant, Lampson Park Place, LLC, proposes to demolish the existing office building and surface parking lot on the 12.3-acre property and redevelop the Project site with a residential development consisting of a variety of housing product types, including single-family homes, townhomes, and apartments. The unit mix proposes 55 single family detached homes, 114 townhomes in 18 buildings, and 77 for rent multi-family apartment homes in three buildings comprised of 76 units restricted to lower income and one unrestricted manager's unit. The Project would include a total of 246 units and the overall density for the Project would be 20 dwelling units per acre. Vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. The Project would provide 577 parking spaces (475 spaces for the single-family detached and townhomes and 102 for the apartments) in exceedance of the 441 parking spaces that would be required pursuant to the State's Density Bonus Law.

On October 23, 2024, the City of Los Alamitos Planning Commission voted 7-0 to approve separate recommendations to the City Council for the four discretionary approvals to be considered tonight. Those recommendation resolutions are attached to this report.

DISCUSSION

Project Location

The Project site is located at 4665 Lampson Avenue, in the City of Los Alamitos, County of Orange (Assessor Parcel Number 130-012-35). Specifically, the 12.3-acre Project site is north of and adjacent to Lampson Avenue and northwest of the intersection of Lampson Avenue and Rose Street.

Aerial View of Site (DEIR Figure 3-3)

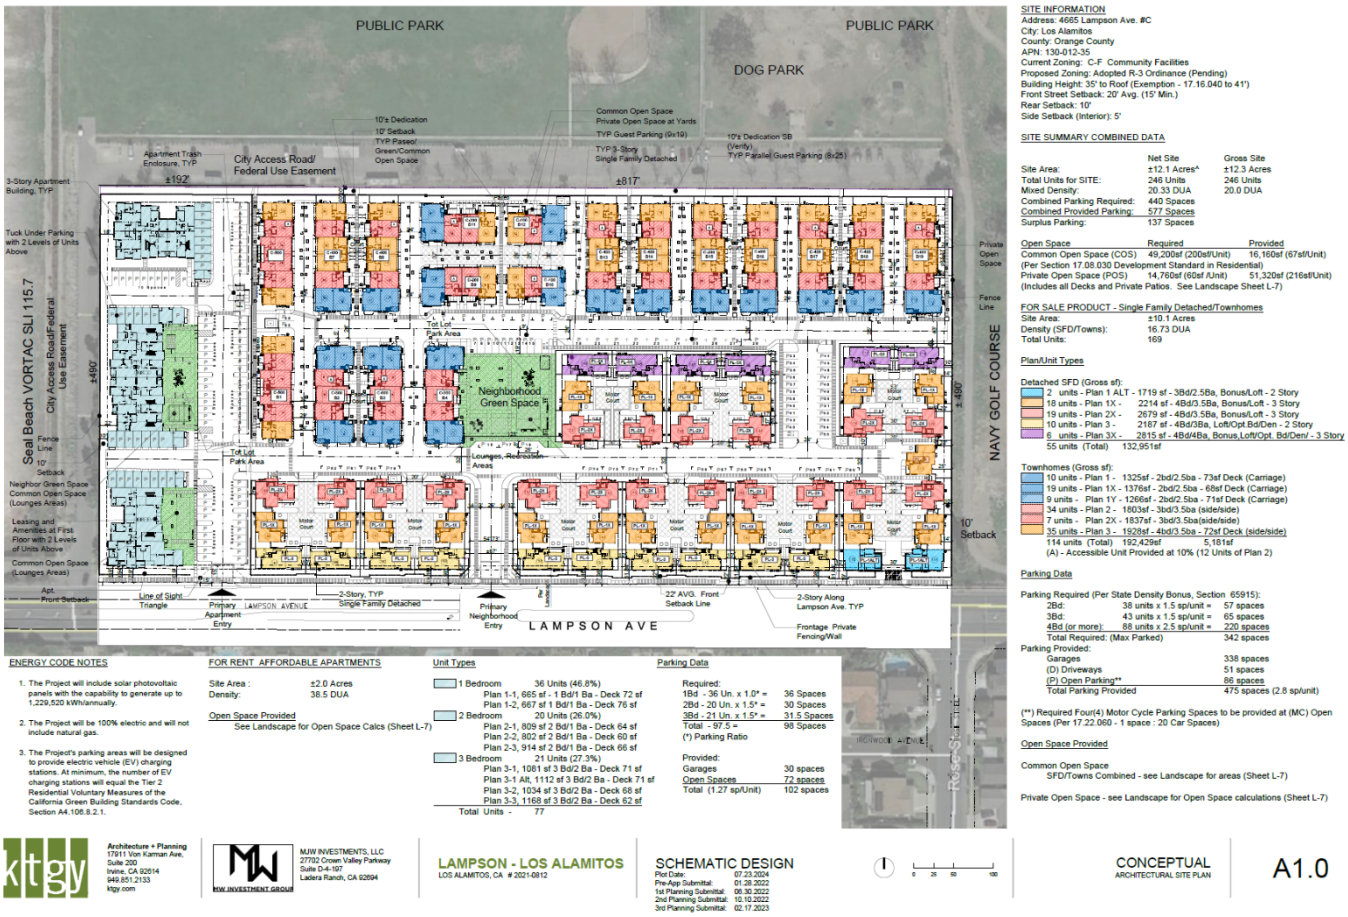
Figure 3-3

Existing Site Conditions

In 1971, the Project site was developed with the existing commercial structure on the central portion, a parking lot on the west portion, and landscaped areas on the remainder. The site has remained in this configuration through the present. Under existing conditions, the Project site is currently developed with a vacant two-story, 88,000-square-foot commercial office building located centrally within the Project site and a surface parking lot located within the western portion of the Project site. A boat storage area that is fenced off and a shipping container is located in the northwest corner of the property. AYSO uses the abutting Arbor Park (north of the Project) on weeknights and weekends for soccer practice and games, utilizing the existing paved parking lot on the Project site for overflow parking.

Site Land Use Designation and Zoning Classification

The Project site's land use designation is "Multi-Family Residential-25," which is defined as single-family detached and attached residences, including all development permitted in other residential categories, stacked flats, and other building types with 4 or more units. Other uses,



such as convalescent hospitals, churches, and mobile home parks, are also permitted, subject to special procedures.

The Project site's zoning classification is "Multi-Family Residential (R-3)". The R-3 zone applies to lots intended to provide multifamily housing. Housing types permitted include those permitted in the R-1 and R-2 zones, as well as structures containing four or more dwelling units. The maximum permitted density is 20 to 25 dwelling units per net acre. The R-3 zone implements the General Plan Multi-Family Residential land use designation.

Surrounding Designations and Uses

Direction from Project Site	Existing Land Use & Jurisdiction	General Plan Land Use Designation	Zoning
North	Arbor Park & Los Alamitos Joint (JFTB)	Community & Institutional/JFTB	C-F (Community Facilities)
South	Residential College Park East City of Seal Beach	Residential Low Density (RLD)	RLD-9
West	JFTB	Community & Institutional/JFTB	C-F (Community Facilities)
East	Navy Golf Course, JFTB	Community & Institutional/ JFTB	C-F (Community Facilities)

Below is the Site Plan for this proposed project (plans are attached/linked to this report).

Parks, Open Space, Landscaping, and Amenities

There is a total of 316.83 acres of park and recreation facilities in Los Alamitos and 35.05 acres of park and recreational facilities in Rossmoor, for a total of 351.8 acres to meet the recreational needs of the City's residents. As proposed, the Project would provide a total of 58,027 square feet (sf) or 1.33 acres of open space on the Project site, including 16,508 sf of usable common open space, 41,519 sf of private open space (homeowner maintained). The usable common open space areas would include amenities such as a tot-lot with rubberized play surface, a shade surface with BBQ Island and dining furniture, lawn area with cornhole play equipment, table tennis tables, and lounge seating with a fire-pit. There are also 4,620 sf of multifamily private decks and 5,181 sf of townhomes private decks that would be provided onsite. The Project has been designed with these enhanced recreational amenities to meet the needs of its future residents.

Although the designed neighborhood open space areas are anticipated to meet many of the park and recreation needs of Project residents, Project residents are also anticipated to utilize existing off-site park and recreation facilities in the City of Los Alamitos, the community of Rossmoor, and the City of Seal Beach Park. Future residents of the Project site would also have access to (within walking distance) the following public park and recreational facilities, which comprise just over 14 acres of usable parkland and open space:

- Arbor Park, located directly north of the Project site, is currently leased by the City of

Seal Beach from the JFTB and includes a baseball diamond within its approximately 9.60-acre site.

- Arbor Dog Park, located directly north of the Project site, includes a dog park currently leased by the City of Seal Beach from the JFTB for its residents within its approximately 1.40-acre site.
- Orville R. Lewis Park, located approximately 1 mile northwest of the Project site, includes a grass area, baseball backstop, basketball court, play area, barbecue, picnic shelter and tables, and drinking fountain within its approximately 1.65-acre site.
- Heather Park, located approximately 350 feet southwest of the Project site, includes two lit tennis courts, one tot lot/play structure, one swing set, and four picnic tables within its approximately 1.6-acre site.

The Project also includes a dedication or easement for the northerly 10-foot strip of land abutting Arbor Park and Arbor Dog Park for public access and parking, comprising an area of approximately 10,000 sf of the Project site (Condition No. 14).

Based on the Project's Parks Impact Analysis, it is anticipated that a negligible amount of Project residents will regularly visit parks near the Project site. Specifically, a total of 178 Project residents would visit the designed neighborhood open spaces within the Project site and 131 Project residents would visit Arbor Park, Arbor Dog Park, and Heather Park as the parks they visit most often.

Open Space Plan

Landscape Plan

The carrying capacity of Arbor Park and Heather Park would be 337 visitors, and there is no calculation for the carrying capacity of Arbor Dog Park. Because the projected number of Project visitors to these parks is well within the carrying capacity, there is sufficient capacity at existing nearby neighborhood parks to accommodate the Project residents. With full occupancy of the Project, the designed neighborhood open spaces within the Project site, the capacity and existing maintenance and usage of existing parks, and the estimated visitation of the Project residents to the existing parks, the Project is not anticipated to increase the use of the existing parks such that substantial additional use or physical deterioration of the existing parks would occur or be accelerated.

Additionally, the Project Applicant will be required to pay in-lieu fees in accordance with the City's park dedication requirements under Chapter 16.18 (Dedication of Land for Park Facilities and Payment of In Lieu Fees) of the City of Los Alamitos Municipal Code (Condition No. 29).

Also, a variety of trees, shrubs, accent plants, and ground cover are proposed along the perimeter of the Project site, in common areas, recreational amenities, open space areas, and parking areas. Landscaping will feature drought-tolerant plant materials.

LAMC Section 17.08.030, Table 2-03 requires a minimum of 200 square feet of common area and 60 square feet of private space per unit. The Project will be able to comply with the minimum private space requirement, yet the Project will not be able to comply with the

common area requirement. Pursuant to the Density Bonus Law, the Applicant is requesting a reduction from 200 to 150 square feet per unit. (Government Code Section 65915).

Parking

The Project would provide 577 parking spaces (475 spaces for the single family detached and townhomes and 102 for the apartments) in exceedance of the 441 parking spaces that would be required pursuant to the State's Density Bonus Law.

As part of the Project, Walker Consultants prepared a parking analysis (*Technical Appendix P* of the Draft EIR) to determine the appropriate amount of parking needed for the Project. Based on the City's off-street parking requirements in the Municipal Code, the Project would be required to provide 679 parking spaces. However, because the Project includes an affordable housing component, it is entitled to the reduced parking ratios outlined in the State Density Bonus Law (Government Code Section 65915), which would reduce the Project's minimum off-street parking requirement to 441 parking spaces. The Project is proposing to provide 557 parking spaces, 26% above what is required under the State Density Bonus Law. Moreover, the City of Seal Beach has lower parking requirements for multi-family dwelling units than the City of Los Alamitos. Under the City of Seal Beach's Municipal Code Section 11.4.20.015, a total of 472.29 parking spaces would be required, inclusive of guest parking.

As discussed above, the Project would provide 577 parking spaces and exceed the City of Seal Beach's parking standards by 84 spaces. Therefore, the Project would provide more than adequate parking based on nationally recognized Urban Land Institute/National Parking Association Standards for market-rate residential development and would meet the minimum parking requirements of the City of Seal Beach, the adjacent jurisdiction. Based on the analysis conducted in the parking analysis, the Project's proposed parking supply is appropriate to serve the potential parking needs of the Project. As a result, Project residents would have adequate parking on-site and would not park on streets in the adjacent neighborhood.

Table 3, 4665 Parking Requirements Based on State Density Bonus Law
Appendix P, Draft EIR (Walker Consultants; January 30, 2023)

Land Use	Vehicle Parking Requirement	Proposed # of Units	Number of Spaces Required	Number o Provi
Single-Family Dweling	2.50 spaces per unit	55	137.50 spaces	*183.00*
Multi-Family Dwelling				
2 bedroom	1.50 spaces per unit	38	57.00 spaces	
3 bedroom	1.50 spaces per unit	41	61.50 spaces	
4 bedrooms	2.50 spaces per unit	35	87.50 spaces	
Guest parking	Included in Above			
	Subtotal Multi-Family Dwelling		*206.00 spaces*	*276.00*
Affordable Housing				
1 bedroom	1.00 spaces per unit	36	36.00 spaces	
2 bedroom	1.50 spaces per unit	20	30.00 spaces	
3 bedroom	1.50 spaces per unit	21	31.50 spaces	
Guest parking	Included in Above			
	Subtotal Affordable Housing		*97.50 spaces*	*98.00 s*
		Grand Total	**441.00 spaces**	**557.00**

Architectural Features and Materials

The proposed residential buildings would range from two to three stories, and the maximum building height for the Project is 41 feet. Los Alamitos Municipal Code (LAMC) Sections 17.08.030 and 17.16.040 govern maximum building height, height measurement, and exceptions. According to LAMC Section 17.16.040.B certain building elements may exceed the allowed height of the zone in which they are located, up to an additional 6 feet above the maximum height limit (maximum height limit of 41 ft). These building elements include plumbing vents and chimneys, fire and parapet walls, roof structures for the housing of air conditioners, elevators, stairways, tanks, ventilating fans, and similar equipment, and skylights. As proposed, the typical single-family dwelling ranges from 25.9 feet to 36 feet in height, the typical townhomes are approximately 35.5 to 37 feet in height, and the typical multifamily building is approximately 37 to 39 feet in height.

The typical architectural materials of single-family dwelling units include a composite shingle roof (no rake tile), a metal roof (standing seam), faux wood, a French door, vinyl windows, a decorative fiberglass entry door, and a cantilever built-up deck/balcony.

SFD PLAN 1X - 3-STORY ALT
ELEVATIONS - STYLE B

A4.8

The typical townhome unit's architectural materials include a composite shingle roof, stucco light sand finish, faux wood trim, decorative faux vent, barge board, decorative gable end outlook, vinyl windows, wood railing, decorative fiberglass entry door, and metal utility door.

Typical Townhome Elevations

The typical architectural materials of multifamily units include stucco, vertical siding, composite shingle roof, decorative gable end outlook, vinyl windows, metal sectional garage door, and stone veneer.

Typical Multi-Family Elevations

Public views of the townhomes and clustered homes from Lampson Avenue would consist of two-story to three-story buildings, parked cars, landscaping, and residents.

Lampson Street Scene

Walls and Fencing

Walls and fencing would be provided throughout the Project site to provide visual and physical privacy, sight lines for views, buffering between different uses, and to allow for privacy and

security in residential areas. As shown in EIR Figure 3-20, *Wall and Fence Plan (see below)*, a 7-foot-high concrete wall would be constructed around the Project's perimeter and between the apartments and single-family detached homes/townhomes. Vinyl fencing (5'-6" high) would be constructed around the single-family detached homes and a 3'-6" high stucco concrete patio wall would be constructed around the patio areas of the townhomes. Additionally, a 4-foot-high combo metal guard-rail fencing would be constructed on the northern portion of the eastern boundary of the Project site.

Wall and Fence Plan

Water

Golden State Water Company (GSWC) would provide potable water service to the Project site. Water demand associated with the Project would consist of interior plumbing devices (i.e., showers, sinks, toilets, faucets), outdoor landscape irrigation, washers, and other uses similar to that of a residential development. Based on the available water supplies and the estimated water demand, sufficient water supplies are available to serve the Project during average, single dry, and multiple dry years. The Project would not require the construction of new or expanded water facilities, nor would the Project require the relocation of water facilities. The Project would include the installation of new water lines within the Project site, connecting to existing facilities within Lampson Avenue, including a 1,200-foot water main extension between the eastern driveway and the existing GSWC water main at the intersection of Lunar and Lampson.

Wastewater (Sewer Infrastructure)

The results from the Sanitary Sewer Analysis (refer to *Technical Appendix O* of the Draft EIR) demonstrate that the proposed flows, in addition to the observed flows, create a proposed depth of flow that would not impact the existing surrounding sanitary sewer systems. Based on sewer monitoring data collected in preparation of the Sanitary Sewer Analysis, the sewer systems in all three locations indicated good flow, along with hydraulics and relatively low depths. Wastewater volumes produced by the proposed development would not significantly impact or exceed the existing sewer capacity in the public system, and that the existing sewer system has adequate capacity for the proposed development.

Stormwater Drainage

The Hydrology Study (*Technical Appendix I3* of the Draft EIR) prepared for the Project demonstrated that the Project's peak hour flows would not exceed the existing condition flows. As proposed, the Project site's stormwater runoff would be conveyed by roof downspouts or street surface flow to the proposed gutters and collected by through-curb inlet bio-filtration devices or catch basin inlets for water quality treatment. The bio-filtration devices include internal overflow bypass that direct flows via on-site underground storm drain system to an underground detention system located under parking areas at the southwest portion of the Project site. From the detention system, a stormwater sump pump located in the southwest corner of the Project site would outlet flow into the existing 18" outlet storm drainpipe at the southwest corner of the site, which conveys stormwater runoff to Los Alamitos Joint Forces Training Base (JFTB) property directly west of the site. The detention system and pump would be sized so that the outlet flows from the developed site will be equal to, or less than, existing conditions for all storm events. In the event the stormwater pump fails or the outlet pipe becomes clogged, the emergency overflow for the site will be conveyed through a parkway drain discharging flow onto Lampson Avenue, matching historical drainage patterns.

WQMP

Pursuant to the LAMC Chapter 8.44, the Project Applicant would be required to implement a Water Quality Management Plan (WQMP) to demonstrate compliance with the City's National Pollutant Discharge Elimination System (NPDES) municipal stormwater permit, and to minimize the release of potential waterborne pollutants, including pollutants of concern for downstream receiving waters. The WQMP is a site-specific post-construction water quality management program designed to address the pollutants of concern of a development project via BMPs, the implementation of which ensures the ongoing protection of the watershed basin. The Project's preliminary WQMP is included as *Technical Appendix I2* appended to the EIR.

As identified in the Project's preliminary WQMP, the proposed Project is designed to include evapotranspiration, rainwater harvesting BMPs, biotreatment BMPs, non-structural source control BMPs, and structural source control BMPs. The Project site would be divided into seven (7) Drainage Management Areas (DMA). Each drainage area would have an area drain system to convey runoff from landscape and roof drainage along curb inlet Modular Wetlands Systems to intercept surface runoff from surrounding walkways and drive aisles. The area drain system design would be determined during final engineering and would connect directly to the proposed water quality treatment devices. Non-structural source control BMPs include education for property owners, tenants and occupants, activity restrictions, common area landscape management, BMP maintenance, title 22 CCR compliance, uniform fire code implementation, common area litter control, employee training, common area catch basin inspection, and street sweeping private streets and parking lots. Structural source control

BMPs include storm drain system stenciling and signage, trash and waste storage areas, efficient irrigation systems & landscape design, water conservation, smart controllers, and source control.

Solar & KW hours

The City of Los Alamitos receives electrical service from the Southern California Edison Company (SCE), and SCE would supply the Project's operational energy demands. The Project does not propose uses that are inherently energy intensive, and the energy demands in total would be comparable to those of other residential uses of similar scale and configuration. No new or expanded off-site dry utilities are required to serve the Project.

As summarized in EIR Table 4.5-2, *Project Annual Operational Energy Demand Summary*, operations for the Project would result in approximately 1,131,132 kWh of electricity annually and would offset the demand through the use of on-site photovoltaic solar power which is expected to generate 1,229,520 kWh of electricity annually (PDF-GHG-1), resulting in a net electricity demand of 98,388 kWh/year of electricity. This is consistent with General Plan Policy 4.9, Renewable Energy, to promote the use of renewable energy sources to serve public and private sector development.

Noise

To address the proximity of the Los Alamitos JFTB, the Project will implement sound attenuation methods to ensure the interior CNEL does not exceed 45 dB. For example, the Project will provide mechanical ventilation (e.g. air conditioning) in all units. In addition, with implementation of PDF-N-2, which includes the use of windows with a STC rating of 29 on all second-floor facades adjacent to Lampson Avenue and JFTB Los Alamitos, the Project would be designed to achieve a 25 dBA reduction and meet the 45 dBA CNEL interior noise standard. As designed, the Project would not expose people residing or working in the Project area to excessive noise levels from airport or aircraft operations. Furthermore, as conditioned, the Applicant will be required to notify purchasers and renters that the Project site is within an airport influence area and may experience annoyances or inconveniences associated with proximity to airport operations (Condition No. 15).

Condominiums

The Project includes Tentative Parcel Map No. 2022-133 and Vesting Tentative Tract Map No. 19263. Tentative Parcel Map No. 2022-133 (for finance and conveyance purposes) would subdivide the property into two parcels: 1) Parcel 1 (2.204 acres) for the affordable housing component and 2) Parcel 2 (10.163 acres) for the single family detached and townhome component. The 77-unit apartment home component, including 76 units reserved for lower income households, will be established on Parcel 1, and the Vesting Tentative Tract Map would be proposed on the Parcel 2 and would be used for condominium purposes. Therefore, the Project would not conflict with General Plan Policy 4.10 related to subdivisions of land. Under this policy, the City encourages further land divisions resulting in parcel sizes that facilitate multifamily development affordable to lower income households. The City offers incentives for land division encouraging the development of affordable housing including but not limited to: priority to processing subdivision maps that include affordable housing units, expedited review for subdivision of larger sites, and financial assistance. The objective of this policy is to facilitate land subdivisions for affordable housing development.

Pursuant to LAMC section 17.28.110, *Condominiums – Residential and Residential Conversions*, the proposed Project furthers the goals of the General Plan, provides a balanced mix of housing, and ensures the form of ownership and occupancy complies with applicable laws for the general health, safety, and welfare of the public. This section allows new residential condominium projects in all residential zones at densities applicable to the zone in which the project is located, subject to the approval of tentative and final tract or parcel maps as may be required by law and any development permits required for multi-family housing in the zone in which the new project is located.

As proposed, the Project complies with the requirements of this section, with the requirements of LAMC Title 16 (Subdivisions), and with the basic purpose of the State Subdivision Map Act. The Project would also comply with applicable building and fire codes in effect at the time of construction. Furthermore, the Project incorporates Project Design Feature (PDF) N-2 that would reduce potential noise impacts for future residents.

Pursuant to the Density Bonus Law, the Applicant has requested concessions and waivers regarding the Condominium and/or zoning district requirements for the setback distance between structures, building step-back requirements, minimum storage space, common area requirements, and reduced parking ratio. See Affordable Housing Units and State Density Bonus Law below for additional details.

Affordable Housing Units

As proposed and conditioned (Condition Nos. 16 - 23), the Project would include 77 multi-family units comprising seventy-six (76) units restricted to lower income and with one unrestricted manager's unit. The affordable units would be rented to lower-income households as defined in Section 50079.5 of the California Health and Safety Code for a period of no less than 55 years at rents that do not exceed the maximum rent for 80% of income level units for that size unit in Orange County. There will be a priority preference for veterans and those who currently live and work in Los Alamitos.

State Density Bonus Law

The State Density Bonus Law (Government Code Section 65915 et seq.) (collectively, "Density Bonus Law" or "DBL") and Los Alamitos Municipal Code (LAMC) Section 17.28.050 (Affordable Housing) entitles applicants to a density bonus, incentives or concessions, waivers or reductions of development standards, and reduced parking ratios to encourage the construction of affordable housing units. The Project qualifies for three incentives/concessions and unlimited waivers or reductions of development standards by providing 76 units for lower-income households.

1. Density Bonus

A maximum base density of 25 units per acre is allowed in the Multi-Family Residential R-3 zone pursuant to Section 17.08.030 of the LAMC, which yields 308 multi-family units for the 0.23-acre lot. With the inclusion of 76 units for lower-income households, the Project is providing 24% of its base density for affordable housing. Thus, pursuant to the Density Bonus Law, the Applicant is entitled to a Density Bonus of up to 50%, or up to 154 additional units, for a total development potential of 462 units. While entitled to the aforementioned Density Bonus, the Applicant is proposing a total of 246 residential units, less than the maximum 308-unit base density.

2. Concessions and Waivers

A "concession or incentive" includes a reduction in site development standards or a modification of zoning code requirements or architectural design requirements, approval of mixed-use zoning in conjunction with a housing project, and other regulatory incentives or concessions that result in a reduction in affordable housing costs. The DBL provides that a city must grant a proposed concession or incentive unless it makes a written finding, based upon substantial evidence, that the concession or incentive: (1) does not result in identifiable and actual cost reductions to provide for affordable housing costs for the targeted units; (2) would have a specific, adverse impact upon public health and safety or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact without rendering the development unaffordable to low-income and moderate-income households; or (3) would be contrary to state or federal law. The DBL provides that an applicant is entitled to three "incentives or concessions" if it offers to restrict at least 24% of the housing units for lower households. The Project would provide 76 units for lower-income households, or 24% of the base density, making the Project eligible for three incentives/concessions. The Applicant, however, is proposing only two concessions, as follows:

a. Exception for building step-back requirements. LAMC Section 17.08.045.A.1 requires that for buildings higher than two stories, the third story must have a minimum 5-foot step back from the story below to minimize building bulk and create façade articulation. This requirement appears to govern regardless of building location within a project site or surrounding land uses. While the City interprets this requirement as applying only to perimeter buildings (i.e., buildings that are located along the perimeter of a Project site), given the requirement's ambiguity, the Applicant is requesting an exception from the required minimum 5-foot step back requirement for those structures identified on the site plan.
b. Reduction in minimum storage space. LAMC Section 17.08.030, Table 2-03, requires a minimum storage space in a garage or carport of 200 cubic feet per unit. However, because garage and carport space is limited, this requirement will be difficult to satisfy for certain units within the project. As such, the Applicant is requesting that the minimum storage space requirement be reduced to 175 cubic feet per unit for market-rate units and 50 cubic feet per unit for affordable units identified on the site plan.

3. Waivers or Reductions in Development Standards

The DBL provides that, in addition to a density bonus and concessions or incentives, an applicant may propose waivers or reductions of development standards that will have the effect of physically precluding the construction of the proposed development, with the required density bonus and concessions or incentives permitted by the DBL. Similar to a concession or incentive, a city must waive or reduce a development standard that would physically preclude construction of the proposed development unless the waiver or reduction: (1) would have a specific, adverse impact upon health or safety, and for which there is no feasible method to mitigate or avoid the specific adverse impact satisfactorily; (2) would have an adverse impact on any real property that is listed in the California Register of Historical Resources; or (3) would be contrary to state or federal law. The proposed project incorporates the following two (2) waivers or reductions of development standards, which the applicant contends would

physically preclude construction of the project as proposed:

a. Reduced common area requirement. LAMC Section 17.08.030, Table 2-03 requires a minimum 200 square feet of common area and 60 square feet of private space per unit. The Project will be able to comply with the minimum private space requirement, but the Project will not be able to comply with the common area requirement. This is due to the proposed dedication or grant of an easement related to the northerly 10 feet strip of land abutting Arbor Park and Arbor Dog Park, which comprises an area of approximately 10,000 square feet of property. When this area is dedicated to the City, then the Project will be unable to comply with the common area requirement because compliance with this requirement would physically preclude construction of the Project at the densities allowed and with the concessions described above. Therefore, the Applicant is requesting a reduction in the common area requirement from 200 to 150 square foot per unit.
b. Reduction in setback distance between structures. LAMC Section 17.08.030, Table 2-03 requires a 10-foot minimum distance between structures. Though most of the Project's single-family residential setback distances between structures meet or exceed the minimum distances, the setback distance is reduced to 6 feet at certain locations within the Project site plan. Meeting the required 10-foot minimum setback distance would require a significant change to the site plan and likely result in a reduction of residential units.

4. Parking Reduction Request

The Project would provide 577 parking spaces (475 spaces for the single-family detached and townhomes and 102 for the apartments), the DBL specifies that for housing developments that qualify for a density bonus the local government shall not require a vehicular parking ratio, inclusive of parking for persons with a disability and guests, that exceeds the following ratios: (A) zero to one bedroom: one onsite parking space; (B) two to three bedrooms: one and one-half onsite parking spaces; and (C) four and more bedrooms: two and one-half parking spaces. The Applicant requests that the City require no more than 2.35 spaces per unit for a total of 577 parking spaces for the Project, which is significantly more than the 441 parking spaces that would be required pursuant to the State's Density Bonus Law.

The Project Applicant would be required to provide proof of recording, prior to final map approval, that the 76 affordable units are required to be maintained as affordable units for a period not less than 55 years. This is in accordance with the State Density Bonus Law and described further in the Conditions.

The Applicant would be required to enter into a Regulatory Agreement with the City to memorialize the provision of lower-income housing and the granting of the requested Density Bonus Law concessions and waivers. Among other things, the Regulatory Agreement will require that veterans of the United States military and/or person(s) currently employed in or residing in the City of Los Alamitos be given preference in leasing the affordable units.

Findings

To recommend approval of a Tentative Parcel Map and Vesting Tentative Tract Map, the City Council must consider the following findings (LAMC § 16.10.100 and § 16.10.110). Staff

responds to each of these findings below.

1. The proposed maps are consistent with the City's General Plan:

Staff Response: The proposed maps allow for the site redevelopment with 246 residential units at a density of 20 dwelling units an acre which is within the General Plan multi-family residential land use designation of 20 – 25 units per acre. The proposed design of the Project subdivision is consistent with the applicable General Plan goals, policies, and implementation measures.

2. The design and improvement of the proposed subdivisions is consistent with the City's General Plan:

Staff Response: The design and improvement of the 246-unit project is suitable for residential development in the R- 3 Multi-Family Residential Zone and the subdivisions can be developed in compliance with the General Plan.

3. The site is physically suitable for the proposed type of development:

Staff Response: The site is physically suitable for a residential subdivision because the site is generally flat and will require minimal grading.

4. The site is physically suitable for the proposed density of development:

Staff Response: The 12.3-acre site is capable of supporting the development of the proposed 246 residential units. The proposed Project is at 20 dwelling units per acre, within the maximum that the City' s R- 3 zoning district allows at 25 dwelling units per acre under multi-family development.

5. The requirements of the California Environmental Quality Act (CEQA) have been satisfied:

Staff Response: Pursuant to the provisions of the CEQA, an Environmental Impact Report (“EIR”) was prepared which led to the conclusion that a Statement of Overriding Considerations be prepared for this Project. The purpose of an EIR is to identify potential effects on the environment of the Project and to indicate the manner in which those potential significant effects can be avoided or mitigated. A primary function of the EIR is to disclose and evaluate Project impacts and inform decision makers for the Project. In order to meet the 45-day circulation requirement, a notice regarding the draft EIR was circulated from April 24 to June 10, 2024 (SCH#2022090476).

6. The design of the subdivisions and proposed improvements are not likely to cause substantial environmental damage or substantial and avoidable injury to fish or wildlife in their habitat:

Staff Response: The proposed subdivisions will not cause environmental damage as this is an infill project on property that already has been designated as an area for residential units and there are no fish or wildlife habitat on the site. The site was previously graded for construction of the existing commercial building.

7. The design of the subdivisions and the proposed improvements are not likely to cause serious public health problems:

Staff Response: The proposed subdivision design and improvements will not adversely affect the public health of the citizens of the City of Los Alamitos as the project is the type of use planned for this area; the residential project will be compatible with the single-family and multi-family residential uses in the area. The mitigations required by the CEQA document will ensure the safety of the Project's inhabitants and contribute to the community's health as a whole.

8. The design of the subdivisions and improvements will not conflict with public access easement(s) through the property:

Staff Response: The design of the subdivisions and the proposed improvements will not conflict with any existing telephone, street, and/or public utility easements. There are no public access easements through the property.

9. The design and improvements of the proposed subdivisions are suitable for the uses proposed, and the subdivisions can be developed in compliance with the applicable zoning regulations:

Staff Response: As conditioned, the Project will comply with applicable zoning regulations. Pursuant to the State's Density Bonus legislation, minor incentives, concessions, waivers, and/or reductions in development standards have been requested for reduction in setback distance between structures, exception for building step back requirements, reduction in minimum storage space, reduced common area requirement, and reduced parking requirement.

10. The discharge of waste into an existing community sewer system will not result in or add to a violation of existing requirements prescribed by the Regional Water Quality Control Board.

Staff Response: The discharge of wastewater from the subdivision into the sewer system will not result in a violation of existing requirements prescribed by the Regional Water Quality Control Board.

To recommend approval of a Site Development Permit, the City Council must consider the following findings (LAMC § 17.44.060). Staff responds to each of these findings, below.

1. The proposed project is allowed within the subject zone:

Staff Response: The property is designated and zoned for this type of development. The Project site has a land use designation of Multi-Family Residential - 25 and a zoning classification of Multi-Family Residential (R-3).

2. The proposed project complies with all of the applicable criteria identified in 17.44.030(B) (Application Processing, Filing, and Review—Generally):

Staff Response: The design and layout of the proposed residential units at 4665 Lampson Avenue is efficient, consistent with applicable City regulations and policies, and would not interfere with the use and enjoyment of neighboring residential developments, as the surrounding residential uses are comprised of single-family and multi-family. The location is appropriate for a 246-unit residential development that would be constructed in an architectural style that complements nearby homes. The Project will retain beautiful landscaping through the strength of a Homeowner's Association that will hire and maintain a maintenance crew. The Homeowner's Association will have regulations that are more exacting than the City' s Code concerning maintenance and parking. The location of the driveway ingress/egress access to the site would not create traffic or pedestrian hazards. The design and layout of the 246 residential units at 4665 Lampson Avenue, as conditioned, is consistent with the development and design standards/guidelines. Pursuant to the State's Density Bonus legislation and LAMC 17.28.050, minor incentives, concessions, waivers, and/or reductions in development standards have been requested for reduction in setback distance between structures, exception for building step back requirements, reduction in minimum storage space, reduced common area requirement, and reduced parking requirement.

3. The proposed project is in keeping with the character of the neighborhood in terms of the structure(s) general appearance:

Staff Response: The design of the 246 residential units would be in keeping with the neighborhood character and enhance the attractive, harmonious, and orderly development of the property. The design is in harmony with surrounding development and improves upon the City's architecture with quality detached single-family, townhome, and multi-family residential building design, extensive landscaping, and maintenance requirements.

4. The design of the proposed development will provide a desirable environment for its occupants and the visiting public as well as its neighbors through good aesthetic use of materials, texture, and color, and will remain aesthetically appealing and retain an appropriate level of maintenance:

Staff Response: The design of the 246 residential units would provide a desirable environment for its occupants, the visiting public, and its neighbors through good aesthetic use of materials, texture, landscaping, and color as described in the plan set. Site redevelopment would continue the attractive environment that the existing property previously enjoyed for years and maintain an appropriate level of maintenance, through the implementation of a homeowners' association and the use of covenants, conditions, and restrictions (see Condition Nos. 24 – 28).

5. The proposed development would not be detrimental to the public health, safety, or welfare or materially injurious to the properties or improvements in the vicinity. (Ord. 19-03 § 3, 2019):

Staff Response: The 246 residential units provide for public health, safety, and welfare of the residential and business communities by providing more living options to the City rather than causing sprawl at the fringes of this metropolitan area. The buildings will meet all building code requirements. The mitigation measures identified in the Environmental Impact

Report prepared for the project would ensure the safety of the inhabitants of the project as well as other residents of Los Alamitos. Also, the 246 residential units would not depreciate property values in the vicinity, as the area is zoned for this type of use and it will improve the aesthetics of this residential neighborhood area (formerly a commercial and now vacant property).

FISCAL IMPACT

None.

RESOLUTION NO. 2024-44

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CERTIFYING THE FINAL ENVIRONMENTAL IMPACT REPORT, ADOPTING A STATEMENT OF OVERRIDING CONSIDERATIONS, AND ADOPTING A MITIGATION MONITORING AND REPORTING PLAN FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS (APPLICANT: LAMPSON PARK PLACE, LLC)

WHEREAS, Lampson Park Place, LLC ("Applicant") proposes to demolish the existing office building and surface parking lot on the 12.3-acre property located at 4665 Lampson Avenue (APN 130-012-35) and redevelop the site with a 246-unit residential development consisting of a variety of housing product types, including 55 single-family detached homes, 114 townhomes, and 77 for-rent multi-family apartment homes comprised of 76 units restricted to lower income households and one unrestricted manager's unit (the "Project"); and,

WHEREAS, an Environmental Impact Report ("EIR") for the Project, incorporated by reference herein, has been completed in compliance with the California Environmental Quality Act ("CEQA"), the guidelines promulgated by the State Secretary for Natural Resources, and the procedures for review as set forth in the 2007 City of Los Alamitos Guidelines for Implementation of the CEQA (Local CEQA Guidelines); and,

WHEREAS, notice regarding the EIR for the Project was sent to neighboring property owners pursuant to the City's CEQA Guidelines, concerning the review period commencing April 24, 2024; and,

WHEREAS, copies of the EIR have been made available for a 45-day review period to pertinent agencies and interested members of the public, commencing on April 24, 2024; and,

WHEREAS, all written comment letters received within the 45-day public review period have been noted in the record, responded to by Staff, and none of the comments alter the conclusions in the EIR; and,

WHEREAS, changes to the EIR have been made that amplify and clarify the analysis; and,

WHEREAS, it has been determined that the proposed Project may potentially have significant effects on the environment, and revisions in the Project proposal would mitigate most of the effects to a point where clearly no significant effect would occur; and,

WHEREAS, potential off-site impacts related to vehicle miles travelled (VMT) result in a significant and unavoidable VMT impact on a direct and cumulatively considerable basis, and the City has prepared a Statement of Overriding Considerations to demonstrate that the Project's benefits outweigh the significant and unavoidable VMT impact identified in the EIR; and

WHEREAS, on September 25, 2024, the Planning Commission of the City of Los Alamitos held a duly noticed public hearing to review and consider the proposed Project, including the EIR and the Statement of Overriding Considerations. The Planning Commission recommended by resolution that the City Council certify the EIR, and adopt the Statement of Overriding Considerations and Mitigation Monitoring and Reporting Plan ("MMRP"); and,

WHEREAS, the City Council considered the certification of the EIR, and adoption of the Statement of Overriding Considerations and MMRP, attached hereto and incorporated by reference herein, at a duly noticed public hearing on October 21, 2024, at which hearing it considered all the evidence presented, both written and oral; and,

WHEREAS, the Applicant, Applicant's representatives and members of the public were provided the opportunity to present written and oral testimony.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, DOES RESOLVE AS FOLLOWS:

SECTION 1. The City Council of the City of Los Alamitos, California, finds that the above recitals are true and correct and are incorporated by reference herein.

SECTION 2. The City Council has reviewed and considered the environmental documentation as well as the conditions cited in Exhibit "A," for the Project prior to taking action. Based on the analysis contained in the EIR and the accompanying environmental information, in compliance with CEQA (Public Resources Code Section 21000, et seq., the State CEQA Guidelines (California Code of Regulations, Title 14, Sections 15000, et seq.), and the City's Local CEQA Guidelines, the City Council hereby certifies the EIR and adopts the Statement of Overriding Considerations and MMRP, incorporated by reference herein. In certifying the EIR and adopting the Statement of Overriding Considerations, the City Council finds as follows:

A. The EIR was prepared in accordance with all legal requirements, including all public notice and comment period requirements.

B. The CEQA requires preparation of an environmental impact report if there is substantial evidence in light of the whole record that the Project may have a potentially significant environmental effect on the environment. An environmental impact report was prepared which demonstrates that the proposed Project will not cause any significant onsite environmental damage as this is a Project on property that already has been designated as an area for residential units and there are no

fish or wildlife habitat on site. The site was previously graded for the construction of the existing commercial building.

Regarding potential off-site impacts, Project components and mitigation measures available to reduce vehicle miles travelled (VMT) include developing pedestrian network improvements and implementing travel demand model (TDM) measures such as those listed in Mitigation Measure MM 4.15-1. Even where the TDM measures are implemented to their maximum effectiveness of 10%, the Project would still not be able to reduce its VMT impact to a level of less than significant which requires a 31.8% reduction for baseline (2022) conditions and 27.7% for buildout (2045) conditions. Therefore, the Project is found to have a significant and unavoidable VMT impact on a direct and cumulatively considerable basis. All feasible mitigation measures were incorporated to reduce VMT impacts per measures identified in the 2021 California Air Pollution Control Officers Association (CAPCOA) Handbook; however, even with incorporation of all feasible mitigation measures, impacts would remain significant and unavoidable.

C. The Project is consistent with the General Plan objectives, policies and programs. The proposed Project allows for the development of 246 residential units at a density of 20 dwelling units an acre which is within the General Plan multi-family residential land use designation of 20 – 25 units per acre. The proposed design and improvements of the 246 residential unit Project are consistent with the applicable General Plan goals, policies, and implementation measures.

D. The Project will not adversely affect the public health, safety and welfare. The proposed Project design and improvements will not adversely affect the public health of the citizens of the City of Los Alamitos as the Project is the type of use which is planned for in this area; the residential Project will be compatible with the single-family and multifamily residential uses in the area. The mitigation measures required by the CEQA document, along with the recommended Conditions of Approval, will ensure the safety of the inhabitants of the Project and will contribute to the health of the community as a whole.

E. The EIR identified potentially significant impacts to VMT which could result from the Project. Mitigation measures have been identified which reduce some of these impacts yet not to a level of less than significant. Even with incorporation of mitigation measures from the EIR into the conditions of Project approval, this impact is significant and unavoidable and would not be mitigated to a less than significant level. Per Public Resources Code section 21081(a)(3), specific economic, legal, social, technological, or other considerations, including considerations for the provision of employment opportunities for highly trained workers, make infeasible additional mitigation. Pursuant to the CEQA, with respect to the identified significant unavoidable environmental effects of the Project, the City Council has weighed the economic, legal, social, technological, and other benefits, including region-wide and statewide environmental benefits, of the

Project against its unavoidable significant environmental impacts in determining whether to approve the Project. The City Council finds that the benefits of the Project outweigh its unavoidable adverse environmental effects such that the adverse environmental effects may be considered "acceptable." A Statement of Overriding Considerations, incorporated by reference herein, was prepared and each of the separate benefits listed provides a separate and independent ground for the City's decision that the Project's benefits outweigh the significant and unavoidable environmental impact identified in the EIR.

F. The City has complied with the CEQA. Pursuant to the provisions of the CEQA, an EIR was prepared which led to the conclusion that a Statement of Overriding Considerations be prepared for this Project. The purpose of an environmental impact report is to identify potential effects on the environment of the Project and to indicate the manner in which those potential significant effects can be avoided or mitigated. A primary function of the environmental impact report is to disclose and evaluate Project impacts and inform decision makers for the Project. To meet the 45-day circulation requirement, a notice regarding the EIR was circulated from April 24 to June 10, 2024 (SCH#2022090476).

G. Together, the draft Environmental Impact Report ("DEIR"), the revisions to the DEIR, the comments of persons and organizations commenting on the DEIR and a list of all such persons and organizations, the responses to the comments, and other information added by the City constitute the final Environmental Impact Report ("FEIR") on the Project.

H. No new significant information has been added to the EIR since circulation of the DEIR that would require recirculation of the EIR. Recirculation of the draft EIR is not required where the new information merely clarifies, amplifies or makes minor modifications to an adequate EIR. The information provided since the draft EIR meets those criteria. All the text revisions to the draft EIR provide clarification and additional detail. After considering all comments received on the draft EIR, the City of Los Alamitos has determined that the changes do not result in a need to recirculate the draft EIR.

I. The final EIR reflects the City of Los Alamitos' independent judgement and analysis.

SECTION 3. Based on the entire record before the City Council, including the written and oral record and the findings set forth in the Resolution, the City Council hereby certifies the Environmental Impact Report, and adopts the Statement of Overriding Considerations and Mitigation Monitoring and Reporting Plan, incorporated by reference herein, for the 4665 Lampson Project at 4665 Lampson Avenue, APN 130-012-35.

SECTION 4. The City Clerk shall forward a copy of this Resolution to the Applicant and any person requesting the same, and Staff shall file a Notice of Determination with the County Clerk.

DRAFT

RESOLUTION NO. 2024-45

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, APPROVING TENTATIVE PARCEL MAP 2022-133 (FOR FINANCE AND CONVEYANCE PURPOSES) AND VESTING TENTATIVE TRACT MAP NO. 19263 (FOR CONDOMINIUM PURPOSES) FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS (APPLICANT: LAMPSON PARK PLACE, LLC)

WHEREAS, Lampson Park Place, LLC ("Applicant") proposes to demolish the existing office building and surface parking lot on the 12.3-acre property located at 4665 Lampson Avenue (APN 130-012-35) and redevelop the site with a 246-unit residential development consisting of a variety of housing product types, including 55 single-family detached homes, 114 townhomes, and 77 for-rent multi-family apartment homes comprised of 76 units restricted to lower income households and one unrestricted manager's unit (the "Project"); and,

WHEREAS, a completed application for a Tentative Parcel Map and a Vesting Tentative Tract Map was submitted by Lampson Park Place, LLC, on November 18, 2023, requesting to subdivide the Project site; and,

WHEREAS, the Project would include a total of 246 units and the overall density for the Project would be 20 dwelling units per acre. The Project would provide 577 parking spaces (475 spaces for the single-family detached and townhomes and 102 for the apartments) exceeding the 441 parking spaces that would be required pursuant to the State's Density Bonus Law; and,

WHEREAS, the application included a tentative parcel map and a vesting tentative tract map as required by Section 16.06.030 (Tentative Parcel Maps) and Section 16.06.020 (Tentative Tract Maps) of the Los Alamitos Municipal Code (LAMC); and,

WHEREAS, the Applicant shall offer a dedication in fee or an easement to the City of a 10-foot-wide strip of land (approximately 10,000 square feet) adjacent to Arbor Park for the purpose of public ingress, egress and access by vehicles and pedestrians and the parking of vehicles; and,

WHEREAS, on September 25, 2024, the Planning Commission of the City of Los Alamitos held a duly noticed public hearing to review and consider the proposed Project, including the Tentative Parcel Map and the Vesting Tentative Tract Map. The Planning Commission recommended by resolution that the City Council approve the Tentative Parcel Map and the Vesting Tentative Tract Map; and,

WHEREAS, the City Council reviewed and considered the Tentative Parcel Map and the Vesting Tentative Tract Map, incorporated by reference herein, at a duly noticed public hearing on October 21, 2024, at which hearing it considered all the evidence presented, both written and oral; and,

WHEREAS, the Applicant, Applicant's representatives and members of the public were provided the opportunity to present written and oral testimony.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, DOES RESOLVE AS FOLLOWS:

SECTION 1. The City Council of the City of Los Alamitos, California, finds that the above recitals are true and correct and are incorporated by reference herein.

SECTION 2. The City Council hereby makes the following findings as set forth in the Subdivision Map Act as well as those required by Los Alamitos Municipal Code (LAMC) Sections 16.10.100 and 16.10.110:

1. *The proposed maps are consistent with the City' s General Plan.* The proposed maps allow for the site redevelopment with 246 residential units at a density of 20 dwelling units an acre which is within the General Plan multi-family residential land use designation of 20 – 25 units per acre. The proposed design of the Project subdivision is consistent with the applicable General Plan goals, policies, and implementation measures.

2. *The design and improvement of the proposed subdivisions is consistent with the City's General Plan.* The design and improvement of the 246-unit Project is suitable for residential development in the R-3 multifamily residential zone and the subdivisions can be developed in compliance with the General Plan.

3. *The site is physically suitable for the proposed type of development.* The site is physically suitable for a residential subdivision because the site is generally flat and will require minimal grading.

4. *The site is physically suitable for the proposed density of development.* The 12.3-acre site is capable of supporting the development of the proposed 246 residential units. The proposed Project is at 20 dwelling units per acre, within the maximum that the City's R- 3 zoning district allows at 25 dwelling units per acre under multi-family development.

5. *The requirements of the California Environmental Quality Act (CEQA) have been satisfied.* Pursuant to the provisions of the CEQA, an Environmental Impact Report ("EIR") was prepared which led to the conclusion that a Statement of Overriding Considerations be prepared for this Project. The purpose of an EIR is to identify potential effects on the environment of the Project and to indicate the manner in which those potential significant effects can be avoided or mitigated. A primary

function of the EIR is to disclose and evaluate Project impacts and inform decision makers for the Project. To meet the 45-day circulation requirement, a notice regarding the draft EIR was circulated from April 24 to June 10, 2024 (SCH#2022090476).

6. *The design of the subdivisions and proposed improvements are not likely to cause substantial environmental damage or substantial and avoidable injury to fish or wildlife in their habitat.* The proposed subdivisions will not cause any onsite environmental damage as this is an infill project on property that already has been designated as an area for residential units and there are no fish or wildlife habitat on site. The site was previously graded for construction of the existing commercial building.

7. *The design of the subdivisions and the proposed improvements are not likely to cause serious public health problems.* The proposed subdivisions design and improvements will not adversely affect the public health of the citizens of the City of Los Alamitos as the Project is the type of use which is planned for in this area; the residential Project will be compatible with the single-family and multi-family residential uses in the area. The mitigations required by the CEQA document will ensure the safety of the inhabitants of the Project and will contribute to the health of the community as a whole.

8. *The design of the subdivisions and improvements will not conflict with public access easement(s) through the property.* The design of the subdivisions and the proposed improvements will not conflict with any existing telephone, street, and/or public utility easements. There are no public access easements through the property.

9. *The design and improvements of the proposed subdivisions are suitable for the uses proposed and the subdivisions can be developed in compliance with the applicable zoning regulations.* As conditioned, the Project will comply with applicable zoning regulations. Pursuant to the State's Density Bonus legislation, minor incentives, concessions, waivers, and/or reductions in development standards have been requested for reduction in setback distance between structures, exception for building step back requirements, reduction in minimum storage space, reduced common area requirement, and reduced parking requirement.

10. *The discharge of waste into an existing community sewer system will not result in or add to a violation of existing requirements prescribed by the Regional Water Quality Control Board.* The discharge of wastewater from the subdivision into the sewer system will not result in a violation of existing requirements prescribed by the Regional Water Quality Control Board.

SECTION 3. Based upon such findings and determinations, the City Council hereby approves Tentative Parcel Map 2022-133 and Vesting Tentative Tract Map No. 19263 attached as Exhibits “B” and "C," and incorporated by reference herein, subject to the conditions located in Exhibit "A."

SECTION 4. The City Clerk shall forward a copy of this Resolution to the Applicant and any person requesting the same, and Staff shall file a Notice of Determination with the County Clerk.

DRAFT

RESOLUTION NO. 2024-46

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, APPROVING AN AFFORDABLE HOUSING UNIT APPLICATION FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE, IN THE MULTI-FAMILY RESIDENTIAL (R-3) ZONING DISTRICT (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS, INCLUDING 76 AFFORDABLE MULTI-FAMILY APARTMENT HOMES (APPLICANT: LAMPSON PARK PLACE, LLC)

WHEREAS, Lampson Park Place, LLC ("Applicant") proposes to demolish the existing office building and surface parking lot on the 12.3-acre property located at 4665 Lampson Avenue (APN 130-012-35) and redevelop the site with a 246-unit residential development consisting of a variety of housing product types, including 55 single-family detached homes, 114 townhomes, and 77 for-rent multi-family apartment homes comprised of 76 units restricted to lower income households and one unrestricted manager's unit (the "Project"); and,

WHEREAS, a completed Affordable Housing Unit Application was submitted by Lampson Park Place, LLC, on October 11, 2022, requesting approval for 246 residential units, including 76 affordable multi-family apartment homes; and,

WHEREAS, pursuant to the State's Density Bonus Law, the application also included requests for incentives, concessions and waivers for the following: reduction in setback distance between structures, exception for building step back requirements, reduction in minimum storage space, reduced common area requirement, and reduced parking requirement; and,

WHEREAS, pursuant to Government Code Section 65915, the verified application constitutes a request as required by Section 17.28.050 (Affordable Housing) of the Los Alamitos Municipal Code; and,

WHEREAS, the State Density Bonus Law codified in Government Code Section 65915 to 65918 provides a mechanism that allows housing developers to increase density on a property above the maximum allowed under a jurisdiction's General Plan or zoning and to request relief from development standards in exchange for offering to build or donate land for affordable or senior housing units. A developer who meets the requirements of the State law is entitled to receive the density bonus and other benefits (i.e., incentives, concessions, waivers, and reduction of development standards) as a matter of right; and,

WHEREAS, California Government Code Section 65589.5, also known as the Housing Accountability Act, prohibits a local agency from disapproving, or conditioning

approval in a manner that renders infeasible, a housing development Project for very low, low-, or moderate-income households or an emergency shelter unless the local agency makes specified written findings based on a preponderance of the evidence in the record; and,

WHEREAS, the receipt of a density bonus, incentive, concession, waiver, or reduction of development standards pursuant to Section 65915 shall not constitute a valid basis on which to find a proposed housing development Project inconsistent, not in compliance, or not in conformity, with an applicable plan, program, policy, ordinance, standard, requirement, or other similar provision; and,

WHEREAS, on September 25, 2024, the Planning Commission of the City of Los Alamitos held a duly noticed public hearing to review and consider the application. The Planning Commission recommended by resolution that the City Council approve the Affordable Housing Unit Application, including the requested incentives, concessions, waivers, and reductions in development standards; and,

WHEREAS, the City Council reviewed and considered the Affordable Housing Unit Application, incorporated by reference herein, at a duly noticed public hearing on October 21, 2024, at which hearing it considered all the evidence presented, both written and oral; and,

WHEREAS, the Applicant, Applicant's representatives and members of the public were provided the opportunity to present written and oral testimony.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, DOES RESOLVE AS FOLLOWS:

SECTION 1. The City Council of the City of Los Alamitos, California, finds that the above recitals are true and correct and are incorporated by reference herein.

SECTION 2. The City Council hereby makes the following findings or determinations made in accordance with Section 17.28.050 of the LAMC, which is which is based on all of the evidence presented, both written and oral;

The design and layout of the proposed development are consistent with the development and design standards/guidelines of the applicable zoning district: The design and layout of the 246 residential units at 4665 Lampson Avenue, as conditioned, is consistent with the development and design standards/guidelines of the Multiple Family (R-3) Residential Zoning District as well as with the requirements for residential development set forth in Section 17.34.060. The development meets, or will be conditioned to meet, all requirements. Each proposed unit and the entire Project meets the development standards for the R-3 zone including parcel area, parcel depth, maximum density, minimum dwelling area, and site coverage. Pursuant to the State's Density Bonus legislation, minor incentives, concessions, waivers, and/or reductions in development standards

have been requested for reduction in setback distance between structures, exception for building step back requirements, reduction in minimum storage space, reduced common area requirement, and reduced parking requirement as described below:

Reduction in setback distance between structures. LAMC Section 17.08.030, Table 2-03 requires a 10-foot minimum distance between structures. Though most of the Project's single-family residential setback distances between structures meet or exceed the minimum distances, the setback distance is reduced to 6 feet at certain locations within the Project site plan. Meeting the required 10-foot minimum setback distance would require a significant change to the site plan and likely result in a reduction of residential units.

Exception for building step back requirements. LAMC Section 17.08.045.A.1 requires that for buildings higher than two stories, the third story must have a minimum 5-foot step back from the story below to minimize building bulk and create façade articulation. This requirement appears to govern regardless of building location within a Project site or surrounding land uses. While the City interprets this requirement as applying only to perimeter buildings (i.e., buildings that are located along the perimeter of a Project site), given the requirement's ambiguity, the Applicant is requesting an exception from the required minimum 5-foot step back requirement for those structures identified on the site plan.

Reduction in minimum storage space. LAMC Section 17.08.030, Table 2-03, requires a minimum storage space in a garage or carport of 200 cubic feet per unit. For certain units within the Project, this storage space requirement will be difficult to satisfy because of limitations in garage and carport space. As such, the Applicant is requesting that the minimum storage space requirement be reduced to 175 cubic feet per unit for market rate units and 50 cubic feet per unit for affordable units identified on the site plan.

Reduced common area requirement. LAMC Section 17.08.030, Table 2-03 requires a minimum 200 square feet of common area and 60 square feet of private space per unit. The Project will be able to comply with the minimum private space requirement, but the Project will not be able to comply with the common area requirement. This is due to the proposed dedication or grant of an easement related to the northerly 10-foot strip of land abutting Arbor Park and Arbor Dog Park, which comprises an area of approximately 10,000 square feet of property. When this area is dedicated or granted to the City, then the Project will be unable to comply with the common area requirement because compliance with this requirement would physically preclude construction of the Project at the densities allowed and with the concessions described above. Therefore, the Applicant is requesting a reduction in the common area requirement from 200 to 150 square foot per unit.

Parking Reduction Request. The Project would provide 577 parking spaces (475 spaces for the single family detached and townhomes and 102 for the apartments), which is below the City's required 679 parking spaces pursuant to LAMC Section 17.22.030, Required Parking Spaces. The State's Density Bonus Law specifies that for housing developments that qualify for a density bonus the local government shall not require a vehicular parking ratio, inclusive of parking for persons with a disability and guests, that exceeds the following ratios: (A) zero to one bedroom: one onsite parking space; (B) two to three bedrooms: one and one-half onsite parking spaces; and (C) four and more bedrooms: two and one-half parking spaces. (Gov't Code Section 65915(p)(1).) The Applicant requests that the City require no more than 2.35 spaces per unit for a total of 577 parking spaces for the Project, which is significantly more than the 441 parking spaces that would be required pursuant to the State's Density Bonus Law.

SECTION 3. Prior to final map approval, the applicant shall record covenants with the County Recorder for the low and/or very low affordability requirements of said 76 units to remain affordable for a period no less than 55 years in accordance with Government Code Section 65915 and Los Alamitos Municipal Code Section 17.28.050, as described in Condition Nos. 16 - 23.

SECTION 4. Pursuant to the provisions of the California Environmental Quality Act (CEQA) an Environmental Impact Report ("EIR") was prepared which led to the conclusion that a Statement of Overriding Considerations be prepared for this Project. The purpose of an EIR is to identify potential effects on the environment of the Project and to indicate the manner in which those potential significant effects can be avoided or mitigated. A primary function of the EIR is to disclose and evaluate Project impacts and inform decision makers for the Project. To meet the 45-day circulation requirement, a notice regarding the draft EIR was circulated from April 24 to June 10, 2024 (SCH#2022090476).

SECTION 5. Based upon such findings and determinations, the City Council hereby approves an Affordable Housing Unit Application, including the requested incentives, concessions, waivers, and reductions in development standards, as represented by the plans and elevations incorporated by reference herein, and subject to the conditions located in Exhibit "A."

SECTION 6. The City Clerk shall forward a copy of this Resolution to the Applicant and any person requesting the same, and Staff shall file a Notice of Determination with the County Clerk.

PASSED, APPROVED, AND ADOPTED this _____ day of _____ 2024.

DRAFT

RESOLUTION NO. 2024-47

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, APPROVING SITE DEVELOPMENT PERMIT – MAJOR FOR THE 4665 LAMPSON PROJECT LOCATED AT 4665 LAMPSON AVENUE, IN THE MULTI-FAMILY RESIDENTIAL (R-3) ZONING DISTRICT (APN 130-012-35) TO ALLOW REDEVELOPMENT OF THE PROJECT SITE WITH 246 RESIDENTIAL UNITS (APPLICANT: LAMPSON PARK PLACE, LLC)

WHEREAS, Lampson Park Place, LLC ("Applicant") proposes to demolish the existing office building and surface parking lot on the 12.3-acre property located at 4665 Lampson Avenue (APN 130-012-35) and redevelop the site with a 246-unit residential development consisting of a variety of housing product types, including 55 single-family detached homes, 114 townhomes, and 77 for-rent multi-family apartment homes comprised of 76 units restricted to lower income households and one unrestricted manager's unit (the "Project"); and**,**

WHEREAS, a completed application for a Site Development Permit – Major was submitted for the Project by Lampson Park Place, LLC, on November 18, 2023; and,

WHEREAS, the Project would include a total of 246 units and the overall density for the Project would be 20 dwelling units per acre. The Project would provide 577 parking spaces (475 spaces for the single family detached and townhomes and 102 for the apartments) in exceedance of the 441 parking spaces that would be required pursuant to the State's Density Bonus Law; and,

WHEREAS, the verified application constitutes a request as required by Section 17.44.040 and Section 17.08.020 Table 2-02 (Allowed Uses and Permit Requirements for Residential Zoning Districts) of the Los Alamitos Municipal Code (LAMC); and,

WHEREAS, on September 25, 2024, the Planning Commission of the City of Los Alamitos held a duly noticed public hearing to review and consider the application. The Planning Commission recommended by resolution that the City Council approve the Site Development Permit – Major; and,

WHEREAS, the City Council reviewed and considered the Site Development Permit – Major, incorporated by reference herein, at a duly noticed public hearing on October 21, 2024, at which hearing it considered all the evidence presented, both written and oral; and,

WHEREAS, the Applicant, Applicant's representatives and members of the public were provided the opportunity to present written and oral testimony.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF LOS ALAMITOS, CALIFORNIA, DOES RESOLVE AS FOLLOWS:

SECTION 1. The City Council of the City of Los Alamitos, California, finds that the above recitals are true and correct and are incorporated by reference herein.

SECTION 2. The City Council hereby makes the following findings made in accordance with Section 17.44.060 of the LAMC, which is based on all of the evidence presented, both written and oral; the Staff report and final Environmental Impact Report are incorporated by reference herein:

1. *The proposed project is allowed within the subject zone:* The property is designated and zoned for this type of development. The Project site has a land use designation of Multi-Family Residential - 25 and a zoning classification of Multi-Family Residential - 25 (R-3).

2. *The proposed project complies with all of the applicable criteria identified in 17.44.030(B) (Application Processing, Filing, and Review—Generally):* The design and layout of the proposed residential units at 4665 Lampson Avenue is efficient, consistent with applicable City regulations and policies, and would not interfere with the use and enjoyment of neighboring residential developments, as the surrounding residential uses are comprised of single-family and multi-family. The location is appropriate for a 246-unit residential development that would be constructed in an architectural style that complements nearby homes. The Project will retain beautiful landscaping through the strength of a Homeowner's Association that will hire and maintain a maintenance crew. The Homeowner's Association will have regulations that are more exacting than the City' s Code concerning maintenance and parking. The location of the driveway ingress/egress access to the site would not create traffic or pedestrian hazards. The design and layout of the 246 residential units at 4665 Lampson Avenue, as conditioned, is consistent with the development and design standards/guidelines. Pursuant to the State’s Density Bonus legislation and LAMC 17.28.050, minor incentives, concessions, waivers, and/or reductions in development standards have been requested for reduction in setback distance between structures, exception for building step back requirements, reduction in minimum storage space, reduced common area requirement, and reduced parking requirement.

3. *The proposed project is in keeping with the character of the neighborhood, in terms of the structure(s) general appearance:* The design of the 246 residential units would be in keeping with the neighborhood character and enhance the attractive, harmonious, and orderly development of the property. The design is in harmony with surrounding development and improves upon the City's architecture with quality detached single-family, townhome, and multi-family residential building design, extensive landscaping, and maintenance requirements.

4. *The design of the proposed development will provide a desirable environment for its occupants and visiting public as well as its neighbors through good aesthetic use of materials, texture, and color, and will remain aesthetically appealing and retain an appropriate level of maintenance:* The design of the 246 residential units would provide a desirable environment for its occupants, visiting public, and its neighbors through good aesthetic use of materials, texture, landscaping, and color as depicted in the plan set incorporated by reference herein. Site redevelopment would continue the attractive environment that the existing property previously enjoyed for years and maintain an appropriate level of maintenance, through the implementation of a homeowners' association and the use of covenants, conditions, and restrictions.

5. *The proposed development would not be detrimental to the public health, safety, or welfare or materially injurious to the properties or improvements in the vicinity:* The 246 residential units provide for public health, safety, and welfare of the residential and business communities by providing more living options to the City rather than causing sprawl at the fringes of this metropolitan area. The buildings will meet all building code requirements. The mitigation measures identified in the Environmental Impact Report prepared for the Project would ensure the safety of the inhabitants of the Project as well as other residents of Los Alamitos. Also, the 246 residential units would not depreciate property values in the vicinity, as the area is zoned for this type of use and it will improve the aesthetics of this residential neighborhood area (formerly a commercial and now vacant property).

6. The proposed Project would assist the City of Los Alamitos in providing for the State mandated units identified in the General Plan for moderate, low and/or very low-income categories as described in the Regional Housing Needs Assessment. Remaining sites identified in the housing element are adequate to meet the requirements of Government Code Section 65583.2 and to accommodate the jurisdiction's share of the regional housing need pursuant to Section 65584.

   The City's Regional Housing Needs Allocation (RHNA) for the 6th Cycle Housing Element Update is a total of 769 units, which is comprised of 313 lower income units, 145 moderate income units, and 311 above moderate-income units. The City's Housing Element identified that the City's residential capacity is 817 total units, which exceeds the City's RHNA obligation of 769 units by 48 units. This surplus, or "buffer," of 48 units is comprised of 19 surplus lower income units, 14 moderate income units, and 15 surplus above moderate-income units.

   The Housing Sites Inventory identifies the total number of units for the proposed Project site as 246 units, and those units are projected to consist of 77 lower income units, zero moderate income units, and 169 above moderate-income units. The proposed residential Project proposes 76 lower income units, zero moderate income units, and 170 above moderate-income units

As such, approval of the Project on the site identified in the Housing Sites Inventory will result in the need for the City to deduct one lower income unit from the City's surplus "buffer" of 19 lower income units, resulting in a remaining surplus "buffer" of 18 lower income units. Accordingly, even after approval of the Project, the remaining sites identified in the City's Housing Element are adequate to meet the requirements of Section 65583.2 and to accommodate the jurisdiction's share of the regional housing need pursuant to Section 65584.

SECTION 3. Pursuant to the provisions of the California Environmental Quality Act (CEQA) an Environmental Impact Report ("EIR") was prepared which led to the conclusion that a Statement of Overriding Considerations be prepared for this Project. The purpose of an EIR is to identify potential effects on the environment of the Project and to indicate the manner in which those potential significant effects can be avoided or mitigated. A primary function of the EIR is to disclose and evaluate Project impacts and inform decision makers for the Project. To meet the 45-day circulation requirement, a notice regarding the draft EIR was circulated from April 24 to June 10, 2024 (SCH#2022090476).

SECTION 4. Based upon such findings and determinations, the City Council hereby approves a Site Development Permit – Major, as represented by the plans and elevations incorporated by reference herein, and subject to the conditions located in Exhibit "A."

SECTION 5. The City Clerk shall forward a copy of this Resolution to the Applicant and any person requesting the same, and Staff shall file a Notice of Determination with the County Clerk.

DRAFT

EXHIBIT A

4665 LAMPSON PROJECT
CONDITIONS OF APPROVAL

Site Development Permit – Major, Tentative Parcel Map No. 2022-133, Vesting Tentative Tract Map No. 19263, Affordable Housing Unit Application, and Environmental Impact Report

**The following Conditions of Approval shall be binding on and enforceable against each of the following, and whenever used herein, the term "Applicant" shall mean and refer to, each of the following: Lampson Park Place. LLC, and the future owner(s) and tenant(s) of the property, and each of their respective successors and assigns.

GENERAL

1. Approval of this application is to construct a 246 residential unit project at 4665 Lampson Avenue (APN 130-012-35) pursuant to City Council approval of a Site Development Permit – Major, Tentative Parcel Map 2022-133 (for Finance and Conveyance Purposes), Vesting Tentative Tract Map No. 19263 (for Condominium Purposes), and an Affordable Housing Unit Application for Density Bonus and/or Incentives or Concessions and a Waiver to redevelop the Project site (the "Project") noted thereon the plans incorporated by reference herein, and on file in the Development Services Department. Subsequent submittals for the Project shall be substantially consistent with such plans and in compliance with the applicable land use regulations of the Los Alamitos Municipal Code. If any changes are proposed regarding the location or alteration of the plans dated April 4, 2023, and January 16, 2024 (and as may be revised and approved by the City Council), a request for an amendment of this approval must be submitted to the Development Services Director. If the Development Services Director determines that the proposed change or changes are substantially consistent with the provisions and spirit of intent of this approval action, and that such action would have been the same with the proposed change or changes as for the proposal approved herein, the amendment may be approved by the Development Services Director without requiring a public meeting.

2. The duration of the Site Development Permit approval and the Affordable Housing Unit Application for Density Bonus and/or Incentives or Concessions shall be twenty-four (24) months from the date the site plan is approved. If construction is commenced within this twenty-four (24) month period and construction is being pursued diligently toward completion, the Site Development Permit approval and the Affordable Housing Unit Application for Density Bonus and/or Incentives or Concessions and a Waiver shall remain in full force and effect.

3. The Development Services Director may, upon receipt in writing from the Applicant before the expiration date, grant three (3) extensions of time up to twelve (12) months maximum. If an extension of time is not granted, the Site Plan Review approval shall expire, and a new application shall be made.

4. City Council approval of the Tentative Parcel Map 2022-133 and Vesting Tentative Tract Map No. 19263 shall remain valid for twenty-four (24) months. The Maps shall expire on _____ ___, 2026, unless the applicant requests a time extension as outlined by City standards and in conformance with Section 16.10.130 (Period of Validity – Extensions) of the Los Alamitos Municipal Code.

5. Prior to issuance of a building permit, copies of the recorded maps shall be provided to the Development Services Department. Model homes are exempt from this condition.

6. To the fullest extent permitted by law, the Applicant shall, at its sole cost and expense, protect, defend, indemnify, and hold harmless the City, its elected and appointed officers and officials, employees, agents, departments, agencies, authorized volunteers, consultants, boards, commissions, and committees, and instrumentalities thereof ("Indemnitees"), from and against any and all claims, liabilities, losses, fines, demands, penalties, lawsuits, writs of mandamus, and any other claims or actions or proceedings of any kind whatsoever (whether legal, equitable, declaratory, administrative or adjudicatory in nature), and alternative dispute resolution procedures (including, but not limited to, arbitrations, mediations, and other such procedures), judgments, orders and decisions (collectively "Claims" and “Actions”), brought against the Indemnitees, which seek to attack, challenge, modify, set aside, void, or annul any action of or any permit or approval issued by the Indemnitees (including actions approved by the voters of the City) for, in connection with, or concerning the Project. It is expressly understood and agreed that the City shall have the right to approve, which approval will not be unreasonably withheld, the legal counsel providing the defense of the Indemnitees for the Claims and Actions, and that the Applicant shall promptly reimburse the City for all costs and expenses directly and necessarily incurred by the City in the course of the defense, including reasonable attorneys' fees. The City shall promptly notify the Applicant of any Claims and Actions brought against the Indemnitees and shall cooperate in the defense of any such Claims and Actions. If the Applicant fails to so defend the Claims and Actions, the City shall have the right but not the obligation to do so and, if it does, the Applicant shall promptly pay the City's full cost thereof.

7. The Applicant shall file an Acknowledgment of Conditions of Approval with the Development Services Department within 30 days of final approval of all resolutions. The Applicant shall be required to record the Acknowledgment of these Conditions of Approval with the Office of the Orange County Recorder and proof of such recordation shall be submitted to the Development Services Department before issuing any permits.

8. Failure to satisfy and/or comply with the conditions herein may result in a recommendation to the Planning Commission and/or City Council for revocation of this approval.

9. The Applicant shall comply with applicable City, County, and/or State regulations.

10. The Applicant shall be required to comply with the Seismic Hazards Mapping Act of 1990, including the Guidelines for Evaluating and Mitigating Seismic Hazards in California 1997.

11. In case of violation of any of the conditions of approval or applicable law, the City shall issue Applicant a Notice of Potential Violation, and if said violation is not remedied within a reasonable period of time, then the City shall issue Applicant a Notice of Correction. If

DRAFT

subsequent violations of the conditions of approval and/or City law occurs within ninety days of any Notice of Correction, the Applicant shall be held responsible to reimburse the City for all Staff time directly attributable to enforcement of the conditions of approval, mitigation measures, and/or City law including but not limited to, revocation of the herein approvals.

The Applicant shall be responsible for implementing the mitigation measures identified in the Environmental Impact Report to the satisfaction of the City of Los Alamitos Development Services Department.

12. Project plans shall be subject to a complete code compliance review with the Development Services Department when the plans are submitted for plan check and shall comply with all applicable City of Los Alamitos ordinances, regulations, and policies prior to building permit issuance, including, but not limited to, the requirements established or authorized by Title 15, 16, and 17 of the City of Los Alamitos Municipal Code.

13. All invoices the Applicant has received from the City shall be paid to a zero balance by certificate of occupancy for any portion of the Project.

14. Prior to issuance of a certificate of occupancy for any portion of the Project, the Applicant shall offer a dedication in fee or an easement to the City of a 10-foot-wide strip of land (approximately 10,000 square feet) adjacent to Arbor Park for the purpose of public ingress, egress and access by vehicles and pedestrians and the parking of vehicles. The form of such conveyance shall be subject to approval by the City Attorney.

15. The Applicant shall notify buyers and/or renters that the Project site is within an airport influence area/military installation and may experience annoyances or inconveniences associated with proximity to airport/military installation operations (for example: noise, vibration, or odors) and provide all related disclosures as required by State law.

AFFORDABLE HOUSING/DENSITY BONUS

16. Development of Affordable Housing:

    a. Conveyance of Parcel 1. Prior to the issuance of any building permit on Parcel 2, and after recordation of the parcel map, Applicant may convey Parcel 1 to an affordable housing provider, for the purpose of constructing and managing seventy-seven (77) multi-family units which shall be comprised of seventy-six (76) units restricted to lower income and with one unrestricted manager's unit (the "apartment complex").

    b. Concurrent Grading. Grading shall commence on Parcel 1 concurrently with grading on Parcel 2.

    c. Timing of Construction. Construction of the affordable housing apartment complex must be commenced prior to issuance of certificates of occupancy for the final 17 market rate units on Parcel 2 (i.e., Applicant may construct and obtain certificates of occupancy for 152 market rate units on Parcel 2 prior to the issuance of a building permit for Parcel 1 (the apartment complex parcel); however, certificates of occupancy will be withheld for the remaining 17 market rate units until the issuance of a building permit for Parcel 1 and

commencement of construction in accordance with the building permit prior to its expiration.

17. Applicant agrees that the 76 affordable units shall be rented to lower income households as defined in Section 50079.5 of the California Health and Safety Code for a period of no less than 55 years, commencing with the issuance of certificate of occupancy for any portion of the apartment complex, at rents that do not exceed the maximum rent for 80% income level units for that size unit in Orange County as published annually by the California Tax Credit Allocation Committee ("CTCAC"). Determinations of household income levels shall be made in accordance with the regulations published from time to time by the California Department of Housing and Community Development pursuant to Health and Safety Code Section 50093.

18. The Applicant shall enter into a regulatory agreement with the City memorializing the provision of lower income housing, and the granting of the requested Density Bonus Law concessions and waivers. The regulatory agreement shall be recorded against only the parcel that will include the apartment complex (Parcel 1) in the Official Records of Orange County, California concurrently with recordation of Parcel Map No. 2022-133 and shall be binding upon all future owners and successors in interest of the apartment complex.

19. The regulatory agreement shall be prepared by the City at the Applicant's expense. Prior to the City commencing preparation of a regulatory agreement, the Applicant shall execute a reimbursement agreement with the City in a form approved by the City Attorney and provide a deposit to the City in an amount sufficient to cover the estimated total professional fees and costs to be incurred by the City for preparation of the regulatory agreement, as determined by the City Manager in his reasonable discretion. The City Manager is authorized to execute said reimbursement agreement on behalf of the City.

20. The regulatory agreement shall remain a senior, non-subordinate covenant and as an encumbrance running with the land for the full term thereof. In no event shall the regulatory agreement be made junior or subordinate to any deed of trust or other documents providing financing for the construction or operation of the apartment complex, or any other lien or encumbrance whatsoever for the entire term of the required covenants.

21. The regulatory agreement shall include provisions addressing or requiring the following:

    a. Identification of Affordable Units. The number, affordability level, unit size mix, and location of the affordable units shall be set forth in the regulatory agreement.

    b. Annual Tenant Income Verification, Compliance Reporting, and Certification. The regulatory agreement shall include uniform provisions requiring the Applicant to verify and certify, prior to the initial occupancy, and annually thereafter, that each tenant household occupying each affordable unit meets the applicable income and eligibility requirements established for the affordable unit.

    c. Maintenance Standards. The regulatory agreement shall contain uniform provisions governing the Applicant's maintenance obligations and the City's rights in the event the owner fails to adhere to its maintenance obligations.

d. Compliance Report. The regulatory agreement shall contain provisions requiring the Applicant to submit an annual compliance report containing specified information to the City in a form reasonably satisfactory to the City Manager and to annually certify that the affordable units are in compliance with the requirements of the regulatory agreement.

e. Recordkeeping Requirements. The regulatory agreement shall contain uniform provisions requiring the owner to maintain tenant leases, income certifications, and other books, documents, and records related to the rental of the affordable units and operation of the apartment complex for a period of not less than five (5) years after creation of each such record; to allow the City to inspect any such books, documents, or records and to conduct an independent audit or inspection of such records at a location that is reasonably acceptable to the City Manager upon prior written notice; and to permit the City and its authorized agents and representatives to access the property and examine the housing units and to interview owners, occupants, tenants and employees for the purpose of verifying compliance with the regulatory agreement.

f. Marketing and Management Plan for Affordable Units. The regulatory agreement shall contain uniform provisions regarding property management and management responsibilities and shall require the Applicant to prepare and obtain the City's approval of a marketing and management plan for the apartment complex prior to the issuance of a certificate of occupancy for any portion of the apartment complex. The marketing and management plan shall address in detail, without limitation, the following matters: (i) how the Applicant plans to market the affordable units to prospective tenant households; (ii) procedures for the selection of tenants of affordable units, including a description of how the Applicant plans to certify the eligibility of tenant households; (iii) procedures for annually verifying income and recertifying the eligibility of tenants of affordable units; (iv) the standard form(s) of rental agreement(s) the Applicant proposes to enter into with tenants of affordable units; (v) procedures for the collection of rent; (vi) procedures for eviction of tenants; (vii) procedures for ensuring that the required number and unit size mix of affordable units is maintained; (viii) procedures for complying with the Applicant's monitoring and recordkeeping obligations; (ix) the Applicant's property management duties; (x) the Applicant's plan to manage and maintain the apartment complex and the affordable units; (xi) the rules and regulations of the property and manner of enforcement; and (xii) and a program addressing security and crime prevention at the apartment complex.

g. Rental Preferences and Priority.

   i. Veteran Preference. To the extent permitted by law, and provided that the prospective tenants meet standard screening standards, with respect to the rental of nineteen (19) of the units in the apartment complex, Applicant shall give a preference to households that include one or more veterans of the United States military.

   ii. Local Preference. To the extent permitted by law, and provided that the prospective tenants meet standard screening standards, Applicant shall give a preference to households that include one or more persons who are currently employed in or are currently residing in the City of Los Alamitos.

DRAFT

h. Timing of Construction. The regulatory agreement shall include the construction timing requirements set forth in Condition No. 16(c).

i. Access between Parcels. The regulatory agreement shall include the public ingress and egress requirements set forth in Condition No. 28(i)(iv).

22. The City Manager is authorized to approve and execute the regulatory agreement and any amendments thereto on behalf of the City. The City Manager shall have the authority to make approvals, issue interpretations, waive provisions, make and execute further agreements and/or enter into amendments to the regulatory agreement on behalf of City.

23. The Applicant shall reimburse the City for its reasonable costs to implement the Affordable Housing/Density bonus conditions of approval, and for the fees and costs charged for the services of attorneys and/or other professional third-party consultants engaged by the City to provide consultation, advice, analysis, and/or review or preparation of documents in connection with preparation of the regulatory agreement, review of the initial marketing and management plan required as part of the regulatory agreement, review of annual compliance reports submitted by Applicant pursuant to a regulatory agreement, and inspections and audits provided for in the regulatory agreement.

CONDITIONS, COVENANTS & RESTRICTIONS (CC&Rs)

24. Prior to the approval of the final map, all organizational documents for the Project, including any covenants, conditions, and restrictions (CC&Rs), shall be submitted to and approved by the Development Services Department and City Attorney's Office. Costs for such review shall be borne by the subdivider.

25. CC&Rs submitted to the City for review shall contain a table itemizing each of the requirements identified herein and the page/paragraph where they are addressed in the CC&Rs.

26. The approved CC&Rs shall be recorded with County Recorder's Office concurrent with the Final Map. A copy of the final documents shall be submitted to the Development Services Department after recordation.

27. No dwelling unit in the market-rate portion of the development shall be sold or a certificate of occupancy issued, unless a homeowners association has been legally formed with the right to assess all units which are jointly owned or benefitted to operate and maintain all other mutually available features of the development including, but not limited to, public and private open space, amenities, landscaping, private streets, and utilities.

28. The CC&Rs shall include, but are not limited to, the following provisions:

a. The City shall be included as a party to the CC&Rs for enforcement purposes of those CC&R provisions in which the City has interest as reflected in the following provisions. However, the City shall not be obligated to enforce the CC&Rs.

b. The requirement that association bylaws be established.

c. Provisions for effective establishment, operation, management, use, repair, and maintenance of all common areas and facilities including open space, landscaped areas, roof decks, walls and fences, private roadways (i.e., walkways, sidewalks, paseos, driveways), lighting, and furnishings, awnings, trash enclosures, water quality management plan BMPs and private utilities, if any, shall be established in the CC&Rs.

d. Private open space areas within the common area shall be illustrated on a "Private Open Space Exhibit" and shall be made part of the CC&Rs and shall specify those portions of the open space area that are allocated for private use. The CC&Rs shall include provisions for authorized uses and structures, access, maintenance, and restrictions in the private use areas to minimize noise and light disruptions to adjacent properties.

e. Membership in the homeowners association shall be inseparable from ownership in individual units.

f. Architectural controls shall be provided and may include, but not be limited to, provisions regulating architectural features, exterior finishes, roof materials, fences and walls, balconies, roof decks, accessory structures such as patios, sunshades, trellises, gazebos, awnings, exterior mechanical equipment, television and radio antenna, consistent with the Los Alamitos Municipal Code (LAMC).

g. Maintenance standards shall be provided for applicable items listed in Section (c) above in the CC&Rs. Examples of maintenance standards are shown below.

   i. All common area landscaping and private areas visible from any public way shall be properly maintained such that they are evenly cut, evenly edged, and free of debris and weeds. All trees and shrubs shall be trimmed so they do not impede vehicular or pedestrian traffic. Trees shall be pruned so they do not intrude into neighboring properties and shall be maintained so they do not have droppings or create other nuisances to neighboring properties. All trees shall also be root pruned to eliminate exposed surface roots and damage to sidewalks, driveways, and structures.

   ii. All private drives, sidewalks, and open space areas shall be maintained so that they are safe for users. Significant pavement cracks, pavement distress, excessive slab settlement, abrupt vertical variations, and debris on travel ways shall be removed or repaired promptly.

   iii. Common areas shall be maintained in such a manner as to avoid the reasonable determination of a duly authorized official of the City that a public nuisance has been created by the absence of adequate maintenance such as to be detrimental to public health, safety, or general welfare.

h. Homeowners association approval of exterior improvements requiring a building permit shall be obtained prior to requesting a building permit from the City of Los Alamitos Development Services Department. All plans for exterior improvements shall conform to requirements set forth by the City and the CC&Rs.

i. A "Parking and Circulation Exhibit" shall be made part of the CC&Rs and shall be enforced by the homeowners association. In addition to the exhibit, provisions regarding parking shall be included in the CC&Rs, including the following:

   i. Residents shall not store or park any non-motorized vehicles, trailers or motorized vehicles that exceed seven (7) feet high, seven (7) feet wide, and nineteen (19)

feet long in any parking space, driveway, or private street area except for the purpose of loading, unloading, making deliveries or emergency repairs except that the homeowners association may adopt rules and regulations to authorize exceptions.

ii. Residents shall park vehicles in garage spaces. Storage of personal items may occur in the garages only to the extent that vehicles may still be parked within the required garage spaces.

iii. The homeowners association shall be responsible for monitoring and enforcing all parking regulations on private property. The proposed CC&Rs shall include provisions requiring the association to develop and adopt an enforcement program for parking regulations within the development which may include measures for fire access and enforcement by a private security company.

iv. Roadways within the community shall at all times remain open and unobstructed to allow public ingress and egress (including, without limitation, travel between Parcel 1 and Parcel 2); gates, fences and other means of access control are prohibited.

j. Provisions for enforcing individual trash cart placement at designated curb areas as shown on the approved “Trash Pick-up Plan” no earlier than noon (12:00 P.M.) on the day before scheduled collections and removed within twelve (12) hours of collection.

k. Maintenance of all common areas, driveways, etc., shall be by the homeowners association.

l. Television and radio antennas shall be installed in accordance with the requirements of the LAMC.

m. All utility services serving the site shall be installed and maintained underground pursuant to LAMC 16.12.170.

n. The homeowners association shall be required to file the names, addresses, and telephone numbers of at least one (1) member of the homeowners association Board and, where applicable, a manager of the project before January 1st of each year with the Development Services Department for the purpose of contacting the association in the case of emergency or in those cases where the City has an interest in CC&R violations.

o. The homeowners association shall be responsible for establishing and following procedures for providing access to public utilities for maintenance of their facilities within the project area, subject to those agencies' approval.

p. No amendment to alter, modify, terminate, or change the homeowners association's obligation to maintain the common areas and the project perimeter wall or other CC&R provisions in which the City has an interest, as noted above, or to alter, modify, terminate, or change the City's right to enforce maintenance of the common areas and maintenance of the project perimeter wall, shall be permitted without the prior written approval of the Development Services Department.

FEES

29. In accordance with Government Code section 66477 and Chapter 16.18 of the Los Alamitos Municipal Code, the Applicant shall be required to pay **$3,333,905.00** in parkland dedication (Quimby) fees prior to the final certificate of occupancy issued for the Project.

CONSTRUCTION

30. The Applicant shall deliver a construction schedule to the adjacent properties within 300 feet of the site to properly inform them of future construction, including the name and 24-hour contact information for a project manager for noise, dust, and other complaints.

31. All demolition and construction shall be done in accordance with Los Alamitos Municipal Code Demolition Chapter 8.13.

32. The Applicant must comply with all current California Building Codes and California Residential Codes, as applicable.

33. Project plans for the condominium development shall be subject to a complete code compliance review with the Development Services Department when the condominium plans are submitted for plan check and shall comply with all applicable City of Los Alamitos ordinances, regulations, and policies prior to building permit issuance, including, but not limited to, the requirements established or authorized by Title 15, 16, and 17 of the City of Los Alamitos Municipal Code.

34. The site shall be kept reasonably clean during construction and maintained in a safe, nuisance, and hazard-free condition. Dust control measures shall be employed to include spraying water on dry soil to ensure dust does not migrate onto adjacent properties.

35. During construction the site shall be maintained and kept clear of all trash, weeds, and overgrown vegetation.

36. Prior to demolition and construction, a temporary perimeter security fence not exceeding eight feet in height shall be installed around the project site to secure the site and shield the construction areas and public views. The fencing shall include a privacy screen material or approved equivalent. The fence/screen material shall be properly maintained and be free of rips, tears, fraying, graffiti, and any other damage or vandalism.

37. The Applicant will display a sign visible to the public with a 24-hour emergency contact number for an individual, such as the construction superintendent, should any resident have any questions about the construction.

38. The Project shall comply with all requirements of Chapter 17.20, Noise, of the Los Alamitos Municipal Code.

39. Noise sources associated with construction activities shall only occur between the hours of 7:00 a.m. and 8:00 p.m. on weekdays and on Saturdays and shall not take place at any time on Sundays or Federal holidays.

40. All construction vehicles or equipment, fixed or mobile, operated within 1,000 feet of an existing dwelling shall be equipped with properly operating and maintained mufflers.

WQMP

41. Prior to issuance of any building permits, the Applicant shall submit to the City's Water Quality Manager for review and approval a *Final* Water Quality Management Plan (WQMP). The reviewed and approved WQMP shall be recorded and a copy of the recorded WQMP shall be provided to the City's Water Quality Manager. See also Condition No. 85.

LANDSCAPE

42. A landscape Irrigation Plan prepared by a licensed landscape architect shall be submitted to the Development Services Department prior to the issuance of building permits. The Irrigation Plan shall include an irrigation system layout with the location of controllers and points of connection with data on valve sizes and gallons per minute (G.P.M.), the size and location of sleeves and all spray heads, including the location of conventional systems and drip systems; an irrigation legend with complete specifications; irrigation notes and construction details of all assemblies and components; a recommended irrigation schedule, preferably on an annual basis; and a summary block on the initial page of submitted plans that will present the above information clearly and accurately. The City reserves the right to require subsequent checks, or approval of the landscape plans prior to issuance of a grading permit. See also Condition Nos. 66 and 67.

43. Landscaping shall comply with the City's water conservation ordinances in accordance with Chapter 13.04 (Water Conservation) and Chapter 13.05 (Water Efficient Landscaping) of the Los Alamitos Municipal Code.

44. A phased landscape and irrigation plan shall be submitted for review and comply with the City's Xeriscape Ordinance (Ord. No. 563). All required landscaping and irrigation shall be installed prior to the issuance of a certificate of occupancy for each corresponding phase.

45. All trees noted on the plans shall be planted outside of the Sight Safety Triangle or else be trimmed to eight feet in height from above the adjacent top of curb.

46. All landscaping on the site, including, without limitation, trees, shrubs and other vegetation, drainage and irrigation systems, shall be permanently maintained in good, first-class condition, healthy, without deterioration, free of waste and debris, through all phases of construction and after. Dead or diseased plants shall be promptly replaced with landscaping similar in type, size, and quality. Automatic Irrigation systems shall be properly maintained, and other reasonable and adequate landscape maintenance facilities and procedures shall be provided to fulfill the foregoing requirements.

47. The common open space area improvements shall be reviewed for consistency with the Project plans by the Development Services Department prior to issuance of building permits. The common open space area identified as the "Neighborhood Green Space" on the Site Plan included as Figure 3-4 in the Draft EIR and centrally located within the Project site shall be

completed at the time that the Applicant completes no more than 50 percent of the units (123 units).

LIGHTING

48. Prior to permit issuance Applicant shall submit a lighting plan to the Development Services Department to the satisfaction of the Development Services Director.

49. The Applicant shall provide adequate exterior lighting for each residential unit that maintains performance standards as described in Chapter 8.48 *Lighting Performance Standards* in the Los Alamitos Municipal Code. All lighting structures shall be placed so as to confine direct rays to the subject property.

50. The Applicant shall provide an illuminated uniform address number installed at each unit entryway.

UTILITIES

51. The Applicant shall submit detailed plans showing the proposed location of utilities and mechanical equipment to the Development Services Department for review and approval prior to the Building and Safety Division Plan check.

52. Above ground utility equipment (e.g., electrical, telephone, and cable TV) shall be screened if located in the front yard area of each unit, within the front yard setback, common open space area, or any parking spaces or sidewalks, and shall be screened to the satisfaction of the Development Services Director.

53. All exterior mechanical equipment shall be screened from view.

54. All utility meters, when not enclosed in a cabinet, shall be screened from view from any place on or off site, by either plant materials or decorative screen, while allowing sufficient access for reading.

SIGNAGE

55. All tract name signage at entry points to the project site shall be subject to the discretion and approval of the Development Services Director.

PARKING

56. Applicant shall construct and maintain at all times a minimum of 577 parking spaces on the combined parcels and a minimum nine (9) foot by nineteen (19) foot dimension per parking space with minimum drive aisle widths of twenty-four (24) feet.

57. Wheel stops/blocks or curbs as wheel stops shall be required for all parking spaces on exterior parking spaces as shown on the Project site plans.

58. All units with a garage shall maintain within the garage the ability to park cars at all times. Garages shall not be converted to any other use.

59. There shall be no business activities or day care conducted within or from the garages.

60. Residents shall not park or store vehicles anywhere on the site except within the designated parking spaces in the garage or driveways for their unit. However, the open parking spaces, located along the private driveways, may be utilized for residents or guest for temporary parking. Any issues arising from the use, application, or restriction of such open parking spaces shall be resolved by the Homeowner's Association.

TRASH

61. Except as required for CC&Rs per Condition 28.j, Applicant shall design the refuse and recycling storage area in accordance with Section 17.16.090 of the Los Alamitos Municipal Code as applicable.

OTHER

62. Each residence shall be utilized as one (1) dwelling unit. No portion of any residence shall be utilized or rented as a separate dwelling unit.

63. The block wall on the south parcel line of the proposed Project that separates the Project from Lampson Avenue shall be 7 feet tall as measured from the exterior of the parcel and painted white.

MITIGATION MOINTORING AND REPORTING PLAN (MMRP)

Project Design Features (PDFs)

64. PDF AQ-1 - The Project will utilize Tier 4 Interim construction equipment during construction activities.

65. PDF B-1 - Pursuant to Figure 3-18, Landscape Plan, the Project will incorporate larger sized box tree species (including the western sycamore and cottonwood trees) that foliage specialist bats prefer and will plant the trees on the fringes of the development, adjacent to open space areas.

66. PDF B-2 - Pursuant to Figure 3-18, Landscape Plan, the Project will plant approximately 441 trees onsite (excluding shrubs and ground cover), including the western sycamore (Platanus racemosa), paperbark melaleuca (Melaleuca quinquenervia), olive (Olive sp.), southern magnolia (Magnolia grandiflora), Crape myrtle (Lagerstroemia indica), Brisbane box (Lophostemon confertus), Australian willow (Geijera parviflora), Italian cypress (Cupressus sempervirens), yew pine (Podocarpus macrophyllus) and other species. No plants listed on the California Invasive Plant Council (Cal-IPC)6 Inventory species will be planted and a list of approved species to planted shall be reviewed by a qualified biologist prior to planting.

67. PDF GHG-1 - The Project will include solar photovoltaic panels with the capability to generate up to 1,229,520 kWh/annually.

68. PDF GHG-2 - The Project will be 100% electric and will not include natural gas.

69. PDF GHG-3 - The Project will provide a community electric vehicle for the affordable housing component for residents to drive short distance trips to the local grocery store.

70. PDF GHG-4 - The Project's affordable apartment parking areas will be designed to provide electric vehicle (EV) charging stations. At minimum, the number of EV charging stations will equal the Tier 2 Residential Voluntary Measures of the California Green Building Standards Code, Section A4.106.8.2.1.

71. PDF HYD-1 - The Project will be built such that the finished floor elevation for the onsite buildings is set 1 foot minimum above the peak 100-year storm event water surface elevation in accordance with Orange County Flood Protection Requirements.

72. PDF N-1 - Prior to the issuance of occupancy permits, the Project will construct a 7-foot-high noise barrier along Lampson Avenue. The noise control barrier will be constructed so that the top of each wall and /or berm combination extends to the planned height above the pad elevation of the lot it is shielding. Since the pad elevations varies, the top of each wall and/or berm combination will be 7' above each applicable pad elevation. When the roadway or terrain is elevated above the pad elevation, the barrier shall extend to the recommended height above the highest point between the residential home and the roadway. The barrier shall be built with a material surface weight of at least 4 pounds per square foot, with no decorative cutouts, perforations, or line-of-sight openings between residences and Lampson Avenue. The noise barrier shall be constructed using the following materials:

    - Masonry block;
    - Stucco veneer over wood framing (or foam core), or 1-inch-thick tongue and groove wood of at least four pounds per square foot;
    - Material with sufficient weight per square foot capable of providing a minimum transmission loss of 20 dBA;
    - Earthen berm; or,
    - Any combination of these construction materials.

73. PDF N-2 - To comply with the State of California and City of Los Alamitos 45 A-weighted Decibels (dBA) Community Noise Equivalent Level (CNEL) interior noise standards for residential land use, the Project will provide the following or equivalent noise abatement measures on building plans:

    - Windows & Glass Doors: At a minimum the Project will provide windows and glass doors that are well-fitted, well-weather-stripped assemblies with minimum sound transmission class (STC) ratings of 27. Additionally, all second-floor facades adjacent to Lampson Avenue and JFTB Los Alamitos will be provided windows and glass doors that are well-fitted, well-weathers-tripped assemblies with minimum sound transmission class (STC) ratings of 29.

- Doors (Non-Glass): All exterior doors shall be well weather-stripped and have Well-sealed perimeter gaps around the doors are essential to achieve the minimum STC rating.
- Walls: At any penetrations of exterior walls by pipes, ducts, or conduits, the space between the wall and pipes, ducts, or conduits shall be caulked or filled with mortar to form an airtight seal.
- Roof: Roof sheathing of wood construction shall be per manufacturer's specification or caulked plywood of at least one-half inch thick. Ceilings shall be per manufacturer's specification or well-sealed gypsum board of at least one-half inch thick. Insulation with at least a rating of R-19 shall be used in the attic space.
- Ventilation: Arrangements for any habitable room shall be such that any exterior door or window can be kept closed when the room is in use and still receive circulated air. A forced air circulation system (e.g. air conditioning) or active ventilation system (e.g. fresh air supply) shall be provided in compliance with applicable State and local Building Codes (e.g. California Building Code, Chapter 3, R338.3).

Mitigation Measures (MMs)

74. MM 4.3-1 - Vegetation clearing should be conducted outside of the nesting season (February 1 through September 15). If avoidance of the nesting season is not feasible, then a qualified biologist shall conduct a pre-construction nesting bird survey within three days prior to any disturbance to the Project site. Site disturbance includes disking, demolition activities, vegetation removal and grading. If active nests are identified, the biologist shall establish appropriate avoidance buffers around the nest (based on the species detected), and the buffer areas shall be avoided until the nests are no longer occupied (through routine nest monitoring by the qualified biologist) and the juvenile birds can survive independently from their nest(s). In addition, if portions of the Project site have not been disturbed within three days after the initial nesting bird survey, additional nesting bird surveys will be conducted (within the nesting bird season, February 1 to September 15) until all portions of the Project site have been disturbed appropriately (as determined by a qualified biologist) as to not provide potential nesting habitat.

75. MM 4.3-2 - If tree removal or ground disturbance occurs during the raptor nesting season (from approximately January 1 to July 31), pre-removal/disturbance surveys shall be conducted. The surveys shall include areas of suitable nesting trees within 300-feet from the limits of disturbance (to the extent that access is available). The survey shall be conducted no more than three days prior to disturbance. Should nesting raptors be detected either onsite or offsite, work would be delayed until fledglings have left the nest and area no longer dependent on the nest at which time, work could proceed.

76. MM 4.3-3 - A qualified biologist shall conduct a pre-construction bat roost survey for roosting bats no more than 14 days prior to site disturbance. The pre-construction bat roost survey will consist of a minimum of two bat surveys (conducted consecutively or as determined by the biologist). If roosting bats are detected onsite outside of the bat maternity season, the roost tree will be removed in a manner to avoid and/or minimize injury to roosting bats. This may include using mechanical equipment to gently nudge the tree trunk multiple times prior to

removal or for palm trees and other species, to de-frond or de-branch the tree using a mechanical lift and gently lower the cut branches to the ground. Regardless of the method, the fallen tree and/or material will be left undisturbed overnight until at least the next morning to give roosting bats time to exit before site disturbance.

If roosting bats are detected onsite during the maternity season, the Project shall avoid the subject roost(s) and incorporate an avoidance buffer (as determined by a qualified biologist) until after the maternity season or until a qualified biologist determines no maternity roosting is occurring. Once the qualified biologist approves removal of the subject roost tree(s), the same tree removal procedures as outlined above shall be implemented prior to tree removal.

77. MM 4.4-1 - Discovery of Inadvertent Resources. Prior to the issuance of any grading permits, the Applicant shall submit proof that a qualified consulting archaeologist meeting the Secretary of Interior's (36 CFR 61) Professional Qualifications Standards has been retained to conduct periodic spot checks during ground disturbing activities. Spot check should occur at initial ground exposure within the project; upon a 50 percent completion milestone of ground disturbance; upon an 80 percent milestone of ground disturbance; or at any other time determined necessary by the consulting archaeologist. If any potentially historic or archaeological resources are encountered during ground-disturbing activities, the archaeologist shall halt construction work within 50 feet of the find and assess the nature of the find for importance.

    a) If the discovery is determined to not be important by the archaeologist (e.g. isolates and clearly non-significant deposits), work will be permitted to continue in the area. If a find is determined to be potentially important by the archaeologist, the Lead Agency shall be notified, and additional investigation would be required. Additional investigation work would include scientific recordation and, depending on the nature of the find, excavation.

    b) At the conclusion of ground disturbing activities, the archaeologist shall draft a report detailing the monitoring process and summarize any additional field study and analysis of resources, should any be discovered. The completed report shall be approved by the Planning Department and the Applicant shall provide verification that the report was submitted to the Lead Agency prior to the issuance of an occupancy permit.

    c) Excavated finds shall be curated at a repository determined by the archaeologist and approved by the City with verification provided to the City prior to the issuance of an occupancy permit.

78. MM 4.4-2 - Discovery of Human Remains. If human burial or skeletal remains are identified during excavation or construction, work in that location shall stop immediately until the find can be properly treated. The construction contractor would be required by law to comply with California Health and Safety Code Section 7050.5 “Disturbance of Human Remains.” The County Coroner must be contacted and if the Coroner recognizes the human remains to be those of a Native American or has reason to believe that they are those of a Native American, the Coroner is required to contact the Native American Heritage Commission (NAHC) by telephone within 24 hours. Once the NAHC receives notification of a discovery of Native American human remains from a county coroner, the NAHC is required to immediately notify those persons it believes to be most likely descended from the deceased Native American. The descendants may, with the permission of the owner of the land, or his or her authorized

representative, inspect the Site of the discovery of the Native American human remains and may recommend to the owner or the person responsible for the excavation work means for treatment or disposition, with appropriate dignity, of the human remains and any associated grave goods. The descendants shall complete their inspection and make recommendations or preferences for treatment within 48 hours of being granted access to the site. According to Public Resources Code Section 5097.94(k), the NAHC is authorized to mediate disputes arising between landowners and known descendants relating to the treatment and disposition of Native American human burials, skeletal remains, and items associated with Native American burials.

79. MM 4.6-1 - Prior to the issuance of grading permits or building permits, the City of Los Alamitos Public Works & Engineering Department shall verify that all of the recommendations provided in Section 4.0 of the Project's December 21, 2021 "Preliminary Geotechnical Evaluation and Design Recommendations for Proposed Single-Family and Multi-Family Residential Development, 4665 Lampson Avenue, Los Alamitos, California," prepared by LGC Geotechnical, Inc. and included as Technical Appendix F1 to the Project's EIR, are incorporated into the Project's grading and building plans and implemented by the construction contractors. These recommendations include but are not limited to a) Site Earthwork Considerations; b) Preliminary Foundation Recommendations; c) Site Grading Recommendations; d) Soil Bearing and Lateral Resistance Considerations; e) Lateral Earth Pressures for Retaining Walls Considerations; f) Nonstructural Concrete Flatwork Recommendations; and g) Preliminary Asphalt Concrete Pavement Design Parameters. Alternatively, the Project shall comply with the findings and recommendations of any geotechnical studies that may be required in association with future grading and/or building permits.

80. MM 4.6-2 - If paleontological resources are discovered during earth disturbance activities, the discovery shall be cordoned off with a 50-foot radius buffer so as to protect the discovery from further potential damage, and an Orange County Certified Professional Paleontologist shall be consulted to assess the discovery.

    If the discovery is determined to be significant by the paleontologist, a monitoring and recovery plan shall be initiated, which will include notification of appropriate personnel involved and monitoring of earth disturbance activities.

    a) Monitoring of mass grading and excavation activities shall be performed by a qualified paleontologist or paleontological monitor. Monitoring will be conducted full-time in areas of grading or excavation in undisturbed sediments of alluvial deposits.

    b) Paleontological monitors will be equipped to salvage fossils as they are unearthed to avoid construction delays. The monitor must be empowered to temporarily halt or divert equipment to allow removal of fossils in a timely manner. Monitoring may be reduced if the potentially fossiliferous units are not present in the subsurface, or, if present, are determined upon exposure and examination by qualified paleontological personnel to have low potential to contain fossil resources. The monitor shall notify the project paleontologist, who will then notify the concerned parties of the discovery.

    c) Paleontological salvage during trenching and boring activities is typically from the generated spoils and does not delay the trenching or drilling activities. Fossils will be

collected and placed in cardboard flats or plastic buckets and identified by field number, collector, and date collected. Notes will be taken on the map location and stratigraphy of the site, which is photographed before it is vacated, and the fossils are removed to a safe place. If the site involves remains from a large terrestrial vertebrate, such as large bone(s) or a mammoth tusk, that is/are too large to be easily removed by a single monitor, a fossil recovery crew shall excavate around the find, encase the find within a plaster and burlap jacket, and remove it after the plaster is set. For large fossils, use of the contractor's construction equipment may be solicited to help remove the jacket to a safe location.

d) Recovered specimens will be prepared to a point of identification and permanent preservation (not display), including screen-washing sediments to recover small invertebrates and vertebrates.

e) Recovered specimens shall be identified and curated of specimens into a professional, accredited public museum repository with a commitment to archival conservation and permanent retrievable storage (e.g., OC Parks). The paleontological program should include a written repository agreement prior to the initiation of monitoring activities. Prior to curation, the lead agency (e.g., the City of Los Alamitos) will be consulted on the repository/museum to receive the fossil material.

f) A final report of findings and significance will be prepared, including lists of all fossils recovered and necessary maps and graphics to accurately record their original location(s). The report, when submitted to, and accepted by, the appropriate lead agency, will signify satisfactory completion of the project program to reduce impacts to any potential nonrenewable paleontological resources (i.e., fossils) that might have been lost or otherwise adversely affected without such a program in place.

81. MM 4.15-1 - Prior to the issuance of certificate of occupancy, the project applicant shall provide documentation that it has implemented the CAPCOA strategies identified below. Verification that the CAPCOA strategies were completed shall be verified by the City's Public Works Director.

    1. Provide pedestrian and bicycle network improvements within the development connecting to existing off-site facilities, as detailed in Section 3.3.2 of this EIR.

    2. Confirm with the OCTA whether providing new or re-routing existing transit services to the site would be feasible, as determined by OCTA pursuant to OCTA's standards.

    3. Install broadband infrastructure or other communication technologies that encourages telecommuting and working from home, which would reduce mobile source emission.

82. MM 4.16-1 - <u>Retain a Native American Monitor Prior to Commencement of Ground-Disturbing Activities</u>.

    1. The project applicant/lead agency shall retain a Native American Monitor from or approved by the Gabrieleño Band of Mission Indians – Kizh Nation. The monitor shall be retained prior to the commencement of any "ground-disturbing activity" for the subject project at all project locations (i.e., both on-site and any off-site locations that are included in the project description/definition and/or required in connection with the project, such as public improvement work). "Ground disturbing activity" shall include, but is not limited to,

demolition, pavement removal, potholing, auguring, grubbing, tree removal, boring, grading, excavation, drilling, and trenching.

2. A copy of the executed monitoring agreement shall be submitted to the lead agency prior to the earlier of the commencement of any ground-disturbing activity, or the issuance of any permit necessary to commence a ground-disturbing activity.

3. The monitor will complete daily monitoring logs that will provide descriptions of the relevant ground-disturbing activities, the type of construction activities performed, locations of ground disturbing activities, soil types, cultural-related materials, and any other facts, conditions, materials, or discoveries of significance to the Tribe. Monitor logs will identify and describe any discovered TCRs, including but not limited to, Native American cultural and historical artifacts, remains, places of significance, etc., (collectively, tribal cultural resources, or "TCR"), as well as any discovered Native American (ancestral) human remains and burial goods. Copies of monitor logs will be provided to the project applicant/lead agency upon written request to the Tribe.

4. On-site tribal monitoring shall conclude upon the latter of the following (1) written confirmation to the Kizh from a designated point of contact for the project applicant/lead agency that all ground-disturbing activities and phases that may involve ground-disturbing activities on the project site or in connection with the project are complete; or (2) a determination and written notification by the Kizh to the project applicant/lead agency that no future, planned construction activity and/or development/construction phase at the project site possesses the potential to impact Kizh TCRs.

5. Upon discovery of any TCRs, all construction activities in the immediate vicinity of the discovery shall cease (i.e., not less than the surrounding 50 feet) and shall not resume until the discovered TCR has been fully assessed by the Kizh monitor and/or Kizh archaeologist. The Kizh will recover and retain all discovered TCRs in the form and/or manner the Tribe deems appropriate, in the Tribe's sole discretion, and for any purpose the Tribe deems appropriate, including for educational, cultural and/or historic purposes.

83. MM 4.16-2 - Unanticipated Discovery of Human Remains and Associated Funerary Object.

1. Native American human remains are defined in PRC 5097.98 (d)(1) as an inhumation or cremation, and in any state of decomposition or skeletal completeness. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to this statute.

2. If Native American human remains and/or grave goods discovered or recognized on the project site, then all construction activities shall immediately cease. Health and Safety Code Section 7050.5 dictates that any discoveries of human skeletal material shall be immediately reported to the County Coroner and all ground-disturbing activities shall immediately halt and shall remain halted until the coroner has determined the nature of the remains. If the coroner recognizes the human remains to be those of a Native American or has reason to believe they are Native American, he or she shall contact, by telephone within 24 hours, the Native American Heritage Commission, and Public Resources Code Section 5097.98 shall be followed.

3. Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2).

4. Construction activities may resume in other parts of the project site at a minimum of 200 feet away from discovered human remains and/or burial goods, if the Kizh determines in its sole discretion that resuming construction activities at that distance is acceptable and provides the project manager express consent of that determination (along with any other mitigation measures the Kizh monitor and/or archaeologist deems necessary). (CEQA Guidelines Section 15064.5(f).)

5. Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods. Any historic archaeological material that is not Native American in origin (non-TCR) shall be curated at a public, non-profit institution with a research interest in the materials, such as the Natural History Museum of Los Angeles County or the Fowler Museum, if such an institution agrees to accept the material. If no institution accepts the archaeological material, it shall be offered to a local school or historical society in the area for educational purposes.

6. Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.

84. MM 4.16-3 - Procedures for Burials and Funerary Remains.

1. As the Most Likely Descendant ("MLD"), the Koo-nas-gna Burial Policy shall be implemented. To the Tribe, the term "human remains" encompasses more than human bones. In ancient as well as historic times, Tribal Traditions included, but were not limited to, the preparation of the soil for burial, the burial of funerary objects with the deceased, and the ceremonial burning of human remains.

2. If the discovery of human remains includes four or more burials, the discovery location shall be treated as a cemetery and a separate treatment plan shall be created.

3. The prepared soil and cremation soils are to be treated in the same manner as bone fragments that remain intact. Associated funerary objects are objects that, as part of the death rite or ceremony of a culture, are reasonably believed to have been placed with individual human remains either at the time of death or later; other items made exclusively for burial purposes or to contain human remains can also be considered as associated funerary objects. Cremations will either be removed in bulk or by means as necessary to ensure complete recovery of all sacred materials.

4. In the case where discovered human remains cannot be fully documented and recovered on the same day, the remains will be covered with muslin cloth and a steel plate that can be moved by heavy equipment placed over the excavation opening to protect the remains. If this type of steel plate is not available, a 24-hour guard should be posted outside of working hours. The Tribe will make every effort to recommend diverting the project and keeping the remains in situ and protected. If the project cannot be diverted, it may be determined that burials will be removed.

5. In the event preservation in place is not possible despite good faith efforts by the Applicant, before ground-disturbing activities may resume on the project site, the landowner shall arrange a designated site location within the footprint of the project for the respectful reburial of the human remains and/or ceremonial objects.

6. Each occurrence of human remains and associated funerary objects will be stored using opaque cloth bags. All human remains, funerary objects, sacred objects and objects of

cultural patrimony will be removed to a secure container on site if possible. These items should be retained and reburied within six months of recovery. The site of reburial/repatriation shall be on the project site but at a location agreed upon between the Tribe and the landowner at a site to be protected in perpetuity. There shall be no publicity regarding any cultural materials recovered.

7. The Tribe will work closely with the project's qualified archaeologist to ensure that the excavation is treated carefully, ethically, and respectfully. If data recovery is approved by the Tribe, documentation shall be prepared and shall include (at a minimum) detailed descriptive notes and sketches. All data recovery data recovery-related forms of documentation shall be approved in advance by the Tribe. If any data recovery is performed, once complete, a final report shall be submitted to the Tribe and the NAHC. The Tribe does NOT authorize any scientific study or the utilization of any invasive and/or destructive diagnostics on human remains.

NPDES

85. Prior to the issuance of any building permits, the Applicant shall submit to the City for review and approval a *Final* Water Quality Management Plan (WQMP) that:

- Addresses Site Design BMPs (Best Management Practices) such as minimizing impervious areas, maximizing permeability, minimizing directly connected impervious areas, creating reduced or "zero discharge" areas, and conserving natural areas.
- Incorporates the applicable Routine Source Control BMPs as defined in the DAMP.
- Incorporates Treatment Control BMPs as defined in the DAMP.
- Generally describes the long-term operation and maintenance requirements for the Treatment Control BMPs.
- Identifies the entity that will be responsible for long-term operation and maintenance of the Treatment Control BMPs.
- Describes the mechanism for funding the long-term operation and maintenance of the Treatment Control BMPs.

86. Prior to issuance of any Grading or Building Permit and as part of the future development's compliance with the NPDES requirements the Applicant shall enroll electronically through the SMARTS program to comply with the State of California General Construction Permit. Proof of enrollment must be submitted to the City of Los Alamitos before issuance of grading or building permits. Also, a Stormwater Pollution Prevention Plan (SWPPP) shall be reviewed and approved by the Director of Public Works and the City Engineer for water quality construction activities on-site. A copy of the SWPPP shall be available and implemented at the construction site at all times. The SWPPP shall outline the source control and/or treatment control BMPs to avoid or mitigate runoff pollutants at the construction site to the "maximum extent practicable".

87. Prior to obtaining grading permits, the Applicant shall submit a Stormwater Pollution Prevention Plan (SWPPP) for review and approval by the Building and Safety Division.

88. Prior to issuance of any Grading Permit, the Director of Public Works and the Building Official shall confirm the Grading Plan specifications stipulate, in compliance with SCAQMD Rule 403, excessive fugitive dust emissions shall be controlled by regular watering or other dust prevention measures as specified in the SCAQMD's Rules and Regulations. In addition, SCAQMD Rule 402, requires implementation of dust suppression techniques to prevent fugitive dust from creating a nuisance off-site. Implementation of the following measures would reduce short-term fugitive dust impacts on nearby sensitive receptors:

    - All active portions of the construction site shall be watered twice daily to prevent excessive amounts of dust;
    - On-site vehicle speed shall be limited to 15 miles per hour;
    - All on-site roads shall be paved as soon as feasible, watered twice daily, or chemically stabilized;
    - Visible dust beyond the property line which emanates from the project shall be prevented to the maximum extent feasible;
    - All material transported off-site shall be either sufficiently watered or securely covered to prevent excessive amounts of dust prior to departing the job site; Track-out devices shall be used at all construction site access points; and
    - All delivery truck tires shall be watered down and/or scraped down prior to departing the job site.

89. All trucks that are to haul excavated or graded material onsite shall comply with State Vehicle Code Section 23114 (Spilling Loads on Highways), with special attention to Sections 23114(b)(F) and (e)(4) as amended, regarding the prevention of such material spilling onto public streets and roads. Prior to the issuance of grading permits, the Applicant shall demonstrate to the City of Los Alamitos how the project operations subject to that specification during hauling activities shall comply with the provisions set forth in Sections 23114(b)(F) and (e)(4).

ORANGE COUNTY FIRE AUTHORITY (OCFA)

90. PR105 - Conditional Use Permit (Conditions of Approval)

    The Applicant or responsible party shall submit the plan(s) listed below to the Orange County Fire Authority for review. Approval shall be obtained on each plan before the event specified.

    1. As previously requested, provide a completed Water Availability Form, signed by a representative of the local water purveyor, showing the results of a recent fire hydrant flow test (within 6 months).
    2. The site plan shall meet minimum requirements per OCFA Guideline B-01.
    3. As previously requested, stated per OCFA Guideline B-01 Fire department access shall be available during the entire trajectory of the project. A phasing plan may be proposed under an AM&M. The plans were reviewed based on a single owner of the property. Per our discussion, the lot will be split and divided among more than one owner. Easement Agreements shall be approved and recorded before Fire Master Approval.

4. Prior to OCFA clearance of a final map or issuance of a precise grading permit or a building permit, if a grading permit is not required:

   * fire master plan (service code PR145)

5. Prior to issuance of a building permit:

   * Architectural (service codes PR200-PR285)

   * underground piping (service code PR470-PR475)

   * fire sprinkler system (service codes PR400-PR465)

6. Prior to concealing interior construction:

   * fire alarm system (service code PR500-PR530)

Temporary/Final Occupancy Inspections:

7. Prior to issuance of a temporary or final certificate of occupancy, all OCFA inspections shall be completed to the satisfaction of the OCFA inspector and be in substantial compliance with codes and standards applicable to the project and commensurate with the type of occupancy (temporary or final) requested. Inspections shall be scheduled at least five days in advance by calling OCFA Inspection Scheduling at 714-573-6150.

91. PR110 - Tentative Tract Map "B" and Fire Master Plan

As previously indicated, the proposed site plans do not meet minimum fire department access. Please see the redlined tentative track map for reference. These design issues will need to be resolved prior to submittal/approval of the B Map and/or f the Fire Master Plan.

a. As previously requested, fire department lanes shall be deciphered on the Track Map by shading the minimum 20' width. See redline item #1.

b. All entry signs shall be per OCFA Guideline B-0, Figure 6-Fire Lane Entrance Signs. See redline item #2.

Figure 6 – Fire Lane Entrance Signs

All portions of the buildings are within 150 feet of the public road as measured along the path of firefighter travel. All starting points for the hose pull shall be at the fire department access road. See redline item #3.

The plans have not been reviewed for Vehicular Gates. Obstructions to Emergency Vehicle Access shall meet minimum requirements per OCFA Guideline B-01Section B1. Reference redline item #4.

Required Fire Department Fire Access Road less than 36 ft. shall require signage on one or both sides of the road. See detail #6.

92. The Applicant shall enter into a Secured Fire Protection Agreement (SFPA) to provide for fair-share funding of capital improvements necessary to establish adequate fire protection facilities and equipment, and/or personnel. The SFPA would ensure that responses times and service ratios are met due to the implementation of the Project and no new fire station facilities would be required.

ENGINEERING / PUBLIC WORKS

93. A City public works encroachment permit shall be obtained for all work in public right-of-way before starting work. All work shall be done in accordance with APWA Standards and to the satisfaction of the City Engineer and must be completed before issuance of Certificate of Occupancy.

94. A bond or surety device shall be posted with the City in an amount and type sufficient to cover the amount of off-site and on-site work to be done, as approved by the City Engineer.

95. Pad certification by the Design Civil Engineer and Soil Engineer is required prior to the commencement of structural construction.

96. The final compaction report prepared by a qualified Soil Engineer shall be submitted to the City Engineer for review and approval before the commencement of structural construction.

97. The Applicant shall submit a Geotechnical Report for review and approval and shall prepared by a licensed Soils Engineer.

98. Prior to the issuance of any building permits, the Applicant shall provide to the City a Final Water Quality Management Plan (WQMP) that:
    - Addresses Site Design BMPs (Best Management Practices) such as minimizing impervious areas, maximizing permeability, minimizing directly connected impervious areas, creating reduced or “zero discharge” areas, and conserving natural areas.
    - Incorporates the applicable Routine Source Control BMPs as defined in the DAMP.
    - Incorporates Treatment Control BMPs as defined in the DAMP.

- Generally describes the long-term operation and maintenance requirements for the Treatment Control BMPs.
- Identifies the entity responsible for long-term operation and maintenance of the Treatment Control BMPs.
- Describes the mechanism for funding the long-term operation and maintenance of the Treatment Control BMPs.

99. The Applicant shall submit Improvement Plans to a Registered Civil Engineer prepared for public works (off-site) and on-site improvements. Plan check fees shall be paid in advance.

100. An on-site grading and drainage plan shall be prepared and submitted to the City Engineer for approval. The plan shall be 24" x 36", with elevations to the nearest 0.01-foot, minimum scale 1" = 20'. Registered Civil Engineers shall prepare a plan. Public works improvements may be shown in this plan. Grading plan check fees must be paid in advance.

101. The Applicant shall submit a Drainage Report that shall contain Hydrologic and hydraulic calculations demonstrating adequate habitable onsite protection for the 100- year storm and street drainage assessing a 10-year return frequency storm (25-year frequency in sump areas) prepared by a Registered Civil Engineer shall be submitted with the Grading Plan. Drainage Report shall be per the Orange County Hydrology Manual and the Orange County Local Drainage Manual as applicable.

102. Proposed Condition Drainage patterns are not to exceed the Existing Condition flow rates and must match the existing outlet locations. No net increase of flows will be allowed to enter Lampson Avenue or any other drainage conveyance without approval from the owner of the drainage facility.

103. The driveway and parking lot slope shall be a minimum slope of one 1.0% for asphalt and 0.5% for concrete.

104. Pursuant to and in accordance with Government Code Section 66020(d)(1), the Project Applicant is hereby notified as follows: The fees, dedications, reservations, and other exactions ("impositions") imposed on this development, and which are subject to notification pursuant to Government Code Section 66020(d)(1) are:

    Traffic Impact Fees: Yes, if you are increasing the total daily trips by 200 trips.

105. Provide a Traffic Impact Analysis for review and approval. Based on the review and approval of this analysis, additional conditions and/or fees may be required. Applicant is required to provide evidence to the Director of Development Services that the Applicant has conferred with the City of Seal Beach regarding the final Traffic Impact Analysis prior to issuance of grading permit.

106. All driveways, sidewalks and ADA Ramps shall meet current ADA requirements, and all offsite improvements are to be done per City Standards.

107. A new 5-foot-wide concrete sidewalk shall be installed to be contained within the entire Los Alamitos right of way.

108. A Sewer Will-Serve letter is required prior to approval of building permits. Applicant must coordinate with the City of Seal Beach and/or the Rossmoor Los Alamitos Sewer District (RLAASD) to secure a connection to the sanitary sewer system provided by either the City of Seal Beach or the Rossmoor/Los Alamitos Sewer District

109. In relation to sewer connections, preliminary plans with the proposed lateral connections must be submitted, at no expense to the City of Los Alamitos, to the City of Seal Beach and/or the Rossmoor Los Alamitos Sewer District (RLAASD) to assess if plan check, inspection, and/or a sewer study is required. Approval of a sewer capacity study is required from the applicable sewer agency prior to issuance of a grading permit.

110. All Project improvements (within the public right of way) shall comply with Los Alamitos and all other applicable standards to ensure all intersection sight distance, pedestrian/bike crossing facilities, and street design requirements are complied with.

111. Prior to importation onsite, the Project Applicant shall submit evidence to the Development Services Director that all imported fill materials have been tested and meet the regulatory screening levels.

Tom Oliver, Associate Planner
City of Los Alamitos Planning Division
3191 Katella Avenue
Los Alamitos, CA 90720

Dear Mr. Oliver,

On behalf of the Los Alamitos Unified School District, I would like to express our sincere appreciation for the continued collaboration between the City Council, the community, and the District in planning projects that support the growth and vitality of our community. We value the coordination and thoughtful dialogue that accompany these developments, which serve to strengthen our city and community.

I am writing today to offer the Los Alamitos Unified School District's support for the 4665 Lampson Avenue residential housing development. As a district committed to providing high-quality education for all students, we recognize that housing plays a critical role in fostering a stable and engaged community. This development will offer additional residential opportunities for families, professionals, and community members, all of whom contribute to the overall well-being of our city and its schools. By increasing access to affordable, safe, and attractive housing, this project will help attract and retain the diverse population essential for sustaining our local schools and businesses.

Over 80% of families in our district have shared that the quality of our schools is a primary reason for moving into this community. We are honored to provide a world-class education to the students and families of Los Alamitos, and we take great pride in maintaining the high standards that draw families to our district. However, like many districts across the state, we have experienced an enrollment decline, with our student population decreasing by nearly 8% over the past eight years. This decline has resulted in available classroom space at each of our campuses, leaving us well-positioned to accommodate any new students from this development. We look forward to welcoming new families to our award-winning district.

The District has taken proactive steps to plan for both current and future enrollment trends. We have engaged a professional demographer to guide us in making informed decisions regarding short- and long-term planning. Based on both internal data and the demographer's projections, our district is expected to

Board of Education: Megan Cutuli • Marlys Davidson • Scott Fayette • Chris Forehan • Diana D. Hill

see further declines in enrollment over the coming years. As such, we are eager to serve new families who choose to live in this community and benefit from the exceptional educational programs we offer.

Furthermore, we are pleased to learn that the 4665 Lampson Avenue Residential Project will prioritize affordable housing for individuals who work within the City of Los Alamitos. This is especially significant for our classified staff members, who may find this development an excellent opportunity to live in the same community they serve.

In conclusion, the Los Alamitos Unified School District fully supports the approval of the 4665 Lampson Avenue Residential Project. We appreciate the opportunity to provide input throughout this process and remain available to address any questions you may have regarding the project and its potential impact on our district.

We look forward to continuing to work in partnership with the city to create a thriving community where families and students can live, learn, and thrive.

Sincerely,

Meg Cutuli

Hello,

My name is Asheena Lee. I am a resident of Parkewood in Los Alamitos. I have a few concerns about the Lampson project.

1. Please consider the dangerous increase in Uturns. We need a no Uturn sign and added lights to prevent mortality and morbidity.

2. Please request that they add more parking. Living in Parkewood I am aware of how quickly parking spaces fill up. We already have a problem with so many parked cars on the road it is often dangerous driving and walking. There are narrow passages with two-way traffic trying to get into a small space due to so many street vehicles. This will only be amplified if the Lampson project does not have appropriate parking. Parking garages or fewer units would help with this.

3. Please consider requiring a public park. We do not have many parks here, and the park we have is in seal beach. With adding so many residents, we will need a safe place for children to play. Parks decrease crime and increase the quality of life. Please consider requiring some of the land for a park for the children.

4. Consider keeping some of the land commercial. There is not much commerce on the street here. It may be a great place to keep a few units that could be used for small restaurants such as coffee shops, bakeries, or restaurants. This would bring further revenue to the city and reinvigorate the community.

Thank you,
Asheena Lee

Subject: housing development at Seal Beach/Lampson

IRONSCALES couldn't recognize this email as this is the first time you received an email from this sender lelisa_b@yahoo.com

Good evening,

As a 20-year resident of Rossmoor, I am concerned with the proposed housing development. My door faces Montecito Road, and I know from firsthand accounts of increased traffic on one of the main roads in Rossmoor. Not only has there been an increase in cars, but post-Covid, there has been a significant increase in electric bikes amongst the teens. And we now share the roads with them!

The housing development is sure to bring more traffic, air, and noise pollution. Increased population density is also correlated with an increase in crimes.

I greatly opposed the proposed developments.

Thank you in advance for your consideration in this matter.

Respectfully,
Lelisa Balderama

Subject: Lampson Park Place Comment

Dear Mr Les Johnson:

Thanks first off to you and your design team for taking the time out to show the communities the plan this past Wednesday night at Ayres Hotel.

I am a CPE resident who resides close to the project as I live in this over 1700 home tract since 1988 with my husband (who are now adults). I know the project is proposed to lay on Los Alamitos property at the old West Ed property. Anyhow since the land behind it is federal property and leased to the City of Seal Beach I think it's valid that you listen to what we have to say as well as anyone living in the city of Los Alamitos because it affects us all. It also will affect Rossmoor, Cypress, and Garden Grove.
My comments are as follows:

1. Arbor Park has always only had one way in and one way out. Looking at the map from Alan the architect it shows that there are a few open walkways right into Arbor Park. This is not allowed legally because I have told it's federal land. It is opened at the main gate near Heather St in the daytime by a Seal Beach official and at night it's always closed by a federal rep. At dusk it's always closed for the night. No one is allowed in Arbor Park per the Army Corp of Engineers I have been told.

2. The parking in Arbor Park has and always will be full as soon as there is soccer or dog park people. This clashes often and that is when there are well over 200 parking spaces that West Ed allowed people to park since a very long time ago. It was always practice to allow it because you can see clearly if you go to Arbor Park how quickly it gets filled. We need better parking at Arbor if this is truly going to be a project that helps communities get on that field at Arbor Park.

3. I think it's fine that there are two parks within the complex that helps the people who will be living there but Arbor Park is where their kids will be playing at most often because it's wide open.

4. Parking spaces that the architect showed me isn't sufficient for the project. Originally in the April 11th conceptual plan it shows 580 spaces and then in the current one they showed us it said 556 spaces. Why? These spaces are still insufficient and as we all know there will be more needed for the apartments. This was proven when there was a fight for LA Fitness to not be next to a complex in Rossmoor. Those condos were originally with one parking space but then that changed when people had two cars. Then they parked the overflow at the shopping center on the other side of the building because they had no other parking. You see what I mean by you need to think about parking within your complex better. Anyhow even if there are parking spaces added that still means there was work to be done to help Arbor Park itself.

5. Concerning the left turn lane at large, main entrance, I can't believe one believes that it's the best way to move the flow of traffic to a lane that at certain points of the day will clog up Lampson. How do you

propose the safety too for that when cars clog the left lane on Lampson? That's not the stagnant lane..it's the passing lane! Since there is no third lane on Lampson this makes it difficult to move approximately 500 cars a day into and out of that complex without causing destruction. Stop lights will also create a cluster btw. This is proven at every stop light we currently have just coming out of our over 1700 home tract.

I have indicated key parts in this letter and I know I will have more questions but for now this is it. Thanks for reading.

Sincerely,

Enea Ostrich

Subject: Lampson Park Place Project Concerns

IRONSCALES couldn't recognize this email as this is the first time you received an email from this sender jefftilson.77@gmail.com

Hi,

My wife, my 3 young kids, and myself are residents of College Park East, Seal Beach and we feel the proposed development on Lampson Ave. has some major concerns that haven't been addressed:

Lack of parking for the proposed community:

Resulting in 250-plus cars parked in our neighborhood every night:
Garage parking is used for storage and not parking
Parking at Arbor Park will be impacted (Dog park/AYSO soccer). Parking will be used by residents during the day.
Vehicles will park all around Heather Park, which will limit parking for visitors.

Impact on Heather Park:

Only 14,000 sq feet of open meeting space with no play structure
Residents will be crossing Lampson Ave. to walk to Heather Park which will be a safety hazard.
Heather park is already overused and in terrible shape.
Impact on tennis courts.

Traffic Safety on Lampson:

Lampson Ave. does not have street parking and a sidewalk on one side of the road.
Vehicles will all have to make right turns when leaving the development, significantly increasing U-turns and cut-through traffic at Heather Dr.
There have been many serious and fatal traffic collisions on Lampson, which will increase.
Limited visibility when residents exit CPE onto Lampson Ave. will cause more collisions.
Lack of visibility for vehicles approaching U-turns at intersections.
There is not enough room to make U-turns at Heather Dr. and Lampson, resulting in 3-point turns.

Other concerns:

Children's safety
Heather Park is the main pick up and drop off stop for the school buses, the increased traffic will create additional hazards when the busses are stopped with red lights flashing
Water runoff (flooding)

Lampson Ave floods easily during storms and additional housing and construction will cause additional flooding
Utilities (internet, electricity, sewer)
CPE already has spotty internet with the Military Base Interference, more users will cause more disruptions and impact service
Police Response
The planned Community is under the City of Los Alamitos, however, Seal Beach will be heavily utilized/impacted for accidents on Lampson or called for additional issues (ie parking or disturbance issues) in CPE
Density of project.
In the affordable housing: 1 bedroom can house 1-3 people
2 bedrooms can house 3-5 people
3 bedrooms can house 4-7 people

Thank you for your consideration and look forward to hearing how these issues may be resolved if the project moves forward.

Jeff Tilson

To whom it may concern,

We have been residents of College Park East since 2002. This letter is to request that you stop the Lampson Project. The project is not taking into consideration many negative environmental effects on our community.

The project will not add anything to our community but will affect the quality of life for our families. Lampson is not designed to take the proposed project. It is a small street that already causes traffic issues. We moved to CPE because of its location, which is not on a main thoroughfare. Moving forward with such a project will create noise pollution and will become unsafe for our children.

Thank you for your consideration.

Regards,

Scott & Maria Melendres

Subject: Lampson Project Comments

Hello everyone,
I am a resident of College Park East (CPE) at 4548 Fir Ave, Seal Beach, and I would like to write you to oppose the project for 4665 Lampson Avenue for the following reasons:

- The new project would increase traffic on Lampson to an unsafe level increasing accidents and injuries. Lampson is already one of the most dangerous streets in Seal Beach / Los Alamitos.
- Vehicles exiting the development are only able to turn right towards Seal Beach Blvd, which will greatly increase the amount of U-turns on Heather Ave. This is extremely dangerous and potentially deadly. Heather park is heavily used by children in CPE, sports teams, and is a major school bus pickup and drop off location. Traffic accidents and children/pedestrians being hit by vehicles will only increase.
- Overflow parking from the development would overflow into CPE, reducing available street parking to CPE residents.
- The construction noise and road closures are also a concern. We have already had to endure the noise pollution and increased construction traffic from the 405 freeway expansion for the last couple of years.
- The proposed project plan is over-crowded. Too many units in a small area, not enough parking in the development, and no parks or play equipment in the development.
- Arbor Park will not have enough parking spots for the hundreds of families who attend AYSO soccer at Arbor Park. AYSO region 159 is an amazing organization who has been in the community for decades and have used Arbor Park for decades as well. The reduction of parking caused by the proposed unit project would jeopardize the success of playing soccer at Arbor Park and will negatively affect the children and families of our community.

I am asking you will take into account the concerns of CPE residents and the detrimental effects this project would have on the quality of life for CPE residents, AYSO region 159, and the children, and not approve the 4665 Lampson Ave development project.
Thank you,

Derek Berger

Hello, good day.

I would like to suggest building a sound wall on the Los Alamitos side of the Lampson Project to help muffle the noise which so many new residents will inevitably generate into the now peaceful neighborhood of Seal Beach College Park.

I would like to suggest not building quite as many new homes, thereby making room for a park in the new development.
It is important.

Lastly I would ask that the developers provide funding for anyone in the Seal Beach College Park area, whose backyard fence borders Lampson, so that those residents may heighten their backyard fences to the maximum height allowable at no cost to the residents themselves.
The developers should also provide funding for air purifiers for those Seal Beach residents, as the air quality will suffer greatly with the influx of so many additional vehicles.

Thank you,
C Reynolds

Good morning. I have listened to many of the comments and agree with them. I also would like to add that the freeway at seal beach Blvd seems to be a dangerous one. I think with the 22 405 and that on off ramp we have most of the accidents of the 405. Can we really add that many more people getting on and off and rush hour. Just something to look at please. Thanks for your consideration. Teresa Werner.

Please consider all the traffic for lampson. We are very much against a large development that this was not zoned for. Seal beach Blvd is already too crowded and this will even cause more problems. Can our schools handle all of this too? Our college park neighborhood doesn't want the traffic it will cause either! I know California is working to provide housing but this high density hurts everyone. We did not pay high housing prices to have this happen to our area. Do we have enough emergency services, parks, libraries, schools? I hope the community is more important than developers making a lot of money. Please consider all of this in your plans. Thank you. Dear Council Members,

I am writing you again to voice my concern for the Proposed Lampson High Density Project. As was voiced last night by multiple residents, there are serious concerns about the negative impacts this project will bring to our community.

When making your decision, please ask yourself the following... if I lived near this proposed high-density project would I want it? How would it affect my family, my safety, and my quality of life? Please put yourself in the position of the existing residents that you represent and consider a No vote on this project. Or, at the very least please reduce the size by half as it is out of character and scale with our already overpopulated community.

Sincerely,
Dara Baddeley

Subject: Stop Lampson Project

Dear Council Members,

I am writing to express my strong opposition to the high density housing development that is being considered to be built on Lampson. This project causes major concerns over the addition of multi-family housing leading to more people, significantly increase traffic congestion, noise, pollution, decrease in safety as well as a reduction in property values of the existing community. Heavy traffic on Lampson is already common during morning rush hour and critical times of the day; with an additional 240 plus high density housing units Lampson could not accommodate traffic from the additional cars. From discussions with my neighbors my opinion is shared by many families who live in our community of College Park East in Seal Beach. This development will negatively impact our neighborhood and quality of life. I urge you to disapprove and stop this plan from moving forward.

Sincerely,
Dara Baddeley

RE: WestEd Development Project

To Whom It May Concern:

My wife and I, who live in College Park East, would like to express our great concern regarding the proposed project at 4665 Lampson Ave. (WestEd). While we support the need for increased housing, the proposed project, as we see it, will significantly increase traffic on Lampson and potentially increase the number of motor vehicle accidents.

As our home backs up to Lampson, we have witnessed numerous accidents on this street, at least three of them fatal. In addition, our block wall was breached when a car lost control sending pieces of block wall right up to the back of our house. At the time, we had small children. This has happened to numerous other residents along Lampson Ave. as well. We believe the expected increase in traffic will only increase the likelihood of additional accidents.

Furthermore, as proposed, the project does not include the ability to turn left upon exiting the proposed site. It is highly likely that many residents will attempt to make a U-turn at the intersection of Lampson and Heather where the accident rate, already high, can be expected to increase significantly.

Additionally, the project as proposed, does not include adequate parking for its residents and their guests. It is expected then that residents and guests will be forced to park somewhere in College Park East where the parking is already crowded.

We believe it is essential to address and remedy these issues so that the new housing doesn't result in increased traffic accidents on Lampson Ave. and street crowding in the adjacent community of College Park East.

Sincerely,

Aaron and Leslie Kern

1.0 INTRODUCTION

In accordance with Section 15088 of the California Environmental Quality Act (CEQA) Guidelines, the City of Los Alamitos, as the Lead Agency, has evaluated the comments received on the Draft Environmental Impact Report (Draft EIR) for the 4665 Lampson Avenue Project (Project) (SCH No. 2022090476) and has prepared written responses to these comments. This document has been prepared in accordance with CEQA and represents the independent judgment of the lead agency.

Public Resources Code Section 21082.1(a) authorizes lead agencies, such as the City of Los Alamitos here, to prepare an EIR either directly by its own staff or under contract with a public or private entity. More specifically, Section 15084(d) of the CEQA Guidelines provides that:

> *The lead agency may choose one of the following arrangements or a combination of them for preparing a draft EIR.*
>
> *(1) Preparing the draft EIR directly with its own staff.*
>
> *(2) Contracting with another entity, public or private, to prepare the draft EIR.*
>
> *(3) Accepting a draft prepared by the applicant, a consultant retained by the applicant, or any other person.*
>
> *(4) Executing a third party contract or memorandum of understanding with the applicant to govern the preparation of a draft EIR by an independent contractor.*
>
> *(5) Using a previously prepared EIR.*

Pursuant to Public Resources Code Section 21082.1 and CEQA Guidelines 15084(e), to the extent a lead agency authorizes a consultant to prepare an EIR, the lead agency shall subject the draft to the agency's own review and analysis. The EIR must reflect the independent judgment of the lead agency, and the lead agency remains responsible for the adequacy and objectivity of the EIR.

This document has been prepared in accordance with CEQA and represents the independent judgment of the lead agency.

According to State CEQA Guidelines Section 15132, the Final EIR shall consist of:

> *(a) The Draft EIR or a revision of the draft;*
>
> *(b) Comments and recommendations received on the Draft EIR either verbatim or in summary;*
>
> *(c) A list of persons, organizations, and public agencies commenting on the Draft EIR;*
>
> *(d) The responses of the Lead Agency to significant environmental points raised in the review and consultation process; and*

(e) Any other information added by the Lead Agency.

The City of Los Alamitos will consider certification of the EIR, adoption of a Mitigation Monitoring and Reporting Program, Findings and Facts, and a Statement of Overriding Considerations as part of the approval process for the Project.

This Final EIR document is organized as follows:

Section 1 provides a brief introduction to this document, a summary of the public review process, and a list of commenters.

Section 2 provides master responses for comments that were made by many commenters on the same issue.

Section 3 provides responses to the public comments received on the Draft EIR during the public review period. Responses are provided in the form of individual responses to comment letters received. Comment letters are followed immediately by the responses to each letter.

Section 4 provides responses to late comment letters received on the Draft EIR after the public review period. Responses are provided in the form of individual responses to comment letters received. Comment letters are followed immediately by the responses to each letter.

Section 5 contains revisions and clarifications to the Draft EIR as a result of the comments received from agencies and interested persons as well as errata to clarify, amplify, or make insignificant modifications to the EIR as authorized under CEQA. This information does not constitute significant new information pursuant to CEQA, and therefore recirculation of the EIR for further review pursuant to CEQA Guidelines Section 15088.5 is not required.

1.1 Public Review Process

In compliance with Section 15201 of the State CEQA Guidelines, the City of Los Alamitos (City) has taken steps to provide opportunities for public participation in the environmental review process. A Notice of Preparation (NOP) was distributed on October 3, 2022 to responsible agencies, local government agencies, and interested parties for a 30-day public review period (from October 3, 2022 to November 2, 2022) in order to solicit responses that would help the City identify the full scope and range of potential environmental concerns associated with the Project so that these issues could be fully examined in this EIR. The NOP was also distributed to the State of California Office of Planning and Research, State Clearinghouse (SCH) for distribution to State agencies. The Project was described; potential environmental effects associated with Project implementation were identified; and agencies and the public were invited to review and comment on the NOP. A copy of the NOP and comments received are included in Appendix A of the Draft EIR. The City received comment letters from eight (8) agencies and organizations and 201 individuals in response to the NOP. Substantive issues raised in response to the NOP and during the Scoping Meeting are summarized in Table 1-1, *Summary of NOP Comments*, and Table 1-2, *Summary of Scoping Meeting Comments* of the Draft EIR.

CEQA requires that a Draft EIR have a review period lasting at least 45 days for projects that have been submitted to the SCH for review (State CEQA Guidelines, Section 15105[a]). The Draft EIR was distributed to various public agencies, organizations, and individuals on April 24, 2024; the EIR was available for public review and comment for a period of 45 days. The review period ended on June 10, 2024. The City used several methods to elicit comments on the Draft EIR. A Notice of Availability (NOA) and the Draft EIR was distributed to the SCH for distribution to State agencies and was posted on the City's website. The NOA was also posted at the Orange County Clerk's office on April 24, 2024. The NOA was mailed to responsible agencies, local government agencies, and interested parties that received the NOP, to individuals who had previously requested the NOA or EIR, and to individuals who provided NOP comments on April 24, 2024. The NOA was also published in the Event News Enterprise which started the week of April 22 through the week of May 6; the NOA and Draft EIR were made available for review, on the City's web site at: https://cityoflosalamitos.org/203/Planning-Commission-Projects.

The Planning Commission held public hearings on September 25, 2024 and October 23, 2024, and City Council, is scheduled to hold a public hearing November 18, 2024 to consider whether to approve the proposed Project and associated actions and whether to certify the Final EIR for the Project.

1.2 LIST OF EIR COMMENTERS

In accordance with Section 15132 of the State CEQA Guidelines, the following includes a list of the agencies, organizations, and individuals that submitted comments on the Draft EIR and indicates the environmental topics raised by each commenter regarding the Draft EIR. The City received a total of 6 comments from agencies and organizations and 74 comments from individuals and interested parties on the Draft EIR during the public review period.

Section 2.0 provides Master Responses in response to environmental topical areas that were raised by several of the commenters. The use of master responses by lead agencies is a well-accepted means of responding to issues frequently raised in comments on a draft EIR. (S. Kostka & M. Zischke, Practice Under the California Environmental Quality Act (rev. 2023) Section 16.9.) Responses to each comment are in Section 3.0. The agency and organization comment letters have been assigned a letter (i.e., A, B, C) and the individual comment letters have been assigned a number (i.e., 1, 2, 3). Each comment within the transmittal is divided into sequential numbered comments (i.e., A-1, A-2, A-3; or 1-1, 1-2, 1-3).

2.0 Master Responses to Comments Received During the Public Review Period

All of the comment letters received by the City have been included and responded to in this Final Environmental Impact Report (Final EIR). Comments that raise significant environmental concerns have been thoroughly addressed. Comments that do not require a response are indicated below and include those that (1) do not address the adequacy or completeness of the Draft EIR (i.e., are outside the scope of CEQA); (2) do not raise significant environmental issues; (3) do not address the Project; or (4) request the incorporation of additional information not relevant to environmental issues.

CEQA Guidelines Section 15204(a) outlines the parameters for public agencies and interested parties to submit comments and the Lead Agency's responsibility for responding to specific comments. Per CEQA Guidelines Section 15204(a), comments should be related to:

> *[T]he sufficiency of the document in identifying and analyzing possible impacts on the environment and ways in which the significant effects of the project might be avoided or mitigated. Comments are most helpful when they suggest additional specific alternatives or mitigation measures that would provide better ways to avoid or mitigate the significant environmental effects. At the same time, reviewers should be aware that the adequacy of an EIR is determined in terms of what is reasonably feasible…CEQA does not require a lead agency to conduct every test or perform all research, study, and experimentation recommended or suggested by commenters. When responding to comments, lead agencies need only respond to significant environmental issues and do not need to provide all information requested by reviewers, as long as a good faith effort at full disclosure is made in the EIR.*

CEQA Guidelines Section 15204(c) further advises that, "[r]eviewers should explain the basis for their comments, and should submit data or references offering facts, reasonable assumptions based on facts, or expert opinion supported by facts in support of the comments. Pursuant to CEQA Guidelines Section 15064, an effect shall not be considered significant in the absence of substantial evidence." Additionally, CEQA Guidelines Section 15204(d) notes that, "[e]ach responsible agency and trustee agency shall focus its comments on environmental information germane to that agency's statutory responsibility;" but, pursuant to CEQA Guidelines Section 15204(e), "[t]his section shall not be used to restrict the ability of reviewers to comment on the general adequacy of a document or of the lead agency to reject comments not focused as recommended by this section [CEQA Guidelines Section 15204]."

Section 15088 of the California Environmental Quality Act (CEQA) Guidelines, Evaluation of and Response to Comments, states:

a) *The lead agency shall evaluate comments on environmental issues received from persons who reviewed the draft EIR and shall prepare a written response. The lead agency shall*

respond to comments raising significant environmental issues received during the noticed comment period and any extensions and may respond to late comments.

b) The lead agency shall provide a written proposed response, either in a printed copy or in an electronic format, to a public agency on comments made by that public agency at least 10 days prior to certifying an environmental impact report.

c) The written response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular, the major environmental issues raised when the Lead Agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted. There must be good faith, reasoned analysis in response. Conclusory statements unsupported by factual information will not suffice. The level of detail contained in the response, however, may correspond to the level of detail provided in the comment (i.e., responses to general comments may be general). A general response may be appropriate when a comment does not contain or specifically refer to readily available information, or does not explain the relevance of evidence submitted with the comment.

d) The response to comments may take the form of a revision to the draft EIR or may be a separate section in the final EIR. Where the response to comments makes important changes in the information contained in the text of the draft EIR, the lead agency should either:

1. *Revise the text in the body of the EIR; or*
2. *Include marginal notes showing that the information is revised in the response to comments.*

As further discussed in Section 5.0 of this document, the Draft EIR revisions and information presented in the responses to comments do not result in any of the conditions set forth in CEQA Guidelines Section 15088.5; therefore, the EIR does not need to be recirculated prior to its certification.

This section presents detailed responses to comments that were made by many commenters on the same environmental issue. The master responses provide a means of giving a broader context to the response than may be possible in individual responses and eliminates unnecessary duplication in the responses In some cases, one or more master responses may be responsive to an individual comment.

2.1 MASTER RESPONSE

2.1.1 TRANSPORTATION AND TRAFFIC CONGESTION

Several commenters raised concerns regarding the Project's traffic increases in areas that are currently congested during peak hours. As discussed in Section 4.15, *Transportation*, of the Draft EIR, pursuant to Senate Bill (SB) 743, changes to the CEQA Guidelines were adopted in December 2018, which

require all lead agencies to adopt Vehicle Miles Travelled (VMT) as the measure for identifying transportation impacts for land use projects under CEQA. This Statewide mandate went into effect July 1, 2020. The issue of congestion is no longer a CEQA issue and for this reason is not addressed in the Draft EIR (refer to Page 4.15-1 of the Draft EIR). With the California Natural Resources Agency's certification and adoption of the changes to the CEQA Guidelines, automobile delay, as measured by "level of service" and other similar metrics, no longer constitute a significant environmental effect under CEQA. (Pub. Resources Code, § 21099, subd. (b)(3)). Transportation analysis under CEQA is now based on VMT rather than impacts to automobile delay-based level of service (LOS) (traffic congestion).

Nonetheless, a Traffic Analysis (TA; *Technical Appendix N1* of the Draft EIR [Updated TA is also included as *Attachment G* to the Final EIR]) was prepared for the Project to evaluate the Project's traffic impacts with respect to congestion, the potential circulation system deficiencies that may result from the development of the proposed Project, and where necessary to recommend improvements to achieve acceptable operations consistent with General Plan level of service goals and policies. This TA was primarily prepared for non-CEQA purposes, although it does provide information (e.g. trip generation) to support the analyses in other technical reports (e.g., air quality, etc.).

A. Non-CEQA Topic for Informational Purposes

Although the Project is located in the City of Los Alamitos, access to the site via Lampson Avenue lies within the City of Seal Beach's jurisdiction. The Project's traffic study has been prepared in accordance with the City of Los Alamitos' requirements and the City of Seal Beach's Transportation Analysis Guidelines (June 2020, referred to as City Guidelines) as the study area intersections lie within the City of Seal Beach. The Project traffic study scoping agreement, provided in Appendix 1.1 of the TA, was provided for review and approval by the cities of Los Alamitos, Seal Beach, and Garden Grove.

Based on consultation with the City of Los Alamitos and the City of Seal Beach, ten study area sections were selected for analysis in the TA, shown in Table 1-1 in the TA. Additionally, a total of nine study area roadway segments were selected for evaluation based on City of Seal Beach's Guidelines which require analysis of any roadway segment where a project contributes 1% or more of the total traffic on the segment. Pursuant to comments received on the Draft EIR and TA from the City of Seal Beach (see Comment Letter D in Section 3.0 of this Final EIR) and the City of Garden Grove (see Comment Letter C in Section 3.0 of this Final EIR), an updated TA was prepared and included as *Attachment G* to this Final EIR.

In the TA, Seal Beach Boulevard & Lampson Avenue was identified as a deficient intersection under Opening Year Cumulative (2026) and under General Plan Buildout traffic conditions. Restriping the number two westbound left turn lane as a shared left-right turn lane would improve the intersection operations to an acceptable LOS D. The Project Applicant's responsibility for the Project's contributions towards the deficient intersection would be addressed by payment of fair share fees to the jurisdiction that would construct the recommended improvement.

Moreover, as discussed in Section 3.0, *Project Description*, of the Draft EIR, according to the City of Seal Beach General Plan, Lampson Avenue is a divided roadway with a raised median and designed to accommodate a maximum of 37,500 daily vehicle trips. The City of Seal Beach's General Plan identifies two roadway segments that generally comprise the portion of Lampson Avenue fronting the Project site: Rose Street to Tulip (east of the Project) and Rose Street to Heather Street (adjacent and West of the Project). The Project is anticipated to generate 1,658 daily trips. At General Plan Buildout with the Project, these two segments of Lampson Avenue would carry between 15,350 and 15,750 daily trips (see *Technical Appendix N1* of the EIR), below the maximum of 37,500 daily trips. Therefore, the Project's anticipated trip generation is well within the capacity of Lampson Avenue even at General Plan Buildout (refer to Page 3-17 of the Draft EIR).

Many commenters also expressed concerns regarding U-turns on Lampson Avenue at Heather Street. As discussed in the Project's Traffic Analysis, there are existing westbound U-turns occurring at the intersection of Heather Street and Lampson Avenue, however, the intersection operates at an acceptable LOS with the inclusion of these existing peak hour U-turns. Additionally, Project traffic is not anticipated to utilize Heather Street for U-turns along Lampson Avenue as all components of the Project would have access to the full access driveway at the primary neighborhood entry on Lampson Avenue for making southbound left turns.

Many commenters also expressed concerns on cut-through traffic into existing neighborhoods. Project traffic would utilize Lampson to access either Seal Beach Boulevard or Valley View to access the regional freeway system. There would be no reason for Project traffic to use roads within the existing neighborhoods to the south since they do not provide direct access or a shorter route to Seal Beach Boulevard or Valley View. The existing surrounding residential neighborhoods do not provide any direct connection to these facilities. Therefore, internal residential streets, including College Park East, are not a desirable alternative route to the regional roadway network. Minimal travel may occur within the adjacent neighborhood to access public parks, since there is an existing park directly adjacent to the Project site.

B. CEQA-Related Topic

As discussed in Section 4.15, *Transportation*, of the Draft EIR, the Project would result in significant VMT impacts with the implementation of Mitigation Measure MM 4.15-1. Even where the TDM measures are implemented to their maximum effectiveness, the Project would still not be able to reduce its VMT impact to a level of less than significant which requires a 31.8% reduction for baseline (2022) conditions and 27.7% for buildout (2045) conditions. Therefore, the Draft EIR identified a significant and unavoidable VMT impact for the Project on a direct and cumulatively considerable basis (refer to Page 4.15-20 of the Draft EIR).

2.1.2 ROADWAY SAFETY ON LAMPSON AVENUE

Many commenters expressed concerns regarding vehicle and pedestrian safety on Lampson Avenue due to the potential for decreased visibility and an increase in traffic. A Safety Evaluation was prepared for the Project (see *Attachment H* of this Final EIR) which analyzed collision data, pedestrian and

bicycle safety, and site access management (e.g. driveway sight distance, driveway spacing, project access and queuing, multimodal conflict points, and pedestrian/bicycle connections). A summary of the main findings are presented below.

Additionally, several comments were made regarding the proposed traffic signal at the primary neighborhood entry on Lampson Avenue. The Project's Traffic Analysis (see *Attachment G* of this Final EIR) evaluated this issue and determined that the primary neighborhood entry is not anticipated to meet peak hour or planning level (daily volume) based traffic signal warrants and no traffic signal at this location is needed or required. However, due to public comments received during the Notice of Preparation and scoping period, the Project initially proposed to install a traffic signal at the primary neighborhood to alleviate neighborhood concerns related to safety. Subsequent public comments received on the Draft EIR during the 45-day public review period expressed concern with installing a traffic signal and after further traffic signal warrant and safety analyses, it was determined that the proposed traffic signal is not warranted (see *Attachment G* of this Final EIR). Therefore, the Project no longer proposes a traffic signal at this entryway. However, to address the public comments expressing concerns related to safety in this area, a Safety Evaluation was prepared for the Project (see *Attachment H* of this Final EIR). Based on the Safety Evaluation and for the reasons summarized below, the Project would not result in a safety impact or substantially increase hazards due to a geometric design feature.

A. Collision

As discussed in the Safety Evaluation (see *Attachment H* of this Final EIR), collision data was gathered by California Highway Patrol (CHP) Statewide Integrated Traffic Records System (SWITRS). The collision data includes 5 years of collision data gathered by CHP staff and members of its allied agencies throughout California (including the City of Los Alamitos). Table 1 of the Safety Evaluation provides a summary of the types of collisions by intersection for eight intersections. Table 2 of the Safety Evaluation provides a summary of the crash rate compared to the statewide average. The results indicated the following:

- **Basswood Street & Lampson Avenue** had a total of 1 reported collision in a 5-year period. The common collision included a sideswipe collision. Sideswipe collisions are commonly caused by failure to yield or impaired/distracted driving. The intersection of Basswood St. & Lampson Av. has a lower crash rate than the state average for similar facilities.

- **Candleberry Avenue & Lampson Avenue** had a total of 1 reported collision in a 5-year period. The common collisions included a broadside collision. Broadside collisions are commonly caused by failure to yield, failure to stop, or impaired/distracted driving. The intersection of Candleberry Av. & Lampson Av. has a lower crash rate than the state average for similar facilities.

- **Rose Street & Lampson Avenue** had a total of 2 reported collisions in a 5-year period. The common collisions included broadside and overturn collisions. Overturned vehicles are commonly caused by unsafe speeds, improper maneuvers, or loss of vehicle control.

The intersection of Rose St. & Lampson Av. has a lower crash rate than the state average for similar facilities.

- **Tulip Street & Lampson Avenue** had a total of 1 reported collision in a 5-year period. The common collision included a broadside collision. The intersection of Tulip St. & Lampson Av. has a lower crash rate than the state average for similar facilities.

- **Valley View St. & Lampson Avenue** had a total of 14 reported collisions in a 5-year period. The common collisions included rear-end and broadside collisions. Rear-end collisions are commonly caused by failure to yield, failure to stop, or impaired/distracted driving. The intersection of Valley View St. & Lampson Av. has a lower crash rate than the state average for similar facilities.

The existing crash rates for the study area intersections are lower than the statewide average crash rates. A Project would have the potential to create an increase in collision rate if it introduced a geometric design feature that did not meet safety standards or incompatible uses (e.g. farm equipment). As demonstrated in the analysis below in Master Response 2.1.2C through 2.1.2E, implementation of Project improvements (within the public right-of-way) per Los Alamitos and Seal Beach standards ensures all that sight distance requirements, pedestrian crossing requirements, and street design requirements are met. Additionally, the Project vehicle mix is consistent with the adjacent land uses, including the residential neighborhood to the south. Therefore, it is not anticipated that the Project will result in a significant change in collision rates or result in an accident rate higher than the statewide average.

B. Bicycle and Pedestrian Facilities

As discussed in Section 4.7, *Transportation*, of the Draft EIR, existing sidewalks are present on both the westbound and eastbound side of Lampson Avenue, adjacent to the Project site. Crosswalks are present at the intersections of Lampson Avenue/Heather Street and Lampson Avenue/Rose Street (refer to Page 4.15-3 of the Draft EIR). Frontage improvements for the Project would include median improvements, sidewalks, driveway modifications needed to accommodate site access, and landscaping improvements as required by City standards (refer to Page 3-4 of the Draft EIR).

As discussed in the Safety Evaluation (*Attachment H* of this Final EIR), there are existing Class II (on-street, striped) bike lanes on the north and south sides of Lampson Avenue from Basswood Street to the east. In addition, there is a Class I bike/pedestrian path on Seal Beach Boulevard north of Lampson Avenue and a Class II bike lane south of Lampson Avenue. The Project would not remove any existing bike/pedestrian paths and would maintain the existing Class II bike lane on Lampson Avenue along its frontage to maintain bicycle safety. The existing sidewalks adjacent to the Project met design standards and the Americans with Disabilities Act (ADA) standards at the time they were constructed.

As stated, the sidewalks along the Project frontage will be improved as part of the Project. Frontage improvements include sidewalks, driveway modifications to accommodate site access, median modifications, and landscaping improvements as required by City standards. The proposed sidewalk

along the Project's frontage on the north side of Lampson Avenue will provide connectivity with proposed sidewalks and paths internal to the Project.

The intersections at Lampson Avenue at Heather Avenue and Lampson Avenue at Rose Avenue are currently signalized and both have pedestrian crosswalks for Lampson Avenue. The wheelchair ramp on the north side of Lampson Avenue at Heather Avenue does not meet current ADA standards. However, the wheelchair ramp on the north side of Lampson Avenue at Rose Avenue does meet ADA standard requirements.

All Project driveways will be designed to meet current City standards and accommodate pedestrian crossing per current ADA standards. These improvements will ensure the Project meets all compliance requirements.

C. Intersection Sight Distance

Intersection sight distance at the primary neighborhood entry was evaluated by identifying limited use areas pursuant to Orange County Standard Plan 1117 – Intersection Sight Distance. The limited use areas determine the necessary sight distance to allow 7 ½ seconds for the driver on the crossroad (or left turn pocket) to safely cross the main roadway or turn left while the approach vehicle travels at the assumed design speed of the main roadway. All Project driveways are required to meet these sight distance requirements. Exhibit 3 of the Safety Evaluation shows that the primary neighborhood entry will meet the sight distance requirements, and that the Project would not create any new sight distance issues or contribute to decreased visibility along Lampson Avenue.

D. Stopping Sight Distance

According to the Highway Design Manual (HDM), stopping sight distance is the minimum sight distance for a given design speed to be provided on multilane highways and on 2-lane roads when passing sight distance is not economically obtainable. Stopping sight distance also is to be provided for all users, including motorists and bicyclists, at all elements of interchanges and intersections at grade, including private road connections. Lampson Avenue has a posted speed limit of 45 miles per hour (mph). As stated in HDM Table 201, a stopping sight distance of 360 feet is the standard for a design speed of 45 mph. Therefore, the Project does not introduce any new stopping sight distance issues to Lampson Avenue.

E. On-Site Vehicle Circulation

The Project does not involve freight operations because the Project is a residential project. Since the proposed use is residential, a limited number of trucks would travel to the Project site (e.g. trash trucks, emergency vehicles, delivery vans). Therefore, congestion from freight trucks to and from the Project site would be negligible and there will be no conflicts between freight trucks and passenger vehicles.

Attachment D of the Safety Evaluation identifies the on-site circulation for the site. The exhibits identify various vehicle paths (front-loading garbage trucks, fire trucks, delivery trucks, etc.) for various internal drive aisles, which allow for two-way traffic. Access to and from the site will be

accommodated via driveways on Lampson Avenue. As shown in Attachment D of the Safety Evaluation, the vehicle turning templates show acceptable turning movements for the various vehicles and trucks anticipated to access the site. Therefore, there will be no conflicts between garbage trucks, fire trucks, and delivery trucks and passenger vehicles.

F. Conclusion

A review of available collision data indicates that the study area intersections have lower crash rates than the statewide average of intersections with similar configuration and settings. The addition of Project traffic is not anticipated to increase the crash rates by a significant margin. As discussed throughout this evaluation, the implementation of Project improvements (within the public right of way) per Los Alamitos, Seal Beach, Orange County Public Works, Highway Design Manual (HDM), and American with Disabilities Act (ADA) standards ensures all sight distance requirements, pedestrian crossing requirements, and street design requirements are met. Additionally, the Project TA, *Attachment G* of the Final EIR, indicates the highest peak hour volume along Lampson Avenue at Driveway 2 is 561 vehicles (Refer to Exhibit 3-8 of the TA). The highest Project peak hour volume of 50 vehicles occurs at Driveway 2 in the evening (Refer to Exhibit 4-2 of the TA). The Project contributes 9% of the additional vehicles to the evening peak hour ([50/561]*100=9%). Therefore, the addition of Project-related traffic is not anticipated to cause any new or exacerbate any existing safety deficiencies along Lampson Avenue or in the vicinity of the Project's interface with Lampson Avenue. The City will impose upon the Project a condition of approval that will ensure that the intersection sight distance, pedestrian/bike facilities, and street facilities satisfy CA MUTCD, ADA, City of Los Alamitos, and City of Seal Beach standards.

2.1.3 PARKING

As of 2010, the CEQA Guidelines Appendix G, no longer requires an evaluation of parking for a project. This elimination of the requirement to analyze parking was in response to case law holding that the inconvenience resulting from a parking shortage is a social impact; pursuant to these cases, a parking shortage is not an environmental impact necessary for analysis under CEQA unless secondary indirect environmental impacts may result from any such parking shortage as indirect environmental impacts. Moreover, a condition of approval has been included which requires the parking garages onsite be used for primarily parking purposes. Nevertheless, due to previous comments received during the NOP period related to concerns about parking, two technical studies were prepared for the Project and incorporated into the Draft EIR to analyze the Project's onsite parking supply (*Technical Appendix P* of the Draft EIR) and potential parking impacts to nearby parks (*Technical Appendix Q* of the Draft EIR). A summary of the findings from these technical studies is further discussed below.

A. Arbor Park/Arbor Dog Park Parking

Many commenters expressed concerns regarding parking for Arbor Park and Arbor Dog Park. As discussed in Section 4.15, *Transportation*, of the Draft EIR, Walker Consultants prepared an analysis to evaluate the parking need at Arbor Park and Arbor Dog Park, including American Youth Soccer Organization (AYSO) Region 159 uses at Arbor Park for soccer practices on weeknights and soccer

games on weekends (see *Technical Appendix Q* of the Draft EIR). AYSO parking demand is highest during Saturday soccer games with a parking demand that fluctuates between 97 to 339 spaces between the hours of 8:00 AM and 2:00PM and a peak parking demand of 339 spaces at noon. AYSO currently uses parking spaces on the Project site on an informal basis (i.e., the owner of the Project site does not have a formal arrangement with AYSO) for soccer games, many of which would not be available upon Project implementation.

Walker was engaged to evaluate options to assist AYSO in resolving its parking needs following Project buildout. Two options were considered: 1) a voluntary commitment by the Project to provide a 10-foot strip of land along the north boundary of the Project site, or 2) a voluntary commitment by the Project to provide a 10-foot strip of land in addition to improvements 2'-10" to 4'- 3" in width on the north side of the Arbor Park parking lot (see Figures 1 and 4 *of Technical Appendix Q* of the Draft EIR for the proposed parking layouts). The Project's voluntary commitment to either of these options would allow for up to 154 or 200 parking spaces for users of Arbor Park, respectively.

Following implementation of these options, if an inadequate amount of parking still remained to accommodate an AYSO soccer game event, vehicles would have the option of dropping off players/visitors at the park and/or seeking available parking off-site and walking to the park. Ultimately, Walker concludes that to resolve any parking shortages related to these soccer events, the AYSO could re-program its event schedule to ensure that these events are distributed throughout the day in such a way as to accommodate simultaneous arrivals of attendees for these events. Additionally, any change in vehicle trip distance over time would be negligible, as it would only occur on Saturdays during soccer season,[1] which typically lasts from 8AM to 2PM. Moreover, attendees in vehicles would arrive at certain appointed times to watch or participate in these events, and therefore these vehicles are not expected to circle or idle in the parking lot to wait until a parking space became available.

The potential for parking in adjacent neighborhoods would not cause any indirect environmental impacts. Attendees for these events who are unable to find parking even with these additional parking spaces voluntarily provided by the Project could search for parking elsewhere, such as the nearby College Park East or West Garden Grove neighborhoods. The final destination for these attendees and the number of attendees seeking parking elsewhere is unknown given the potential for existing or future parking regulatory controls (e.g. neighborhood permitted parking) in these neighborhoods, the possibility that AYSO may ultimately re-program its event schedule, and the inherent variations in the number of attendees and participants from season to season.

Nonetheless, the need for attendees to seek parking in nearby neighborhoods would not constitute additional new vehicle trips or vehicle miles traveled attributable to the Project because soccer events

[1] *Parking demand is low on weeknights for AYSO practices. As documented in Technical Appendix Q of the Draft EIR: "On the weekday, parking demand related to the AYSO leagues was low and could have been entirely accommodated within the existing gravel parking area, if needed. Over the course of the observations, a small number of soccer-related parking occurred in the 4665 Lampson parking lot.*

at Arbor Park are not an element of the Project. Additionally, any change in vehicle trip distance over time would be negligible, as it would only occur on Saturdays during soccer season, which typically lasts from 8AM to 2PM. Moreover, attendees in vehicles would arrive at certain appointed times to watch or participate in these events, and therefore these vehicles are not expected to circle or idle in the parking lot to wait until a parking space became available. As such, vehicles unable to find adequate parking would not result in any significant transportation impacts related to congestion at the site (which is a level of service concept no longer considered a significant impact under CEQA in any event) or air quality impacts related to emissions (refer to Pages 4.15-15 through 4.15-16 of the Draft EIR).

B. On-site Parking

Many commenters expressed concerns regarding the lack of proposed onsite parking and the potential for overflow parking from the Project to nearby streets and Arbor Park. As discussed in Section 3.0, *Project Description*, of the Draft EIR, the Project would provide 577 parking spaces (475 spaces for the single family detached and townhomes and 102 for the apartments). These 577 spaces exceed the 441~~0~~ parking spaces that would be required pursuant to the State's Density Bonus Law (refer to Page 3-4 of the Draft EIR).

As part of the Project, Walker Consultants prepared a parking analysis (*Technical Appendix P* of the Draft EIR) to determine the appropriate amount of parking needed for the Project. Based on the City's off-street parking requirements in the Municipal Code, the Project would be required to provide 679 parking spaces. The Project qualifies for a density bonus and parking concessions under the State Density Bonus Law (Government Code Section 65915) which would reduce the Project's minimum off-street parking requirement to 441 parking spaces. The Project is proposing to provide 577 parking spaces, approximately 15% fewer than City code requirements, but 30.8% above what is required under Government Code Section 65915(p).

Therefore, the Project would provide more than adequate parking based on nationally recognized Urban Land Institute/National Parking Association Standards for market-rate residential development and would meet the minimum parking requirements of the City of Seal Beach, the adjacent jurisdiction.

Based on the analysis conducted in the parking analysis, the Project's proposed parking supply is appropriate to serve the potential parking needs of the Project. As a result, Project residents would have adequate parking on-site and would not park on streets in the adjacent neighborhood or Arbor Park. Moreover, a condition of approval would be included which requires the parking garages onsite be used for primarily parking purposes.

2.1.4 HYDROLOGY AND WASTEWATER INFRASTRUCTURE ANALYSIS

A number of residents expressed concern that the Project would exacerbate flooding conditions in College Park East and stated that the Project would add additional flows down Lampson to Ironwood and Hazelnut Avenues. A Hydrology Study (*Technical Appendix I3* of the Draft EIR) was prepared for

the Project, which demonstrated that the Project's peak hour flows would not exceed the existing condition flows.

Based on comments received from the City of Seal Beach (Comment Letter D, herein), the Hydrology Study was updated and included as *Attachment E* of this Final EIR. The updated analysis expanded the hydrologic analysis and street capacity analysis for the Lampson Avenue downstream tributary area to the existing sump catch basin within Lampson Avenue. The peak flow rates were reduced based on the detention routing analysis and incorporation of the storm water sump pump system onsite which controls the outflow, mitigating the peak flow discharge rate. The updated analysis resulted in the following changes to the Draft EIR.

1. Pages 3-9, 3-10 of the Draft EIR are revised as follows:

D. Stormwater Drainage Infrastructure

1. Preferred Stormwater Drainage

The proposed Project site's stormwater runoff would be conveyed by roof downspouts or street surface flow to the proposed gutters and collected by thru-curb inlet bio-filtration devices or catch basin inlets for water quality treatment. The bio-filtration devices include internal overflow bypass that direct flows via on-site underground storm drain system to an underground detention system located under parking areas at the southwest portion of the Project site. From the detention system, a stormwater sump pump located in the southwest corner of the Project site would outlet flow into the existing 18" outlet storm drain pipe at the southwest corner of the site, which conveys stormwater runoff to ~~match the historical flow pattern across~~ the Los Alamitos Joint Forces Training Base (JFTB) property directly west of the site. The detention system and pump will be sized so that the outlet flows from the developed site will be equal to, or less than, existing conditions for all storm events. In the event the stormwater pump fails or the outlet pipe becomes clogged, the emergency overflow for the site will be conveyed through a parkway drain discharging flow onto Lampson Avenue, matching historical overflow drainage patterns.

2. Alternate Stormwater Drainage

An alternate plan for stormwater conveyance is proposed in the event the preferred route (historical flow) across the JFTB, as described above, is not available. The alternate would include stormwater outflow onto Lampson Avenue, which would subsequently flow west to an existing stormwater catch basin approximately 2,200 feet west of the Project site. Due to existing flooding concerns on Lampson Avenue, the onsite pump system would allow for low flows to enter Lampson Avenue up until the time that the flows begin to exceed the allowed 25-year storm event in Lampson Avenue. At that point, peak flows would be detained onsite. Once the flows are no longer above the allowed 25-year storm event in Lampson Avenue, onsite flows to Lampson Avenue would resume. Under the Alternate Off-Site Storm Drain plan, stormwater will be detained and mitigated onsite such that Lampson Avenue meets OC

Hydrology flooding standards. Approximately 33,106 ~~32,300~~ cf of water would need to be detained onsite to ensure that offsite 25-year flows are not exceeded. Detained volumes would be discharged from the site via a pump system at flow rates that do not exceed the existing condition flow rates.

2. Pages 4.9-17 and 4.9-19 are hereby modified as follows to reflect the changes made in the updated Hydrology Study.

1. Storm Drain Facilities – Preferred Route

The preferred treatment of stormwater runoff for the Project would be conveyance by roof downspouts or street surface flow to proposed gutters and collected by thru-curb inlet bio-filtration devices or catch basin inlets for water quality treatment. The bio-filtration devices include internal overflow bypass that direct flows via onsite underground storm drain system to an underground detention system located under parking areas at the southwest portion of the site. From the detention system, a stormwater sump pump located in the southwest corner of the site will outlet flows into the existing 18" storm drain pipe at the southwest corner of the site to outlet to the JFTB. The detention system and pump will be sized so that the outlet flows from the developed site will be equal to, or less than, existing flows. In the event the stormwater pump fails or the outlet pipe becomes clogged, the emergency overflow for the site will flow onto Lampson Avenue matching historical overflow drainage patterns.

The combined, total 100-year peak flow rate for the Project site is 31.51~~40.28~~ cfs under existing conditions. The combined, total 100-year peak flow rate for the Project Site is approximately 42.15~~44.31~~ cfs under the proposed conditions without improvements. Figure 4.9-4, *Proposed Conditions Hydrology Map* illustrates the post development drainage conditions of the Project site. The proposed drainage design would follow the existing drainage pattern with surface flows to on-site drainage facilities that would ultimately outlet into the existing storm drain pipe at the southwest corner of the Project site. The results from the hydrology study demonstrate that the proposed conditions of the Project site of 42.15~~44.31~~ cfs would generate a higher peak runoff flowrate than the existing condition of the site of 31.51~~40.28~~ cfs.

Due to increased peak runoff flows created from the proposed change in land use and increased impervious coverage by 48%, stormwater would need to be detained and minimized ~~mitigated~~ on-site to match existing conditions. ~~By matching the maximum flows conveyed by the outlet pipe and providing a 20 percent factor for safety for preliminary sizing, approximately 10,000 cubic feet (cf) would be required to be detained on-site based on a conservative 100-year storm event.~~ To prevent overflow into Lampson Ave, the detention system will be sized to match the maximum flows conveyed by the outlet pipe, approximately 33,106 cubic feet. In addition, a proposed stormwater pump system with upstream detention storage has been incorporated into the onsite drainage design to provide onsite peak flow and volume detention for the development for all storm events. The pump system will control the outflow discharge rate matching the existing 2-year peak flow at approximately 8.9 cfs. As such, the proposed on-site

detention facilities will be designed to detain ~~a minimum volume of 10,000 cf and detained~~ volumes that would be discharged from the site via a pump system at flow rates that do not exceed the existing condition flow rates. As such, downstream facilities would not be hydrologically impacted by the proposed Project. Impacts would be less than significant and no mitigation is required.

2. Alternate Drain Facilities

In the event the preferred route (historical flow across the JFTB) is not available, an alternate treatment of stormwater runoff for the Project would be conveyance to offsite storm drain facilities. Figure 4.9-5, *Proposed Alternate Conditions Hydrology Map* illustrates the post-development drainage conditions for this drainage and detention alternate. The proposed site's stormwater runoff would be conveyed by roof downspouts or street surface flow to proposed gutters and collected by thru-curb inlet bio-filtration devices or catch basin inlets for water quality treatment. The bio-filtration devices include internal overflow bypass that direct flows via on-site underground storm drain system to an underground detention system located under parking areas at the southwest portion of the site. From the detention system, a stormwater sump pump located in the southwest corner of the site will outlet flows onto Lampson Avenue via a parkway culvert. Due to existing flooding concerns on Lampson Avenue, the onsite pump system would allow for low flows to enter Lampson Avenue up until the time that the flows begin to exceed the pre-development ~~allowed~~ 25-year storm event in Lampson Avenue. At that point, peak flows would be detained onsite. Once the flows are no longer above the pre-development ~~allowed~~ 25-year storm event in Lampson Avenue, onsite flows would continue pumping to Lampson Avenue normally.

Under the Alternate Storm Drain plan, stormwater will need to be detained and minimized ~~mitigated~~ onsite such that Lampson Avenue meets OC Hydrology flooding standards. Onsite and offsite small unit hydrographs were analyzed using AES Rational Method Analysis to identify the time that the flows exceed the allowed offsite 25-year storm event flows to prevent flooding of one travel lane of the half-street per the OC Local Drainage Manual. Approximately 33,106 ~~32,300~~ cf of water would need to be detained onsite to ensure that offsite 25-year flows are not exceeded. By matching the maximum flows and providing an additional 20 percent factor of safety for preliminary sizing, approximately 38,800 cf of water would be detained onsite. Detained volumes would be discharged from the site via a pump system at flow rates that do not exceed the existing condition flow rates. Downstream facilities would not be hydrologically impacted by the proposed improvements. Additionally, the proposed finished floor elevations for the onsite buildings would be set 1-foot minimum above the 100-year storm event water surface elevation in accordance with Orange County Flood Protection Requirements.

3. Page 4.9-21 of the Draft EIR is hereby modified as follows to reflect the changes made in the updated Hydrology Study.

3. Outlet Runoff to Arbor Park to North: Arbor Park is within the JFTB and drains south to the same earthen channel outlet as the project site. If the proposed flows from the Project are not allowed to outlet to the JFTB at the southwest corner of the site, proposed flows from the Project would not be allowed to outlet to the JFTB to the north of the site either since they are essentially the same outlet location. In addition, the existing site does not flow in the northerly Arbor Park/ JFTB area as the site drains in the southwesterly direction, therefore directing stormwater runoff to the north would change the historic drainage pattern which can potentially cause downstream flooding.

4. Outlet Runoff to Golf Course to East: The golf course to the east is within the JFTB and drains east, ultimately ~~outletting~~ to the Bolsa Chica Channel. ~~Outletting~~Discharging to the east does not match the historical drainage pattern and the Bolsa Chica Channel was not designed to accommodate flows from the Project site; therefore, runoff to the golf course to the east would potentially cause downstream flooding. In addition, the golf course and Bolsa Chica Channel are upstream from the site, therefore, this option would not be feasible due to elevation differences.

5. Construct storm drain pipe under Lampson Avenue to east: ~~Outletting~~Discharging to the east does not match the historical drainage pattern and the Bolsa Chica Channel was not designed to accommodate flows from the site. Additionally, installation of underground storm drain pipe within Lampson Avenue is infeasible due to conflicts with existing utilities, maintenance concerns, and head losses as described above (see #1). Similarly to item #4, changing the historical drainage pattern may potentially cause unforeseen drainage impacts.

4. Page 4.9-23 of the Draft EIR is hereby modified as follows to reflect the changes made in the updated Hydrology Study.

1. On-Site Drain Facilities

The results from the hydrology report demonstrate that the proposed drainage conditions would generate a higher peak runoff flowrate than the existing conditions on the Project site due to an increase in impervious area and change in land use. The preferred detention facilities would be designed to detain the increased peak flow between the existing outlet pipe flows and proposed conditions. Detained volumes would be discharged from the site via a pump system at flow rates that do not exceed the existing condition flow rates. Downstream facilities would not be hydrologically impacted by the proposed Project site improvements (C&V, 2024a).

2. Alternative Storm Drain Facilities

A second hydrology report was prepared for the alternate stormwater conveyance plan. The results from the report demonstrated that the proposed condition of the alternate would generate a ~~10 percent (44.31 cfs proposed/40.28 cfs existing)~~ higher 100-year storm event peak runoff flowrate than the existing condition of the site due to an increase in impervious area and change

in land use. The proposed underground detention facilities would be designed to detain the increased flows under the proposed conditions, which would be discharged from the site via a pump station at flow rates that would not exceed the existing condition flow rates. Downstream facilities would not be hydrologically impacted by the proposed Project site improvements. ~~(C&V, 2023)~~ (C&V, 2024a).

2.1.5 FLOODING

Many commenters expressed flooding and storm drainage concerns on Lampson Avenue and impacts to College Park East. As shown in Figure 4.9-3, *Existing Flood Hazard Zone*, according to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) No. 06059C0116J (effective 12/03/2009), the Project site is located within FEMA Flood Zone D. Flood Zone D is correlated with a possible risk of flooding, but the probability has not been determined. It may be noted that the area south of the Project site, including adjacent Lampson Avenue, is located within FEMA Flood Zone X (areas determined to be outside the 0.2% annual chance floodplain) according to the FEMA FIRM No. 06059C0118J (effective 12/03/2009). According to the Hydrology Report for the proposed storm drain facilities, during a peak 100-year storm event, stormwater flows would be detained within the on-site underground detention basin. Detained volumes will be discharged from the site via a pump system at flow rates that do not exceed the existing condition flow rates. Additionally, the Project's proposed finished floor elevations would be set at least 1 foot above the peak 100-year storm event water surface elevation in accordance with Orange County Flood Protection requirements.

Similarly, according to the Hydrology Report for the alternate stormwater conveyance plan, during a peak 100- year storm event, stormwater flows would be detained with the proposed detention facilities. Detained volumes would be discharged from the site via a pump system at flow rates that do not exceed the existing condition flow rates. Downstream facilities would not be hydrologically impacted by the proposed improvements. Additionally, proposed floor elevations for the onsite buildings would be set at least 1 foot above the peak 100-year storm event water surface elevation in accordance with Orange County Flood Protection requirements (refer to Page 4.9-24 of the Draft EIR).

As discussed in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff. The Project's preferred storm drain system and alternate storm drain system would be sized and designed in accordance with the City's drainage requirements and Orange County Hydrology Manual to ensure that off-site flows are conveyed through the Project site and flows originating off-site are discharged from the site at a volume and rate that can be accommodated by existing and planned downstream storm drain facilities. Additionally, the Project's storm drainage infrastructure would adequately detain 100-year flows, discharge detained flows at rate that do not exceed existing flows, and the Project's finish floor elevations would be at least 1 foot above the water surface elevation. Accordingly, the Project is not

anticipated to risk the release of pollutants due to project inundation. Impacts would be less than significant and no mitigation is required (refer to Pages 4.9-23 through 4.9-25 of the Draft EIR).

Cumulative development such as Old Ranch Country Club Specific Plan development would be required to comply with federal, State, and local regulations and applicable regional and local master drainage plans in order to mitigate flood hazards both on- and off-site. Compliance with federal, State, and local regulations and applicable drainage plans would require development sites to be protected from flooding during peak storm events (i.e., 100-year storm) and also would not allow development projects to expose downstream properties to increased flooding risks during peak storm events. In addition, future development proposals within the San Gabriel-Coyote Creek Watershed would be required to prepare hydrologic and hydraulic calculations, subject to review and approval by the responsible City Engineer, to demonstrate that substantial on- and/or off-site flood hazards would not occur. Accordingly, the construction and operation of the Project would not contribute to cumulatively considerable flooding impacts (refer to Pages 4.9-27 of the Draft EIR).

2.1.6 SEWER

Many commenters expressed concerns with the increase in wastewater to the existing system and the old age of the infrastructure.

As discussed in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, the existing sewer mains of three manholes (Basswood and Aster Street [Manhole A-16]; Candleberry Avenue and Aster Street [Manhole A-21]; and Elder Avenue [Manhole A-25]) were analyzed. Flow monitoring was conducted under the existing conditions of the three manholes. The existing Project site peak flow was subtracted from the projected Project site flow. The delta flow was then added to the existing monitored peak flows to obtain the proposed development conditions. The results from the Sanitary Sewer Analysis (refer to *Technical Appendix O* of the Draft EIR) demonstrate that the proposed flows, in addition to the observed flows, create a proposed depth of flow that would not impact the existing surrounding sanitary sewer systems. Based on sewer monitoring data collected in preparation of the Sanitary Sewer Analysis, the sewer systems in all three locations indicated good flow, along with hydraulics and relatively low depths. Wastewater volumes produced by the proposed development would not exceed the existing sewer capacity in the public system, and the existing sewer system has adequate capacity for the proposed development. Accordingly, impacts would be less than significant, and no mitigation is required (refer to Pages 4.17-17 to 4.17-19).

Many commenters also expressed concerns regarding the increase in cost for utility infrastructure improvements that may be needed due to the increase in capacity to existing systems and aging infrastructure. The Project is subject to connection and service fees to offset increased demand and assist in facility expansion and service (at the time of need). Additionally, the Project Applicant would be required to pay development impact fees which will be used for any future needed improvements on the infrastructure systems.

2.1.7 EMERGENCY VEHICLE ACCESS

Several commenters raised concerns regarding potential impacts to emergency access and evacuations.

In the event of an evacuation in the nearby area, Lampson Avenue has adequate capacity to handle vehicle evacuations. As described above, Lampson Avenue is a divided roadway with a raised median and designed to accommodate a maximum of 37,500 daily vehicle trips. The City of Seal Beach's General Plan identifies two roadway segments that generally comprise the portion of Lampson Avenue fronting the Project site: Rose Street to Tulip (east of the Project) and Rose Street to Heather Street (adjacent and West of the Project). At General Plan Buildout with the Project, these two segments of Lampson Avenue would carry between 15,350 and 15,750 daily trips (see *Technical Appendix N1* of the EIR), below the maximum of 37,500 daily trips. Therefore, the Project's anticipated trip generation is well within the capacity of Lampson Avenue even at General Plan Buildout (refer to Page 3-17 of the Draft EIR). Additionally, in the event of an evacuation, traffic would be controlled by local law enforcement and vehicles would be directed away from the area.

As discussed in Section 4.15, *Transportation*, of the Draft EIR, the Project would provide adequate emergency access for emergency vehicles via Lampson Avenue. A restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site. The Project also includes a fire master plan (see *Attachment J* of this Final EIR) to ensure proper installation and maintenance of fire access roadways, proper siting of hydrants, adequate water supply, and access to the structures. The Project would be required to comply with all applicable fire codes and ordinances for construction, access, water mains, fire flows, and fire hydrants.

The effectiveness of emergency response and firefighting operations is directly related to the proper installation and maintenance of fire access roadways, the proper sitting of hydrants, adequate water supply, and access to structures. In accordance with OCFA Guideline B-09, Fire Master Plans for Commercial & Residential Development, Firesafe Planning Solutions prepared a Fire Master Plan for the Project (see Figure 4.8-3, *Fire Master Plan*, of the Draft EIR). The Fire Master Plan demonstrates the Project's compliance with the California Fire and Building Codes and other regulations regarding emergency access to the Project site, including but not limited to required fire access and roadway design, fire lane identification, and access to structures. Compliance with OCFA Guidelines ensures that the Project is designed and constructed to provide adequate emergency access for emergency vehicles.

Furthermore, the Project would be required to comply with all applicable fire code and ordinances for construction, access, water mains, fire flows, and fire hydrants. For example, site plans would be submitted to OCFA to ensure compliance with OCFA standard conditions, including fire flow requirements based upon the tenant type, building size, and building type. Access to and around structures would meet OCFA and CFC requirements. Additionally, pursuant to LAMC Section 12.08, the Project would be required to provide adequate emergency access along abutting roadways during temporary construction activities within the public right-of-way. Specifically, the Project's compliance with LAMC 12.08.200 would ensure adequate access for all vehicles during temporary lane closures (refer to Pages 4.15-17 through 4.15-18 of the Draft EIR).

2.1.8 PUBLIC SAFETY

Many commenters raised concerns regarding public safety due to the Project's increase in population. As discussed in Section 4.13, *Public Services*, the Los Alamitos Police Department was contacted to document the existing and planned police protection facilities and to determine whether the Project would require the construction or expansion of new facilities. Buildout of the Project would increase demands for police protection services in the City, including the potential need for parking enforcement. During the construction and operation of the Project, the need for police services is expected to grow due to the increase in population. Crime and safety issues during Project construction may include theft of building materials and construction equipment, malicious mischief, graffiti, and vandalism. After construction, the Project is anticipated to generate a typical range of police service calls as similar developments. Additionally, it should be noted that an increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities.

However, per correspondence with Los Alamitos Police Department, the anticipated increase in demands on police services resulting from the implementation of the Project would not adversely impact Los Alamitos Police Department's existing resources. There are currently no staffing or equipment deficiencies in the service area. The increase in potential services needed would not require the construction of a new police station or improvements to the existing station that serves the Project site. The existing resources would be adequate to meet the additional demands generated by the Project. The Los Alamitos Police Department has not indicated the need for a new police station or expansion of existing facilities due to the Project. Responses times and service ratios would be met and would not require the construction of new facilities.

The Seal Beach Police Department indicated that the Project site is within the City of Los Alamitos and serviced by Los Alamitos Police Department. The Seal Beach Police Department provides service to Lampson Avenue and requested that the Draft EIR address traffic flow and safety, which were addressed in the Draft EIR and Master Responses 2.1.1, *Transportation and Traffic Congestion*, and 2.1.2 *Roadway Safety on Lampson Avenue*, above.

Moreover, Project development would result in increased property tax and, indirectly, sales tax revenue proportionally increasing the City's General Fund revenue, providing funding for police protection services, equipment, and/or personnel. Because the Project does not include construction of new police facilities and does not generate a need for additional facilities, increases in demands for police protection resulting from implementation of the Project impacts would be less than significant. No mitigation is required (refer to Pages 4.13-8 through 4.13-10 of the Draft EIR).

As discussed in Section 4.13, *Public Services* of the Draft EIR, considering the existing firefighting resources available in the City, implementation of the Project is not expected to result in the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impact. Per correspondence with the OCFA, there are currently no deficiencies in fire protection service provided to the Project site. In order to maintain acceptable service ratios, OCFA uses a fair share approach to mitigate fire service response impacts and facility/equipment needs.

Project development would occur in an area of the City already served by OCFA; therefore, the Project would not result in an expansion of OCFA's service area. In the event of an emergency within the Project site that requires more resources than the primary fire stations that serve the area could provide, OCFA would direct resources to the site from other OCFA stations nearby (refer to Page 4.13-8 through 4.13-10 of the Draft EIR). As a result, response times would not decrease to necessitate the construction of a new fire station.

2.1.9 PROXIMITY TO THE LOS ALAMITOS JOINT FORCES TRAINING BASE (JFTB)

A. Safety

Many commenters expressed concerns related to safety hazards based on the Project's proximity to the Los Alamitos JFTB and stated that two State Agencies, Cal Trans Division of Aeronautics and the California Airport Land Use Commission, had issued warnings that projects within close proximity to the JFTB have safety and health issues. As discussed in Section 2.4.3, *Airport Environs Land Use Plan for The Joint Forces Training Base Los Alamitos*, the Airport Land Use Commission's (ALUC) previous finding that the City's Housing Element, including the Project site, was inconsistent with the Airport Environs Land Use Plan for the Joint Forces Training Base Los Alamitos, was overruled by the Los Alamitos City Council on December 11, 2023, pursuant to Public Utilities Code Sections 21670 and 21676.

As discussed in Section 4.8, *Hazards and Hazardous Materials*, of this EIR, the Project site is not located within the CZs or APZ (refer to Figure 4.8-1, *JFTB Impact Zones*) for the JFTB. Therefore, the Project does not concentrate people in areas susceptible to aircraft accidents. Moreover, the FAA issued Determinations of No Hazard to Air Navigation (*Technical Appendix J2* of the Draft EIR) after its aeronautical study of the Project determined that the structures would not exceed obstruction standards and would not be a hazard to air navigation on January 26, 2022. Military safety areas are intended to protect people on the ground from airplanes and the FAA airspace determinations are intended to protect airplanes from structures and interference on the ground. As such, the Project would not result in a safety hazard for people residing at the Project site (refer to Page 4.8-18 of the Draft EIR).

Additionally, as shown in Figure 4.8-2, *Los Alamitos JFTB Flight Patterns*, the Project site is not located within any of the flight patterns in the JFTB. As discussed in Section 4.10, *Land Use and Planning*, of the Draft EIR, the ALUC mandates the provision of the State's real estate disclosure regarding buyer and renter notification for new residential land uses within an airport influence area even if these state laws were to be revised or rescinded. The ALUC also requires that signs providing these disclosures and notices be "prominently posted" in real estate sales offices and within the new development depicting overflight areas and helicopter traffic patterns. Buyer awareness is required as part of the City's approval process for the Project. The buyer awareness notification process is built into the real estate disclosure laws of the State to ensure that potential buyers are fully informed before buying a home near an airport if they are sensitive to the types of annoyances or disruptions that may come with the location (refer to Page 4.10-18 of the Draft EIR).

Many comments also provided suggested mitigation measures to be included in the Draft EIR. However, based on the preceding information, the Project would not result in significant impacts related to any safety hazards associated with the JFTB. Therefore, additional mitigation measures related to safety hazards are not warranted.

B. Noise Impacts and Noise Insulation

Many commenters expressed concerns regarding noise impacts for Project residents due to the proximity of the Los Alamitos JFTB. Additionally, commenters expressed concerns regarding the need for noise insultation in walls, windows, and ceilings for the Project's structures. As discussed in Section 4.11, *Noise*, of the Draft EIR, an on-site exterior aircraft noise impact analysis has been completed to determine the noise exposure levels that would result from adjacent JFTB Los Alamitos aircraft noise sources in the Project study area, and to identify environmental impacts from the proposed Project and potential noise abatement measures for the proposed Project that would achieve acceptable Project noise levels, if required.

The JFTB Los Alamitos is located adjacent to, and northwest of the Project. Figure 4.11-4, *APHC 2020 Airport Noise Level Contour Boundaries*, of the Draft EIR shows the Project site in relation to the airport's projected noise level contour boundaries, as provided by the 2020 Noise Assessment for Los Alamitos Airfield, Joint Forces Training Base Los Alamitos. As shown on Figure 4.11-5, *On-Site Aircraft Noise Level Contours*, of the Draft EIR, the northwestern portion of the Project site would locate residential uses between the 60 and 65 dBA CNEL noise level contours. Residential land uses exposed to noise levels less than 60 dBA CNEL are "normally consistent." Residential uses exposed to noise levels between 60 and 65 dBA CNEL are considered "conditionally consistent" with AELUP Noise limitations, requiring that sound attenuation as identified by the California Noise Insulation Standards, Title 25, California Code of Regulations is implemented to ensure that the interior CNEL does not exceed 45 dBA.

The interior noise level is the difference between the predicted exterior noise level at the building facade and the noise reduction of the structure. Typical building construction would provide a Noise Reduction (NR) of approximately 12 dBA with "windows open" and a minimum 25 dBA noise reduction with "windows closed." However, sound leaks, cracks and openings within the window assembly can greatly diminish its effectiveness in reducing noise. Several methods are used to improve interior noise reduction, including: (1) weather-stripped solid core exterior doors; (2) upgraded dual glazed windows; (3) mechanical ventilation/air conditioning; and (4) exterior wall/roof assembles free of cut outs or openings.

The Project will implement sound attenuation methods to ensure the interior CNEL does not exceed 45 dB. For example, the Project will provide mechanical ventilation (e.g. air conditioning) in all units. In addition, with implementation of PDF-N-2, which includes the use of windows with a STC rating of 29 on all second floor facades adjacent to Lampson Avenue and JFTB Los Alamitos, the Project would be designed to achieve a 25 dBA reduction and meet the 45 dBA CNEL interior noise standard. Accordingly, the Project would not expose people residing or working in the Project area to excessive

noise levels from airport or aircraft operations, and impacts would be less than significant. No mitigation is required (refer to Page 4.11-31 of the Draft EIR).

2.1.10 Loss of Existing Open Space and Provision of On-Site Amenities

Many commenters expressed concerns regarding loss of existing open space and failure to provide on-site amenities for Project residents. As discussed in Section 2.0, *Environmental Setting*, under existing conditions, the Project site is currently developed with a vacant two-story, 88,000 sf commercial office building (most recently occupied by WestEd, California Department of Fish and Wildlife, National Comfort Institute, Inc., and James J. Mentas Attorney at Law) located centrally within the Project site and surface parking lot located within the western portion of the Project site. The remainder of the Project site consists of undeveloped/vacant land, which includes approximately 5.97 acres of developed/ornamental land and approximately 6.40 acres of disturbed/ornamental land (refer to Pages 2-6 through 2-7 of the Draft EIR) which provides very little value as open space or for recreation as the site was used for commercial uses and existing trees appear to be in declining health from possibly a variety of reasons including but not limited to an unknown disease and stress from drought.

The Project would provide a variety of common open space amenities, as well as a variety of privately maintained open space and decks. The Project would provide a total of 58,027 square feet (sf) or 1.33 acres of open space on the Project site, including 16,508 sf of usable common open space and 41,519 sf of private open space (homeowner maintained). The Project would result in an increase in residents; however, as explained in the following paragraph, the Project is not anticipated to increase the use of the existing parks such that substantial additional use or physical deterioration of the existing parks would occur or be accelerated.

Based on the Project's Parks Impact Analysis (*Technical Appendix M* of the Draft EIR), it is anticipated that a negligible amount of Project residents will regularly visit parks in close proximity to the Project site specifically, Arbor Park, Arbor Dog Park, and Heather Park. Specifically, it is anticipated that a total of 178 Project residents would visit the designed neighborhood open spaces within the Project site and 131 Project residents would visit Arbor Park, Arbor Dog Park, and Heather Park as the parks they visit most often. Project residents are anticipated to visit (frequent) Arbor Park and Heather Park as follows: approximately 22 users 2 times per week, 18 users once per week, 27 users once or twice per month, 32 users several times per year, and 20 users once or twice per year (see Table 2, *Technical Appendix M* of this Draft EIR). Project residents' dogs are anticipated to visit (frequent) Arbor Dog Park 147 times once per week. (sees Tables 3 and 4, *Technical Appendix M* of this Draft EIR).

The carrying capacity of Arbor Park and Heather Park is 270 and 67 visitors, respectively, and there is no calculation for carrying capacity for Arbor Dog Park due to the nature of a dog park. Carrying capacity (referring to the number of visitors that can be accommodated in a park without unacceptable impacts to the quality of the visitor experience) can be calculated for a park utilizing the amenities, such as playgrounds, baseball fields, and open lawn areas present in the park. Because the projected number of Project visitors to these parks are well within the carrying capacity stated above, there is sufficient capacity at existing nearby neighborhood parks to accommodate the Project residents. With full occupancy of the Project, the designed neighborhood open spaces within the Project site, the

capacity and existing maintenance and usage of existing parks, and the anticipated visitation of the Project residents to the existing parks; the Project is not anticipated to increase the use of the existing parks such that substantial additional use or physical deterioration of the existing parks would occur or be accelerated.

Based on the Project's Parks Impact Analysis (*Technical Appendix M* of this EIR), there is sufficient capacity at existing neighborhood parks to accommodate the Project residents and impacts would be less than significant. Refer to Section 4.14, *Recreation*, of the Draft EIR for further discussion (refer to Pages 4.14-8 to 4.14-9 of the Draft EIR).

3.0 RESPONSES TO COMMENTS RECEIVED DURING THE PUBLIC REVIEW PERIOD

This section includes responses to substantive Draft EIR comments received by the City. With respect to comment letters received, aside from certain courtesy statements, introductions, and closings, individual comments within the body of each letter have been identified and numbered. A copy of each comment letter and the City's responses to each applicable comment are included in this section. Brackets delineating the individual comments and a numeric identifier have been added to the right margin of the letter. Responses to each comment identified are included on the page(s) following each comment letter. Responses to comments are being sent to the agencies and organizations that provided comments at least 10 days prior to the City's consideration of the Project and EIR.

Revisions to the Draft EIR have been prepared to make minor corrections and clarifications to the Draft EIR as a result of City review, and comments received during the public review period (refer to Section 5.0, *Draft EIR Clarifications and Revisions*, of this document). Therefore, this Response to Comments section, and the Draft EIR Clarifications and Revisions section, are included as part of this Final EIR along with the Draft EIR for consideration by the City prior to a vote to certify the EIR.

COMMENT LETTER A

AIRPORT LAND USE COMMISSION
FOR ORANGE COUNTY
3160 Airway Avenue • Costa Mesa, California 92626 • 949.252.5170 fax: 949.252.6012

June 10, 2024

Tom Oliver, Associate Planner
City of Los Alamitos Planning Division
3191 Katella Avenue
Los Alamitos, CA 90720

Subject: Draft Environmental Impact Report for 4665 Lampson Avenue Project

Dear Mr. Oliver:

Thank you for the opportunity to review the Draft Environmental Impact Report (DEIR) for the 4665 Lampson Avenue Project in the context of the Airport Land Use Commission's (ALUC) *Airport Environs Land Use Plan for Joint Forces Training Base Los Alamitos.* The proposed project would redevelop the existing office building on the 12.3-acre site with a residential development consisting 246 residential units including: 55 single family homes, 114 townhomes, and 77 affordable multi-family apartment homes. The proposal also includes 21,000 square feet of common open space and 557 parking spaces. The proposed discretionary approvals include a General Plan Amendment, Zone Change, Specific Plan and Tentative Tract Map. A-1

The proposed project site was included in the City's Housing Element Update which was submitted to ALUC for a consistency review. On January 19, 2023, the ALUC found the Los Alamitos Housing Element Update to be inconsistent with the *Airport Environs Land Use Plan (AELUP) for Joint Forces Training Base Los Alamitos* (*JFTB Los Alamitos)* due in part to the subject site (Site 6), along with other sites in the City, being changed from non-residential uses to residential. The inconsistent finding was based on: A-2

1. AELUP Section 2.1.1 Aircraft Noise, that the "aircraft noise emanating from airports may be incompatible with general welfare of the inhabitants within the vicinity of an airport." A-3

2. PUC Section 21674, (as referenced in Section 1.2 of the *AELUP for JFTB Los Alamitos*) which states that the Commission is charged by PUC Section 21674(a) "to assist local agencies in ensuring compatible land uses in the vicinity of …existing airports to the extent that the land in the vicinity of those airports is not already devoted to incompatible uses," and PUC Section 21674(b) "to coordinate planning at the state, regional and local levels so as to provide for the orderly development of air transportation, while at the same time protecting the public health, safety and welfare." A-4

3. AELUP General Land Use Policies in Section 3.2.1 which states that "within the boundaries of the AELUP, and land use may be found to be Inconsistent with the AELUP which (1) Places people so that they are affected adversely by aircraft noise and (2) Concentrates people in areas susceptible to aircraft accidents." A-5

While the City overruled ALUC on December 11, 2023, in accordance with PUC 21676(b), ALUC has the following comments.

Section 4.11 Noise of the DEIR indicates that there would be a less-than-significant impact and no mitigation is required for "Threshold c: For a project located within the vicinity of … an airport land use plan..., would the Project expose people residing or working in the project area to excessive noise levels?" The project site is within the airport land use plan area for JFTB Los Alamitos, and within the 60 dB noise contour for JFTB Los Alamitos. Sites within the AELUP noise contours must use sound attenuation as required by the California Noise Insulation Standards, Title 25, California Code of Regulations. Residential use sound attenuation is required to ensure that the interior CNEL does not exceed 45 dB. A-6

In addition, for noise sensitive uses, the Commission recommends a posting of: "NOTICE OF AIRPORT IN VICINITY: This property is presently located in the vicinity of an airport, within what is known as an airport influence area. For that reason, the property may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (for example: noise, vibrations, or odors). Individual sensitivities to those annoyances can vary from person to person. You may wish to consider what airport annoyances, if any, are associated with the property before you complete your purchase and determine whether they are acceptable to you." A-7

Thank you again for the opportunity to comment on the initial study. Please contact me at (949) 252-5170 or via email at jfitch@ocair.com should you have any questions related to the Airport Land Use Commission for Orange County. A-8

Sincerely,

Julie Fitch

Julie Fitch
Interim Executive Officer

Responses to Comment A

Airport Land Use Commission (ALUC) for Orange County, dated June 10, 2024.

A-1 The commenter provides introductory remarks and a summary of the Project. For clarification regarding the proposed open space, the Project would provide 58,027 sf of open space, including approximately 16,508 sf of usable common open space, approximately 41,519 sf of private open space, and approximately 78,038 sf of planting area (refer to Page 3-7 of the Draft EIR).

A-2 The commenter states the Project site was included in the City's Housing Element Update and ALUC had previously found the updated Housing Element to be inconsistent with the Airport Environs Land Use Plan (AELUP) for JFTB for reasons listed in the comment. The Draft EIR acknowledges that ALUC previously found the Housing Element to be inconsistent with the AELUP. As provided in Section 2.0, *Environmental Setting*, of the Draft EIR, City's Housing Element received certification from the State Housing and Community Development Department (HCD). However, the Housing Element received an inconsistent finding from ALUC on January 19, 2023. On February 21, 2023, the City Council adopted Resolution 2023-04, providing notice of the City's intent to overrule ALUC's determination. The City Council conducted a Study Session and reviewed information related to ALUC's finding of inconsistency on July 17, 2023. A Public Hearing was held on August 21, 2023, where the City Council considered the adoption of a resolution overruling the ALUC's determination but failed to receive the required two-thirds affirmative vote (four affirmative votes were required). On September 21, 2023, the ALUC voted to require the City to submit all discretionary actions related to Housing Element Sites 6 (4655 Lampson Avenue), 7 (Laurel Park), and 10 (5030-5084 Katella) to ALUC for review until such time as the General Plan is revised, or the City overrules ALUC's determination. On December 11, 2023, the City received a four/fifths vote from the Los Alamitos City Council to overrule ALUC's finding and adopt the City's Housing Element pursuant to the State Aeronautics Act. Accordingly, approval from ALUC is not required for the Project because the Project site is listed as a Housing Opportunity Site in the City's Housing Element, which was included in the City Council's vote to overrule the ALUC (refer to Page 2-6 of the Draft EIR).

Refer to Response to Comment A-3 through A-5 related to the inconsistency reasoning.

A-3 The commenter states that the Housing Element inconsistency finding was based on AELUP Section 2.1.1 – "aircraft noise emanating from airports may be incompatible with the general welfare of inhabitants in the vicinity of an airport." The commenter merely restates the text of this section and does not provide further information to evaluate the assertion that the Project is inconsistent or explain why the Project would be inconsistent with this finding. Refer to Response to Comment A-6 related to noise impacts from aircrafts.

A-4 The commenter states that the Housing Element inconsistency finding was also based on Public Utilities Code (PUC) Section 21674, which states that the Commission is charged to assist local agencies in ensuring compatible land uses in the vicinity of existing airports. The commenter merely restates the text of this section and does not provide further information to evaluate the assertion that the Project is inconsistent or to assess why the commenter believes the Project would be inconsistent with this finding. The Draft EIR documented the proper procedural requirements with respect to ALUC input as described in Response to Comment A-2.

A-5 The commenter states that the Housing Element inconsistency finding was based on AELUP General Land Use Policies in Section 3.2.1, which states that Land uses may be found to be inconsistent with the AELUP if it 1) places people so that they are affected adversely by aircraft noise and 2) concentrates people in areas susceptible to aircraft accidents. Refer to Response to Comment A-3 regarding aircraft noise impacts. As discussed in Section 4.10, *Land Use and Planning*, of the Draft EIR, the Project site is not located within the clear zones or accident potential zone (refer to Figure 4.8-1, JFTB Impact Zones) for the JFTB. Therefore, the Project does not concentrate people in areas susceptible to aircraft accidents and would not result in a safety hazard for people residing at the Project site (refer to Page 4.10-15 of the Draft EIR). The commenter does not provide additional information related to aircraft accidents that would affect the finding documented in the Draft EIR.

A-6 The commenter states while the City overruled ALUC on December 11, 2023, the commenter has additional comments regarding the Project. The commenter summarizes threshold c in Section 4.11, *Noise*, of the Draft EIR, and states that projects within the 60 dB noise contour must use sound attenuation as required by the California Noise Insulation Standards, Title 25, California Code of Regulations. The Draft EIR acknowledges that the Project is near JFTB and evaluates noise emanating from the airport in Section 4.11, *Noise*, of the Draft EIR. An on-site exterior aircraft noise impact analysis has been completed to evaluate the potential noise exposure levels that would result from adjacent JFTB Los Alamitos aircraft noise sources in the Project study area, and to identify environmental impacts from the proposed Project and potential noise abatement measures for the proposed Project that would achieve acceptable Project noise levels, if required. As shown on Figure 4.11-5, *On-Site Aircraft Noise Level Contours*, the northwestern portion of the Project site would locate residential uses between the 60 and 65 dBA CNEL noise level contours. Residential land uses exposed to noise levels less than 60 dBA CNEL are "normally consistent." Residential uses exposed to noise levels between 60 and 65 dBA CNEL are considered "conditionally consistent" with AELUP Noise limitations, requiring that sound attenuation as identified by the California Noise Insulation Standards, Title 25, California Code of Regulations is implemented to ensure that the interior CNEL does not exceed 45 dBA.

The Project will implement sound attenuation methods to ensure the interior CNEL does not exceed 45 dBA. For example, the Project will provide mechanical ventilation (e.g. air conditioning) in all units. In addition, with implementation of PDF-N-2, which includes the

use of windows with a STC rating of 29 on all second floor facades adjacent to Lampson Avenue and JFTB Los Alamitos, the Project would be designed to achieve a 25 dBA reduction and meet the 45 dBA CNEL interior noise standard. Accordingly, the Project would not expose people residing or working in the Project area to excessive noise levels from airport or aircraft operations, and impacts would be less than significant. No mitigation is required (refer to Page 4.11-31 of the Draft EIR).

Refer also to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*, related to noise impacts. A portion of the Project is within the 60 dBA noise contour, and as such, the Project will implement PDF-N-2, which includes the use of windows with a STC rating of 29 on all second floor facades adjacent to Lampson Avenue and JFTB Los Alamitos, ensuring the Project is designed to achieve a 25 dBA reduction and meet the 45 dBA CNEL interior noise standard. Thus, no further response is required.

A-7 The commenter also recommends a posting of "NOTICE OF AIRPORT IN VICINITY". The commenter's recommendation is already addressed in Section 4.10, *Land Use and Planning*, of the Draft EIR (refer to Page 4.10-18 of the Draft EIR). As discussed in Section 4.10, *Land Use and Planning of the Draft EIR*, the buyer awareness notification process is built into the real estate disclosure laws of the State to ensure that potential buyers are fully informed before buying a home near an airport if they are sensitive to the types of annoyances or disruptions that may come with the location. Buyer awareness is required as part of the City's approval process for the Project including the statement "NOTICE OF AIRPORT IN VICINITY". Refer also to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*, related to buyer awareness. Thus, no further response is required.

A-8 The commenter provides concluding remarks, and the City acknowledges Julie Fitch as the contact person for ALUC. No further response is required.

COMMENT LETTER B

CALIFORNIA STATE TRANSPORTATION AGENCY GAVIN NEWSOM, GOVERNOR

California Department of Transportation

DISTRICT 12
1750 East 4th Street, Suite 100 | SANTA ANA, CA 92705
(657) 328-6000 | FAX (657) 328-6522 TTY 711

June 10, 2024

Mr. Tom Oliver
Associate Planner
City of Los Alamitos
3191 Katella Avenue
Los Alamitos, CA 90740

File: LDR/CEQA
SCH: 2022090476
12-ORA-2022-02577
I-405, PM 21.086
SR 22, PM R0.668
SR-39, PM 9.279

Dear Mr. Oliver,

Thank you for including the California Department of Transportation (Caltrans) in the review of the Draft Environmental Impact Report (EIR) for the 4665 Lampson Avenue Project. The Project Applicant proposes to redevelop the existing office building with a residential development consisting of a variety of different product types, including: cluster homes, townhomes, and apartments. The unit mix would include 55 cluster homes, 114 townhomes, and 77 affordable multi-family apartment homes. The mixed density for the Project would be 20 dwelling units per acre (DUA). The Project would provide approximately 21,000 sf of common open space, which includes a central 14,000 sf neighborhood open space area. Under the City's R-3 development standards, the maximum building height for the Project is 35 feet. The Project would provide a total of 557 parking spaces: 459 parking spaces for the cluster homes and townhomes and 98 parking spaces for the affordable multifamily apartment homes. Vehicle access to the Project site would be provided via one driveway on Lampson Avenue.

The 4655 Lampson Avenue Project (Project) site is located in the City of Los Alamitos, Orange County, California. The 12.3-acre Project site is located north of Lampson Avenue and northwest of the intersection of Lampson Avenue and Rose Street. The project is located less than a half mile from Interstate 405 (I-405), The project is also two and a quarter mile from Interstate 605 (I-605), two miles from State Route (SR) SR-39 and almost a mile from SR-22. All four State Routes are owned and operated by Caltrans. Caltrans is a responsible agency on this project, and has the following comments:

B-1

"Provide a safe and reliable transportation network that serves all people and respects the environment"

City of Los Alamitos
June 10, 2024
Page 2

1. To ensure safe operations, please assess the capacity(s) (storage length) of the off-ramps at Valley View St./Bolsa Chica Rd. This assessment should determine if the ramp(s) is/are able to accommodate the demand(s) and will not create a back-up onto the freeway mainline. B-2

2. Regional access to the project is through the I-405, I-605, and SR 22 freeway. Therefore, the document should include a discussion on any potential impacts of this project I-405, I-605, and SR 22 ramps and mainline. B-3

3. In the Traffic Impact Analysis, please include HCM intersection analysis along with current and projected capacities of local street, and state highways or freeways including ramps that might be impacted. B-4

4. If impact analysis leads to findings of significance on State facilities, please coordinate with Caltrans District 12 Local Development on development of a Traffic Mitigation Agreement or similar effort. B-5

5. Caltrans encourages the design of Complete Streets that include high-quality pedestrian, bicycle, and transit facilities that are safe and comfortable for users of all ages and abilities. Improvements may include providing secure bicycle parking, pedestrian-oriented LED lighting, and comfortable connections to nearby active transportation and/or transit facilities. Complete Streets improvements also promote regional connectivity, improve air quality, reduce congestion, promote improved first-/last-mile connections, and increase safety for all modes of transportation. B-6

6. New residential infill development offers an opportunity to encourage multimodal transportation options. Caltrans encourages the project to look at opportunities to include Complete Streets improvements in the project, and/or to improve bicycle, pedestrian, and transit access and connectivity to nearby bikeway, sidewalk, and transit facilities. B-7

7. Encourage the use of transit among future residents, visitors, and workers of the development. Increasing multimodal transportation may lead to a reduction to congestion, Vehicle Miles Traveled, and improve air quality. Provide adequate wayfinding signage and related amenities to the transit stops within the project vicinity. B-8

8. There is an existing Class II bike lane on Lampson Avenue. Consider adding signage for drivers to watch for bicyclists and pedestrians near driveways on Lampson Avenue. Also, consider green conflict zone paint on the Class II near driveways. B-9

"Provide a safe and reliable transportation network that serves all people and respects the environment"

9. During project construction, if there are any impacts to the existing bike lanes on Lampson Avenue, please ensure that appropriate temporary detours are provided to maintain safe bicycle access to Lampson Ave. B-10

10. Please ensure that truck parking, ingress and egress, and staging will not interfere with vehicle parking, pedestrian paths, or bicycle lanes/bicycle parking. B-11

11. Establish freight pick up and drop off times that do not coincide with peak commute hours to reduce passenger vehicle conflicts and congestion for freight. Consider designating on-street freight-only parking and delivery time windows so trucks will not resort to double parking, thus causing street traffic congestion. B-12

Caltrans' mission is to provide a safe, sustainable, equitable, integrated, and efficient transportation system to enhance California's economy and livability. Please continue to coordinate with Caltrans for any future developments that could potentially impact State transportation facilities. If you have any questions, please do not hesitate to contact Julie Lugaro at: Julie.lugaro@dot.ca.gov. B-13

Sincerely,

Scott Shelley
Branch Chief, Regional-LDR-Transit Planning
Caltrans, District 12

"Provide a safe and reliable transportation network that serves all people and respects the environment"

Responses to Comment B

California Department of Transportation (Caltrans), dated June 10, 2024.

B-1 The commenter provides an introductory statement and summarizes the Project and states that Caltrans is a responsible agency on the project. For clarification regarding the proposed common open space, the Project would provide 58,027 sf of open space, including approximately 16,508 sf of usable common open space, approximately 41,519 sf of private open space, and approximately 78,038 sf of planting area (refer to Page 3-7 of the Draft EIR). Additionally, vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Furthermore, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site (refer to Page 3-4 of the Draft EIR). There are no expected discretionary or administrative actions needed from Caltrans on this Project; therefore, Caltrans is not considered a responsible agency for this Project.

B-2 The commenter requests an analysis of the capacities (storage length) of off-ramps at Valley View Street and Bolsa Chica Road to determine if the ramps are able to accommodate the demand and will not create a back-up onto the freeway mainline. Although the Caltrans guidelines have been updated and no longer include guidelines related to level of service, Caltrans used to require an analysis of capacities at State facilities when a Project contributes 50 or more peak hour trips to a State off-ramp or intersection. However, this is still a reasonable metric to determine whether a Project would have a measurable impact on State facilities. As shown in Exhibit 4-2 of the Traffic Analysis (*Attachment G* of this Final EIR), the Project would send less than 50 peak hour trips to the off-ramps at Valley View Street and Bolsa Chica Road (25 AM and 42 PM peak hour trips, respectively). As a result, since the Project would contribute less than 50 peak hour trips to a State off-ramp, and industry standard recognizes that any contribution less than 50 peak hour trips does not cause a significant increase in delay or create a safety hazard; therefore, an analysis of capacities of off-ramps at Valley View Street and Bolsa Chica Road is not needed or required.

B-3 The commenter states that the document should include a discussion on any potential impacts of the Project on I-405, I-605, and SR-22 freeway ramps and mainline. For the reasons stated above, the Project would not have measurable impact to these State facilities, including ramps or mainline facilities. Refer to Response to Comment B-2. Specifically, the peak hour trips at the freeway ramps at I-405, I-605, and SR-22 are listed below and the Project would contribute less than 50 peak hour trips to these ramps, and industry standard recognizes that any contribution less than 50 peak hour trips does not cause a significant increase in delay.

- I-405/I-605 via Seal Beach Boulevard: 35 AM and 45 PM peak hour trips
- SR-22/I-405 via Valley View/Bolsa Chica: 25 AM and 42 PM peak hour trips

B-4 The commenter states that the Project's Traffic Analysis (*Technical Appendix N1* of the Draft EIR) should include HCM intersection analysis along with current and projected capacities of local street, and state highways or freeways including ramps that might be impacted. As discussed previously, transportation analysis under CEQA is now based on VMT rather than impacts to automobile delay-LOS based on intersection analysis (traffic congestion).

The intersection analysis methodology complies with the traffic guidelines of the jurisdiction where the study area intersections are located. The study area intersections (see Table 1-1 of *Attachment G* of this Final EIR) are within the jurisdictions of Los Alamitos, Seal Beach, and Garden Grove; and not Caltrans. The cities of Los Alamitos, Seal Beach, and Garden Grove require Intersection Capacity Utilization (ICU) analysis and not HCM per their respective Traffic Study Guidelines. Because Caltrans does not have jurisdiction over study area intersections, HCM intersectional analysis is not required.

B-5 The commenter states that if the impact analysis leads to findings of significance on State facilities, to coordinate with Caltrans District 12 Local Development on development of a Traffic Mitigation Agreement or similar effort. This comment is noted. Please refer to responses to Comments B-2 through B-4 regarding Project's impacts on State facilities. No further response is required.

B-6 The commenter states that Caltrans encourages the design of Complete Streets that include high-quality pedestrian, bicycle, and transit facilities that are safe and comfortable for users of all ages and abilities. The Project has been designed to incorporate pedestrian improvements and tie into regional bicycle facilities. Frontage improvements would include sidewalk improvements, driveway modifications to accommodate site access, and landscaping improvements as required by City standards, which would improve the safety and comfort of pedestrian and bicycle crossings. As discussed in Section 3.0, *Project Description*, of the Draft EIR, non-motorized circulation would include pedestrian connectivity with existing sidewalks along Lampson Avenue, including an existing signalized pedestrian connection to the south at Rose Street and Lampson Avenue and pedestrian "paseo" connections with Arbor Park and the Arbor Dog Park to the north. The Project would provide pedestrian gates to be controlled by the Homeowners' Association to restrict residents from entering Arbor Park and Arbor Dog Park outside of hours specified by JTFB. The Project would also promote the use of bicycles as an alternative means of transportation by providing short-term and/or long-term bicycle parking accommodations (refer to Pages 3-4 and 3-5 of the Draft EIR). Refer also to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, related to Pedestrian and Bicycle Facilities. Refer also to Response to Comment B-7.

B-7 The commenter encourages the Project to look at opportunities to encourage multimodal transportation options, to include Complete Streets improvements in the Project, and/or to improve bicycle, pedestrian, and transit access and connectivity to nearby bikeway, sidewalk, and transit facilities. As discussed in Table 4.15-1, *Consistency with the General Plan Mobility and Circulation Element*, of the Draft EIR, the Project facilitates multimodal mobility. An off-

site pedestrian circulation system would be available in proximity to the Project site with an interconnected paved sidewalk system with the roadway right-of-way separated from vehicular travel lanes by a landscaped parkway. There are existing Class II (on-street, striped) bike lanes on the north and south sides of Lampson Avenue from Basswood Street to the east. Additionally, there is a Class I bike/pedestrian path along Seal Beach Boulevard, north of Lampson Avenue and a Class II bike lane south of Lampson Avenue. The Project would maintain the existing Class II bike lane on Lampson Avenue along the Project site's frontage. Moreover, bike lane improvements are currently ongoing on Lampson Avenue between Basswood Street and Seal Beach Boulevard, which will connect to the existing Class I bike lane on Lampson Avenue (refer to Page 4.15-10 of the Draft EIR). Refer also to Response to Comment B-6.

B-8 The commenter encourages the use of transit among future residents, visitors, and workers of the Project to reduce congestion, Vehicle Miles Traveled and improve air quality. The commenter also encourages the provision of adequate wayfinding signage and related amenities to the transit stops within the Project vicinity. There is currently no transit service to the Project site or within a 0.25 mile radius. The nearest OCTA bus stop from the Project site is Route 123, approximately 1.2 miles at the intersection of Valley View Street and Lampson Avenue. As discussed in Section 4.15, *Transportation* of the Draft EIR, however, Mitigation Measure MM 4.15-1 includes implementing CAPCOA strategies such as coordination with OCTA to provide new or re-routing existing transit services to the site, as determined to be feasible by OCTA pursuant to OCTA's standards (refer to Page 4.15-19 of the Draft EIR). Additionally, regarding air quality impacts, as discussed in Section 4.2, *Air Quality*, of the Draft EIR, the Project would not exceed criteria pollutant thresholds established by the South Coast AQMD for emissions of any criteria pollutant and impacts would be less than significant (refer to Pages 4.2-24 and 4.2-25 of the Draft EIR).

B-9 The commenter states that there is an existing Class II bike lane on Lampson Avenue and recommends adding signage for drivers to watch for bicyclists and pedestrians near driveways on Lampson Avenue and green conflict zone paint on the Class II bike lane near driveways. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, related to sight distance and other safety measures implemented by the Project. As demonstrated, the Project would not result in a safety hazard. However, this comment will be taken under consideration; the City Engineer will evaluate the need for signage and/or green conflict zone paint during review of the Project's construction drawings. Thus, no further response is required.

B-10 The commenter requests that appropriate temporary detours are provided to maintain safe bicycle access to Lampson Avenue if there are encroachments to existing bike lanes during construction. As discussed in 4.8, *Hazards and Hazardous Materials*, of the Draft EIR, during construction, the Project would result in roadway improvements along Lampson, including replacement of the existing median curb and construction of the two proposed driveways. Construction on Lampson will require an encroachment permit and approval from the City Engineer. Lane closures that may be required for median improvements would be temporary

and require a permit and compliance with LAMC 12.08.200, Safety precautions–Obstruction of traffic. Compliance with LAMC 12.08.200 would ensure safe crossing and access for all vehicles and pedestrians/bicyclists at all times (refer to Pages 4.8-21 of the Draft EIR).

B-11 The commenter requests to ensure that truck parking, ingress and egress, and staging will not interfere with vehicle parking, pedestrian paths, or bicycle lanes/bicycle parking. During construction all staging will occur on the Project site to ensure that there are no conflicts with vehicle parking, pedestrian paths, or bicycle lanes/parking. Refer also to Response to Comment B-10 above regarding temporary closures during construction. Operationally, since the proposed use is residential, a limited number of trucks would travel to the Project site (e.g. trash trucks, emergency vehicles, delivery vans). Figure 4.8-3, *Fire Master Plan*, demonstrated adequate turning radii for emergency vehicles to access the Project site. A Safety Evaluation was prepared for the Project (*Attachment H* of this Final EIR), which evaluated on-site vehicle circulation. The Safety Evaluation identifies the on-site circulation for the site, including various vehicle paths (front-loading garbage trucks, fire trucks, delivery trucks, etc.) for various internal drive aisles, which allow for two-way traffic. Access to and from the site will be accommodated via driveways on Lampson Avenue. The vehicle turning templates show acceptable turning movements for the various vehicles and trucks anticipated to access the site (see Attachment D of *Attachment H* of this Final EIR). Therefore, truck parking, ingress and egress, and construction staging would not interfere with vehicle parking, pedestrian paths, or bicycle lanes/bicycle parking.

B-12 The commenter requests that the Project establish freight Pick up and drop off times that do not coincide with peak commute hours to reduce passenger vehicle conflicts and congestion for freight. The Project does not involve freight operations as it is a residential project. As it relates to delivery trucks refer to Response to Comment B-11. There would be no conflicts between delivery trucks and passenger cars and congestion is not an impact evaluated under CEQA (see Master Response 2.1.2, *Roadway Safety on Lampson Avenue*). However, this comment is noted for the record.

B-13 The commenter provides concluding remarks, and the City acknowledges Julie Lugaro as the contact person for Caltrans. Thus, no further response is required.

COMMENT LETTER C

GARDEN GROVE

CITY OF GARDEN GROVE

RE: Notice of Availability of Draft Environmental Impact Report for the 4665 Lampson Avenue Project

Dear Tom,

Thank you for providing the Notice of Availability of Draft Environmental Impact Report for the 4665 Lampson Avenue Project. Department staff of the City of Garden Grove have reviewed the available documents. The following comments are provided for your consideration:

- Please see attached redlines, by the City of Garden Grove Public Works Department, Traffic Engineering Division, on the Traffic Analysis Report by Urban Crossroads, dated June 1, 2023.

C-1

If you have any questions, please contact me at (714) 741-5314 or chrisc@ggcity.org.

Sincerely,

Chris Chung
Senior Planner

URBAN CROSSROADS

CITY OF GARDEN GROVE ENGINEERING COMMENTS 5 10 24

4665 LAMPSON AVENUE

TRAFFIC ANALYSIS

PREPARED BY: Charlene So, PE | cso@urbanxroads.com
Aric Evatt | aevatt@urbanxroads.com

Reference Number	Agency	Date
14501-07 TA Report	City of Los Alamitos	June 1, 2023

1.4 STUDY AREA

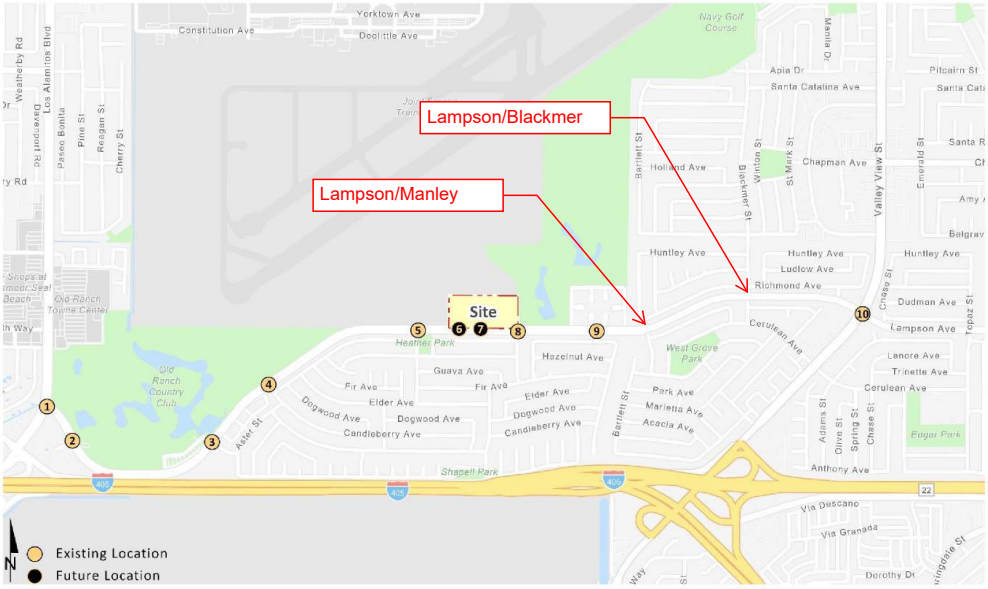
To ensure that this TA satisfies the City of Los Alamitos and City of Seal Beach's traffic study requirements, Urban Crossroads, Inc. prepared a Project traffic study scoping package for review by both agencies prior to the preparation of this report. This agreement provides an outline of the Project study area, trip generation, trip distribution, and analysis methodology. The agreement approved by both Cities is included in Appendix 1.1 of this TA.

The 10 study area intersections shown on Exhibit 1-3 and listed in Table 1-1 were selected for evaluation in this TA based on consultation with both agencies during the scoping process. The intent of a Congestion Management Program (CMP) is to more directly link land use, transportation, and air quality, thereby prompting reasonable growth management programs that will effectively utilize new transportation funds, alleviate traffic congestion and related deficiencies, and improve air quality. The Orange County CMP became effective with the passage of Proposition 111 in 1990 and most recently updated in 2021. The Orange County Transportation Authority (OCTA) adopted the 2021 CMP for the County of Orange in November 2021. (5) There are no CMP intersections within the study area.

TABLE 1-1: INTERSECTION ANALYSIS LOCATIONS

#	Intersection	Jurisdiction	CMP?
1	Seal Beach Bl. & Lampson Av.	Seal Beach	No
2	Old Ranch Plaza & Lampson Av.	Seal Beach	No
3	Basswood St. & Lampson Av.	Seal Beach	No
4	Candleberry Av. & Lampson Av.	Seal Beach	No
5	Heather St. & Lampson Av.	Seal Beach/Los Alamitos	No
6	Driveway 1 & Lampson Av.	Seal Beach/Los Alamitos	No
7	Driveway 2 & Lampson Av.	Seal Beach/Los Alamitos	No
8	Rose St. & Lampson Av.	Seal Beach/Los Alamitos	No
9	Tulip St. & Lampson Av.	Seal Beach/Los Alamitos	No
10	Valley View St. & Lampson Av.	Garden Grove	No

Why were the following intersections not studied?



11. Lampson/Manley
12. Lampson/Blackmer

(CONT.)

elaborate on HCM and ICU methodology and why HCM is appropriate to use at Valley View/Lampson.

Although the intersection of Valley View Street at Lampson Avenue is anticipated to operate at a deficient LOS based on the ICU methodology, a more detailed peak hour intersection operations assessment based on the HCM methodology indicates acceptable peak hour operations. As such, no intersection improvements have been recommended at the intersection of Valley View Street and Lampson Avenue. The intersection operations analysis worksheets for Opening Year Cumulative (2026) Without and With Project traffic conditions are included in Appendix 5.1 and Appendix 5.2 of this TA, respectively.

C-3

TABLE 5-1: INTERSECTION ANALYSIS FOR OPENING YEAR CUMULATIVE (2026) CONDITIONS

C-4

* **BOLD** = Level of Service (LOS) does not meet the applicable jurisdictional requirements (i.e., unacceptable LOS).

[1] Per the Highway Capacity Manual (6th Edition), overall average intersection delay and level of service are shown for intersections with a traffic signal or all way stop control. For intersections with cross street stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown.

ICU is reported in volume-to-capacity (v/c). ICU analysis conducted for signalized intersections only.

[2] CSS = Cross-street Stop; TS = Traffic Signal; **CSS** = Improvement

review comments in appendices, which I've attached at the end of this document and update values.

C-5

5.5 TRAFFIC SIGNAL WARRANTS ANALYSIS

All existing study area intersections are currently signalized. As such, no traffic signal warrant analysis has been conducted for Opening Year Cumulative (2026) Without Project traffic conditions. The intersection of Driveway 2 at Lampson Avenue is not anticipated to warrant a peak hour or planning-level (ADT) based warrant under Opening Year Cumulative (2026) With Project traffic conditions. The traffic signal warrant analysis worksheets for Opening Year Cumulative (2026) With Project traffic conditions are included in Appendix 5.3 of this TA.

Perform left turn queuing analysis to determine if left turn pockets are adequate.

C-6

Who provided timing sheet to you?

HCM 6th LOS	C

Responses to Comment C

City of Garden Grove, dated May 29, 2024.

C-1 The commenter provides redlines to the Project's Traffic Analysis (*Technical Appendix N1* of the Draft EIR). Pursuant to the commenter's request, the Project's Traffic Analysis has been revised and included as *Attachment G* to this Final EIR. Additionally, responses to each redline/comment bubble on the TA pages provided by the commenter are addressed below.

C-2 The commenter inquires why Lampson/Manley and Lampson/Blackmer were not studied. Both Manley and Blackmer are not identified as City General Plan roadways. However, both Manley and Blackmer are signalized intersections that provide access into existing residential neighborhoods to the north and south. Similar to the signalized intersections at Rose and Tulip, it is anticipated these intersections would also operate at acceptable LOS and would have similar affects to the intersections due to added eastbound and westbound through traffic from the Project, and therefore no further study of these intersections was required. Additionally, the Project scoping agreement was provided to the City of Garden Grove on August 24, 2022 requesting a review of the scoping agreement and applicable cumulative project information. The City did not identify these intersections for inclusion at the time of scoping, and for that reason as well these intersections were not included.

C-3 The commenter inquires why HCM methodology is appropriate to use at Valley View/Lampson. Pursuant to the commenter's request and the City of Garden Grove's traffic study guidelines, the HCM analysis for the intersection of Valley View and Lampson has been removed. Only ICU methodology has been utilized to evaluate the signalized intersection.

C-4 The commenter inquires about who provided the timing sheet and AM/PM cycle length of 130 seconds. The timing sheet was requested from each applicable agency at the time of scoping but was not responded to by Garden Grove. However, Pursuant to the commenter's request, the revised Traffic Analysis (*Attachment G* to this Final EIR) has been updated to reflect the 130-second cycle length denoted by City of Garden Grove staff for the intersection of Valley View and Lampson. This revision has been made to both peak hours for all study area intersections.

C-5 The commenter requests review of the comments made in the appendices and update values. Pursuant to the commenter's request, applicable cycle length, clearance time, and saturation flow rates have been updated as denoted, consistent with the City of Garden Grove's Guidelines. Consistent with the City's Guidelines the clearance or lost time has been updated to 5% of the cycle length which is rounded up to 7 seconds. The revised Traffic Analysis is included in *Attachment G* to this Final EIR.

C-6 The commenter requests to perform left turn queuing analysis to determine if left turn pockets are adequate at the intersection of Valley View/Lampson. Pursuant to the commenter's request, a queuing analysis has been performed for General Plan Buildout With Project traffic

conditions to verify the queuing needs for the left turn pockets and results are reported in Table 6-3 of the updated Traffic Analysis (see *Attachment G* to this Final EIR).

C-7 The commenter requests to review the City's TIA Guidelines regarding Minimum Green. Note that minimum green is not an applicable input parameter for the ICU methodology. However, consistent with the City's Guidelines the clearance or lost time has been updated to 5% of the cycle length which is rounded up to 7 seconds (see *Attachment G* to this Final EIR).

C-8 The commenter inquires about the ideal flow and that lane capacities of 1700 per hour per lane for through and turn lanes shall be used per the City of Garden Grove's TIA Guidelines. This comment is no longer applicable as the HCM based analysis for Valley View/Lampson has been removed. However, all of the ICU analysis for the intersection of Valley View/Lampson has been revised to assume 1700 vehicle per hour per lane per the City's Guidelines as noted in the comment.

COMMENT LETTER D

City of Seal Beach
CITY HALL 211 EIGHTH STREET
SEAL BEACH, CALIFORNIA 90740
(562)431-2527 • www.sealbeachca.gov

VIA U.S. MAIL AND E-MAIL

June 10, 2024

Tom Oliver, Associate Planner
City of Los Alamitos – Planning Department
3191 Katella Avenue
Los Alamitos CA 90720

SUBJECT: 4665 LAMPSON AVENUE PROJECT – DRAFT EIR
City of Seal Beach Comments

Dear Mr. Oliver:

Thank you for the opportunity to comment on the Draft Environmental Impact Report ("DEIR") as a Responsible Agency for the 4665 Lampson Avenue Project, dated April 2024. The Proposed Project ("Project") would demolish the existing site improvements and redevelop with 246 residential units, consisting of 55 single-family detached homes, 114 townhomes, and 77 affordable multi-family apartment homes. The Project site, while within the City of Los Alamitos, is situated on the City of Seal Beach ("Seal Beach") city limits where public access, infrastructure, and other services would likely be impacted. D-1

A series of comments follows, but in broad terms, we believe the DEIR should more thoroughly disclose the regulatory powers of the City of Seal Beach that apply to this Project, as well as impacts to the City of Seal Beach.

Section 1.0 INTRODUCTION

1. Section 1.6 (Responsible and Trustee Agencies) – The City of Seal Beach should be listed as a Responsible Agency as it has discretionary approval of the inter-jurisdictional sewer service agreement and other Project improvements. D-2

Section 3.0 PROJECT DESCRIPTION

1. Section 3.3.2 (Vehicle Access & Circulation) – Seal Beach did not request a traffic signal to be installed at the primary neighborhood, instead this was a traffic D-3

facilitation discussion topic that the Applicant considered. Please revise the text for accuracy.

We suggest the DEIR disclose that should the Applicant pursue a traffic signal, it must be applied for, approved, and permitted by Seal Beach. We further recommend mitigation measures be included to fund the capital and maintenance costs of the signal, as Seal Beach does not have identified revenue resources to assume these costs to serve the Project.

D-3 (CONT.)

2. Section 3.3.7 (Infrastructure Improvements – Water Infrastructure) – The document should disclose that the proposed Water Infrastructure is not in place and is contingent upon receiving a Seal Beach City Council-approved agreement with the proposed water purveyor.

D-4

3. Section 3.3.7 (Infrastructure Improvements – Sanitary Sewer Infrastructure) – The document should disclose that Seal Beach sanitary sewer service is contingent upon receiving a Seal Beach City Council-approved agreement for service outside the Seal Beach service area boundaries, and (as applicable) LAFCO approval.

   The DEIR assumes Seal Beach will approve an inter-jurisdictional sewer service agreement; however, discussion of alternatives should be provided should the agreement not be approved.

D-5

4. Section 3.3.7 (Infrastructure Improvements – Alternate Stormwater Drainage) – The document should disclose that the proposed alternative drains into Seal Beach right-of-way, which is contingent upon approval from the City of Seal Beach.

D-6

5. Section 3.4.3 (Parking Reduction Request) – The Project is proposing 102 on-site parking spaces less than the City of Los Alamitos' municipal code requires, although more than the minimum 441 required spaces, based on State Density Bonus (SB 1818). Please explain whether the provided parking will have any parking impacts on Seal Beach; and if there are impacts, how those impacts will be mitigated.

D-7

6. Table 3-6 (Project-Related Approvals/Permits) – Recommend expansion of the list to include approvals and permits from Seal Beach, including review and approvals for:

   a. SWPPP & Dewatering Plan
   b. Water Quality Management Plan
   c. Traffic Impact Study

D-8

d. Approval of infrastructure plans directly/indirectly related to Seal Beach. D-8 (CONT.)

Section 4.0 ENVIRONMENTAL ANALYSIS

1. Table 4.0-1 – Old Ranch Country Club Development is proposed to have 167 multi-family housing units, 25,340 square feet of medical office, and a 109,015 square foot expansion to the existing clubhouse which will include a 150-room hotel. Please clarify if all proposed components are included in the cumulative impact modeling. D-9

Section 4.9 HYDROLOGY AND WATER QUALITY

1. Section 4.9.1 B. Site Hydrology - It is stated that per field observation, flows may overflow onto Lampson Avenue from the existing on-site concrete channel. Please disclose any documentation of overflows onto Lampson Avenue due to clogging of the outlet pipe. D-10

2. Section 4.9.1 B. Site Hydrology: DEIR states contributing 25-year storm event street flows are contained below the top of curb along Lampson Avenue. This is inconsistent with field observations of multiple instances where the curb has been overtopped during storm events. Please explain the discrepancy and revise analysis as appropriate. D-11

3. Section 4.9.6.A – DEIR mentions that a SWPPP would be prepared for construction-related activities. The SWPPP shall also be submitted to Seal Beach for concurrence. As groundwater would likely be encountered during construction, a separate dewatering plan shall be submitted to Seal Beach for review and approval prior to Los Alamitos grading permit issuance. D-12

4. Section 4.9.6.B - As drainage could potentially affect Seal Beach, Seal Beach approval and acceptance of the WQMP shall be required. Applicant shall be responsible for monitoring, maintaining and reporting to Seal Beach, as code or otherwise required. D-13

5. Threshold C - There are flooding issues along Lampson Avenue under existing conditions. This condition is not consistent with the listed Level of Significance Before Mitigation of "Less than Significant Impact". The DEIR should clarify the analysis and explain the basis for this conclusion. D-14

6. Threshold C.A.1 – The DEIR assumes Seal Beach approval of emergency overflow onto Lampson Avenue in certain unforeseen circumstances. This Preferred Route has not been approved by Seal Beach. D-15

7. Clogged pipes should not take place provided that proper WQMP monitoring and maintenance are in place (see Comment #4, above), please explain why this scenario is discussed. D-16

8. The DEIR should analyze all potential drainage resulting from the site and address potential impacts. Please disclose any agreements where Seal Beach accepts Los Alamitos stormwater conveyance of any volume. D-17

9. Threshold C.A.2 – The DEIR provides an Alternate Storm Drain Facilities scenario. This scenario assumes drainage onto Lampson Avenue (Seal Beach jurisdiction), which would be contingent upon approvals from the City of Seal Beach. D-18

10. Other Storm Drain Facilities were considered; however, please substantiate the following: (1) the DEIR's conclusion that drainage to the north (JFTB/Arbor Park) is not allowable for use as detention, (2) Bolsa Chica Channel's capacity, and (3) the DEIR's conclusion of the inability to construct underground storm drain facility within the Lampson Avenue right-of-way. D-19

11. Sections 3-C-1 and 3-C-2 – Please disclose what thresholds were used to determine downstream hydrological impacts and how the determination of no impact was arrived at. D-20

12. Appendix I1 (Hydrology Study, Section 4.0) - If the northerly 10-foot proposed dedication is not included in the hydrology calculation, where will it be included? Please advise of the roles and responsibilities of this 10-foot dedication. D-21

13. Appendix I1 Preliminary Hydrology Report: Appendix C.1: The provided hydrograph calculations represent the unit hydrograph only. Please refer to the example problem under Section J.1.1 in the Orange County Hydrology Manual to complete the small-area runoff hydrograph calculation. D-22

Section 4.10 LAND USE PLANNING

1. Discussion should be expanded to include the City of Seal Beach within the regulatory framework, given the number of discretionary approvals from Seal Beach that are required to implement the Project. D-23

Section 4.14 RECREATION

1. Table 4.14-1 – The parks closest to the Project, and therefore likely to be most used by Project residents, are Seal Beach parks. Arbor Dog Park, Arbor Park D-24

Fields, and Heather Park are currently operated and maintained by Seal Beach and should be included in the table. D-24 (CONT.)

2. Section 4.14.5 (Impact Analysis) – The closest parks to the Proposed Project site are owned and/or operated by Seal Beach. DEIR speaks to the Applicant paying in-lieu fees to the City of Los Alamitos; however, the impacts are largely on Seal Beach parks. Deterioration and maintenance impacts to Seal Beach are not addressed. D-25

3. Appendix M (Park Impact Analysis) – The Arbor Park usage assumption is understated compared to what was observed and documented in Appendix Q (Arbor Park Parking Study & Layout). Please explain how this would change the Park Impact Analysis findings. D-26

Section 4.15 TRANSPORTATION

1. Section 4.15.4 – As the Proposed Project takes access off Lampson Avenue (Seal Beach jurisdiction), the basis for determining significance should be based on Seal Beach's guidelines. D-27

2. Table 4.15-1, Policy 1.7 – DEIR speaks to fair share requirements to the City of Los Alamitos; however, the surrounding roadway network serving the proposed Project site is within Seal Beach jurisdiction. Please clarify how the fair share would be used to benefit the Project site's surrounding roadway network within the City of Seal Beach. D-28

3. Table 4.15-1, Policy 4.3 – Site access modifications to the Proposed Project site are within Seal Beach jurisdiction; therefore, improvements shall require compliance with Seal Beach requirements and Seal Beach approval. D-29

4. Special Considerations – Section states "vehicles would have the option of …. and/or driving a short distance to available parking off-site and walking to the park." Please clarify where the intended off-site parking is, and if this would impact Seal Beach parking supply; and discuss how those potential impacts would be mitigated. D-30

5. Special Consideration – Construction traffic impacts shall be confirmed with Seal Beach. A Seal Beach approved permit is required. D-31

6. Appendix N1 (Traffic Impact Analysis, Section 1.1) - Please clarify whether a traffic signal would be provided at the main Project site access. D-32

7. Appendix N1 (Traffic Impact Analysis, Section 1.7) - Indicate that the queuing analysis conducted for the site driveway was for the unsignalized case. D-33

8. Appendix N1 (Traffic Impact Analysis, Section 3.3) - Title should be "City of Seal Beach" D-34

9. Appendix N1 (Traffic Impact Analysis, Exhibit 3-3) Show the location of the site on the map for context. D-35

10. Appendix N1 (Traffic Impact Analysis, Exhibit 3-4) Show the city boundaries to indicate Los Alamitos and Seal Beach. D-36

11. Appendix N1 (Traffic Impact Analysis, Exhibit 3-5) Show the location of the site on the map for context. D-37

12. Appendix N1 (Traffic Impact Analysis, Section 5.6) - Please show feasibility documentation of how recommended mitigation measure can be achieved within the geometric configuration without sacrificing westbound left-turn storage. D-38

13. Per City of Seal Beach Traffic Impact Study Guidelines, June 2020 (Guidelines) "intersections or roadway links having five or more reported accidents within the most recent 12-month period within significant influence of the project shall be analyzed and will require mitigation". No crash analysis was provided. D-39

14. Per Guidelines, "link analysis shall be performed on all sections of arterial highways and collector streets within the project area where the daily project traffic after distribution to the street system represents 1% or more of the total directional volume." No link analysis was performed. D-40

15. Appendix P (On-Site Parking Analysis, Local Project Precedents) - Consultant uses Los Alamitos Luxury Apartments parking requirements as a precedence for parking reduction from Code. Please explain how this reduction has impacted surrounding on/off street parking, if at all. D-41

16. Appendix Q (Arbor Park Parking Study) - The study references an AYSO peak parking demand of about 339 spaces. Does the Project include overflow provisions; and if so, explain those provisions. D-42

17. Appendix Q (Arbor Park Parking Study) - What would happen with the Caltrans park-and-ride? Are there requirements to provide a substitute location? D-43

18. Appendix Q (Arbor Park Parking Study, Option 2) - Seal Beach requests a Condition of Approval requirement to work with the American Youth Soccer Organization (AYSO) and Seal Beach to address the remaining parking shortfall. D-44

19. Seal Beach requests that all mitigation measures identified in this letter be incorporated into a Mitigation Monitoring and Reporting Program (MMRP) and that all project design features that avoid or reduce impacts and all mitigation measures also be incorporated into the project Conditions of Approval. Further, the City reserves the right to provide comments on the MMRP following its release. D-45

Section 4.17 UTILITIES AND SERVICE SYSTEMS

1. Section 4.17.5 (Impact Analysis – Water Facilities) – The document should disclose that the proposed Water Infrastructure is not in place and is contingent upon receiving a Seal Beach City Council-approved agreement with the proposed water purveyor. D-46

2. Section 4.17.5 (Impact Analysis – Wastewater and Wastewater Treatment Facilities) – The document should disclose that Seal Beach sanitary sewer service is contingent upon receiving a Seal Beach City Council-approved agreement for service outside the Seal Beach service area boundaries, and (as applicable) LAFCO approval.

   The DEIR assumes Seal Beach will approve an inter-jurisdictional sewer service agreement; however, discussion of alternatives should be provided should the agreement not be approved. D-47

3. Section 4.17.5 (Impact Analysis – Stormwater Drainage Facilities) – The document should disclose that the proposed alternative drains into Seal Beach right-of-way, which is contingent upon approval from the City of Seal Beach. D-48

4. Section 4.17.5 (Impact Analysis) - It appears that GSWC will be expanding water facilities to serve the Proposed Project site; however, please confirm that the effort would be reviewed under a separate environmental assessment. D-49

Seal Beach looks forward to coordinating with the City of Los Alamitos in identifying and mitigating Project impacts. If you have questions regarding this letter, please contact me at ilee@sealbeachca.gov. D-50

Sincerely,

Iris Lee
Director of Public Works

Alexa Smittle, Director of Community Development
Kathryne Cho, City Engineer/Deputy PW Director

Responses to Comment D

City of Seal Beach, dated June 10, 2024.

D-1 The commenter provides introductory remarks and summarizes the Project. The commenter states that the Draft EIR should more thoroughly disclose the regulatory powers of the City of Seal Beach that apply to this Project and impacts to the City of Seal Beach. The City acknowledges the City of Seal Beach's concerns related to its approval authority and impacts of the Project on Seal Beach services and infrastructure. Revisions to the Draft EIR have been made to address these concerns. Specific responses and revisions to the Draft EIR have been provided in responses to Comments D-2, D-4, D-5, and D-8, below.

D-2 The commenter states that the City of Seal Beach should be listed as a Responsible Agency as it has discretionary approval of the inter-jurisdictional sewer service agreement and other Project improvements. Please note that the City of Seal Beach was acknowledged as a responsible agency in the Draft EIR in Table 3-6, *Project-Related Approvals/Permits*. Pursuant to the commenter's request, the City of Seal Beach has also been added to the summary of responsible agencies in Section 1.0, *Introduction*, of the Draft EIR. Page 1-37 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

> For the Project, the <u>City of Seal Beach,</u> Orange County Airport Land Use Commission (ALUC), Regional Water Quality Control Board (RWQCB), Orange County Sanitation District (OCSD), Southern California Gas Company (SoCalGas), Southern California Edison (SCE), and the South Coast Air Quality Management District (SCAQMD) are identified as Responsible Agencies. Regardless, this EIR can be used by any Trustee Agency or Responsible Agency, whether identified in this EIR or not, as part of their decision-making processes in relation to the proposed Project.

D-3 The commenter states that the City of Seal Beach did not request a traffic signal to be installed at the primary neighborhood access and that the text be revised to reflect the change. Additionally, the commenter recommends that the proposed traffic signal should be applied for, approved, and permitted by the Seal Beach and mitigation measures be included to fund the capital and maintenance cost of the signal.

The City acknowledges that the City of Seal Beach did not request that a traffic signal be installed at the primary neighborhood entry. As demonstrated in Section 6.5 of the Traffic Analysis (*Attachment G* of this Final EIR), the traffic signal does not meet peak hour or planning level warrant criteria. As a result, the Project no longer proposes a traffic signal in this location. Additionally, refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for a detailed discussion of the traffic signal warrant analysis and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding the Project's safety impacts.

Page 3-4 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

> Vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Additionally, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site. The Project would implement stop controls for the southbound approach at all driveways on Lampson Avenue. The driveway for the apartment entry would be restricted to right-in/right-out only. Vehicular circulation would be unrestricted throughout the Project site. The primary neighborhood entry is not anticipated to meet a peak hour or planning level (daily volume) based traffic signal warrants. ~~However, per the request of the City of Seal Beach and in response to public comments during scoping, the Project will install a traffic signal at the primary neighborhood entry in coordination with both the City of Los Alamitos and City of Seal Beach~~.

D-4 The commenter states that the Draft EIR should disclose that the proposed water infrastructure is not in place and is contingent upon receiving a Seal Beach City Council-approved agreement with the proposed water purveyor.

Golden State Water Company (GSWC) is currently installing a public 12" water main from the intersection of Blackmer Street and Apia Drive to Lampson Avenue and Lunar Drive, approximately 600' east of the site, which provides adequate water services to support the development. As directed by GSWC, a New Business Application is required to request a main line extension on Lampson Avenue at Lunar Drive to the site, including in-tract public improvements. This would include the main line, water meters, and public fire hydrants to service the Project site. A separate encroachment permit from the City of Seal Beach and Agreement of Franchise Facilities between GSWC and the City of Seal Beach is required. Pursuant to the commenter's request, Page 3-9 and Table 3-6 on Page 3-18 of the Draft EIR have been revised as shown below and in Section 5.0 of this Final EIR.

> Golden State Water Company would provide water service to the Project. Domestic water lines would be provided as shown in Figure 3-23, *Utility Plan*. In addition, the Project would include a 1,200 feet watermain extension between the eastern driveway and the existing GSWC watermain at the intersection of Lunar and Lampson. The Project would include, at a minimum, an 8" watermain size for the extension. <u>The proposed water infrastructure would require an encroachment permit from the City of Seal Beach and Agreement of Franchise Facilities between GSWC and the City of Seal Beach.</u>

City of Seal Beach	• Issuance of Public Works Permit (encroachment permit) for infrastructure

	improvements within the Lampson Ave. right-of-way. • Agreement of Franchise Facilities between GSWC and the City of Seal Beach • Agreement between the Rossmoor/Los Alamitos Area Sewer District and the City of Seal Beach for Inter-Jurisdictional Wastewater Services. • Approval of stormwater discharge/conveyance, if required. • Approval Water Quality Management Plan, if required. • Approval of infrastructure plans directly/indirectly related to Seal Beach, if required.

D-5 The commenter states that the Draft EIR should disclose that Seal Beach sanitary sewer service is contingent upon receiving a Seal Beach City Council-approved agreement for service outside the Seal Beach service area boundaries and LAFCO approval, if required. Additionally, the commenter states that the Draft EIR should include an alternative that addresses what would occur if Seal Beach does not approve an inter-jurisdictional sewer service agreement.

The Project site is located within Rossmoor/Los Alamitos Area Sewer District's (RLAASD) sewer service area boundaries. RLAASD does not, however, have sewer lines that connect to the Project site. As a result, since approximately January 1975, the City of Seal Beach has been providing sewer services to the Project site.

It is expected that the proposed agreement for Inter-Jurisdictional Wastewater Services (Wastewater Agreement) between the City of Seal Beach and RLAASD is exempt from review and/or approval by LAFCO pursuant to California Government Code §56133. This statute generally states that a city or district may provide new or extended services by contract or agreement outside its jurisdictional boundary only if it first requests and receives written approval from LAFCO in which the affected territory is located (Cal. Gov. Code §56133(a)). A subsection of this statute, §56133(e), however, provides limited exceptions to where LAFCO approval is not required for new or extended services. First, §56133(e)(1) states that the section does not apply to, "(1) Two or more public agencies where the public service to be provided is an alternative to, or substitute for, public services already being provided by an existing public service provider." (Cal. Gov. Code §56133(e)(1)). The Wastewater Agreement between the City of Seal Beach and RLAASD represents a straightforward substitution of one service provider (Seal Beach) for another (RLAASD), and no third party service provider will be displaced by the agreement. Second, §56133(e)(4) states that the section does not apply to, "(4) An extended service that a city or district was providing on or before January 1, 2001." (Cal. Gov. Code §56133(e)(4)). The City of Seal Beach began providing sewer service to the Project

site on or about January 1975. Therefore, it is anticipated that the agreement will be exempt from review and approval by LAFCO. Nevertheless, the Project Applicant will follow all applicable and required LAFCO processes and procedures related to sanitary sewer service. Additionally, the Project Applicant would be required to pay connection or service fees to the City of Seal Beach to provide service.

The Project site is within the Rossmoor-Los Alamitos Area Sewer District service area, however there are limited to no feasible alternative sanitary sewer connection options within the surrounding area in the event the City of Seal Beach does not approve an inter-jurisdictional sewer service agreement[2]. Any other option would require prohibitively expensive construction, as well as difficult to resolve engineering issues related to crossing conflicts, elevation changes, and potential downstream capacity concerns because the existing site is not currently oriented to discharge to this area. Furthermore, the existing site (when the office use was previously occupied) discharged to the City of Seal Beach public sanitary sewer system and therefore the site is currently configured such that discharges to Seal Beach sanitary sewer service would be most efficient and logical.

Pursuant to the commenter's request, Page 3-9 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

> Although the Project site is in the City of Los Alamitos, sanitary sewer will be served by the City of Seal Beach via the Rossmoor-Los Alamitos Area Sewer District. The Rossmoor/Los Alamitos Sewer District would provide wastewater conveyance and treatment services to the Project. A lift station and force main is proposed at the southeast corner of the Project site (refer to Figure 3-23, *Utility Plan*). The Project would connect the force main to the existing 8-inch sanitary sewer line at the southeast corner of the site. All connections to existing sanitary sewer lines require approval by the City of Seal Beach and would be constructed in accordance with the City of Seal Beach standards. Additionally, an agreement between the Rossmoor/Los Alamitos Area Sewer District and the City of Seal Beach would be required for Inter-Jurisdictional Wastewater Services.

D-6 The commenter states that the Draft EIR should disclose that the proposed alternate stormwater drainage would flow onto Seal Beach right-of-way and requires approval from the City of Seal Beach.

---

[2] *The City of Seal Beach has indicated that the inter-jurisdictional sewer service agreement requires Seal Beach City Council approval and therefore is considered a discretionary action. This EIR is intended to provide the environmental clearance for future discretionary and ministerial actions relating to this Project, including the inter-jurisdictional sewer service agreement.*

The preferred treatment of stormwater runoff for the Project would flow to the existing 18" storm drain, located near the southwest corner of the site, that ultimately discharges to the existing JFTB drainage facilities consistent of at-grade depressed basins and hydraulically connected pipes. However, it is noted in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR and in the updated Hydrology Study (*Attachment E* of this Final EIR), that in the event the existing 18" pipe is clogged or the existing at-grade depressed basins reach capacity, stormwater runoff from the site overflows onto Lampson Avenue in the existing condition based on field survey topographic findings and photographic evidence. Therefore, a parkway drain is proposed on Lampson Avenue, near the southwest corner of the site, to provide proper emergency overflow, matching the historic drainage condition. Any proposed improvements and/or stormwater runoff tributary to Lampson Avenue is subject to the City of Seal Beach's review and approval.

Pursuant to the commenter's request, Page 3-10 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

> An alternate plan for stormwater conveyance is proposed in the event the preferred route (historical flow) across the JFTB, as described above, is not available. The alternate would include stormwater outflow onto Lampson Avenue within Seal Beach right-of-way, which would subsequently flow west to an existing stormwater catch basin approximately 2,200 feet west of the Project site. Stormwater outflow onto Lampson Avenue would require installation of a parkway drain on Lampson and a related encroachment permit from the City of Seal Beach. Due to existing flooding concerns on Lampson Avenue, the onsite pump system would allow for low flows to enter Lampson Avenue up until the time that the flows begin to exceed the allowed 25-year storm event in Lampson Avenue. At that point, peak flows would be detained onsite. Once the flows are no longer above the allowed 25-year storm event in Lampson Avenue, onsite flows to Lampson Avenue would resume. Under the Alternate Off-Site Storm Drain plan, stormwater will be detained and mitigated onsite such that Lampson Avenue meets OC Hydrology flooding standards. Approximately 32,300 cf of water would need to be detained onsite to ensure that offsite 25-year flows are not exceeded. Detained volumes would be discharged from the site via a pump system at flow rates that do not exceed the existing condition flow rates.

D-7 The commenter states that the Project is proposing 102 on-site parking spaces less than the City of Los Alamitos Municipal Code requirements. The commenter requests an analysis to determine whether provided parking will have any parking impacts on Seal Beach. A parking evaluation was included in the Draft EIR and a Parking Analysis was provided as *Technical Appendix P* of the Draft EIR. Refer also to Master Response 2.1.3, *Parking*, for a detailed

discussion on parking impacts. As concluded, the Project's proposed parking supply is appropriate to serve the potential parking needs of the Project. As a result, Project residents would have adequate parking on-site and would not park on streets in the adjacent neighborhood in the City of Seal Beach.

D-8 The commenter recommends including the Stormwater Pollution Prevention Plan (SWPPP) & Dewatering Plan, Water Quality Management Plan, Traffic Impact Study, and approval of infrastructure plans directly/indirectly related to Seal Beach in the list of approvals and permits required from Seal Beach.

The City of Los Alamitos, as Lead Agency, is ultimately responsible for review and approval of the Project's Traffic Analysis and Water Quality Management Plan per the County of Orange MS4 Permit requirements. The City acknowledges that the City of Seal Beach, as a Responsible Agency, has review and approval authority for infrastructure plans directly and indirectly related to Seal Beach. However, the SWPPP and Dewatering Plan is a State-reviewed and permitted document, therefore the State Water Resources Control Board (SWRCB) is also noted as a Responsible Agency for the SWPPP.

Pursuant to the commenter's request, Page 3-8 of the Draft EIR has been revised as shown in Response to Comment D-4 and in Section 5.0 of this Final EIR.

D-9 The commenter asked for clarification as to whether all proposed components of the Old Ranch Country Club Development were included in the Project's cumulative analysis. The development capacity for the Old Ranch Country Club Development identified in the cumulative impact modeling was based on the City of Seal Beach's Housing Element Sites Inventory capacity identified for this site. To ensure the cumulative impact modeling is as accurate as possible, the modeling was updated, where appropriate, to include the additional development capacities identified by the commenter. Specifically, the Traffic Analysis (*Attachment G* to this Final EIR) has been updated to include all proposed components of the Old Ranch Country Club for cumulative traffic impact analysis related to congestion or automobile delay. Except with respect to projects specific to transportation improvements, the CEQA Guidelines specify that a project's effects on automobile delay shall not constitute a significant environmental impact. As such, the updated Traffic Analysis does not change the findings of the Draft EIR, since LOS is not a significant impact under CEQA.

With respect to noise impacts (off-site traffic) related to this update in the modeling, there was a slight cumulative increase from existing conditions of 71.6 CNEL dBA to General Plan Buildout conditions of 73.2 CNEL dBA along a portion of Lampson Avenue. Without the additional development capacity at Old Ranch Country Club, the General Plan Buildout conditions with Project were 72.8 CNEL dBA. As a result, the General Plan Buildout with Project, including building of Old Ranch Country Club results in a cumulative increase of 0.4 CNEL dBA. However, the Project's cumulative contribution to the General Plan Buildout

condition, including with the inclusion of the additional development capacities at the Old Ranch Country Club is 0.2 dBA (see Segment #1, Table 8-9 in *Attachment F* to this Final EIR). Because the cumulative incremental noise level threshold is 1.5 dBA, the Project's cumulative contribution of 0.2 dBA is not a significant cumulatively considerable impact under CEQA. Therefore, adjusting the cumulative impact modeling to include this additional development capacity at Old Ranch Country Club does not result in a new significant environmental impact resulting from the Project or a substantial increase in the severity of an impact requiring recirculation of the draft EIR. The Project's Noise Impact Analysis has been updated accordingly and included as *Attachment F* to this Final EIR.

D-10 The commenter requests disclosure of any documentation of overflows onto Lampson Avenue due to clogging of the outlet pipe. Per field survey topographic findings and photographic evidence, existing stormwater runoff from the site ponds within the existing concrete channel and overflows on to Lampson Avenue near the southwest corner and through existing driveways along the property frontage. A Ponding Exhibit (*Attachment E* to this Final EIR) has been prepared for the existing conditions based on the tributary 100-year storm event which shows the water ponding based on the primary overflow elevation near the southwest corner of the site. Because water ponding currently exists even with the existing JFTB stormwater conveyance facilities, it can be reasonably assumed that the downstream, existing JFTB facilities are clogged.

D-11 The commenter requests clarification on the discrepancy related to the 25-year storm event street flows being contained below the top of curb along Lampson Avenue. A hydrologic analysis and street capacity analysis per Orange County Hydrology & Hydraulics Manuals were prepared for Lampson Avenue along the site frontage. Calculation results indicate that Lampson Avenue flooding does not occur along the Project site, but rather downstream at the sump condition near the Old Ranch Country Club. The hydrologic analysis and street capacity analysis for Lampson Avenue has been expanded downstream to determine the depth of flow (see *Attachment E* to this Final EIR). Two areas were analyzed; Section A-A is located near the southwest corner of the site and Section B-B at the existing low-point sump catch basin approximately 2,100 linear feet from the site near the Old Ranch Country Club. Both street capacity analysis indicate that the 100-year water surface elevation is held within the street and less than the existing top of curb elevations.

D-12 The commenter requests that the Project's SWPPP be submitted to City of Seal Beach for concurrence, and that a separate dewatering plan be submitted to the City of Seal Beach for review and approval prior to the City of Los Alamitos issuing grading permits. The Project would comply with state requirements related to the submittal of a SWPPP. The SWPPP and Dewatering Plan will be made available as referenced to the City of Seal Beach, however these are State-reviewed documents that will be processed, approved and permitted by the State Water Resources Control Board (SWRCB) as appropriate. Both documents shall be approved by the SWRCB prior to issuance of grading permit by the City of Los Alamitos.

D-13 The commenter requests that the Project's Water Quality Management Plan (WQMP) require approval from the City of Seal Beach and the Project Applicant shall be responsible for monitoring, maintaining, and reporting to the City of Seal Beach. The Project's Water Quality Management Plan will be reviewed and approved by the City of Los Alamitos and Seal Beach, as may be required. If required, a maintenance covenant/agreement will be executed by the property owner for monitoring, maintenance, and operation of all privately installed water quality facilities per City of Los Alamitos code requirements and to the satisfaction of the City of Seal Beach. It should be noted that City of Los Alamitos is ultimately the responsible agency for review/ approval of the Water Quality Management Plan per the County of Orange MS4 Permit requirements. Refer to Response to Comment D-8.

D-14 The commenter states that flooding issues along Lampson Avenue under existing conditions is not consistent with the listed level of significance before mitigation of "Less than Significant Impact." The commenter requests clarification of the analysis under threshold c in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, and an explanation of the basis for the conclusion.

The Draft EIR documented the existing hydrological conditions in Section 4.9 of the Draft EIR. As stated, based on field observations from C&V, the existing concrete channel along the site's southerly property line currently ponds back to the existing driveway and overflows onto Lampson Avenue. Based on the existing topography of the site, in the event the outlet pipe was to become clogged, the existing overflows from the property would flow onto Lampson Avenue at the low point at the southwest corner of the site (refer to Page 4.9-1 of the Draft EIR). As required by CEQA, in determining whether the Project's impacts are significant, the Draft EIR evaluated the Project's impacts compared to existing environmental conditions. The analysis provided under Threshold c demonstrates that the Project has been designed (under two stormwater drainage facility options) to detain peak runoff flows on-site to ensure that increased flow rates do not exceed the existing condition flow rates. As such, downstream facilities would not be hydrologically impacted by the proposed Project. Impacts would be less than significant and no mitigation is required (refer to Pages 4.9-18 to 4.9-19).

Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, related to flooding impacts. Thus, no further response is required.

D-15 The commenter states that the preferred route for emergency overflow onto Lampson Avenue has not been approved by the City of Seal Beach. Emergency overflow in the existing condition is based on field survey topographic elevations and photographic evidence when stormwater runoff that cannot discharge through the existing 18" storm drain pipe to existing JFTB facilities will overflow on to Lampson Avenue. This is a historic condition. Refer to Ponding Exhibit (*Attachment E* to this Final EIR) prepared for the existing condition identifying the inundation area during the 100-year storm event in the existing condition. As stated in Response to Comment D-4, an encroachment permit may be required to implement the

preferred drainage route. However, there are no required agreements to allow for drainage overflow onto Lampson Avenue, as this is a historic, existing drainage condition. Lampson Avenue is considered a public right-of-way and can accept stormwater runoff from adjacent sites. The existing topography identifies that stormwater runoff in the historic condition overflows onto Lampson Avenue near the southwest corner of the site.

D-16 The commenter states that clogged pipes should not take place provided that proper WQMP monitoring and maintenance are in place and requests explanation of why this scenario is discussed. Page 4.9-17 of the Draft EIR states that in the event the stormwater pump fails or the outlet pipe becomes clogged, the emergency overflow for the site will flow onto Lampson Avenue matching historical drainage patterns. Although proper maintenance would ensure that clogged pipes should not take place, this has occurred historically as observed and documented in the existing conditions (refer to Page 4.9-1 of the Draft EIR).

Appropriate maintenance and frequency information is part of the Project's Water Quality Management Plan and recorded maintenance covenant/agreement as required per the County of Orange. However, in the remote event that proposed water quality and/or drainage facilities fail, become clogged, and/or are not maintained properly, emergency overflow through the Project site is provided and incorporated into the grading/drainage design. This ensures that the proposed building finish floor elevations are set at minimum 1' higher than the 100-year water surface elevation for the tributary area and a safe vehicular path of travel is being maintained for emergency vehicles and proper maneuvering throughout the site. As part of the County of Orange's MS4 Permit requirements, the responsible reviewing agency, such as the City of Los Alamitos is obligated to conduct yearly inspections of installed water quality facilities and report to the County.

D-17 The commenter states that the Draft EIR should analyze all potential drainage resulting from the site and disclose any agreements where Seal Beach accepts Los Alamitos stormwater conveyance of any volume. Refer to Response to Comment D-14. The Draft EIR demonstrates that the Project has been designed (under two stormwater drainage facility options) to detain peak runoff flows on-site to ensure that increased flow rates do not exceed the existing condition flow rates. As such, downstream facilities would not be hydrologically impacted by the proposed Project. Impacts would be less than significant and no mitigation is required (refer to Pages 4.9-18 to 4.9-19).

The existing site generally flows in a north to south direction into an existing westerly flowing concrete channel along the site's southerly property line. The westerly flowing channel is collected via an offsite 18-inch corrugated metal pipe (CMP) that flows under the offsite driveway to Arbor Park and discharges into an offsite earthen channel on the west side of the driveway. Runoff flows within this earthen channel are then collected by an existing 24-inch CMP that flows westerly, discharges into a westerly flowing earthen channel within the JFTB, and then drains to the Old Ranch Country Club to the south. Runoff is ultimately conveyed

downstream into the San Gabriel River. There is currently not an agreement in place that Seal Beach accept Los Alamitos stormwater conveyance of any volume. Additionally, there are no required agreements to allow for drainage overflow onto Lampson Avenue, as this is considered a historic, existing drainage condition. Lampson Avenue is considered a public right-of-way, therefore can accept stormwater runoff from adjacent sites. Based on the existing topography, stormwater runoff in the existing historic condition overflows onto Lampson Avenue near the southwest corner of the site.

D-18 The commenter states that the Alternate Storm Drain Facilities scenario would be contingent upon approval from the City of Seal Beach. Refer to Response to Comment D-6 for the revised language in the Draft EIR related to approval from City of Seal Beach. The Project Applicant will be required to seek approvals from Seal Beach, as applicable. As stated in Response to Comment D-4, an encroachment permit may be required to implement the preferred drainage route. There are no required agreements to allow for drainage overflow onto Lampson Avenue, as this is a historic, existing drainage condition. Lampson Avenue is considered a public right-of-way and can accept stormwater runoff from adjacent sites.

D-19 The commenter requests that the Draft EIR substantiate that drainage to the north is not allowable for use as detention, Bolsa Chica Channel's capacity, and the conclusion of the inability to construct an underground storm drain facility within the Lampson Avenue right-of-way.

Option #3 to outlet runoff to Arbor Park/ JFTB north of the site was evaluated, however based on topography and existing surface drainage facilities, stormwater runoff from Arbor Park drains south to the same downstream discharge location near the southwest corner of the site and Lampson Avenue. If JFTB does not allow for discharge at the southwest corner of the site, then JFTB is unlikely to allow a northerly discharge offsite. In addition, the existing site does not flow northerly to the Arbor Park/ JFTB area, as the site drains in the southwesterly direction. Therefore, directing stormwater runoff to the north would change the historic drainage pattern which can potentially cause downstream flooding because it would add additional flows to this area that do not currently occur.

Option #4 to outlet to the Golf Course, east of the site which conveys stormwater runoff to the Bolsa Chica Channel was evaluated, however similar to Option #3, the golf course is considered JFTB property, therefore requires JFTB approval for discharge and the site is not tributary to these existing facilities. Regardless of whether the Bolsa Chica Channel has capacity to accept stormwater runoff from the site, discharging to the Golf Course and subsequent Bolsa Chica Channel would change the historic drainage pattern which can potentially cause downstream flooding because it would add additional flows to this area that do not currently occur.

Option #5 to construct a public storm drain system within Lampson Avenue that drains east to the Bolsa Chica Channel was evaluated and as with Option #4 the site does not historically drain to this facility, therefore a direct connection to the channel would change the historic drainage pattern which may potentially cause downstream flooding, since it would add additional flows to an area that do not currently occur within the channel or site. In addition, there are existing public facilities such as gas, water, sewer mains located within Lampson Avenue which will prevent a feasible gravity fed storm drain system from being installed.

D-20 The commenter requests disclosure of what threshold was used to determine downstream hydrological impacts and how the determination of no impact was arrived at. Per methods identified within the Orange County Hydrology Manual, the proposed increased peak flow/volume generated by the Project will be contained with an upstream onsite detention and pump system with a controlled outflow to match the existing historic overflow condition; therefore, no downstream impact is anticipated. The downstream junction structure will be equipped with a Connector Pipe Screen (CPS) device for full trash capture of the 1-yr, 1-hr peak flow rate sized for the entire site to ensure trash collection prior to overflow.

D-21 The commenter inquires whether the northerly 10-foot proposed dedication was included in the hydrology calculation and, if not, where will it be included. Additionally, the commenter inquires about the roles and responsibilities of the 10-foot dedication. The Project's Preliminary Hydrology Study (*Attachment E* of this Final EIR) has been revised providing additional information regarding the 10' wide dedication area along the northerly property line. To summarize those revisions, the 10' wide dedication area is outside the proposed residential development and will not be tributary to the Project site's proposed storm drain system. Existing conditions show that this area of the site currently drains in the northerly direction. Page 3-4 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

The Project Applicant proposes to dedicate or grant an easement for the northern 10 feet of property abutting Arbor Park and Arbor Dog Park to the City of Los Alamitos, or other entity, with authority over the two parks.

D-22 The commenter states that the provided hydrograph calculations from the Project's Preliminary Hydrology Report (*Technical Appendix I1* of the Draft EIR) represent the unit hydrograph only and refers to the example problem in the Orange County Hydrology Manual to complete the small-area runoff hydrograph calculation.

Pursuant to the commenter's request, the Small Unit Hydrograph and detention routing calculations for the onsite proposed condition have been updated as part of the revised Preliminary Hydrology Report (*Attachment E* of this Final EIR) which utilizes the requirements set forth in Orange County Hydrology Manual and confirms the required upstream detention and outflow mitigation discharge rate compared to the existing condition.

Existing historic drainage patterns will be maintained without causing the potential increase of tributary flooding; therefore, impacts would be less than significant.

D-23 The commenter states that the discussion in Section 4.10, *Land Use and Planning*, of the Draft EIR, should be expanded to include the City of Seal Beach within the regulatory framework, given the number of discretionary approvals from Seal Beach that are required to implement the Project. The City acknowledges that the Project would need approval from the City of Seal Beach for certain off-site infrastructure improvements and agreements. Pursuant to the Commenter's request, Page 4.10-33 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

4. City of Seal Beach General Plan

Table 4.10-3, *Seal Beach General Plan Consistency Analysis*, provides an analysis of the Project's consistency with all applicable General Plan goals and policies that were adopted for the purpose of avoiding or mitigating an environmental effect. As shown in Table 4.10-3, the Project would not conflict with any of the applicable General Plan goals and policies. Accordingly, the Project would have a less-than-significant impact with respect to a conflict with the City of Los Alamitos General Plan and mitigation is not required.

Table 4.10-3 Seal Beach General Plan Consistency Analysis

General Plan Policy	**Consistency**
Circulation Element	
Objective: Provide a citywide system of safe, efficient, and attractive bicycle and pedestrian routes for commuter, school, and recreational use.	
Policy: Maintain existing pedestrian facilities and require new development to provide pedestrian walkways between developments, schools, and public facilities.	**No Conflict.** The Project would promote future residents of the Project to walk, bike, or ride the bus to and from developments, schools, and public facilities. Project frontage improvements such as sidewalk improvements, the existing bike lanes on Lampson Avenue adjacent to the Project site, and bike storage would promote residents and students to utilize these facilities. Therefore, the Project would not conflict with this policy.
Growth Management Element	

General Plan Policy	Consistency
Goal 3: Cooperate with Neighboring Jurisdictions and the County of Orange and County of Los Angeles to Achieve Reduction in Regional Traffic Congestion.	
Policy 3.1 - The City shall participate in inter-jurisdictional planning forums within its established growth management areas as adopted by the Regional Advisory Planning Council and will continue to participate in forums with neighboring or affected jurisdictions to address transportation or other planning issues.	**No Conflict.** The City of Seal Beach is a responsible agency for the Project. Table 3-6, *Project-Related Approval/Permits*, lists all approvals and decisions required by the City of Seal Beach for the Project. Additionally, the City of Los Alamitos and City of Seal Beach have been in coordination throughout the planning process for this Project including the preparation of the Traffic Analysis. Therefore, the Project would not conflict with this policy.

D-24 The commenter states that Arbor Dog Park, Arbor Park Fields, and Heather Park which are currently operated and maintained by Seal Beach should be included in Table 4.14-1, *Existing Parks and Recreation Facilities*, of the Draft EIR. The purpose of Table 4.14-1 is to identify parks and recreational facilities that are located within the City of Los Alamitos and its sphere of influence and as presented in the City's General Plan. As such, Arbor Dog Park and Arbor Park Fields were identified in Table 4.14-1 of the Draft EIR (refer to Page 4.14-2 of the Draft EIR), because they are located in Los Alamitos, while Heather Park was not included in this table. Details on the City of Seal Beach Park system and parks closest to the Project site operated by Seal Beach, including Arbor Park, Arbor Dog Park, and Heather Park, are described on Pages 4.14-4 through 4.14-6 of the Draft EIR. Accordingly, no corrections or revisions to the Draft EIR are required.

D-25 The commenter states that the closest parks to the Project are owned and operated by the City of Seal Beach and that while the Draft EIR includes a discussion of the Project applicant paying in-lieu fees to the City of Los Alamitos, it does not address impact on the deterioration and maintenance on Seal Beach. Section 4.14, *Recreation*, of the Draft EIR analyzes the Project's impact on existing neighborhood and regional parks, including those closest to the Project site. The Draft EIR concluded that implementation of the Project would not result in significant impacts related to the physical deterioration of recreational facilities and impacts would be less than significant. (refer to Pages 4.14-9 and 4.14-10).

D-26 The commenter states that the Arbor Park usage assumption is understated in the Park Impact Analysis (*Technical Appendix M* of the Draft EIR) compared to what was observed and documented in the Arbor Park Parking Study and Layout (*Technical Appendix Q* of the Draft EIR).

A direct comparison of the two reports mentioned by the commenter cannot be made because each report was prepared for a separate and distinct purpose and each analysis was based on conservative assumptions for the issue being addressed (i.e., impacts to parks and impacts of parking to AYSO events, respectively). The purpose of the Park Impact Analysis (*Technical Appendix M*) is to evaluate the potential impact of future Project residents' regular use of parks in close proximity to the Project site, including Arbor Park, Arbor Dog Park, and Heather Park. On the other hand, the purpose of the Arbor Park Parking Study and Layout (*Technical Appendix Q*) is to specifically address parking needs for AYSO 150 events and observed peak parking demand during AYSO events with all nine soccer fields in use concurrently.

Nevertheless, the Park Impact Analysis (*Technical Appendix M*) acknowledges the AYSO events. Specifically, Pages 2 and 3 of *Technical Appendix M* states:

> *Arbor Park is primarily a permitted park, which means groups/organizations/individuals must apply to the City of Seal Beach for approval for requested dates and times to utilize the park. Applicants provide information including, but not limited to, the type of activity and must follow the rules and regulations set forth by the City of Seal Beach. Arbor Park is primarily permitted to AYSO Region 159, serving the Los Alamitos, Rossmoor, and Seal Beach area. AYSO Region 159 was permitted to use Arbor Park for 1,052 hours in each calendar year 2022 and 2023. No other groups received permits. Typically, Arbor Park is permitted on Saturdays and weekday afternoons for AYSO Region 159 games and practices. Arbor Park's permitted use is comparable to other similar active parks in the City of Seal Beach system.*
>
> *Although Arbor Park is primarily a permitted park, the park is available and used by others outside of permitted times. Residents participate in allowable nonpermitted/passive uses such as informal/family sports activities (i.e., soccer, ultimate frisbee, playing catch with the football/baseball) and walking. In accordance with "Recreation Areas, Their Design and Equipment," a carrying capacity (referring to the number of visitors that can be accommodated in a park without unacceptable impacts to the quality of the visitor experience) can be calculated for a park utilizing the amenities, such as playgrounds, baseball fields, and open lawn areas present in the park. In general, a carrying capacity is not calculated for a community park that an agency can monitor for usage through a permitting process. However, for the purpose of this analysis, during non-permitted times, it is estimated at full capacity that 270 visitors can be accommodated at Arbor Park. Based upon City of Seal Beach staff monitoring and observations, Arbor Park is currently not at full capacity usage.*

Therefore, the Park Impact Analysis (*Technical Appendix M*) identifies that Arbor Park is a permitted park and also identifies the number of AYSO games and practices in the 2022 and 2023 calendar years. The analysis calculates carrying capacity in accordance with "Recreation Areas, Their Design and Equipment,"[3] prepared for the National Recreation Association, and therefore, the analysis utilizes an appropriate industry standard and does not understate the usage of Arbor Park. Accordingly, no corrections or revisions to the Draft EIR are required.

D-27 The commenter states that as the Project takes access off Lampson Avenue, the basis for determining significance should be based on Seal Beach's guidelines. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, this traffic study has been prepared in accordance with the City of Los Alamitos' requirements (as the Lead Agency for the Project) and the City of Seal Beach's Transportation Analysis Guidelines (June 2020, referred to as City Guidelines) as the study area intersections are located within the City of Seal Beach. The recommendations for off-site roadway improvements within the jurisdiction of the City of Seal Beach were made in compliance with Seal Beach Guidelines. As stated previously, the CEQA Guidelines specify that a project's effects on automobile delay shall not constitute a significant environmental impact.

D-28 The commenter requests clarification on how the fair share requirements would be used to benefit the Project's site's surrounding roadway network within the City of Seal Beach. As stated in the Traffic Analysis (*Attachment G* of this Final EIR), transportation improvements are funded through a combination of improvements constructed by the Project or fair share contributions. When off-site improvements are identified with a minor share of responsibility assigned to proposed development, the approving jurisdiction may elect to collect a fair share contribution or require the development to construct improvements. The Project's fair share contribution to Seal Beach Boulevard and Lampson Avenue is 3.8% in the AM peak hour and 5.1% in the PM peak hour (see Table 7-1 of *Attachment G* of this Final EIR). As stated previously, the CEQA Guidelines specify that a project's effects on automobile delay shall not constitute a significant environmental impact. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

D-29 The commenter states that site access modifications to the Project site are within Seal Beach jurisdiction and improvements shall require approval and compliance with Seal Beach. The City acknowledges and agrees with the commenter. Table 3-6, *Project-Related Approvals/Permits*, of the Draft EIR acknowledges that the Project would require an encroachment permit for infrastructure improvements within the Lampson Avenue right-of-way.

---

[3] *"Recreation Areas, Their Design and Equipment" – second edition, George D. Butler, The Ronald Press Company, New York, copyright 1958, by National Recreation Association Incorporated, pg. 96*

D-30 The commenter requests clarification on where the intended off-site parking is with respect to AYSO events and whether it would impact Seal Beach's parking supply.

Parking shortfalls relative to parking demand during AYSO Saturday games are not considered a significant environmental impact under CEQA. As discussed in the Draft EIR, there is a potential for inadequate parking during AYSO Saturday games as it currently operates (see Pages 4.2-25 and 4.2-26). If there is inadequate parking, visitors to the AYSO games would have the option of dropping off players or parking off-site. It is expected that any off-site parking would occur in available parking spaces and within walking distance (0.25 to 0.5 mile radius) of Arbor Park.

D-31 The commenter states that construction traffic impacts shall be confirmed with Seal Beach and an approval permit from Seal Beach is required. The City acknowledges that the Project would require an encroachment permit for infrastructure improvements, including construction, within the Lampson Avenue right-of-way. Refer to Response to Comment D-29.

D-32 The commenter requests for clarification on whether a traffic signal would be provided at the main Project site access. As evaluated and determined in the Project's Traffic Analysis (see *Attachment G* of this Final EIR), the primary neighborhood entry is not anticipated to meet a peak hour or planning level (daily volume) based traffic signal warrants. Therefore, the Project does not propose installation of a traffic signal. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*.

D-33 The commenter requests that Traffic Analysis indicate that the queuing analysis conducted for the site driveway was for the unsignalized case. As provided in the updated Traffic Analysis (*Attachment G* of this Final EIR), both Project driveways on Lampson Avenue were evaluated assuming cross-street stop-controlled intersections for the purposes of the queuing assessment.

D-34 The comment requests that the title in Section 3.3 of the Project's Traffic Analysis (*Technical Appendix N1* of the Draft EIR) to be revised to the City of Seal Beach. Pursuant to the commenter's request, the Project's Traffic Analysis has been updated accordingly and included as *Attachment G* to this Final EIR.

D-35 The commenter requests Exhibit 3-3 of the Traffic Analysis to show the location of the Project site for context. Pursuant to the commenter's request, the Project's Traffic Analysis has been updated accordingly and included as *Attachment G* to this Final EIR.

D-36 The commenter requests that Exhibit 3-4 of the Traffic Analysis show city boundaries to indicate Los Alamitos and Seal Beach. Pursuant to the commenter's request, the Project's Traffic Analysis has been updated accordingly and included as *Attachment G* to this Final EIR.

D-37 The commenter requests Exhibit 3-5 of the Traffic Analysis to show the location of the Project site for context. Pursuant to the commenter's request, the Project's Traffic Analysis has been updated accordingly and included as *Attachment G* to this Final EIR.

D-38 The commenter requests feasibility documentation of how the recommended mitigation measure can be achieved within the geometric configuration without sacrificing westbound left-turn storage.

Pursuant to the commenter's request, the Traffic Analysis has been revised to include a queuing analysis to demonstrate the feasibility of the recommended improvement at Seal Beach Boulevard and Lampson Avenue. Additionally, a queuing analysis was performed at the intersection of Valley View Street and Lampson Avenue. The updated Traffic Analysis is included in *Attachment G* to this Final EIR. The queuing analysis was conducted for General Plan Buildout Without and With Project traffic conditions since these analysis scenarios have the highest traffic volumes and would result in the most conservative analysis (see Table 6-4 of *Attachment G*) As shown, there are no queuing issues in the turn lanes anticipated at Seal Beach Boulevard and Lampson Avenue. The intersection of Valley View Street and Lampson Avenue is anticipated to have the same queuing issues under both Without and With Project traffic conditions where the addition of Project traffic would not add more than one vehicle length to any of the deficient turning movements (approximately 25-feet). Therefore, the recommended improvement at Seal Beach Boulevard and Lampson Avenue is feasible and the Project's fair share contribution would be 5.1% (see Table 7-1 of the Traffic Analysis in *Attachment G*). As stated previously, the CEQA Guidelines specify that a project's effects on automobile delay shall not constitute a significant environmental impact; therefore, the recommended improvement is not mitigation measure.

D-39 The commenter states the City of Seal Beach Traffic Impact Study Guidelines state that intersections or roadway links with more than five or more reported accidents within the most recent 12-month period within significant influence of the project shall be analyzed and will require mitigation. Further, the commenter states that no crash analysis was provided in the Draft EIR. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, and *Attachment H, Safety Evaluation*. Thus, no further response is required.

D-40 The commenter states that no link analysis was provided pursuant to the City of Seal Beach Traffic Impact Study Guidelines. As discussed previously, transportation impacts under CEQA is now based on VMT rather than automobile delay- LOS (traffic congestion). However, the LOS analysis was prepared pursuant to the City of Los Alamitos and Seal Beach Transportation Guidelines.

The following roadway segments, in boldface, were evaluated. since the Project would represent 1% or more of the total direction volume under General Plan Buildout traffic conditions:

#	Roadway	Segment Limits	Project	2045 WP	Project %
1	Seal Beach Bl.	North of Lampson Av.	308	48,860	0.6%
2	**Seal Beach Bl.**	**South of Lampson Av.**	**538**	**47,018**	**1.1%**
3	**Lampson Av.**	**Seal Beach Bl. to Old Ranch Plaza**	**846**	**23,220**	**3.6%**
4	**Lampson Av.**	**Old Ranch Plaza to Basswood St.**	**846**	**20,854**	**4.1%**
5	**Lampson Av.**	**Basswood St. to Candleberry Av.**	**846**	**16,825**	**5.0%**
6	**Lampson Av.**	**Candleberry Av. to Heather St.**	**846**	**15,012**	**5.6%**
7	**Lampson Av.**	**Heather St. to Rose St.**	**846**	**15,287**	**5.5%**
8	**Lampson Av.**	**Rose St. to Tulip St.**	**692**	**15,686**	**4.4%**
9	**Lampson Av.**	**Tulip St. to Valley View St.**	**692**	**16,878**	**4.1%**
10	**Lampson Av.**	**East of Valley View St.**	**230**	**12,915**	**1.8%**
11	Valley View St.	North of Lampson Av.	154	50,882	0.3%
12	Valley View St.	North of Lampson Av.	308	49,969	0.6%

The roadway segment analysis indicates that all study area roadway segments would operate at an acceptable LOS under all analysis scenarios. As such, no roadway segment widening is recommended.

D-41 The commenter requests clarification on how the reduction in parking from the Los Alamitos Luxury Apartment project impacts surrounding on/off street parking.

The discussion of the Los Alamitos Luxury Apartment project in the Parking Analysis (*Technical Appendix P* of the Draft EIR) is presented to demonstrate a precedent for a reduction in parking standards in the City of Los Alamitos, which is a jurisdiction that has a high parking standard in comparison to neighboring Seal Beach parking requirements. The analysis demonstrates that the Project would provide adequate parking for future residents and visitors of the Project and therefore, would not require any off-site parking. Refer to Response to Comment D-7 and Master Response 2.1.3, *Parking*, for a discussion of parking impacts.

D-42 The commenter inquires whether there will be overflow provisions during AYSO peak parking demand. The Arbor Park Parking Study and Layout (*Technical Appendix Q* of the Draft EIR) considers options for parking overflow that would be voluntarily provided by the Project if there is a parking shortage. For non-CEQA informational purposes, Walker Consulting found that any parking shortages at AYSO events could be eliminated in their entirety if AYSO spread out its soccer events and eliminated the large number of overlapping games. Refer to Response to Comment D-30 and Master Response 2.1.3, *Parking*, for a discussion of parking impacts. Thus, no further response is required.

D-43 The commenter inquires about the Caltrans park-and-ride and whether there are requirements for a substitute location. The park-and-ride that previously occupied the Project site has not

been in operation for the past 18 months and when in operation had limited usage. There are no requirements or proposal to provide a substitute park-and-ride location.

D-44 The commenter requests a condition of approval requirement to work with the American Youth Soccer Organization (AYSO) and Seal Beach to address the remaining parking shortfall. Parking shortfalls relative to parking demand during AYSO Saturday games are not considered a significant environmental impact under CEQA; therefore, the City has no legal authority under CEQA to impose a condition to this effect. However, the Project Applicant has agreed to coordinate with the City of Seal Beach and AYSO to help coordinate usage of Arbor Park, as needed.

D-45 The commenter requests that all mitigation measures identified in this letter be incorporated into a Mitigation Monitoring and Reporting Program (MMRP) and that all project design features that avoid or reduce impacts and mitigation measures also be incorporated into the Project's conditions of approval. Additionally, the commenter states the City of Seal Beach reserves the right to provide comments on the MMRP following its release. The City acknowledges that all mitigation measures identified in the Draft EIR will be incorporated into the MMRP and that project design features that reduce environmental impacts will be incorporated as conditions of approval. The MMRP will identify all Project Design Features and Mitigation Measures incorporated into the Project and is incorporated as *Attachment O* of this Final EIR. Pursuant to CEQA Guidelines Section 15088, the Final EIR will be distributed to the City of Seal Beach a minimum of 10-days prior to the City's hearing on the Project.

D-46 The commenter states that the Draft EIR should disclose that the proposed water infrastructure is not in place and is contingent upon receiving a Seal Beach City Council-approved agreement with the proposed water purveyor. This comment is duplicative of Comment D-4; refer to Response to Comment D-4.

D-47 The commenter states that the Draft EIR should disclose that Seal Beach sanitary sewer service is contingent upon receiving a Seal Beach City Council-approved agreement for service outside the Seal Beach service area boundaries and discussion of alternatives should be provided should the agreement not be approved. This comment is duplicative of Comment D-5; refer to Response to Comment D-5.

D-48 The commenter states that the Draft EIR should disclose the proposed alternative drains into Seal Beach right-of-way, which is contingent upon approval from the City of Seal Beach. This comment is duplicative of Comment D-6; refer to Response to Comment D-6.

D-49 The commenter requests confirmation of whether Golden State Water Company (GSWC) will be expanding water facilities to serve the Project site under a separate environmental assessment. GSWC has indicated that it has adequate water supply to serve the Project site (see *Attachment K, Will-Serve Letters*). The expansion of water infrastructure is identified as part

of the Project and analyzed in the Draft EIR. As described in Section 3.0, *Project Description*, of the Draft EIR, GSWC would provide water service to the Project. Domestic water lines would be provided as shown in Figure 3-23, *Utility Plan*, of the Draft EIR, and include a 1,200 feet watermain extension between the eastern driveway and the existing GSWC watermain at the intersection of Lunar and Lampson. The Draft EIR analyzed impacts associated with the connection to GSWC infrastructure and the extension of the 1,200 foot off-site watermain. Potential impacts related to installation of the off-site water main are addressed under construction-related impacts throughout the Draft EIR, and no significant impacts have been identified. Therefore, a separate environmental assessment is not required or anticipated to provide water service to the Project.

D-50 The commenter makes concluding remarks and the City acknowledges Iris Lee as the contact person for the City of Seal Beach. Thus, no further response is required.

RE: DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE 4665 LAMPSON RESIDENTIAL PROJECT DATED APRIL 24, 2024, STATE CLEARINGHOUSE NUMBER 2022090476

Dear Tom Oliver,

The Department of Toxic Substances Control (DTSC) received a Draft Environmental Impact Report (DEIR) for the 4665 Lampson Residential Project (Project). The Project would demolish the existing office building and surface parking lot on the 12.3-acre property and redevelop the Project site with 246 residential units consisting of a variety of different product types. These housing types include 55 single family detached homes, 114 townhomes, and 77 for rent affordable multi-family apartment homes. After reviewing the project, DTSC recommends and requests consideration of the following comments: E-1

1. Based on the Limited Phase II Environmental Site Assessment (ESA), there was no evidence of a significant release of potential chemicals of E-2

concern to the subsurface in the area investigated, which included in the diesel above ground storage tank (AST), elevator equipment room, and parking lot. Although low levels of total petroleum hydrocarbons (TPHd), lead and select organochlorine pesticides (OCPs) were detected in Site soils, the concentrations were well below residential screening levels, and thus, are de minimis in nature and do not warrant further investigation or mitigation.

Also, the Phase II ESA states: “Although the detected concentrations of arsenic found at the Site exceed the residential screening level, no levels are less than the DTSC upper bound background concentration of 12 mg/kg. Therefore, the on-site detections of arsenic are de minimis in nature and do not warrant further investigation or mitigation. Based on the results of the assessment activities detailed herein, the potential chemicals of concern detected in soil in the areas assessed (e.g., diesel AST, elevator equipment room, parking lot release area, and Site wide historical agricultural use) are not indicative of a significant subsurface chemical release has occurred. The detected concentrations found during this investigation are considered to be de minimis in nature for the proposed residential redevelopment, and it is EFI Global’s opinion that no further assessment is warranted at this time with respect to the RECs (recognized environmental conditions) identified.”

Since potential chemicals of concerns were found in the Phase II ESA and the detected concentrations of arsenic found at the site exceed the residential screening level and remain in excess of DTSC's upper bound background concentration of 12 mg/kg, DTSC recommends that all constituent concentrations meet screening levels in accordance with DTSC's Preliminary Endangerment Assessment (PEA) Guidance Manual. If the constituent concentrations do not meet screening levels in accordance with DTSC guidance, the following comments are also recommended:

E-2
(CONT.)

2. The City of Los Alamitos enter into DTSC's Standard Voluntary Agreement (SVA) program or seek oversight with your Certified Local Agency - Orange County Health Care Agency - so a proper evaluation of the Project is completed. If entering into an SVA with DTSC, the FLUXX portal link is provided and the page also has a link to the Fluxx User Guide that can help you navigate the system. You will need to create a new profile and once in the system, click "Start a Request for Lead Agency Oversight Application." DTSC recommends that once the SVA is signed, a Preliminary Endangerment Assessment Report (PEA Report) be submitted for DTSC review. The PEA Report shall summarize all existing data and provide an evaluation of the possible risk to current and future users of the site. If you have any questions about the application portal, please contact the DTSC Brownfield Coordinator Gregory Shaffer or contact the Application Portal Inbox. E-3

3. If buildings or other structures are to be demolished on any project sites included in the proposed project, surveys should be conducted for the presence of lead-based paints or products, mercury, asbestos containing materials, and polychlorinated biphenyl caulk. Removal, demolition, and disposal of any of the above-mentioned chemicals should be conducted in compliance with California environmental regulations and policies. In addition, sampling near current and/or former buildings should be conducted in accordance with DTSC's Preliminary Endagngerment Assessment (PEA) Guidance Manual. E-4

4. All imported soil and fill material should be tested to ensure any contaminants of concern are within DTSC's and U.S. Environmental Protection Agency (USEPA) Regional Screen Levels (RSLs) for the intended land use. To minimize the possibility of introducing contaminated soil and fill material there should be documentation of the origins of the soil or fill material and, if applicable, sampling be conducted to ensure that the imported soil and fill material meets screening levels outlined in the PEA for the intended land use. E-5

The soil sampling should include analysis based on the source of the fill and knowledge of the prior land use. Additional information can be found by visiting DTSC's Human and Ecological Risk Office (HERO) webpage.

E-5 (CONT.)

DTSC appreciates the opportunity to comment on the DEIR for the Project. Thank you for your assistance in protecting California's people and environment from the harmful effects of toxic substances. If you have any questions or would like any clarification on DTSC's comments, please respond to this letter or via email for additional guidance.

Responses to Comment E

Department of Toxic Substances Control (DTSC), dated June 5, 2024.

E-1 The commenter provides introductory remarks and summarizes the Project. Responses to comments are provided in responses to Comments E-1 to E-6, below; thus, no further response is required.

E-2 The commenter summarizes results from the Phase II Environmental Site Assessment (ESA; *Technical Appendix H2* of the Draft EIR), which stated that there was no evidence of a significant release of potential chemicals of concern to the subsurface in the area investigated. Although there were low levels of total petroleum hydrocarbon, lead and select organochlorine pesticides detected in the soil, the concentrations were well below residential screening levels, and thus do not warrant further investigation. The commenter recommends that all constituent concentrations meet screening levels in accordance with DTSC's Preliminary Endangerment Assessment (PEA) Guidance Manual since the detected arsenic remains in excess of DTSC's upper bound background concentration of 12 mg/kg.

As to the comment regarding arsenic concentrations, this comment references text in the original Phase II ESA that included a typographical error. The Phase II ESA (see Section 5.0 and *Attachment C1* to this Final EIR) has been updated to correct this typographical error and to more accurately reflect the fact that the detected arsenic concentrations found at the Project site are all *below the upper bound concentration of 12 mg/kg*, and thus, they are trace or background concentrations that do not warrant further investigation or mitigation. The corrected Phase II ESA now reads: "Although the detected concentrations of arsenic found at the site exceed the residential screening level, all levels are less than the DTSC upper bound background concentration of 12 mg/kg."

E-3 The commenter provides information on procedures related to DTSC's Standard Voluntary Agreement (SVA) program and PEA Report. Refer to Response to Comment E-2 related to the constituent concentrations meeting screening levels in accordance with DTSC guidance. Due to the change made in the Phase II ESA (see Section 5.0 and *Attachment C1* to this Final EIR), all constituent concentrations are lower than the screening levels. As such, the commenter's recommendation to enter into DTSC's Standard Voluntary Agreement program or seek oversight with the Certified Local Agency – Orange County Health Care Agency is not required.

E-4 The commenter states that lead-based paints (LBP) or products, mercury, asbestos containing materials (ACM), and polychlorinated biphenyl (PCB) caulk surveys should be conducted if there are buildings or structures that will be demolished. Additionally, removal, demolition, and disposal should be conducted in compliance with California environmental regulations and policies. As discussed in Section 4.8, *Hazards and Hazardous Materials*, of the Draft EIR, the use of asbestos-containing materials (ACM, a known carcinogen) and lead-based paint (LBP)

(a known toxic), both of which are considered hazardous materials, was a common building construction method prior to 1978 and may be present in the existing building. All proposed demolition activities would be required to comply with all applicable federal, State, and local hazardous materials regulation, which includes mandatory provisions for the safe removal, transport, and disposal of PCBs, ACMs and LBP. Additionally, the Project is required to comply with South Coast AQMD Rule 1403 (Asbestos Emissions) and Title 17 of the CCR, Division 1, Chapter 8: Accreditation, Certification, and Work Practices for Lead-Based Paint and Lead Hazards applies. Compliance with the above regulatory requirements would ensure that removal of ACMs or LBPs would not result in a significant hazard to the public or the environment through routine transport, use, or disposal of hazardous materials, and impacts would be less than significant (refer to Page 4.8-16 of the Draft EIR).

Moreover, EFI prepared a Phase II ESA for the Project site dated September 22, 2022 based on a geological survey and soil sampling conducted on August 16, 2022. Select soil samples were collected and analyzed for Total Petroleum Hydrocarbons (TPH) as gasoline (TPHg), TPH as diesel (TPHd), TPH as oil (TPHo), volatile organic compounds (VOCs), PCBs, organochlorine pesticides (OCPs), arsenic, and lead (Pb). Analytical results for PCBs indicated concentrations were not detected above the laboratory reporting limits in any of the soil samples analyzed (refer to Page 4.8-5 of the Draft EIR). However, caulk containing PCBs were used in buildings in the 1950s through the 1970s and may be present in the existing building. Therefore, the Project would be required to comply with all applicable federal, State, and local hazardous materials regulation, which includes mandatory provisions for the safe removal, transport, and disposal of PCBs including Title 40, Code of Federal Regulations, Part 761.

There is also a potential for mercury containing products at the existing buildings. When a mercury-containing product breaks and the mercury is released, the exposed mercury can evaporate and become an invisible, odorless toxic vapor. Mercury-containing products exhibit hazardous characteristics as described in the California Code of Regulations, Title 22, chapter 11 and are classified as a type of hazardous waste called “universal waste.” Universal wastes are hazardous wastes that pose a lower immediate risk to people and the environment when handled properly. Due to this lower risk, universal wastes can be handled and transported under more relaxed rules compared to other hazardous wastes.[4] The Project would be required to comply with all applicable federal, State, and local hazardous materials regulations including California Health and Safety Code Section 25214.8.16 to prevent mercury releases.

[4] *https://dtsc.ca.gov/toxics-in-products/mercury-waste/*

Pursuant to the commenter's request, Page 4.8-16 of the Draft EIR has been revised as shown in Section 5.0 of this Final EIR to include the above discussion regarding the potential of PCBs and mercury.

E-5 The commenter states that all imported soil and fill material should be tested to ensure any contaminants of concern are within DTSC's and U.S. Environmental Protection Agency (USEPA) Regional Screening Levels (RSLs) for the intended land use. As stated in Section 3.0, *Project Description*, of the Draft EIR, approximately 6,280 cubic yards of soil import would be required. As a condition of approval, prior to importation onsite, the Project Applicant shall submit evidence to the Planning Department that all imported fill materials have been tested and meet the regulatory screening levels. Thus, no further response is required.

E-6 The commenter provides concluding remarks. The City acknowledges Tamara Purvis as the contact person for DTSC for the Project. Thus, no further response is required.

Subject: Notice of Availability (NOA) of a Draft Environmental Impact Report – 4665 Lampson Avenue Project

Dear Mr. Oliver:

The Orange County Transportation Authority (OCTA) appreciates the opportunity to review and comment on the 4665 Lampson Avenue Project. The following comments are provided for you:

- On page 2-11, Section 2.5.9 (Transportation), please remove any reference of the project area being served by OCTA Routes 42 and 123. Neither route has stops within 0.5 miles the project area, the OCTA transit accessibility standard. F-1
- On page 4.10-27, Policy 4.7 (Transit stops), please note that the nearest OCTA bus stop from the project site is 1.2 miles for Route 123 (located at the intersection of Valley View Street and Lampson Avenue) and 1.6 miles for Route 42 (located at the intersection of Seal Beach Boulevard and Lampson Avenue). Please revise the document to reflect the correct distances. F-2
- On page 4.15-1, Section B (Existing Transit Services), please remove any mention of the project site being served by OCTA bus routes. OCTA considers properties within a 0.5-mile radius of a bus stop to be served by that stop/route. The nearest OCTA routes (42, 56, 123) have stops that are between 1.2 and 1.6 miles from the project site, which is greater than the 0.5-mile OCTA transit accessibility standard. Therefore, the project site is not served by these routes. F-3
- On page 4.15-13, in the table, Policy 4.7 (Transit stops), the nearest stop for Route 123 is 1.2 miles away from the project site, and the nearest stop for Route 42 is 1.6 miles away from the project site. Please revise to reflect the correct distances. F-4

We also have the following comment for Appendix N1 (Traffic Analysis): F-5

Orange County Transportation Authority
550 South Main Street / P.O Box 14184 / Orange / California 92863-1584 / (714) 560-OCTA (6282)

- On page 23, Section 3.4 (Transit Service), please remove any reference of the project area being served by OCTA Routes 42 and 123. Neither route has stops within 0.5 miles of the project area, the OCTA transit accessibility standard.

F-5 (CONT.)

We encourage open communication with OCTA on any matters discussed herein. Should you have any comments or questions, please contact me at (714) 560-5907 or at dphu@octa.net.

F-6

Sincerely,

Dan Phu
Manager, Environmental Programs

DP:tc

Orange County Transportation Authority
550 South Main Street / P.O Box 14184 / Orange / California 92863-1584 / (714) 560-OCTA (6282)

Responses to Comment F

Orange County Transporation Authority (OCTA), dated June 5, 2024.

F-1 The commenter requests that the Draft EIR remove any reference of the Project area being served by OCTA Routes 42 and 123 and that neither route has stops within 0.5 miles the project area, the OCTA transit accessibility standard. Pursuant to the commenter's request, Page 2-11 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

~~The Project site is currently served by~~ Orange County Transit Authority (OCTA) ~~with~~ currently provides bus service along Seal Beach Boulevard, Valley View Street, and Lampson Avenue (east of Valley View Street). ~~The Project site is served by OCTA bus routes 42 and 123.~~ The nearest OCTA bus stops to the Project site are Route 123, located at the intersection of Valley View Street and Lampson Avenue (approximately 1.2 miles from the Project site) and Route 42, located at the intersection of Seal Beach Boulevard and Lampson Avenue (approximately 1.6 miles from the Project site).

F-2 The commenter provides the distance to the nearest OCTA bus stops and requests revisions to the Draft EIR to reflect the correct distances. Pursuant to the commenter's request, Page 4.10-27 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

Policy 4.7 **Transit stops.** Improve and maintain safe, clean, comfortable, well-lit, and rider friendly transit stops that are well marked and visible to motorists.	**Not Applicable.** The nearest OCTA Route 123 bus stop from the Project site is approximately 1.2~~1.6~~ miles walking distance at the intersection of Valley View Street and Lampson~~Champman~~ Avenue. The nearest OCTA Route 42 bus stop from the Project site is approximately 1.6~~3.5~~ miles walking distance at the intersection of Seal Beach Boulevard and Lampson Avenue.~~Katella Avenue and Los Alamitos Boulevard~~ Therefore, this policy is not applicable to the Project.

F-3 The commenter requests to removal of any mention of the Project site being served by OCTA bus routes. Pursuant to the commenter's request, Page 4.15-1 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

As shown in Figure 4.15-1, *Existing Transit Routes*, ~~the Project site is currently served by the~~ Orange County Transportation Authority (OCTA) ~~with~~ currently provides bus service along Seal Beach Boulevard, Valley View Street, and Lampson Avenue (east of Valley View Street). OCTA route 42 runs along Seal Beach Boulevard and serves Seal Beach to Orange with an

existing stop provided at the intersection of Seal Beach Boulevard and Lampson Avenue ~~Katella Avenue and Los Alamitos Boulevard~~. The existing stop is approximately 1.6~~3.5~~ miles ~~walking distance~~ from the Project site. Bus service frequency is approximately 20-minute intervals during the peak commute hours and 40 minutes during other times of the day during a typical weekday. OCTA Route 123 serves the city of Anaheim to city of Huntington Beach via Malvern Avenue, Valley View Street, and Bolsa Chica. There are existing stops along Valley View Street with an existing stop at Chapman Avenue. The nearest OCTA Route 123 existing stop is located approximately 1.2~~1.6~~ miles ~~walking distance~~ from the Project site to the intersection of Lampson~~Champman~~ Avenue and Valley View Street. Bus service frequency is approximately 60-minute intervals on a typical weekday for OCTA Route 123.

F-4 The commenter requests revisions to the Draft EIR to reflect the correct distances of the Project site's proximity to the nearest bus stops. Pursuant to the commenter's request, Page 4.15-13 of the Draft EIR has been revised as shown below and in Section 5.0 of this Final EIR.

Policy 4.7 **Transit stops.** Improve and maintain safe, clean, comfortable, well-lit, and rider friendly transit stops that are well marked and visible to motorists.	**Not Applicable.** The nearest OCTA Route 123 bus stop from the Project site is approximately 1.2~~1.6~~ miles walking distance at the intersection of Valley View Street and Lampson~~Champman~~ Avenue. The nearest OCTA Route 42 bus stop from the Project site is approximately 1.6~~3.5~~ miles walking distance at the intersection of Seal Beach Boulevard and Lampson Avenue.~~Katella Avenue and Los Alamitos Boulevard~~ Therefore, this policy is not applicable to the Project.

F-5 The commenter requests removal of any reference of the Project area being served by OCTA in the Project's Traffic Analysis (*Technical Appendix N1* of the Draft EIR). Pursuant to the commenter's request, the Project's Traffic Analysis has been updated accordingly and revisions have been included in Section 5.0 and *Attachment G* to this Final EIR.

F-6 The commenter provides concluding remarks The City acknowledges Dan Phu as the contact person for OCTA. Thus, no further response is required.

Comment Letter 1

From: Alexandria A

Date: Friday, May 24, 2024 8:06:16 PM

IRONSCALES couldn't recognize this email as this is the first time you received an email from this sender tankwh@gmail.com

I strongly approve this project site to build more housing on Lampson. Selfish NIMBYs who want to protect their property values at the expense of limiting housing availability for millenials and gen z are absolutely disgusting and are parasitic to our community. There is a culture of fear mongering and hatred of "poor people" who will move into losal and the boomers who live here use that to stop necessary development and modernization for our community.

Boomers dont get to ruin the future of young people. Millenials are the first generation who are poorer than their parents. Boomers have already ruined so much - the environment, the economy, and now housing. Boomers have lived lavish and excessive lives.

Build housing and let young people have a chance at living a good life!!!

1-1

Responses to Comment 1

Alexandria, A., dated May 24, 2024.

1-1 The commenter expresses approval of the Project. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

Comment Letter 2

To: toliver@cityoflosalamitos.org
Subject: Lampson Project
Date: Sunday, May 19, 2024 2:25:47 PM

Hello,

Please convey to those who are making the decisions:

Of the items listed regarding concerns and comments about this project, this is the one that caught my most attention:

2-1

"7. This area is a lovely and relatively quiet community where most households are families where we feel safe and it's not congested by traffic, pollution or too much housing squeezed into a small area.

2-2

This project causes a HUGE loss to the hundreds of families calling College Park East and the surrounding area “home”. **Only a win for the developer."**

Please listen to the COMMUNITY, not the developer.

Thank you.

2-3

Kindly,
Lelisa

Rossmoor resident

Responses to Comment 2

Balderama, Lelisa, dated May 19, 2024.

2-1 The commenter requests that comments and concerns about the Project be conveyed to the decision maker. No further response to this comment is required.

2-2 The commenter expresses concerns with traffic congestion, pollution, and the Project's proposed density. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

2-3 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

Responses to Comment 3

Balderama, Lelisa, dated April 30, 2024.

3-1 The commenter expresses concerns related to ALUC and Caltrans Division of Aeronautics findings related to the Project site. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*.

3-2 The commenter opposes the Project based on the ALUC and Caltrans Division of Aeronautics findings, increased traffic and pollution. The City acknowledges the commenter's concerns and will be forwarded to decision makers.

Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. As discussed in Section 4.2, *Air Quality*, of the Draft EIR, the Project would not exceed the South Coast AQMD localized significance thresholds for assessing localized health impacts from criteria air pollutants during construction. Therefore, sensitive receptors would not be exposed to substantial pollutant concentrations during Project construction. Further, Project traffic would not create or result in a CO "hotspot." Therefore, sensitive receptors would not be exposed to substantial pollutant concentrations due to the Project, and impacts would be less than significant (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR).

3-3 The commenter expresses concerns with ALUC and Caltrans Division of Aeronautics findings as to the Project site. This comment is duplicative of Comment 3-1; refer to Response to Comment 3-1 and refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*.

3-4 The commenter opposes the Project due to increased traffic and pollution. This comment is duplicative of Comment 3-2; refer to Response to Comment 3-2.

Comment Letter 4

May 13, 2024

Tom Oliver, Associate Planner
City of Los Alamitos
Planning Department
3191 Katella Avenue
Los Alamitos, CA 90720

Mr. Oliver,

I have been a resident of Seal Beach for 38 years. I live in College Park East (CPE) which is the neighborhood right across the street from the proposed Lampson Park Place development. I strongly oppose the development of this project. There is a shortage of housing in California but growth should not negatively impact the quality of life of current residents. If this plan is approved, the quality of life for the residents in my neighborhood and the surrounding neighborhoods, will forever change for the worse. These are some of the specific areas of concern I have: 4-1

#1 TRAFFIC

Your *Notice of Availability of a Draft Environmental Impact Report* states "impacts would remain significant and unavoidable." The residents of CPE, Parkewood-Los Alamitos, West Garden Grove and anyone else who must travel on Lampson Avenue is already well aware of the traffic problems we currently face. The additional traffic from Lampson Park Place, and possibly the Old Ranch Golf Course project, will create massive traffic delays and more accidents. The stretch of Lampson Avenue between Heather Street and Candleberry Avenue is called "Dead Man's Curve" due to the numerous accidents, some with fatalities, that have occurred there. Very recently, a driver lost control and flipped her car at Lampson and Rose Street. The intersection at Lampson and Manley, just east of your proposed development, has also been the scene of accidents, some resulting in death. Lampson Avenue is the only way to get anywhere because the JFTB is to the north and the Naval Weapons Station is to the south! 4-2

Currently, cars on Lampson waiting to turn north onto Seal Beach Boulevard during peak hours are sometimes backed up all the way to Basswood Avenue. Cars

heading east on Lampson from Seal Beach Boulevard also experience traffic. When there are large events with many cars arriving at the Old Ranch Golf Course at the same time, the left turn lane into that facility cannot accommodate all the cars and they back up and impede the smooth flow of traffic. Cars traveling in the left lane must suddenly stop or quickly change lanes to avoid collisions. This creates very hazardous situations. Similarly, drivers turning left into the Lampson Park Place neighborhood could face similar issues.

The addition of another light between Heather and Rose Streets will also affect the flow of traffic. The homes in CPE that back up to Lampson at that signal will be subjected to noise and light pollution which they currently do not experience and certainly never expected to when they purchased their homes.

4-2 (CONT.)

#2 – HYDROLOGY REPORT

The Hydrology report states that your representatives did converse with City of Seal Beach staff so you should be aware of the major flooding issues CPE experiences from Heather Street all the way to the very west end of the tract. This problem has existed since the neighborhood's inception due to improper grading by the developer. Over the years, and even more so during these most recent storms in January and February of this year, flooding has caused significant distress and damage to property. Many cars were flooded and sustained electrical damage for a total loss. The flood waters went into garages and even into homes. Some sunken living rooms were substantially flooded and residents had to worry about mold and how to thoroughly dry the walls. People could not even leave their homes. Some residents with large trucks had to rescue people who could not get home because their cars stalled in the deep waters. One such truck owner helped a mother whose car stalled on Ironwood when driving her children home from school. He pulled the children out of her car windows, secured them in his truck, and drove over the curb and onto the grass to deliver them safely to their front door. The storm drain at Elder and Ironwood had no grate and the water was so deep that it formed a vortex which could have easily swept a child away!

According to the 2008 and 2019 studies done for the City of Seal Beach by AKM Consulting Engineers, they stated that in addition to the inadequate drainage capabilities in CPE which hinder our storm water runoff from making it over to the Old Ranch Golf Course, when the lake has reached its capacity, the storm water

4-3

flows back into our neighborhood creating an even bigger problem. Your Hydrology report states that the stormwater from your project will also flow through the JFTB to the Old Ranch Country Club. If the Golf Course cannot currently accommodate the stormwater from CPE, how will it be able to take even more from your proposed development? Or will your project's runoff make it to the golf course first, causing even less water from CPE making it onto the golf course? That would create an even more treacherous situation with deeper flood waters on our affected streets.

Your report further states that if the JFTB does not allow stormwater flows from your project to outlet to their property, then the alternate design is to outlet the flows onto Lampson Avenue near Heather Street. Your report even states that the outlet pipe could clog and create emergency overflow. In a heavy storm, the runoff could be so deep on Lampson that it rises above the curb and floods the backyards of the homes on Ironwood and even further exacerbates the flooding on Ironwood. As you are aware, the City of Seal Beach currently has no timeline to install any capital improvements to alleviate the flooding in CPE.

4-3 (CONT.)

#3 – SANITARY SEWER ANALYSIS

The City of Seal Beach is in the process of proposing a Water/Sewer rate increase. The original proposal was for a 140% increase over the next five years. During the presentation, Staff stated that the increase was necessary as many of the pipes in the city are over 100 years old and others may have significant deterioration. Many residents complained of the huge rate increase and the process is currently on hold.

Your Sanitary Sewer Analysis concludes that the proposed depth of flow from your project will not impact the existing surrounding sanitary sewer systems. It further states that all three sewer mains at the monitored locations will have d/D levels under 0.5. It states that the manhole on Elder, MH-A25, has an existing d/D of 0.3958 and at the completion of the project will have d/D of 0.441 which is still under 0.5. This would be a 10.24% increase which could be significant. I live two houses away from MH A-25 on Elder Avenue. Years ago, the sewer truck would come regularly to clear the pipe in that manhole.

4-4

During the recent storms in January and February, 2024, we witnessed bubbles coming out of the manholes on Elder Street and Ironwood Avenue. Research shows that excessive rain can cause a catastrophe. The pressure from a blockage in the sewer line, amplified by the sudden influx of water, can cause sewer lines to crack and even burst! The increase of sewage from your development added to our already deteriorating pipes could cause very serious and unpleasant problems which would directly affect our section of the neighborhood.

4-4 (CONT.)

OTHER ISSUES

My final comments are in regards to the **Airport Land Use Compatibility Assessment** and the **Noise Study** stating that the proposed project is deemed within the noise limits and will not be susceptible to aircraft accidents. Speaking from experience, the noise from the various aircraft at the JFTB can be extremely loud at times. Helicopter training drills involve takeoffs and landings which involve circling around in a pattern repeatedly for the entire day. When the huge C-5 takes off from the base, we can hear the powerful engine revving up and the noise is so loud that it causes our windows to rattle and house to shake as it slowly makes its ascent over our houses. In the summer, many of the aircraft that participate in the Huntington Beach Air Show take off and land at the JFTB. Yes, it is exciting to see the jets but many people and animals are in distress during those four days. Even if your prospective buyers are fully informed before buying a home in your development, they will be shocked at just how loud and how much activity they will be exposed to and your city will receive complaints.

4-5

Thank you for taking my comments into consideration.

Responses to Comment 4

Barembaum, Susan, dated May 13, 2024.

4-1 The commenter expresses general opposition to the Project. The commenter acknowledges the need for housing in California but states that growth should not negatively impact the quality of life of current residents. The commenter expresses concerns related to specific environmental issues related to traffic, hydrology, sanitary sewer, airport compatibility and noise addressed in Response to Comments 4-2 through 4-5, below. Please note that "quality of life" is not considered an impact under CEQA. However, comments related to quality of life are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

4-2 The commenter expresses concerns with traffic stating that transportation impacts would remain significant and unavoidable, and the project would create massive traffic delays and more accidents. The commenter provides an example of an accident that occurred at Lampson and Rose Street and provides examples of congestion in the area. The commenter also states that the addition of the proposed traffic signal will affect the flow of traffic and will subject residents to noise and light pollution. Please refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns related to congestion, and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, related to accidents and safety. The Project no longer proposes installation of a traffic signal. A Safety Evaluation was prepared to confirm that the Project would have no safety impacts on public roadways and Project access points (see Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, and *Attachment H* of this Final EIR). The Safety Evaluation further confirms the analysis and determination in the Transportation Section (Section 4.15) of the Draft EIR that the Project would not result in a safety impact or substantially increase hazards due to a geometric design feature.

4-3 The commenter expresses concerns with existing flooding issues in the area and provides examples of recent flooding events. The commenter references 2008 and 2029 studies done for the City of Seal Beach by AKM Consulting Engineers, which confirms inadequate drainage within the residential area of College Park East (CPE). The commenter expresses concern that both of the Project's storm drainage alternates will exacerbate existing flooding conditions, considering also that the City of Seal Beach currently has no timeline to install capital improvements to alleviate flooding in CPE. Please refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for hydrology concerns. Per Master Response 2.1.4, flooding will not be an issue because the Project's storm drainage infrastructure would adequately detain 100-year flows, discharge detained flows at rate that do not exceed existing flows, and the Project's finish floor elevations would be at least 1 foot above the water surface elevation.

4-4 The commenter states the City of Seal Beach's process of proposing a Water/Sewer rate increase due to the age of existing sewer pipes is currently on hold due to residents' complaints. The commenter also summarizes the results of the Project's Sanitary Sewer Analysis (*Technical Appendix O* of the Draft EIR) and expresses concern with regular sewer maintenance, the amount of increase to Manhole A-25 on Elder Avenue as well as the effect of flooding on sewer facilities. Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, related to sanitary sewer impacts. Per Master Response 2.1.4, wastewater volumes produced by the proposed development would not significantly impact or exceed the existing sewer capacity in the public system, and that the existing sewer system has adequate capacity for the proposed development.

4-5 The commenter expresses concerns with the ALUC assessment and noise study regarding noise impacts from the JFTB. The commenter provides examples of her experience with extremely loud noise from takeoffs and landings at JFTB. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*.

To: Tom Oliver
Subject: Written Comment from Los Alamitos Resident
Date: Monday, April 29, 2024 6:59:47 PM

Attention Tom Oliver-

As a resident and owner of the property in the beautiful city of Los Alamitos it is disheartening to hear about your site development

The negative effects of traffic, noise, and pollution will be hazardous to our community.

5-1

Please do not develop your proposed community of 246 residential units. Your development will add about one thousand vehicles on our two lane street of Lampson which will be devastating for current residents.

We will have a community polluted with vehicles and traffic jams resulting in loss of property values.

5-2

Thank you for your time,
Maria Beaini
Los Alamitos Home owner

Responses to Comment 5

Beaini, Maria, dated April 19, 2024.

5-1 The commenter expresses opposition to the Project and states that traffic, noise, and pollution will be hazardous to the community. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

Comment Letter 6

Comments on Draft Environmental Impact Report for the 4665 Lampson Avenue Project

James Biery <jamesbiery@yahoo.com>
Mon 6/10/2024 12:48 PM

To:Tom Oliver <Toliver@cityoflosalamitos.org>
Cc:James Biery <jamesbiery@yahoo.com>

1. The project is adjacent to Arbor Park is owned by the US Army and overseen by the Army as well as the Joint Forces Training Base(JRTB) Installation Commander. Any modifications and access to the Arbor Park site must be approved by them. This includes taking down or moving fencing and adding a 10 foot addition as proposed in the Draft EIR. The BASE has not approved this change and may not approve it.
This information must be included in the EIR documents. In addition, there must be documentation of approval of changes to the site by the referenced parties. 6-1
2. The city of Seal Beach has a lease for the current Arbor Park site which also must be included and referenced in the documents and related studies. 6-2
3. Arbor Park operates only as permitted by the Army and the Base on a dawn to dusk basis. This should be included in the report.
4. Gate modifications, fence changes, and direct access from the proposed development into the Arbor Park have not been approved by the Army and the Base. The City of Seal Beach or Los Alamitos or the Developer can not make these changes under the current lease to Seal Beach. 6-3
5, The buildings at 4665 are currently supplied with domestic water and sewer by the City of Seal Beach. There is a proposal to change the water supplier for the project to Golden State Water. It is not clear who will supply water for Arbor Park. This should be clarified and described fully as well as the impacts from construction of new water mains. Seal Beach would continue to provide sewer service in Lampson Avenue. The City of Seal Beach uses water use to calculate sewer charges. The water use information will be need to transferred to Seal Beach to determine sewer charges.. 6-4
6. The storm drainage from the property as described in the report will drain into several areas including underground on-site storage, connection into a ditch which runs into the JFTB and then into the Old Ranch Property, and also Lampson Avenue. The impact and capacity of the ditch and the Old Ranch Property is not described. The overflow of water from Lampson Avenue into Heather Street is also not described or analyzed. Heather Street then feeds into Ironwood Avenue which is subject to constant overflow already. This project drainage will impact College Park East. This was not analyzed. 6-5
7. A new traffic signal is now proposed on Lampson Avenue, but is now supposed to be 600 feet west of Rose. This should be verified and plans updated. In addition, the impact of this signal and the adding of this signal to the City of Seal Beach network must be described and analyzed. 6-6

Responses to Comment 6

Biery, James, dated June 10, 2024.

6-1 The commenter states that the United States Army must approve any modifications and access to Arbor Park and has not approved this change. Project Applicant proposes to dedicate or grant an easement for the northern 10 feet of property abutting Arbor Park and Arbor Dog Park to the City of Los Alamitos with authority over the two parks. The City acknowledges that any improvements to Arbor Park, owned by JFTB, would require JFTB approval, which is not guaranteed. Because the Project does not include any improvements to Arbor Park, the Draft EIR analysis does not assume any improvements to Arbor Park as a result of the dedication.

6-2 The commenter states that the City of Seal Beach has a lease for the current Arbor Park and must be included and referenced in the EIR documents and related studies. The commenter also states that Arbor Park operates only as permitted by the Army and JFTB on a dawn to dusk basis and should be included in the report. The Draft EIR states that Arbor Park and Dog Park are currently leased by the City of Seal Beach from the JFTB for its residents, although the two parks are within the jurisdiction of Los Alamitos (see Page 4.14-4 of the Draft EIR). Arbor Park operations are discussed on Pages 4.14-4 and 4.14-5 of the Draft EIR.

6-3 The commenter states that gate modifications, fence changes, direct access from the Project site into Arbor Park have not been approved by the Army and the Base. The commenter states that the City of Seal Beach, Los Alamitos, or the Project cannot make the proposed changes under the current lease to Seal Beach. The Project is not proposing any gate/fencing improvements on JFTB property and on-site improvements do not require JFTB approval.

6-4 The commenter states that the Project site is currently supplied with domestic water and sewer from the City of Seal Beach. The commenter states that there is a proposal to change the water supplier to Golden State Water Company (GSWC) and inquires who will supply water for Arbor Park. The commenter states that the water supplier for Arbor Park should be clarified and described fully as well as impacts from construction of new water mains. The commenter states that water use will need to be provided to Seal Beach to determine sewer fees.

As stated in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, GSWC provides potable water to the Project site. The Project site will be served by GWSC and infrastructure improvements have been analyzed in the Draft EIR (see the water supply will-serve letter provided as *Attachment K* of this Final EIR). Arbor Park is not part of the Project; therefore, there will be no changes to the water supply for the park as a result of the Project. Sewer service to the Project site would be provided by the City of Seal Beach, and the Project Applicant will be required to pay any applicable sewer connection fees.

6-5 The commenter states that the impact and capacity of the ditch that runs into the JFTB and Old Ranch property and overflow of water from Lampson Avenue into Heather Street is not described or analyzed. The commenter states that Project drainage impacts to College Park

East were not analyzed. Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for a detail discussion on the Project's proposed storm drain routes and impacts.

6-6 The commenter states that the proposed traffic signal should be verified and the plans should be updated along with an analysis of the proposed traffic signal impacts to the City of Seal Beach network. The Project no longer proposes installation of a traffic signal. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*.

Comment Letter 7

We need more housing

Rose Boland <roseboland7@gmail.com>
Thu 6/6/2024 6:17 PM
To:Tom Oliver <Toliver@cityoflosalamitos.org>

IRONSCALES couldn't recognize this email as this is the first time you received an email from this sender roseboland7@gmail.com

Mr. Oliver

I am a long-term (51-year) Rossmoor homeowner and I am fully in favor of the plan to build multiple new housing units on Lampson Avenue. The Joint Forces air base is already surrounded by housing on all sides. The argument that it would be unsafe to build more housing on Lampson because of the noise and possibility of aircraft accidents has no merit because thousands of people have been living in close proximity to the base for years and years without being adversely affected. Furthermore, I do not believe another environmental impact report is needed. I suspect that a lot of people opposed to new housing at this location fear an influx of low income and minority buyers. Yet if the public does not have the will to permit projects such as the Lampson development, we will never adequately address the problem of a lack of affordable housing in this part of Orange County.

John Boland

7-1

Responses to Comment 7

Boland, Rose, dated June 06, 2024.

7-1 The commenter expresses approval of the Project. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

Comment Letter 8

From: Barbara Boyer
To: Tom Oliver
Subject: Lampson Project
Date: Monday, May 20, 2024 6:54:19 AM

Mr. Oliver,

From my position as a resident that lives off of Lampson I oppose the project that is proposed in our community. The density proposed per acre is too high. The neighboring Parkview neighborhood is far less dense than what is being proposed and that should be taken into consideration when building.

The impact of the traffic and safety to this area is such a concern for me. We have seen fatalities and serious accidents living in College Park East. Lampson, Safety needs to be addressed for the families that drive in our area everyday. This proposal of a minimum of 500 vehicles added to Lampson is unreasonable for this community. I drive here everyday and there are concerns as it is now with visibility and bends in the road. When I think of the stress this will put on our Emergency Response and daily commute it does not make sense.

I am in disagreement with the proposal of this site.

Barbara Boyer

8-1

Responses to Comment 8

Boyer, Barbara, dated May 20, 2024.

8-1 The commenter opposes the Project and states the proposed density is too high. The commenter also expresses concerns with traffic, safety, and emergency response. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

For reference, the Project is consistent with the City's General Plan and zoning designations for the site, including allowable density. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for pedestrian safety concerns. Refer to Master Response 2.1.7, *Emergency Vehicle Access*, and 2.1.8, *Public Safety* for emergency response concerns.

Comment Letter 9

EIR comments Lampson Place Project

Daniel Brandt <dbrandt660@gmail.com>
Mon 6/10/2024 4:38 PM
To:Tom Oliver <Toliver@cityoflosalamitos.org>

Good afternoon,

I am writing to you as a resident of the City of Seal Beach, who is concerned about the proposed project at 4665 Lampson Ave. My name is Daniel Brandt and I have lived at 3761 Oleander Street for the past 6 years. Our neighborhood in the Seal Beach subdivision is referred to as College Park East (CPE). This neighborhood is a quiet suburb of single family residences. My wife and I moved to CPE from Long Beach to get away from the busy city life and enjoy a neighborhood which is safe for my children to grow up in. We feel safe allowing my young children to ride their bikes in the street and play in our small, but quaint parks.

I have identified many potential negative impacts on the communities surrounding the proposed development at 4665 Lampson Ave. I will address those potential negative environmental impacts and require and answer to each of the following concerns:

9-1

I have reviewed the EIR. The glaring fact was that there was not enough parking for the density of the project. I was also concerned that with the increased number of vehicles that will be on Lampson Ave. has been a dangerous street and has been the scene of many serious/deadly traffic collisions.

I understand that Lampson Ave. is technically considered a "commercial corridor," but the reality is that this area is a residential area, surrounded by two golf courses. First, there is no street parking on Lampson Ave. Second, Lampson Ave. is a two-lane highway, with many curves and only one sidewalk. Lastly, the area of the proposal is not walkable or safe for bicyclists (little to non-existent bike lanes). Furthermore, Lampson Ave. is already overused and underdeveloped to handle additional vehicles.

9-2

According to the EIR, there will be a traffic signal installed on Lampson Ave. between Heather Ave. and Rose. This would be 3 traffic signals in a very short distance. I believe the insulation of another traffic signal will add additional noise for acceleration of engines, braking noise and light pollution to the residents living on Lampson Ave. between Heather And Rose. I would request a light and noise study regarding the impact on the residents with the insulation of a traffic signal.

9-3

Traffic

I believe there will be approximately 500 plus vehicles that will be utilized by residents of the project, based on the potential occupancy levels, which I will describe later in this email. I will specifically address the potential impacts the additional vehicles will have on Lampson Ave.

9-4

1) Lampson Ave. is a two-lane east/west asphalt street with a posted speed limit of 45 MPH. Between Seal Beach Blvd. and Valley View Ave. on Lampson Ave. there are six curves, which decreases visibility and braking reaction times for drivers approaching intersections on Lampson Ave. In the past, there have been many traffic collisions on Lampson Ave. between Seal Beach Blvd. and Valley View St. Many of these collisions have occurred at intersections with drivers making U-turns from westbound Lampson Ave. to eastbound Lampson Ave. In addition to the curves in the roadway, there are raised center medians with large trees and boulders, which also decreases visibility of drivers. Due to these trees and boulders, vehicles traveling eastbound Lampson Ave. approaching Candleberry Ave. and Heather Dr. have reduced visibility of vehicles traveling westbound on Lampson Ave. Based on the fact that vehicles exiting the project must make right turns out of the project, vehicles will be forced to make U-turns at either Basswood St., Candleberry Ave., and Heather Dr. if the drivers wants to travel to Valley View St. They will likely make U-turns at the three aforementioned intersections to drive towards Valley View St. Based on the speed limit of 45 MPH on Lampson Ave., the curves on the roadway, the reduced visibility from the boulders and trees in the center medians, I believe the added vehicles will be a safety hazard and will result in additional traffic collisions. I am requesting technical studies on the braking reaction times for vehicles traveling eastbound Lampson Ave. at the intersections of Basswood St., Candleberry Ave. and Heather Dr. I would like the study to address any additional traffic control signals devices or modifications needed to the existing devices.

9-4 (CONT.)

2) During the morning hours, traffic becomes heavily congested for vehicles traveling westbound Lampson Ave. at the intersection of Seal Beach Blvd. In this area, there are two dedicated left turn lanes and one dedicated right turn lane for vehicular traffic intending to turn northbound or southbound Seal Beach Blvd. Just north of Lampson Ave. at Seal Beach Blvd. is the 405 Freeway. With the additional traffic intending on traveling to the 405 freeway, I am concerned about the two-left turn lanes on Lampson Ave. at Seal Beach Blvd. will not have the capacity to handle the additional vehicles. There will be additional congestion in the two dedicated left turn lanes for vehicles traveling to the 405 Freeway.

9-5

Also, many of the residents of the development will have young kids, who will attend schools in the Los Alamitos Unified School District. The schools are located in the cities of either Rossmoor, Los Alamitos, or Seal Beach. In order to transport their children, they will need to travel westbound on Lampson Ave. towards Seal Beach Blvd. The new residents will increase the traffic congestion during the morning hours. Based on the fact that only one elementary school is located south of Lampson Ave. and the fact that the other five elementary schools, two middle schools, and one high school are located north of Lampson Ave., drivers will most likely travel northbound on Seal Beach Blvd. from Lampson Ave. The already congested one dedicated right turn lane westbound Lampson Ave. at Seal Beach Blvd. will become increasingly congested. I believe a second dedicated right turn lane should be added to handle the additional vehicles making right turns onto northbound Seal Beach Blvd. I am requesting a technical study on the phasing of the traffic control devices at Lampson Ave. and Seal Beach Blvd. and whether a right turn lane should be added.

9-6

Lastly, the vehicles stopped in the westbound lanes of Lampson Ave. in the right turn lane at Seal Beach Blvd. frequently back up to the intersection Lampson Ave. and Old Ranch Plaza. This

9-7

additional traffic would impact the intersection of Lampson Ave. and Old Ranch Plaza. I am requesting a technical traffic times study of the traffic control devices at the intersection of Old Ranch Plaza and Lampson Ave. and would like to know what changes or modifications to these traffic control devices would be.

9-7 (CONT.)

3) In the morning and afternoon hours, traffic from southbound Seal Beach Blvd. to eastbound Lampson Ave. is often congested. There are two dedicated left turn lanes at this location. I am concerned that traffic will be backed up to St. Cloud Dr. and cause a safety issue for those at the intersection of Seal Beach Blvd. and St. Cloud Dr. I do not believe the two dedicated left turn lanes are sufficient for the influx of vehicles wanting to make a left turn onto eastbound Lampson Ave. in the mornings and afternoons. I am requesting a study of the traffic control devices at southbound Seal Beach Blvd. at Lampson Ave. and additional lanes or modifications to the traffic control devices. I believe the two-way left turn lanes need to be lengthened to handle the additional vehicles making left turns.

9-8

4) Lampson Ave. is a two-lane highway in each direction between Seal Beach Blvd. and Valley View Dr. The marked bicycle lanes have a width of a few feet to non-existent in some locations. I am concerned that the additional traffic from the development will be a safety hazard for bicycles traveling on Lampson Ave. in the bicycle lane. I do not believe that the bicycle lanes are safe to use and should not be considered as a transportation source for new residents at the proposed development.

9-9

5) Lampson Ave. only has a narrow sidewalk on the south side of the street on Lampson Ave. between Seal Beach Blvd. and Tulip Dr., with the exception of a sidewalk on the north side in front of the proposed development. I am concerned about pedestrians crossing Lampson Ave. to walk to Heather Park in Seal Beach. The development does not have a planned park and Arbor Park does not have any play structures. It is likely that residents will use Heather Park as their primary recreational activity location. In addition, California's “jaywalking” law will change in January of 2023 and allow for people to cross any street, as long as they safely cross, without impeding vehicular traffic. I believe this will lead pedestrians crossing from the development to cross Lampson Ave. outside of the crosswalk. I am concerned that with the decreased visibility of drivers traveling eastbound Lampson Ave. due to the curves in the roadway, as well as the boulders and trees in the center medians, there will be an increase in pedestrian injuries /fatalities. I am requesting a study on the impact of foot traffic on Lampson Ave. due to the development. I also would like a sidewalk added to the north side of Lampson Ave. between Seal Beach Blvd. and Tulip Dr.

9-10

6) Valley View St. is a major arterial highway, which intersects with Lampson Ave. and this intersection is located east of the development. The eastbound Lanes of Lampson Ave. already become congested at the intersection. Eastbound Lampson Ave. at Valley View St. consist of two dedicated straight lanes for eastbound traffic and one dedicated left turn lane for vehicle traveling northbound Valley View St. Based on the additional added vehicle of the development, I am requesting a technical study on the traffic signal time and where additional traffic signal devices need to be added or modified. Also,

9-11

based on the additional traffic will add congestion to the number two lane of eastbound Lampson Ave. at Valley View St. Vehicle intending on traveling southbound Valley View St. in order to drive to the 405 Freeway / 22 Freeway will be slowed. I am requesting a dedicated right turn lane be added in this area for vehicles making a right turn from Lampson Ave. to southbound Valley View Dr.

9-11 (CONT.)

7) Vehicles leaving the project intending to travel to Valley View St. will take the quickest route possible. Many vehicles traveling eastbound Lampson Ave. towards Valley View St. currently make a right turn onto Blackmer St. and to cut through the residential neighborhood to reach Valley View St. The vehicles will exit on Cerulean Ave. or Tiffany Ave. (Garden Grove) to Valley View Dr. in order to bypass traffic congestion on eastbound Lampson Ave. at Valley View Dr. I believe the additional vehicles from the development will impact the safety of the following street in Garden Grove: Blackmer St., Trinette Ave., Cerulean Ave. Tunstall St., St. Mark St., and Tiffany Ave. Based on the additional vehicle cut through traffic, I am requesting a technical traffic study on the aforementioned streets in Garden Grove.

9-12

Parking

In addition to traffic issues, below I have broken down the potential occupancy of the apartment development, as well as the cluster/townhomes development.

9-13

Apartment Occupancy

	Quantity	Occupancy	Minimum	Maximum
77 total units				
(1) bedrooms	36	1-3 people	36	108
(2) bedrooms	20	2-5people	40	100
(3) bedrooms	21	3-7people	63	147
Total:	77		139	355

Possible registered occupants range is 139-355 residents in only 77 apartment units.

Lack of parking:

- 98 parking spots for between 139-355 residents.
- 30 assigned garages and 68 open parking spaces (first come, first serve)

Conclusion: The lack of parking will lead to residents and guests parking in CPE and surrounding communities. There is no parking on Lampson Ave.

Cluster and Town Homes Occupancy

Cluster Homes
55 total units/ 220 total bedrooms
Townhomes
114 units / 321 bedrooms

Lack of parking:

- 54 driveways
- 90 open parking spaces
- 338 garage spaces

Conclusion: There is no street parking in the proposed neighborhood and garages many times are not used for parking. Enforcement of using garages would have to be carried out by the planned HOA for the cluster and townhouse communities. HOA's are ineffective in enforcing people to keep their garages open for parking. Many of the vehicles will be parking in CPE and surrounding communities. The lack of parking will not impact the City of Los Alamitos, but will impact residents of Seal Beach (CPE).

I believe that based on the number of occupants in these developments and the limited amount of planned parking, there will be approximately 250 plus vehicles parked on CPE streets on a daily/nightly basis. This lack of parking will increase vehicular traffic on the streets of CPE. I would like a comprehensive study on the potential occupancy of both developments and how many vehicles would be associated with the residents. The additional vehicles parking in the streets nightly will have an impact on roadways in CPE. I would like a technical study of how the extra vehicular traffic from the development will cause wear and tear of the streets within CPE and Lampson Ave.

9-13 (CONT.)

Parks

The proposed development only has a 14,000 open area for recreational activities. There are no play structures proposed except for a "tot lot" in the apartment building Arbor Park has open fields and a dog park, but no play equipment. Without a park being built in the community, Heather Park across the street from the development will be heavily impacted. Heather Park is the most used park in CPE. The additional residents in the proposed development will primarily utilize Heather Park, making an aging and overused park more crowded. Due to the lack of parking in the development, many of those vehicles will take up the street parking surrounding Heather Park, restricting access to Heather Park by CPE residents.

Parking spaces at Arbor Park will also be used by residents and guests of the development rather than visitors of Arbor Park and the dog park.

I am requesting a technical study on the impact of parking at Arbor Park, which will be impacted by the development and restrict park use.

9-14

Public Service

The development is located in the City of Los Alamitos, which is located far away from the Los Alamitos Police Department. The distance from the Los Alamitos Police Department will decrease response time for the residents in the proposed development. In addition, the Los

9-15

Alamitos Police Department (LAPD) and the Seal Beach Police Department (SBPD) utilize the same radio frequency and respond to each other's calls for service. I believe that the Seal Beach Police Department will be utilized to respond to priority calls to the development in Los Alamitos and decrease the service level to Seal Beach residents. I am requesting a technical study of the impact the development will have on the SBPD services being deployed to the development to assist LAPD.

9-15 (CONT.)

Residents of the development will be parking on CPE streets in the daytime and overnight hours due to the lack of parking in the development. SBPD will have increased calls for service from residents regarding illegally parked vehicles. These increased service call volumes will decrease the capacity of SBPD to respond to priority calls in the City of Seal Beach. I would like a technical study on whether additional police officers will need to be hired by the Seal Beach Police Department.

9-16

The Orange County Fire Department (OCFA) services many cities in Orange County, including Los Alamitos, Rossmoor and Seal Beach. The closest OCFA station is at Seal Beach Blvd. and Beverly Manor (Station 48). This station primarily services Leisure World, which is a large senior community, which places a high demand on this fire station. With the addition of approximately 800 residents in the development, the services from OCFA will be strained and residents of CPE and the surrounding communities will be impacted. In addition, response time to Leisure World and their elderly population will be decreased because of the reallocation of service calls to the development. The next closest OCFA fire station is in Los Alamitos, which primarily services Los Alamitos and Rossmoor. I am requesting a technical study on the impact of the additional residents and the response times of the OCFA to the proposed developments resident's and residents of CPE and Leisure World.

9-17

Road impacts from heavy equipment

The City of Seal Beach prohibits trucks with a gross vehicle weight over 6,000 pounds from traveling on Lampson Ave., with limited exceptions. This prohibition is due to the damage heavy vehicles can do to the roadway. I would like this weight limit to be enforced during the demolition and construction of the proposed development. I would like a comprehensive study of how the developer would manage the demolition, removal of debris, and transportation of construction equipment and materials. This study should include the impact of the heavy equipment and loads will have to the integrity of Lampson Ave.

9-18

Construction Noise and road closure

The backyards of the homes on Ironwood Ave. directly across from the development will be severely impacted by construction noise and excess debris (dirt). The cinder block walls along Lampson Ave between the sidewalk and their residents are short and need to be reconstructed to decrease the impact of construction noise. The residents between 4509 Ironwood Ave. and 4701 Ironwood Ave. will be impacted and need to have their cinder block walls rebuild higher. I am also requesting a technical study on the construction decibel noise levels and the impact on the Ironwood Ave. resident's health. What will be in place to monitor the decibel levels during construction?

9-19

Due to the road closures during the construction there will be an increase in cut through traffic in the CPE neighborhood. Lampson is only a two lane highway situated between to major arterial highways (Valley View St. and Seal Beach Blvd.). If there is construction and lane closures on Lampson Ave. vehicles cut through CPE and Garden Grove to reach Valley View St. or Seal Beach Blvd.This cut through traffic will decrease the safety of CPE and Garden Grove residents. I would like a study on cut through traffic in CPE and Garden Grove from construction on Lampson Ave.

9-19 (CONT.)

Aesthetics

The front of the development directly off of Lampson Ave. will be two-stories high. Then all of the other residences will be three stories high. The affordable apartment building will be 3 stories high facing Lampson Ave. Based on the high of the construction and the low cinderblock walls of residents on Ironwood Ave. there will be several impacts to their environment.

One impact will be on the glare from the sun, which is overhead to the south in the afternoon. This will cause a bright glare from the reflection off the windows of the two and three story building of the development into the residents located between 4509 Ironwood Ave. and 4701 Ironwood Ave. I am requesting a technical study of the impact of the angle of the sun and the potential glare from the developments residents and the Ironwood Ave. residents.

Secondly, the height of the two and three-story construction of the development and the short cinder block walls will lead to a lack of privacy for the Ironwood Ave. residents. I am requesting a visual simulation from the residents between 4509 Ironwood Ave. and 4701 Ironwood Ave.

9-20

Rodents

During large construction project rodents are dispersed into nearby residential neighborhoods. What are the plans to control and abate the influx of rodents in the Los Alamitos (Parkewood), CPE, and Garden Grove neighborhoods? Rodent displacement occurs during the excavation portion of the development, construction phase, and at the completion of the construction. I am requesting a comprehensive study on the rodent population in the development and the impacts to the surrounding communities.

9-21

Wildlife

The Joint Forces Training Base (JFTB) is home to a large coyote and rabbit population. I am concerned about the development's impact on their ecosystem and I am requesting a technical study on the construction of the development and the impacts to the coyote and rabbit population on JFTB, which is located adjacent to the development.

Thank you for listening to my concerns regarding this development and I look forward to answers to my issues and concerns, including the studies to lessen the impacts of this development.

9-22

Responses to Comment 9

Brandt, Daniel, dated June 10, 2024.

9-1 The commenter provides introductory remarks as a resident of Seal Beach and expresses the concerns which are responded to below.

9-2 The commenter expresses concerns with insufficient parking and increased number of vehicles. The commenter states that Lampson Avenue is a dangerous street and there have been many traffic collisions. The commenter also states that there is no street parking on Lampson, it is not walkable or safe for bicyclists, and it is already overused and underdeveloped to handle additional vehicles.

The City acknowledges that there is no street parking on Lampson. However, there are sidewalks and Class II (on-street, striped) bicycle lanes on Lampson. Refer to Master Response 2.1.3, *Parking*, for parking concerns. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic/congestions concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for vehicle and pedestrian safety concerns.

9-3 The commenter states that with the installation of the traffic signal at Lampson Ave. there would be 3 signals in short proximity and it would add additional noise due to the acceleration of engines, braking noise and light pollution to residents living on Lampson Ave. between Heather and Rose. The commenter requests a light noise study regarding the impact to residents due to the installation of the signal.

The Project no longer proposes installation of a traffic signal. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*. Additionally, lighting from car headlights would be temporary and be shielded from the existing residential use on Lampson through existing landscaping and walls within the private residences' backyard.

9-4 The commenter expresses concerns with safety and traffic on Lampson and estimates that the Project would generate 500 vehicles. The commenter states that Lampson is unsafe due to poor visibility and drivers making U-turns and requests a study to address additional traffic control signal devices or modifications.

The Project is estimated to generate 1,658 two-way trip-ends per day with 112 AM peak hour trips and 147 PM peak hour trips (Draft EIR, p. 3-17). Existing trees and boulders in the medians within Lampson Avenue are existing conditions, and the Project will not place any additional trees, boulders, or other objects within the median resulting in any further decrease in visibility. Moreover, the Project will not exacerbate any existing visibility concerns because Lampson Avenue has sufficient capacity to accommodate the additional trips generated by the Project. As discussed in Section 3.0, *Project Description*, of the Draft EIR, according to the City of Seal Beach General Plan, Lampson Avenue is a divided roadway with a raised median and designed to accommodate a maximum of 37,500 daily vehicle trips. At General Plan

Buildout with the Project, these two segments comprising this portion of Lampson Avenue would carry between 15,350 and 15,750 daily trips (see *Technical Appendix N1* of the Draft EIR and *Attachment G* of the Final EIR). Therefore, the Project's anticipated generation of 1,658 daily trips is well within the capacity of Lampson Avenue even at General Plan Buildout (refer to Page 3-17 of the Draft EIR). Finally, CEQA requires an evaluation of the Project's potential impacts on the environment, and not the impacts of environmental conditions on the Project. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic/congestions concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for vehicle and pedestrian safety concerns.

9-5 The commenter states that vehicles traveling westbound on Lampson Ave. at the intersection of Seal Beach Blvd. during the morning hours is heavily congested. The commenter is concerned about two left turn lanes on Lampson Ave. at Seal Beach will not have capacity to handle additional vehicles. And there will be additional congestion at the two dedicated left turns for vehicles traveling to the 405 Freeway. The updated Traffic Analysis (*Attachment G* of this Final EIR) identifies the Project's contribution to a level of service deficiency at Seal Beach Boulevard and Lampson Avenue. The recommended improvement is to restripe the number 2 westbound left as a shared left-right turn lane, which will improve the level of service at this intersection (see Table 6-3 of *Attachment G* of this Final EIR). The Project Applicant would be required to pay fair share fees towards this improvement. The Project's contribution to the level of service deficiency at this intersection is 5.1% and therefore negligible. In any event, a project's effects on an intersection or roadway segment level of service is not considered a CEQA impact, and as such, the Project's contribution to a level of service deficiency at this intersection would not constitute a new or substantially more severe impact under CEQA.

9-6 The commenter states that the Project would generate students who would attend schools in either Rossmoor, Los Alamitos, or Seal Beach. The commenter states that residents will need to travel westbound on Lampson Ave. towards Seal Beach and will likely turn northbound on Seal Beach Blvd. from Lampson Ave. The commenter states that Lampson and Seal Beach Blvd. are already congested and believes that a second dedicated right turn lane should be added to handle the additional vehicles. The commentator requests a study on the phasing of traffic control devices for nearby intersections. Refer to Response to Comment 9-5 for the recommended improvement to the intersection of Seal Beach Boulevard and Lampson Avenue.

9-7 The commenter expresses concerns with traffic congestion at Lampson Avenue and Old Ranch Plaza and requests a study on the traffic control devices at Lampson Avenue and Old Ranch Plaza. The commenter states that the two-way left turns need to be lengthened to handle the additional vehicles. The Project's Traffic Analysis (*Attachment G* of this Final EIR) analyzed the intersection of Old Ranch Plaza and Lampson Avenue and determined that this intersection operates at an acceptable level of service under with and without Project conditions under all scenarios.

9-8 The commenter states that traffic from southbound Seal Beach to eastbound Lampson Ave. is often congested. The commenter is concerned that traffic will back up to Saint Cloud Drive and cause a safety issue for those at the intersection of Seal Beach Blvd. and Saint Cloud Drive. The commenter does not believe the two dedicated left turn lanes are sufficient for the influx of vehicles wanting to make a left turn to eastbound Lampson Ave. in the in the morning and afternoon and request a study of traffic control devices at southbound Seal Beach Blvd. at Lampson Ave. Refer to Response to Comment 9-5 for the analysis and recommended improvement to the intersection of Seal Beach Boulevard and Lampson Avenue

9-9 The commenter states that additional traffic from the development will be a safety hazard for bicycles traveling on Lampson Ave. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for pedestrian/bicycle safety concerns.

9-10 The commenter expresses concerns with pedestrian crossing Lampson Avenue to walk to Heather Park, the lack of onsite park amenities, decreased visibility for drivers and pedestrian safety and requests impact on foot traffic on Lampson Avenue. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities,* for impacts to existing parks. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for pedestrian safety concerns.

9-11 The commenter expresses concerns with traffic and requests a study on the traffic signal time and a dedicated right turn lane from Lampson Avenue to southbound Valley View Drive. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding the traffic signal.

9-12 The commenter expresses concerns with traffic and requests a traffic study on streets in Garden Grove. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* and Response to Comment C-2 for a discussion on the selection of studied intersections.

9-13 The commenter expresses concerns with parking and requests study on road impacts from extra traffic. Refer to Master Response 2.1.3, *Parking*, for parking concerns. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns.

9-14 The commenter expresses concerns with parking and impacts to Arbor Park and Heather Park. Refer to Master Response 2.1.3, *Parking*, for parking concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities,* for impacts to existing parks.

9-15 The commenter expresses concerns with public service and requests study on Seal Beach Police Department (SBPD) and response times. The Project site is located within the City of Los Alamitos; therefore, it will be served by LAPD, which was also acknowledged by SBPD (see *Technical Appendix L* of the Draft EIR). Refer to Master Response 2.1.8, *Public Safety,* for emergency response concerns. SBPD stated that it will not be expanding service capacity

as a result of the Project because the Project is located within the City of Los Alamitos. However, SBPD has a mutual aid agreement with LAPD and can assist with public services in the event of an emergency, if needed.

9-16 The commenter states that SBPD will experience an increase in calls from services due to illegal parked vehicles from the Project and requests a study on whether additional police officers will be needed. Refer to Master Response 2.1.3, *Parking*, for parking concerns. The commenter assumes that residents of the Project will be parking on streets within the CPE neighborhood. The Project includes 577 parking spaces, which is in exceedance of the City of Seal Beach's parking standards (by 84 spaces). Based on parking requirements specific to the City of Seal Beach, the Project would comply with Seal Beach parking requirements. Residents are not expected to park anywhere other than in the parking spaces located on the Project site.

9-17 The commenter expresses concern with the decrease in response time to Leisure World that is currently served by the closest OCFA station from the Project site, Station 48, and requests a study to analyze the impacts of response times to the Project, residents of College Park East and Leisure World. As discussed in Section 4.13, *Public Services*, of the Draft EIR, considering the existing firefighting resources available in the City, implementation of the Project is not expected to result in the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impact. Per correspondence with the OCFA, there are currently no deficiencies in fire protection service provided to the Project site. OCFA has not indicated the need for a new fire station or expansion of existing facilities due to the Project. The Secured Fire Protection Agreement would ensure that response times and service ratios are met due to the implementation of the Project and no new fire station facilities would be required (refer to Page 4.13-9 of the Draft EIR)

9-18 The commenter states the City of Seal Beach's weight requirements for trucks traveling on Lampson Avenue and requests this be enforced during demolition and construction of the proposed development. The commenter also requests a study analyzing the management of demolition, removal of debris, and transportation of construction equipment and materials. The Project would be required to comply with all applicable local regulations related to vehicle weight limits. If the Project requires the use of an oversize vehicle in excess of the eight, width, height or length permitted by the Vehicle Code, a permit shall be obtained from the City of Seal Beach in accordance with the City of Seal Beach Municipal Code 8.10.135, *Movement of Oversize Vehicles*.

9-19 The commenter expresses concerns with construction noise and road closure, specifically the homes located between 4509 and 4701 Ironwood Avenue. As discussed in Section 4.11, *Noise*, of the Draft EIR, the construction noise analysis shows that noise impacts at the nearest receiver locations will be less than the daytime 80 dBA L_{eq} significance threshold during Project construction activities. Because the highest construction related noise level is 63.31 dBA L_{eq} at the nearest sensitive receiver (Location R3 at the existing noise sensitive residence at 4625 Ironwood Avenue, approximately 82 feet south of the Project site), the noise impacts due to

Project construction noise are considered less than significant and no mitigation is required (refer to Pages 4.11-23 through 4.11-24 of the Draft EIR). Therefore, noise monitoring during construction is not needed or required.

During construction, the Project would result in roadway improvements along Lampson, including replacement of the existing median curb and construction of the two proposed driveways. Construction on Lampson will require an encroachment permit and approval from the City Engineer. Lane closures that may be required for median improvements would be temporary and require a permit and compliance with LAMC 12.08.200, Safety precautions–Obstruction of traffic. Compliance with LAMC 12.08.200 would ensure safe crossing and access for all vehicle and pedestrians at all times. Pursuant to LAMC 12.08.200, a construction management plan would be prepared to identify construction activity, notification of construction activity, and to ensure that construction activity would not re-route/detour commuter or other pass-through or cut-through traffic through local residential streets.

9-20 The commenter expresses concerns with aesthetics and glare and requests a visual simulation of the Project site. Refer to Figure 4.1-2 and 4.1-3 for visual renderings (refer to Pages 4.1-11 through 4.1-12 of the Draft EIR). As discussed in Section 4.1, *Aesthetics*, of the Draft EIR, buildout of the Project would change the existing visual character of the site from a two-story, 88,000 sf commercial office building to a two- to three-story residential development consisting of 246 units. The Project would be attractive and of quality design and visually compatible with the existing residential and park uses in the Project site's vicinity. Additionally, the Project would be compliant with the zoning development standards and City requirements pertaining to scenic quality. Accordingly, the Project would not conflict with applicable zoning and other regulations governing scenic quality. Impacts would be less than significant (refer to Page 4.1-18 of the Draft EIR).

As discussed in Section 4.1, *Aesthetics*, of the Draft EIR, the Project would redevelop the Project site with residential uses which would produce artificial light. The Project would be required to adhere to the light and glare requirements as set forth in t LAMC (Chapter 8.48 - Lighting Performance Standards and Section 17.24.040 Light and Glare). Chapter 8.48 addresses the visual impacts of exterior lighting on adjacent property owners and neighborhoods. The chapter outlines guidelines for the design, scale, location, and illumination level of lighting fixtures. The guidelines aim to reduce light trespass and prevent glare. Section 17.24.040 would require shielding of light sources to reduce impacts on surrounding land uses. The City would confirm compliance with applicable lighting requirements during future review of building permit applications/plans. Mandatory compliance with LAMC Chapter 8.48 and Section 17.24.040 would ensure that the Project would not introduce any permanent design features that would adversely affect day or nighttime views in the area (refer to Page 4.1-19 of the Draft EIR).

Moreover, a shade and shadow study was conducted for the Project (*Attachment I* of this Final EIR). The study provides 3 shade and shadow conditions (9 AM, 11AM, 3PM) for winter

solstice (December) and summer solstice (June) periods. The longest shadows are cast during the winter months and the shortest shadows are cast during the summer months. In the Northern Hemisphere, the longest day and shortest night of the year occur on the Summer Solstice (on June 21 or 22), marking the beginning of summer. The shortest day and longest night of the year occur on the Winter Solstice (December 21 or 22), marking the beginning of winter. The measurement of shadow lengths that occur at the winter and summer solstices therefore represent the most extreme shadow patterns that occur throughout the year. As shown, during the summer period, the shade and shadow would mostly be confined to the Project site without spillover to adjacent properties. During the winter period, shade and shadow would spillover in the northwestern direction during 9AM and in the northeastern direction during 11 AM. However, the shade and shadow footprint would be minimal and would occur on roadway to the east and parking lot to the north. Therefore, the Project would not result in a significant change in the shade or shadow footprint to nearby properties, and this analysis confirms that the Project will not result in any impacts related to shade or shadow footprint to nearby properties.

9-21 The commenter expresses concerns with rodents. The Project site is located in a highly urbanized area and is surrounded by open spaces to the north, east, and west. If rodents were encountered during construction activities, rodents would travel to the nearby open spaces area instead of traveling south across Lampson Avenue to the existing residential communities. Additionally, as discussed in Section 4.3, *Biological Resources*, of the Draft EIR, the Project site is not located within or part of a wildlife movement corridor. Therefore, the Project would not substantially interfere with an established migratory wildlife corridor. (refer to Page 4.3-33 through 4.3-34 of the Draft EIR). However, this comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

9-22 The commenter expresses concerns with wildlife and impacts to coyote and rabbit population at JFTB. While coyotes and rabbits are common species that may currently inhabit the Project site, as discussed in Section 4.3, *Biological Resources*, of the Draft EIR, the Project site does not include any species listed as special-status animals under either the federal Endangered Species Act or California Endangered Species Act. Also as discussed in Section 4.3, *Biological Resources*, of the Draft EIR, no special-status plants were detected on the Project site. However, the Project does provide limited suitable habitat for nesting birds and common raptor species. Construction activities have the potential to adversely impact nesting birds and raptors and roosting bats. Implementation of Mitigation Measures MM 4.3-1 through MM 4.3-3 would ensure that pre-construction surveys are conducted for nesting birds, nesting raptors, and bat roosts prior to site disturbance. If nesting birds or raptors are present on the Project site, mitigation requires avoidance of active nests. With implementation of the required mitigation, potential impacts to nesting birds and common raptors would be reduced to below a level of significance (refer to Pages 4.3-29 through 4.3-39 of the Draft EIR).

Comment Letter 10

From: Valerie B
To: toliver@cityoflosalamitos.org
Subject: Lampson Project Concerns
Date: Monday, May 20, 2024 10:34:45 PM

Dear Tom Oliver,

We live in College Park East in Seal Beach and I want to express my concern regarding the Lampson Project.
This project will affect CPE the most yet we are not considered in any of the planning.
Our concern is multifold and none of the issues have really been addressed: 10-1

1. CPE already does not have enough parking, especially on street sweeping days its hard enough without the addition of these 246 units, which easily means additional 500 vehicles not counting visitors/company. 10-2

2. Vehicle access into that site is dangerous, just pulling into dog park/AYSO field is hard with the speed of traffic and divider, adding 500 cars to that daily will be a mess and will cause traffic back up across all of Lampson. 10-3

3. There is no playground/play area/park for the new residents so all of them will be impacting CPE parks/play areas which already need repair.
Without the play area, the kids will be dangerously crossing Lampson via walking or biking to access Heather Park. 10-4

4. Vehicle miles travel will be significantly increased on Lampson, Seal Beach Blvd, and Valley View.
The current **Park and Ride** lot that supports car pooling and van pooling will be eliminated increasing vehicle miles traveled further. Project should providing a **Telework Center** in the project to mitigate travel impacts. 10-5

5. California law requires **solar panels** on new housing and **zero emission electric vehicle charging stations**. Neither are mentioned in the draft plan. 10-6

6. This area is a lovely and relatively quiet community where most households are families where we feel safe and its not congested by traffic, pollution or too much housing squeezed into a small area. This project causes a HUGE loss to the hundred of families calling College Park East and the surrounding area "home". **Only a win for the developer.** 10-7

7. Lampson Avenue is not only used by the over 1,700 households in College Park East, but those who live nearby in Rossmoor and Los Al and Garden Grove who go shopping, drop/pick up kids at school and bypass the freeway. Lampson is only a two lane street with constant use and at times extremely congested. By adding one 246 units and potentially 500 additional car trips daily, Lampson will be a nightmare. There are already accidents on Lampson all the time, often affecting the homeowners on both sides of the neighborhoods. 10-8

8. **I am also requesting a study on the impact of foot traffic on Lampson** due to the development.
I would also like a **sidewalk added** to the north side of Lampson between Seal Beach Blvd and Tulip Drive. 10-9

I am concerned that with the **decreased visibilit**y of drivers traveling eastbound on Lampson due to curves in the roadway, as well as the boulders and trees in the center divider, there will be an i**ncrease in pedestrian injuries and fatalities.**

10-10

- Valerie Burstein
4224 Ironwood Ave.
Seal Beach, CA 90740

Responses to Comment 10

Burstein, Valerie, dated May 20, 2024.

10-1 The commenter expresses concerns with the Project's impact on College Park East which are addressed below.

10-2 The commenter states that CPE currently has insufficient parking. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

10-3 The commenter states that vehicle access onto the Project site is dangerous and the additional traffic will cause backup along Lampson. The Project initially proposed to install a traffic signal at the primary neighborhood to alleviate neighborhood concerns related to safety. Subsequent public comments received on the Draft EIR during the 45-day public review period expressed concern with installing a traffic signal and after further traffic signal warrant and safety analyses, it was determined that the proposed traffic signal is not warranted (see *Attachment G* of this Final EIR). Therefore, the Project no longer proposes a traffic signal at this entryway. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns.

10-4 The commenter states that there is no playground, play area or park for the new residents, so they will be impacting CPE parks and kids will dangerously cross Lampson Avenue to get to Heather Park. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities,* for impacts to existing parks. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for pedestrian safety concerns.

10-5 The commenter expresses concerns with VMT, states that the elimination of the current Park and Ride Lot will further increase VMT, and recommends the Project provide a Telework Center. The existing Park-n-Ride that previously occupied the Project site has not been in operation for the past 18 months and when in operation had limited usage. As discussed in 4.15, *Transportation*, of the Draft EIR, the Project would result in significant VMT impacts with the implementation of Mitigation Measure MM 4.15-1. Mitigation Measure MM 4.15-1 includes implementing CAPCOA strategies such as installing broadband infrastructure or other communication technologies that encourages telecommuting and working from home, which would reduce mobile source emission (refer to Page 4.15-19 of the Draft EIR).

10-6 The commenter states that California law requires solar panels on new housing and zero emission electric vehicle charging stations which are not mentioned in the Draft EIR. Contrary to the commenter's assertions, as part of the Project's Project Design Features (PDFs), the Project will include solar photovoltaic with the capability to generate up to 1,229,520 kWh/annually (PDF GHG-1) and the Project's parking areas will be designed to provide electric vehicle (EV) charging stations. At minimum, the number of EV charging stations will equal the Tier 2 Residential Voluntary Measures of the California Green Building Standards

Code, Section A4.106.8.2.1 (PDF GHG-4) (refer to Page 4.5-6 to 4.5-7 of the Draft EIR) Thus, no revision to the Draft EIR is required.

10-7 The commenter expresses concerns with traffic congestion, pollution, and the proposed density and states that it will be a loss of CPE residents. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

10-8 The commenter expresses concerns with traffic congestion and accidents on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for safety concerns.

10-9 The commenter requests a study on impact of foot traffic on Lampson Avenue and requests a sidewalk on the north side of Lampson Avenue between Seal Beach Boulevard and Tulip Drive.

A Safety Evaluation was prepared to confirm that the Project would have no safety impacts on public roadways and Project access points (see Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, and *Attachment H* of this Final EIR). The Safety Evaluation further confirms the analysis and determination in the Transportation Section (Section 4.15) of the Draft EIR that the Project would not result in a safety impact or substantially increase hazards due to a geometric design feature. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for a summary of the Safety Evaluation and issues relating to pedestrian safety. Regarding the request for an additional sidewalk on Lampson Avenue between Seal Beach Boulevard and Tulip Drive, the Project would include improvements to sidewalks along the Project's frontage on Lampson Avenue; areas beyond the Project site's frontage is not part of the Project boundary or a requirement of the Project Applicant. However, this comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

10-10 The commenter expresses concerns with safety due to decreased visibility of drivers traveling eastbound on Lampson due to curves in the roadway. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns.

Comment Letter 11

Response to the DEIR

campbellpe@aol.com <campbellpe@aol.com>

To:Tom Oliver <Toliver@cityoflosalamitos.org>

1 attachments (23 KB)
Response to EIR 6-10-24.docx;

Good Afternoon Tom --

Attached are my comments to the DEIR.
I am also posting them below, so use which ever is easiest to retrieve and read
if you have any questions, please don't hesitate to call or contact me.
Thank you so much.

Patty Campbell
4433 Ironwood Ave
Seal Beach
562-716-7587

11-1

Parking

My first area of concern is the insufficient parking for this project. Let's look at some numbers from this document. The DEIR stated there will be an average of 4 people per housing unit (246 units x 4 = 984). However, they also project 647 residents.

So, which is it?

State requirement (density bonus) is 440 parking spaces.

The Project provides 577 spaces.

If they go to the senior component instead of families, parking goes to 594 spaces.

The City of Los Alamitos required 679 spaces, which is smart – makes for happier residents and neighbors.

11-2

The State is trying to pack as many people as possible into housing and they don't much care about parking; it is also trying to push people into using public transportation to lessen the need for vehicles. However, there is **no** public transportation on Lampson, only on Seal Beach Blvd and on Valley View Street. The nearest bus stop per the DEIR is 3.5 miles walking distance -- 3.5 miles is not exactly what one would call reasonable walking distance. Given the lack of public transportation, the only way to access the Project site will be by car, so you can expect every person who can drive, to have a car. This increases parking demand. For example, a one bedroom apartment will have 1.5 parking spaces. If a couple rent such an apartment and each has a car, *how do they park their two cars into 1.5 spaces?*

11-3

In addition, there is the parking demand from AYSO which now uses the existing parking lot. When the Project is completed, that parking lot will cease to exist and excess AYSO parking will try to use College Park East as will overflow parking from the Project itself. *If nothing else, the developer needs to provide adequate parking for his Project.*

When the document refers to "available parking off-site," they are referring to the streets of College Park East for both AYSO and Project overflow parking. CPE is not a parking lot for that excessive traffic and we do not want nor like the intrusion into our neighborhood. It will interfere with our ability to park in front of our homes and the *safety* of our streets. Whenever there is an accident on Lampson between Candleberry and Heather, Lampson gets blocked off at those two intersections and traffic is routed down Ironwood – too many cars going too fast in this residential neighborhood where the speed limit is 25 mph. That's how we know there is an accident: huge increase in traffic in front of my home.

11-4

Page 4.10-21

Policy 4.11 states they will monitor multifamily parking requirements. Once the project is completed, there will be no opportunities to adjust or increase parking, *so what good is "monitoring" the parking facilities?*

In addition, *there is no plan for guest parking at the Project site and there needs to be*.

The shortages of parking will be dumped on the residents of College Park East and that is not right. The Project needs to provide adequately for its own parking needs.

11-5

Hydrology and Storm Water Runoff

2.5.7: Hydrology: "Water runoff: flows within an earthen channel and then collected by an existing 24" CMP that flows westerly, discharge into a westerly flowing earthen channel within the JFTB and then drains to the Old Ranch Country Club to the south. "

How will it do that? There are no underground culverts or drainage pipes to Old Ranch along Lampson Ave on the north side. The south side of Lampson is the City of Seal Beach and there are no underground drainage pipes behind our homes.

Will this runoff from the Project interfere with the runoff from CPE?

11-6

Storm water runoff will never make it to Old Ranch by going down Lampson: the center divider can contain the water until the center divider ends at the cutout for Heather St; then the water will simply run downhill down Heather St (water always seeks the lowest level) and go onto both Ironwood and Hazelnut Avenues heading toward Guava and eventually Candleberry; there already is significant flooding in that area; don't impact it any more.

11-7

Preliminary Hydrology Report, 3.0, p. 2: "Storm water runoff ultimately gets discharged into the San Gabriel River." No it does not, it ends up on Old Ranch Golf Club in the lakes.

11-7 (CONT.)

Hydrology & water quality: see 4.9-21

Ground water runoff: "connecting to storm drain at Guava found to be infeasible due to too conflicts with existing utilities in the ground: water, sewer and gas 34"main (the main line from San Diego to Santa Barbara – So Cal Gas Co employee told us that if that line blows, it will take out a square mile).

"Storm water will run into a biofiltration device or a catch basin or a detention system for water quality treatment." Really? If that doesn't work, and there is too much water, it will run down Lampson Ave -- more likely scenario. As stated above, the center divider can contain it, but only until it reaches Heather Street and then it will go down Heather to both Ironwood and Hazelnut Avenues, exacerbating an already existing significant flooding problem for the residents of CPE.

11-8

The existing storm drains in CPE are not adequate for the volumes of rain we have received these past two years. So far the water has risen into one home and it has come up to the garage doors of others. If you add runoff from this project, it will be much worse. That is not fair to the residents who are already impacted from storm water runoff.

In addition, we do not want storm water runoff from the Project contaminating the City of Seal Beach's well on the north side of Lampson near the curve, aka, Dead Man's Curve.

11-9

Utilities and Service Systems (4.17)

The city of Los Alamitos cannot provide any services for this project except water (Golden State Water Company). They plan to tie in to all services for the City of Seal Beach.

11-10

Airport Land Use Commission

The ALUC found this project to be inconsistent; *if the land was suitable for housing, they would have put houses there in 1970, but it wasn't then and it isn't now*. The air base is still there and the planes and helicopters are still flying. Matter of fact, the base now houses all branches of the services and is the Emergency Disaster Support area for all of southern CA, so it has more importance today than back in 1970.

11-11

"On September 21, 2023, the ALUC voted to require the City to submit all discretionary actions related to Housing Element Site 6 (4665 Lampson Avenue, Site 7 (Laurel Park) and Site 10 (5030-5084 Katella)" to the ALUC for review until such time as the General Pan is revised or the city overrules the ALUC determination. See p. 4.10-9. ***That statement is not correct.*** *The*

11-12

ALUC voted to only require actions related to the Lampson project and not the others to come before the ALUC for review.

A notice will be required on all sales documents to alert the residents of the presence of the base and of airport noise. *Such a notice needs to run with the land*, not just first-time buyers, but all subsequent buyers need to be notified and sign off on it that they have read it and are aware of the presence of the Joint Forces Training Base and of the noise issues.

11-12 (CONT.)

Arbor Park and Arbor Dog Park

DEIR, 4.14 Recreation: Arbor Park and Arbor Dog Park are not under the jurisdiction of the City of Los Alamitos, but under the jurisdiction of the City of Seal Beach. The City of Seal Beach has a lease with the Army Corps of Engineers for the land for those two parks – not the City of Los Alamitos; Arbor Park & Arbor Dog Park have never been under the jurisdiction of the city of Los Alamitos, so to list them as City of Los Alamitos parks **is not correct.** The City of Seal Beach developed those two parks and maintains them. Mr. Frank Laszlo, a former four-term councilmember from CPE, negotiated with the Army Corps of Engineers and the Base personnel for Arbor Park to be leased by and for the City of Seal Beach.

11-13

Arbor Park Boundary and the addition of 10 feet for parking

Addendum Arbor Park Layout: diagrams state the "existing north fence (along the Project northern boundary), adjacent to Arbor Park, "to be removed." They want this 10 feet dedicated to the City of Los Alamitos. The City of Seal Beach has the lease on Arbor Park and Arbor Dog Park. Dedicate that 10' to the City of Los Alamitos has complications that will render it not feasible. *That fence is the southern boundary of the Joint Forces Training Base and cannot arbitrarily or capriciously be removed without express permission from the Army Corps of Engineers and the Base Commander.* It is pragmatic of the developer to give up 10 feet of space for additional park and Project parking but it requires express permission of the Base Commander and Army Corps of Engineers. *However, if they wish to deed that 10' to the US Army and not the City of Los Alamitos, that might be feasible*. This 10' would go a long way to help AYSO parking. Alternately, that 10' could also be completely separate and available to both AYSO and the Project, with the existing boundary fence kept intact or in place. It would also require an entrance from the park end of the driveway into Arbor Park, near the field.

11-14

Outdoor living space: The project would be short of meeting the common area requirement by 33,040 sf due to requests from the City of Los Al regarding the dedication of the northerly10-ft strip of land abutting Arbor Park and Arbor Dog Park, which comprises an area of approximately 1,000 sf of property to the City. If this area is dedicated to the City, then the project will be unable to meet the common area requirement because compliance with this requirement would physically preclude construction of the project at the densities allowed and with the concessions proposed. As stated above, deeding that 10' of property to the Base, ie, Army Corps of Engineers might be more feasible to accomplish the goal of providing more parking.

11-15

The document (Arbor Park Parking Study and Layout) goes on to say, "the project will provide multiple pedestrian connections with Arbor Park/Arbor Dog Park to the north." That requires the permission of the base commander and the Army Corps of Engineers to do that. It is the Base that has stated that the park will close at sunset and open at sunrise, and that therefore there will be no overnight parking.

The Pass-thru gates: *will they be removed?* They were installed by AYSO and the SWRL folks. If the parking lot is removed, that gate will no longer be necessary and will be removed by Base personnel.

11-16

Heather Park

Proposed parks within the Project are small with defined uses; kids will cross Lampson to use Heather Park. 1. crossing Lampson is *dangerous*, even with the traffic light; 2. they need to provide more park space for their own children and 3. not impact Heather Park. Our parks are well used by CPE kids and families; take care of the needs of your own residents. Don't see our park as your solution to inadequate park space.

11-17

Traffic Safety

Where are their school bus stops? Inside the project (can't pick up kids on Lampson Avenue) or at Heather Park?

Sidewalks stop at each end of the property, so people will not be able to walk on the north side of Lampson past the end of the property line; they will have to use the south side, and the area from Heather to Candleberry contains what has become called Dead Man's curve due to the many frequent accidents along that stretch of roadway – vehicles crash into the wall on the south side of the street making walking dicey at best. You really don't see any walkers from Heather to Candleberry along Lampson. The area is very contained: once you start walking it, there is no way out – you have to walk to the end of either Heather or Candleberry. It's just you, the block wall and oncoming traffic. This is a dangerous stretch of roadway for vehicles, let alone pedestrians.

11-18

U-turns on Lampson at Heather. Vehicles exiting either Arbor Park or Arbor Dog Park must make a right turn onto Lampson due to the presence of the center divider. Consequently, many of those drivers make a U-turn at Heather Street. If I am at the light at Heather, trying to turn right, and there is someone on Lampson *appearing* to turn left, if they have a dog in the car, it's a safe bet they are coming from the dog park and will be making a U-turn right in front of me. This situation has caused many incidents at that intersection for CPE folks trying to turn right at Heather Street. *It is unsafe*.

11-19

Public Service Correspondence: "response time for the Los Alamitos PD to the project site: priority 1: less than 5 minutes." Even with sirens blaring and running all stop lights, it will take more than 5 min. In the morning, from my house (4433 Ironwood) to Katella & Los Al Blvd, it takes a good 20 minutes and that is on a good day. Given traffic and distance, that is just the way

11-20

it is. SBPD will end up servicing those calls as traffic is not as bad from SBPD to Lampson as it is from LAPD to Lampson.

11-20 (CONT.)

Project Alternative: instead of family housing, senior housing.
Instead of 77 family units, there should be 77 senior units; this alternative would provide 594 parking spaces, an increase of 20 spaces – placing parking in the north west corner of the project which is where it is the noisiest. A win-win: that helps solve two issues (noise and more parking). In addition, there would be less demand on parks (seniors are more likely not to have children who would use parks) – that puts less stress on the park within the Project and also on Heather Park. In addition, while many seniors work these days, there would most likely be less demand at peak travel times in the morning and late afternoons. Senior's parking needs would also be less than those of townhome and single-family home residents. But still more than 1.5 parking spaces per unit. We are well aware of the parking demands on the western side of The Shops at Rossmoor along Montecito. Those condos were originally built for seniors with one parking space per unit. Now that they have families there, the parking is not sufficient and they park on Montecito and in Rossmoor, much to the chagrin of the residents of Rossmoor who often find cars partially blocking their driveways. The management of the Shops at Rossmoor has told the residents to not park in back of the condos. It is not a pleasant situation and one to avoid in this Project.

11-21

Moon Trees 4.1
Aesthetics - threshold b: yes. Plan calls for removal of all trees – three of those trees are redwoods and we have reason to believe they are Moon Trees. In 1971, Apollo 14 took a canister full of seeds to the moon. That cannister contained seeds from many plants including 5 tree varieties, one of which was redwoods. Upon return, these seeds were planted all over the country. Most if not all of the redwood seedlings died as they were not in their native habitat. Redwoods are not native to this area, so they had to be planted. Fish and Game controlled where these seedlings were planted and Fish and Game was located at that building, so it is conceivable they planted them; those trees are approximately 50+ years old which fits in with the age of those seedlings and should not be cut down. One tree does not look as if it is doing well, but the other two are fine. Originally there were 5 trees, but 2 of them died and now the third appears to be on its way out, but the two that are doing well, should be kept.

11-22

Question about Townhomes. The kitchens will be on the second floor. No one wants to carry groceries up a flight of stairs. *Do they have dumbwaiters?*

11-23

End of comments.

Date: June 10, 2024

To: Mr. Tom Oliver, Planning Department, City of Los Alamitos

From: Patty Campbell, College Park East

Subject: Comments on the DEIR for the Lampson Project

Parking
My first area of concern is the insufficient parking for this project. Let's look at some numbers from this document. The DEIR stated there will be an average of 4 people per housing unit (246 units x 4 = 984). However, they also project 647 residents.
So, which is it?
State requirement (density bonus) is 440 parking spaces.
The Project provides 577 spaces.
If they go to the senior component instead of families, parking goes to 594 spaces.
The City of Los Alamitos required 679 spaces, which is smart – makes for happier residents and neighbors.

The State is trying to pack as many people as possible into housing and they don't much care about parking; it is also trying to push people into using public transportation to lessen the need for vehicles. However, there is **no** public transportation on Lampson, only on Seal Beach Blvd and on Valley View Street. The nearest bus stop per the DEIR is 3.5 miles walking distance -- 3.5 miles is not exactly what one would call reasonable walking distance. Given the lack of public transportation, the only way to access the Project site will be by car, so you can expect every person who can drive, to have a car. This increases parking demand. For example, a one bedroom apartment will have 1.5 parking spaces. If a couple rent such an apartment and each has a car, *how do they park their two cars into 1.5 spaces?*

In addition, there is the parking demand from AYSO which now uses the existing parking lot. When the Project is completed, that parking lot will cease to exist and excess AYSO parking will try to use College Park East as will overflow parking from the Project itself. *If nothing else, the developer needs to provide adequate parking for his Project.*

When the document refers to "available parking off-site," they are referring to the streets of College Park East for both AYSO and Project overflow parking. CPE is not a parking lot for that excessive traffic and we do not want nor like the intrusion into our neighborhood. It will interfere with our ability to park in front of our homes and the *safety* of our streets. Whenever there is an accident on Lampson between Candleberry and Heather, Lampson gets blocked off at those two intersections and traffic is routed down Ironwood – too many cars going too fast in this residential neighborhood where the speed limit is 25 mph. That's how we know there is an accident: huge increase in traffic in front of my home.

Page 4.10-21

Policy 4.11 states they will monitor multifamily parking requirements. Once the project is completed, there will be no opportunities to adjust or increase parking, *so what good is "monitoring" the parking facilities?*

In addition, *there is no plan for guest parking at the Project site and there needs to be*.

The shortages of parking will be dumped on the residents of College Park East and that is not right. The Project needs to provide adequately for its own parking needs.

Hydrology and Storm Water Runoff
2.5.7: Hydrology: "Water runoff: flows within an earthen channel and then collected by an existing 24" CMP that flows westerly, discharge into a westerly flowing earthen channel within the JFTB and then drains to the Old Ranch Country Club to the south. "
How will it do that? There are no underground culverts or drainage pipes to Old Ranch along Lampson Ave on the north side. The south side of Lampson is the City of Seal Beach and there are no underground drainage pipes behind our homes.
Will this runoff from the Project interfere with the runoff from CPE?

Storm water runoff will never make it to Old Ranch by going down Lampson: the center divider can contain the water until the center divider ends at the cutout for Heather St; then the water will simply run downhill down Heather St (water always seeks the lowest level) and go onto both Ironwood and Hazelnut Avenues heading toward Guava and eventually Candleberry; there already is significant flooding in that area; don't impact it any more.

Preliminary Hydrology Report, 3.0, p. 2: "Storm water runoff ultimately gets discharged into the San Gabriel River." No it does not, it ends up on Old Ranch Golf Club in the lakes.

<u>Hydrology & water quality: see 4.9-21</u>
Ground water runoff: "connecting to storm drain at Guava found to be infeasible due to too conflicts with existing utilities in the ground: water, sewer and gas 34"main (the main line from San Diego to Santa Barbara – So Cal Gas Co employee told us that if that line blows, it will take out a square mile).
"Storm water will run into a biofiltration device or a catch basin or a detention system for water quality treatment." Really? If that doesn't work, and there is too much water, it will run down Lampson Ave -- more likely scenario. As stated above, the center divider can contain it, but only until it reaches Heather Street and then it will go down Heather to both Ironwood and Hazelnut Avenues, exacerbating an already existing significant flooding problem for the residents of CPE.

The existing storm drains in CPE are not adequate for the volumes of rain we have received these past two years. So far the water has risen into one home and it has come up to the garage doors of others. If you add runoff from this project, it will be much worse. That is not fair to the residents who are already impacted from storm water runoff.

In addition, we do not want storm water runoff from the Project contaminating the City of Seal Beach's well on the north side of Lampson near the curve, aka, Dead Man's Curve.

Utilities and Service Systems (4.17)
The city of Los Alamitos cannot provide any services for this project except water (Golden State Water Company). They plan to tie in to all services for the City of Seal Beach.

Airport Land Use Commission
The ALUC found this project to be inconsistent; *if the land was suitable for housing, they would have put houses there in 1970, but it wasn't then and it isn't now*. The air base is still there and the planes and helicopters are still flying. Matter of fact, the base now houses all branches of the services and is the Emergency Disaster Support area for all of southern CA, so it has more importance today than back in 1970.

"On September 21, 2023, the ALUC voted to require the City to submit all discretionary actions related to Housing Element Site 6 (4665 Lampson Avenue, Site 7 (Laurel Park) and Site 10 (5030-5084 Katella)" to the ALUC for review until such time as the General Pan is revised or the city overrules the ALUC determination. See p. 4.10-9. ***That statement is not correct.*** *The ALUC voted to only require actions related to the Lampson project and not the others to come before the ALUC for review*.

A notice will be required on all sales documents to alert the residents of the presence of the base and of airport noise. *Such a notice needs to run with the land*, not just first-time buyers, but all subsequent buyers need to be notified and sign off on it that they have read it and are aware of the presence of the Joint Forces Training Base and of the noise issues.

Arbor Park and Arbor Dog Park
DEIR, 4.14 Recreation: Arbor Park and Arbor Dog Park are not under the jurisdiction of the City of Los Alamitos, but under the jurisdiction of the City of Seal Beach. The City of Seal Beach has a lease with the Army Corps of Engineers for the land for those two parks – not the City of Los Alamitos; Arbor Park & Arbor Dog Park have never been under the jurisdiction of the city of Los Alamitos, so to list them as City of Los Alamitos parks **is not correct.** The City of Seal Beach developed those two parks and maintains them. Mr. Frank Laszlo, a former four-term councilmember from CPE, negotiated with the Army Corps of Engineers and the Base personnel for Arbor Park to be leased by and for the City of Seal Beach.

Arbor Park Boundary and the addition of 10 feet for parking
Addendum Arbor Park Layout: diagrams state the "existing north fence (along the Project northern boundary), adjacent to Arbor Park, "to be removed." They want this 10 feet dedicated to the City of Los Alamitos. The City of Seal Beach has the lease on Arbor Park and Arbor Dog Park. Dedicate that 10' to the City of Los Alamitos has complications that

will render it not feasible. *That fence is the southern boundary of the Joint Forces Training Base and cannot arbitrarily or capriciously be removed without express permission from the Army Corps of Engineers and the Base Commander.* It is pragmatic of the developer to give up 10 feet of space for additional park and Project parking but it requires express permission of the Base Commander and Army Corps of Engineers. *However, if they wish to deed that 10' to the US Army and not the City of Los Alamitos, that might be feasible.* This 10' would go a long way to help AYSO parking. Alternately, that 10' could also be completely separate and available to both AYSO and the Project, with the existing boundary fence kept intact or in place. It would also require an entrance from the park end of the driveway into Arbor Park, near the field.

Outdoor living space: The project would be short of meeting the common area requirement by 33,040 sf due to requests from the City of Los Al regarding the dedication of the northerly10-ft strip of land abutting Arbor Park and Arbor Dog Park, which comprises an area of approximately 1,000 sf of property to the City. If this area is dedicated to the City, then the project will be unable to meet the common area requirement because compliance with this requirement would physically preclude construction of the project at the densities allowed and with the concessions proposed. As stated above, deeding that 10' of property to the Base, ie, Army Corps of Engineers might be more feasible to accomplish the goal of providing more parking.

The document (Arbor Park Parking Study and Layout) goes on to say, "the project will provide multiple pedestrian connections with Arbor Park/Arbor Dog Park to the north." That requires the permission of the base commander and the Army Corps of Engineers to do that. It is the Base that has stated that the park will close at sunset and open at sunrise, and that therefore there will be no overnight parking.
The Pass-thru gates: *will they be removed?* They were installed by AYSO and the SWRL folks. If the parking lot is removed, that gate will no longer be necessary and will be removed by Base personnel.

Heather Park
Proposed parks within the Project are small with defined uses; kids will cross Lampson to use Heather Park. 1. crossing Lampson is *dangerous*, even with the traffic light; 2. they need to provide more park space for their own children and 3. not impact Heather Park. Our parks are well used by CPE kids and families; take care of the needs of your own residents. Don't see our park as your solution to inadequate park space.

Traffic Safety
Where are their school bus stops? Inside the project (can't pick up kids on Lampson Avenue) or at Heather Park?

Sidewalks stop at each end of the property, so people will not be able to walk on the north side of Lampson past the end of the property line; they will have to use the south side, and

the area from Heather to Candleberry contains what has become called Dead Man's curve due to the many frequent accidents along that stretch of roadway – vehicles crash into the wall on the south side of the street making walking dicey at best. You really don't see any walkers from Heather to Candleberry along Lampson. The area is very contained: once you start walking it, there is no way out – you have to walk to the end of either Heather or Candleberry. It's just you, the block wall and oncoming traffic. This is a dangerous stretch of roadway for vehicles, let alone pedestrians.

U-turns on Lampson at Heather. Vehicles exiting either Arbor Park or Arbor Dog Park must make a right turn onto Lampson due to the presence of the center divider. Consequently, many of those drivers make a U-turn at Heather Street. If I am at the light at Heather, trying to turn right, and there is someone on Lampson *appearing* to turn left, if they have a dog in the car, it's a safe bet they are coming from the dog park and will be making a U-turn right in front of me. This situation has caused many incidents at that intersection for CPE folks trying to turn right at Heather Street. *It is unsafe*.

Public Service Correspondence: "response time for the Los Alamitos PD to the project site: priority 1: less than 5 minutes." Even with sirens blaring and running all stop lights, it will take more than 5 min. In the morning, from my house (4433 Ironwood) to Katella & Los Al Blvd, it takes a good 20 minutes and that is on a good day. Given traffic and distance, that is just the way it is. SBPD will end up servicing those calls as traffic is not as bad from SBPD to Lampson as it is from LAPD to Lampson.

Project Alternative: instead of family housing, senior housing.
Instead of 77 family units, there should be 77 senior units; this alternative would provide 594 parking spaces, an increase of 20 spaces – placing parking in the north west corner of the project which is where it is the noisiest. A win-win: that helps solve two issues (noise and more parking). In addition, there would be less demand on parks (seniors are more likely not to have children who would use parks) – that puts less stress on the park within the Project and also on Heather Park. In addition, while many seniors work these days, there would most likely be less demand at peak travel times in the morning and late afternoons. Senior's parking needs would also be less than those of townhome and single-family home residents. But still more than 1.5 parking spaces per unit. Question about Townhomes. The kitchens will be on the second floor. No one wants to carry groceries up a flight of stairs. *Do they have dumbwaiters?*

End of comments.

Responses to Comment 11

Campbell, Patty, dated June 10, 2024.

11-1 The commenter provides comments to the Draft EIR which are addressed below.

11-2 The commenter states that the Draft EIR states there will be 4 people per housing unit (984 residents) and also states there is an estimated 647 residents. The commenter also expresses concerns with insufficient parking.

The commenter does not indicate where in the Draft EIR it is stated that there would be 4 people per housing unit. For purposes of evaluating Project impacts related to population and housing, the Draft EIR projects there would be approximately 647 new residents based on an average household size of 2.63, consistent with the housing household size reported in the City's 2021–2029 Housing Element (Refer to Draft EIR page 4.12-9). Refer to Master Response 2.1.3, *Parking*, for parking concerns.

11-3 The commenter states that there is no public transportation on Lampson Avenue and the nearest bus stop is 3.5 miles walking distance. The commenter states that this will increase the demand for parking and expresses concerns with inadequate parking. Although there is no transit service along Lampson Avenue, an OCTA bus stop for Route 123 is located approximately 1.2 miles at the intersection of Valley View Street and Lampson Avenue. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

11-4 The commenter expresses concerns with parking demand from AYSO states that overflow parking from AYSO will be at CPE. The commenter states that overflow parking at CPE will interfere with the CPE residents' ability to park and impact the safety of their streets. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

11-5 The commenter states that the City General Plan Policy 4.11 to monitor multifamily parking requirements is not useful because once a project is developed there is no opportunity to adjust or increase parking. The commenter also expresses concerns with guest parking and adequate parking needs. The City's Policy pursuant to the General Plan is to monitor the parking requirements to reduce the impact of parking requirements on multifamily development and establish strategies as appropriate. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

11-6 The commenter requests an explanation on how runoff will flow from JFTB to Old Ranch Country Club to the south, if there are no underground drainage pipes to Old Ranch along the Lampson. Additionally, the commenter asks whether runoff would interfere with CPE runoff.

Drainage from the Project site currently flows to Old Ranch Country Club. As stated in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the existing site generally flows in a north to south direction into an existing westerly flowing concrete channel along the site's southerly

property line. The westerly flowing channel is collected via an offsite 18-inch corrugated metal pipe (CMP) that flows under the offsite driveway to Arbor Park and discharges into an offsite earthen channel on the west side of the driveway. Runoff flows within this earthen channel are then collected by an existing 24-inch CMP that flows westerly, discharges into a westerly flowing earthen channel within the JFTB, and then drains to the Old Ranch Country Club to the south (Draft EIR, p. 4.9-1). Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for hydrology impacts.

11-7 The commenter expresses concerns with storm water runoff onto nearby streets and Old Ranch Golf Club and states there is significant flooding in the area. The commenter states that the Draft EIR is incorrect in stating that stormwater runoff is ultimately discharged into the San Gabriel River; and instead states that it ends up in the lakes of Old Ranch Golf Club.

Refer to Response to Comment 11-6 and Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for hydrology concerns. On a regional basis, stormwater drainage in the City is ultimately conveyed to the San Gabriel River.

11-8 The commenter states that if the water quality detention system does not work and there is too much water then it will flow to Lampson down Heather to Ironwood and Hazelnut Avenues, exacerbating flooding in CPE. Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for hydrology concerns.

11-9 The commenter states that the existing storm drains in CPE are not adequate for the amount of rain received in the last two years and states there is a potential that stormwater runoff from the Project could contaminate the City of Seal Beach's well on the north side of Lampson.

Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for hydrology concerns. The Project has been designed to ensure that Project peak flows do not exceed existing flows based on a conservative 100-year storm event (a rainfall event that statistically has the same 1% chance of occurring).

As stated in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project site conditions do not support infiltration and the Project site is not within and is not a part of a recharge facility for the Orange County Groundwater Basin. Implementation of the Project would not result in substantial adverse effects to local groundwater supplies. Further, the Project has been designed to incorporate best management practices to address the pollutants of concern from residential development. Therefore, the Project would have a beneficial impact on water quality.

11-10 The commenter provides a general statement that the City of Los Alamitos cannot provide any utility services for the Project except for water (Golden State Water Company) and the Project plans to tie in all utility services for the City of Seal Beach. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues

concerning the environmental analysis provided in the Draft EIR and no further response is required.

11-11 The commenter states that ALUC found the Project inconsistent. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*.

11-12 The commenter states that the statement made on Page 4.10-9 on the Draft EIR is incorrect and that ALUC voted to only require actions related to the Project site and not Housing Element Sites 7 (Laurel Park) and 10 (5030-5084 Katella) to come before the ALUC for review. The commenter is incorrect about the conclusion of the ALUC meeting on September 21, 2023. According to the meeting minutes of the ALUC Meeting on September 21, 2023, Commissioner Murphy moved to approve Option #2, and a second by Commissioner Sustarsic, Commission voted 5-0 in favor of Option #2. Option #2 required the City to submit the actions listed in Option #1, limited to Site 6 at 4655 Lampson Avenue; Site 7 Laurel Park APN 241-241 -35; and Site l0 located at 5030- 5084 Katella[5]. Therefore, the Draft EIR's statement is accurate and no revisions to the Draft EIR are required.

The commenter also states that a notice is required on all sales documents to alert residents of the presence of the JFTB and of airport noise. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*, related to buyer's awareness.

11-13 The commenter states that listing Arbor Park and Arbor Dog Park under the jurisdiction of Los Alamitos is incorrect and the City of Seal Beach developed the two parks and maintains them. The commenter is mistaken on the language in the Draft EIR when stating the two parks are within the jurisdiction of Los Alamitos. As discussed in Section 4.14, *Recreation*, of the Draft EIR, the Arbor Dog Park and Fields are currently leased by the City of Seal Beach from the JFTB for its residents, although the two parks are within the jurisdiction of Los Alamitos (refer to Page 4.14-4 of the Draft EIR). The use of the language for jurisdiction in this case meant that the parks are located within the City of Los Alamitos. However, the Draft EIR acknowledges that the parks are owned by JFTB and operated by the City of Seal Beach.

11-14 The commenter states that the 10 feet of parking would be dedicated to the City of Los Alamitos and would have complications that render it infeasible. The 10 feet dedication requires permission from JFTB. The ownership of the 10 feet dedication will be granted to the appropriate municipality governing the site at that time and is not an environmental issue analyzed under CEQA; however, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action

[5]*https://files.ocair.com/media/2024-01/ALUC%20Meeting%20Minutes%2009.21.2023_web.pdf?VersionId=Dc8GuySf9k7xwiPQexQBKGVScqtIfcfG*

being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

11-15 The commenter states that the Project is short of meeting the common area requirement by 33,040 sf if the 10 foot strip of land is dedicated to the City, the Project will not meet the common area requirement. The commenter is correct that the Project Applicant is seeking a waiver pursuant the State's Density Bonus Law for reduced common area requirement. The commenter states that deeding the 10 feet of property to the JFTB is more feasible to accomplish the goal of providing more parking. Refer to Response to Comment 11-14 above for the dedication of the 10-foot strip of land on the Project site.

11-16 The commenter states that providing the proposed pedestrian connections with Arbor Park/Arbor Dog Park requires permission from JFTB and inquires if the pass-thru gates will be removed. The proposed pedestrian connections will be self-locking to match the current operational hours of the parks. The exact configuration and implementation of the proposed pedestrian connections are speculative at this time and are not an environmental issue analyzed under CEQA; however, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

11-17 The commenter expresses concerns with street crossing on Lampson, provision of park space, and impacts to Heather Park. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for pedestrian safety concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities* for impacts to existing parks.

11-18 The commenter inquires about the location school bus stops and expresses concerns with traffic safety on Lampson Avenue. There are no school bus stops anticipated at the Project site or along Lampson Avenue. This is currently an existing school bus stop at Heather Park which serves the following schools: McGaugh Elementary, Weaver Elementary, McAuliffe Middle, and Los Alamitos HS. Children from the Project would have access to the existing school bus stop. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns. Refer also to Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for pedestrian safety concerns.

11-19 The commenter expresses safety concerns with U-turns on Lampson Avenue at Heather Street. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson* Avenue, for pedestrian safety concerns.

11-20 The commenter states that SBPD will end up servicing police calls instead of Los Alamitos Police Department (LAPD) due to traffic levels. The Project site is located within the City of Los Alamitos; therefore, it will be served by LAPD. Additionally, as discussed in Section 4.13, *Public Services*, of the Draft EIR, Los Alamitos Police Department has indicated that this

increase would not adversely impact Los Alamitos Police Department's existing resources. The existing resources would be adequate to meet the additional demands generated by the Project. Responses times and service ratios would be met and would not require the construction of new facilities (refer to Page 4.13-10 of the Draft EIR). However, SBPD has a mutual aid agreement with LAPD and can assist with public services in the event of an emergency, if needed.

11-21 The commenter advocates for the Senior Housing Alternatives for its ability to alleviate noise, parking, park, and traffic issues. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

11-22 The commenter states that three of the trees on the Project site are redwoods and believed to be Moon Trees. In response to this comment, T&B Planning, Inc. retained LSA to conduct research to determine if the redwood trees located at the southwest corner of the property at 4665 Lampson Avenue are Moon Trees (see *Attachment N* of this Final EIR).

Research found no evidence that the redwood trees at 4665 Lampson Avenue are Moon Trees. Neither the National Aeronautics and Space Administration (NASA) nor the United States Forest Service (USFS) has found any record of the Apollo 14 Moon Trees being planted in Orange County. CDFW was not part of the 1970s Moon Tree program and was not responsible for distributing Moon Tree seedlings. CDFW staff thinks it unlikely they would have been allowed to plant trees at the Lampson Avenue location since they only leased the building. Additionally, it appears the CDFW lease was several decades after the mid-1970s timeframe when the trees would most likely have been planted and therefore the commentor's speculation that "it is conceivable [CDFW] planted them" is unlikely to be accurate. Moreover, according to City records, there are no Moon Trees in Los Alamitos. In addition, none of the other sources that responded to requests for information could confirm that the redwood trees at 4665 Lampson Avenue are Moon Trees or even that any Moon Trees were planted in Orange County.

11-23 The commenter inquires whether there are dumbwaiters so residents do not have to carry grocery to a second story. There are no dumbwaiters proposed at this time. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

COMMENT LETTER 12

Steven B. Chesser
4764 Candleberry Avenue
Seal Beach, CA 90740
sbbk@mail.com

May 18, 2024

Tom Oliver, Associate Planner
City of Los Alamitos Planning Department
3191 Katella Avenue
Los Alamitos, CA 90720

Dear Mr. Oliver,

I am writing to express my opposition to the Lampson Park Place Project. I also wish to point out the inadequacy of the Draft Environmental Impact Report (DEIR).

The report states that the Proposed Project ("the project") is on land in the City of Los Alamitos but fails to acknowledge that virtually **all the negative impacts fall on the City of Seal Beach**; specifically, the existing housing development known as College Park East (CPE). My family and I have lived in CPE since 2002.

12-1

These impacts include vastly increased traffic on Lampson Avenue; the only access to and from the project is on Lampson Avenue. Lampson Avenue already has experienced numerous fatal and near fatal accidents over the years due to speeding, running red lights, illegal U-turns and driving while impaired. This situation can only get worse with the addition of 246 housing units and nearly 600 vehicles entering and leaving the project. The density of the project, 20 units per acre, is far in excess of what exists in surrounding neighborhoods. The Notice of Availability for the DEIR even concedes that Transportation impacts, even after mitigation measures "**would remain significant and unavoidable**".

There is a high probability of spillover parking into CPE, as the project **by design** has fewer than the recommended number of parking spaces.

12-2

The project refers to FAA approval of the project based on the narrow interpretation of building height and obstruction to air navigation, but **completely ignores the potential of airplane accidents and the attendant danger of residential encroachment**. The Airport Land Use Commission has advised that the residential development adjacent to the Joint Forces Training Base (JFTB) is **incompatible** with public health and safety.

The report also ignored the National Commission on Military Aviation Safety report, which released its findings to Congress on December 1, 2020. From the report's

12-3

introduction: "More than 6,000 U.S. noncombat military aviation mishaps occurred between 2013 and 2018. These mishaps occurred during training or routine operations. They claimed the lives of 198 servicemembers and civilians and cost the nation more than $9.41 billion in damages, including 157 destroyed aircraft." The report is highly relevant to the project which directly abuts a military aviation facility, the JFTB.

I request the DEIR be modified to reflect the **true** impacts of the project. I believe once these are known and understood, the project will need to be scaled back to something more compatible with the surrounding neighborhoods and the capacity of the existing roads and infrastructure.

12-3
(CONT.)

Thank you for considering my views.

Sincerely,

Steven B. Chesser

Responses to Comment 12

Chesser, Steven, dated May 18, 2024.

12-1 The commenter expresses opposition to the Project and states that the Draft EIR fails to acknowledge all impacts that fall on the City of Seal Beach, specifically College Park East. The Draft EIR analyzes the environmental impacts of the Project, including potential impacts that occur across jurisdictional boundaries. Additionally, the City of Seal Beach is acknowledged as a Responsible Agency for the Project (see Table 3-6, of the Draft EIR).

12-2 The commenter expresses concerns with increased traffic, access, traffic accidents, density, significant and unavoidable transportation impacts, and parking. The commenter does not provide specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

Explanation of potential impacts related to increased traffic, traffic accidents, significant and unavoidable transportation impacts, and parking are provided in Master Response 2.1.1, *Transportation and Traffic Congestion*, Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, and Master Response 2.1.3, *Parking*. The Project is consistent with the City's General Plan and zoning designations for the site, including allowable density. Vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Additionally, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site.

12-3 The commenter states that the Draft EIR completely ignores the potential of airplane accidents and attendant danger of residential encroachment near JFTB and states that ALUC has advised the residential development is incompatible with public health and safety. The commenter states the Draft EIR ignored the National Commission on Military Aviation Safety Report, released on December 1, 2020 and states that it is relevant to the Project site. The commenter requests the Draft EIR be modified to reflect the true impacts of the Project.

Contrary to the commenter's assertion, the Draft EIR included an analysis of safety hazards of JFTB on the Project (see Section 4.8, Hazards and Hazardous Materials, of the Draft EIR). The National Commission on Military Aviation Safety is a report on military aviation nationwide and does not provide safety information or accident data specific to JFTB. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*.

Comment Letter 13

draft EIR for 4665 Lampson

Donna Chinn <donna.chinn@gmail.com>
Mon 6/10/2024 3:15 PM
To:Tom Oliver <Toliver@cityoflosalamitos.org>

Please forgive me if this is already included in the draft, but I did not find the results of a traffic flow study. As you are probably aware, the neighborhood of College Park East in Seal Beach has many concerns about the additional traffic that the proposed development would bring. Would there be a left turning lane for eastbound cars at the development entrance? It would seem that there would be a big back up of traffic, especially during the morning and evening rush periods. 13-1

We are also concerned about the number of additional cars overall. Even though it appears that the proposal has the legally required number of parking spaces, I believe that more spaces would be called for. College Park East does not have the capacity for potential overflow parking. 13-2

Lastly, the proposed project would replace areas that are presently covered with vegetation. Removal of mature trees, and grass, to a lesser extent, is definitely a negative impact to the environment. It would destroy habitat for local birds and other wildlife and reduce carbon mitigating capacity. 13-3

Sincerely,
Donna Chinn
College Park East, Seal Beach

Responses to Comment 13

Chinn, Donna, dated June 10, 2024.

13-1 The commenter inquires about the results of a traffic flow study. The commenter asks whether there would be a left turn lane for eastbound cars at the development entrance and whether it would cause a backup of traffic during the morning and evening peak hours. The Project proposes a cross-street stop-controlled intersection at the primary neighborhood entry, which will allow for full access, including left turns for eastbound vehicles. A queuing analysis was performed at the Project driveways to determine whether there is adequate storage length during the AM and PM peak hours. The analysis demonstrates that there is adequate storage at both driveways to accommodate peak hour queues (see Section 1.7, Queuing Analysis, of *Attachment G* of this Final EIR). Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns.

13-2 The commenter expresses concerns about the increased number of vehicles and inadequate parking. The commenter states that College Park East does not have the capacity for potential overflow parking. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

13-3 The commenter expresses concerns with removal of mature trees and grass as it would destroy habitat for local birds and other wildlife and also reduce carbon mitigating capacity. The Project would result in the removal of existing trees. As discussed in Section 3.0, *Project Description*, of the Draft EIR, a variety of trees, shrubs, accent plants, and ground cover are proposed along the perimeter of the Project site, in common areas, recreational amenities, open space areas, and parking areas. Landscaping will feature drought-tolerant plant materials. A total of 441 trees, including 51 36" box focal trees, 190 15-gallon trees, 5 10x10'specimen canopy trees, and 195 24/36" box trees, would be planted throughout the Project site (refer to Page 3-7 of the Draft EIR).

As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, no special-status plants were detected on the Project site. However, the Project does provide limited suitable habitat for nesting birds and common raptor species. Construction activities have the potential to adversely impact nesting birds and raptors and roosting bats. Implementation of Mitigation Measures MM 4.3-1 through MM 4.3-3 would ensure that pre-construction surveys are conducted for nesting birds, nesting raptors, and bat roosts prior to site disturbance. If nesting birds or raptors are present on the Project site, mitigation requires avoidance of active nests. With implementation of the required mitigation, potential impacts to nesting birds and common raptors would be reduced to below a level of significance (refer to Pages 4.3-29 through 4.3-39 of the Draft EIR).

To:Tom Oliver <Toliver@cityoflosalamitos.org>

IRONSCALES couldn't recognize this email as this is the first time you received an email from this sender vitachircord@gmail.com

Dear Mr. Oliver,
I'm writing to state my opposition to the Lampson development project. 14-1

Sincerely,

Vita Chirco
Seal Beach resident

Responses to Comment 14

Chirco, Vita, dated May 12, 2024.

14-1 The commenter expresses opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

Comment Letter 15

From: markjuliac@gmail.com
To: Tom Oliver
Subject: LAMPSON HOUSING
Date: Sunday, April 28, 2024 7:21:48 PM

Dear Mr. Oliver:

As a homeowner at CPE, I would like to voice my concern regarding Lampson not suitable for more residential development. 15-1

Back on Dec 22 2019, a car crashed through the block wall facing Lampson into my property in the middle of the night, missing the pool by a few feet. I was thankful that the car didn't plunge into the pool. Police Officer Kieth Phan came the next day and filed a police report. It took me six trips to the police station and over a year including filing at small claim court to get the driver's insurance to pay for repairing the wall. Building more houses on Lampson would definitely worsen public safety and I hope the city would put a brake in the Lampson project. 15-2

Should you have any questions, please do not hesitate to contact me.

Mark & Julia Chow.
4357 Ironwood, Seal Beach, CA 90740

Responses to Comment 15

Chow, Mark and Julia, dated April 28, 2024.

15-1 The commenter expresses concerns with the Project which are responded below.

15-2 The commenter provides a car accident history onto their property from Lampson Avenue and expresses concerns with public safety. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Refer to Master Response 2.1.8, *Public Safety*.

Hand Delivered 6/10/24

Regarding 4665 Lampson Ave,
Draft Environmental Impact Report Dated April 24, 2024

Mr. Oliver,

In response to the Notice seeking Comments to the Draft Environmental Report for 4665 Lampson. Ave, I am enclosing the following:

1. Comments to **Air Quality Impact Analysis** by Urban Crossroads dated May 5, 2023;

2. Comments to **Phase 1 Environmental Site Assessment Report by EFI Global** dated January 18, 2023, and copy of **FINAL Phase I Environmental Site Assessment Report to GSA** Southwest Regional Laboratory for 4665 Lampson Avenue, Los Alamitos, California 90720; Contract No. GS-00F-168CA/Award No. GS-10F-0076K prepared by Tetra Tech Inc, dated May 2016;

3. Comments on **Airport Land Use Assessmen**t by Nick Johnson dated October 2, 2023 addressed to Nicole Morse at T&B Planning and August 14, 2023 letter to Chet Simmons from Johnson Aviation Consulting;

4. Comments on **Noise Impact Analysis** prepared by Urban Crossroads buy Bill Maddux dated April 22, 2024;

5. Comments to **Biological Technical Report** by Glenn Lukas dated April 1, 2024;

6. Comments to **Phase I Cultural Resources Stud**y by BFSA Environmental Services by BFSA Environmental Services dated April 7, 2023;

7. Comments on **Fire Service Questionnaire** - Orange County Fire Authority dated March 18, 2024 by Tamara Rivers Management Analyst.

8. Comments on **Seal Beach Police Department Questionnaire** signed by Michael Ezroj on November 16, 2023;

9. Comments on **Traffic Analysis by Urban Crossroads** dated September 2022.
Please confirm timely receipt to my email.

16-1

Thank you,
Carol Churchill

Enclosures

RECEIVED
CITY OF LOS ALAMITOS
2024 JUN 10 AM 9:04

Exhibit 1

Comments to Air Quality Impact Analysis by Urban Crossroads dated May 5, 2023

The executive summary states that development projects must comply with laws put in place by federal, state and local regulatory agencies. "Any operation or activity that might cause the emission of smoke, fly ash, dust, fumes, vapors, gases, or other forms of air pollution which can cause damage to human health, vegetation or other forms of property, or ca cause excessive soiling on any other parcel shall conform to the requirements of the South Coast Air Quality Management District.

SCAQMD Rule 402 states that a person shall not discharge for any source whatsoever such quantities of air contaminants or other material that cause injury, detriment, nuisance or annoyance to any considerable number of persons, or to the public, or that endanger….health or safety..of such person or public….

SCAQMD Rule 403 states in part that the rule is intended to reduce the amount of particulate matter entrained in the ambient air as a result of man-made fugitive dust sources by requiring actions to prevent or reduce fugitive dust emissions. The rule applies to human-made conditions capable of generating fugitive dust and applies to earth moving and grading activities.

16-2

The Site Plan Exhibit 1-B is not consistent throughout all of the DEIR Reports.

16-3

Grading as a Source of Fugitive Dust Emissions.

The Air Quality Analysis identifies grading as a source of generating fugitive dust particles on the site during construction.

The Air Quality analysis identifies the following pollutants: Carbon Monoxide, Oxides of Nitrogen, Particulate Matter, Volatile Organic Compounds, Reactive Organic Gasses, Lead, and Odors.

The Air Quality Analysis fails to address the pollutants identified in the January 18, 2023 Phase I Site Assessment Report by EFI Global which reports on a Phase II Site Assessment that also identified Asbestos, Lead and. More significantly levels of Arsenic at 42 times the screening level of .11mg/kg.

The omission of these pollutants in its Air Quality Analysis, given the acknowledge grading of 12 acres of land for residential development, places the public's health and safety at significant risk based on SCAQMD Rules 402 and 403.

16-4

Carbon Monoxide. The operation of the Joint Forces Training Base adjacent to the site is a source for the burning of fuel which is cumulative to the burning of fuel for the grading and construction process. The Analysis failed to take the burning of significant qualities of fuel at the military airport base into consideration in determining the extent of Carbon Monoxide produced during construction.

Oxides of Nitrogen. The operation of the Joint Forces Training Base adjacent to the site is a source for burning of fuel which is cumulative to the burning of fuel for the grading and construction process.

16-5

Ozone - The production of internal combustion engines synthesize into a Ozone. he operation of the Joint Forces Training Base adjacent to the site is a source for burning of fuel which is cumulative to the burning of fuel for the grading and construction process.

16-5 (CONT.)

Particulate Matter comes from road dust, windblown dust, and construction. Ambient fine particulates increase mortality rates, respiratory infections and asthma attacks. The sources identified are fuel combustion, motor vehicles, and equipment.

16-6

The Air Quality Analysis omits to include two of the three particulates located on the property to be graded: arsenic and asbestos in its particulate matter analysis.

As stated above, the **EFI Global report** dated January 18, 2023, include a Phase II Environment Site Assessment including boring samples that identified Lead, Arsenic and Asbestos fibers.

The report states:

Arsenic was detected in all four soil samples analyzed at a maximum concentration of 4.64 mg/kg.

The residential screening level for arsenic is 0.11.

And this screening Leven was exceed in all of the four samples analyzed.

The **EFI GLOBAL report** concludes these levels are below background concentrations **at CALIFORNIA AIR FORCE BASES..**

16-7

The project site is NOT an Air Force Base. The project is adjacent to an Air Force Base which would suggest that pollutants from the operation of the Base have been deposited beyond the JFTB's BORDER where the residential properties are planned to be constructed. The concentration of arsenic on the site IS 42 TIMES higher than residential screening levels.

Grading the site will **release particulate matter containing lead and arsenic** that will endanger the public health given the extent of the contamination.

Cumulative public safety impacts will occur when the soil is graded due to the additional pollution consisting of lead and asbestos that will be released during demolition of buildings and grading of a 12 acre site that abuts the flight path of the JFTB.

Grading will create particulates that can run untreated into the **storm drain running to the ocean untreated, the sewer system, and into well water belonging to the City of Seal Beach.**

16-8

The site will require extensive mitigation measures to remediate the concentration of arsenic for public safety and health before grading can occur.

Those measures must be identified in the final EIR with the South Coast Air Quality Management District, the City of Seal Beach, and the County of Orange approving the grading plan.

16-9

Exhibit 2

Comments to Phase 1 Environmental Site Assessment Report by EFI GLOBAL dated January 18, 2023.

The report states that **EFI GLOBAL** ***conducted only "visual" observations of the site and structures.*** *The consultant states that its services did* ***NOT*** *include "evaluating compliance of past or future owners with applicable local, provincial and federal government laws and regulations. The Consultant concludes that:*

"IT SHOULD BE NOTED THAT COMPOUNDS OR MATERIALS OTHER THAN THOSE DESCRIBED COULD BE PRESENT IN THE SITE ENVIRONMENT."

Section 3.5.3 entitled Commonly Known or Reasonably Ascertainable Information asked the Use if it is aware of any commonly known information in the community about the subject property with retard to recognized environmental conditions. The User informed the Consultant that user was not aware of any information....

The Consultant's Report is deficient because the property owner/user failed to comply with Section 1.4 entitled User Responsibilities" and deliver to Consultant ***the following public record*** *provided User in connection with the auction conducted by the GSA for the sale of the property to User:*

FINAL Phase I Environmental Site Assessment Report
GSA Southwest Regional Laboratory
4665 Lampson Avenue, Los Alamitos, California 90720
Contract No. GS-00F-168CA/Award No. GS-10F-0076K

Prepared For:
United States General Services Administration
Office of Real Property Utilization and Disposal (9PZ)
50 United Nations Plaza – 4th Floor North
San Francisco, California 94102

Prepared By:
Tetra Tech, Inc.
45610 Woodland Road, Suite 400
Sterling, VA 20166
May 2016
Tetra Tech Project No: 103G3995003.001

16-10

The Final Phase I Environmental Assessment Report dated May 2016 *contains significantly data including the following:*

The Site was identified three times in the Hazardous Materials Generator (HAZNET) database. In 2000, the Site was identified as generating asbestos containing waste with disposal in a landfill.

16-11

Page 1 of 3

In 2003, the Site was identified as a generator of off-specification, aged or surplus organics with a disposal method identified as transfer station.

In 2010, the Site was identified as generating ages or surplus organics with a disposal method identified as other treatment. In 2012, the Site was identified as generating a hazardous waste with a disposal method of storage, bulking, and/or transfer off site with no treatment or recovery.

16-11 (CONT.)

A copy of the full report (435 pages) is transmitted by email to the City of Los Alamitos, the City of Seal Beach, and by USPS to Consultant.

++++++++++++++++

The Consultant reports under section entitled ***User Provided Documents*** *that the owner did* ***NOT*** *provide Consultant any information* ***either verbally or in writing*** *(i.e. title report) regarding environmental clean up liens or activity or use limitations encumbering the subject property.*

EFi Global recommended a Phase II Environmental Site Assessment. The scope of the work included a geophysical survey and soil sampling of 11 borings on August 16 2022.

The Phase II Environmental Assessment soil samples revealed measurable levels of ***arsenic was detected in all 4 samples and the screening Level was exceeded; as well as lead.*** *The consultant pointed out that screening levels at Air Force Bases are significantly higher than for RESIDENTIAL USE.* ***The concentration found in the soil was 4.65 mg/kg, which is 42 TIMES the level allowed for residential use, identified by Consultant at 0.11 mg/kg***

16-12

Given the intended use of the property for "residential" use *and outdoor recreation by residents in the soil, and the high water table underlying the property, liquefaction reported in the Hydrology and Geotechnical Reports, and the location of a ground water well belonging to the City of Seal Beach Department of Water, there is a risk to public safety and the need to assure* ***ground water supplies and storm drains are not contaminated by run off, and air borne contaminates are not released during construction.***

Additional chemical analysis of the soil for ***other hazardous materials*** *that may become* ***wind borne during construction should be conducted, mitigation measures identified,*** *and the results shared with the City of Seal Beach and City of Los Alamitos and any other governmental agency entitled to those results, before the EIR is approved.*

16-13

Page 2 of 3

The 12 acre site will be graded to provide building pads to address flooding on the site, will create dust and wind borne contaminates such as lead, arsenic and asbestos, necessitates ***rigid ongoing monitoring*** *and reporting to the City of Seal Beach and City of Los Alamitos.*

Consultant identified ***asbestos*** *within the building to be removed that requires special precautions to prevent contamination of the site. Mitigation measure includes asbestos Operaton and Maintenance Plan in addition to asbestos abatement PRIOR TO any renovation/ demolition that would disturb the building materials.*

Lead based paint*, possible* ***radon concentrations.*** Mitigation measures include construction personnel be properly trained in lead related construction.

16-14

Additional Testing is required for TPHd - diesel in soil sample, ***evidence of flooding and storm drain run off*** *that could carry untreated contaminants into the ocean, all must to be addressed by the Consultant in terms of mitigations measures before and during construction to protect the water supply, prevent air pollution, and protect the public's safety.*

Exhibit 3

DEIR Comment on Airport Land Use Assessment

The Report consists of 88 pages from Nick Johnson, a consulting firm of Johnson Aviation Inc dated October 2, 2023. It was directed to Nicole Morse of T&B Planning. T&B Planning is listed as a consultant for both the City of Los Alamitos and the User of the Property Lampson LLC, one of the partners being Matthew Waken. Mathew Waken employed former City of Los Alamitos staff member Les Johnson, who was employed by T&B Planning, to be his "agent" before the City of Los Alamitos Planning Department. The Senior Planner in Los Alamitos is Tom Oliver, who was supervised by Les Johnson during Johnson's employment in Los Alamitos. T&B Planning as a conflict of interest in that it is financially obligated to both the City of Los Alamitos and the owner of the Property for which it is preparing the DEIR. 16-16

Nick Johnson's resume is attached. It reflects that he has no experience in evaluating the operation of a Military Airport. The consultant lacks the knowledge and expertise to express an opinion on whether the Airport Land Use Plan for the Joint Forces Training Base Los Alamitos is inconsistent with findings by the Airport Land Use Commission and the California Department of Transportation-Division of Aeronautics. Both State Agencies found that the Housing Element Update included three properties adjoining the JFTB that presented a risk to the public's health and safety due to noise and crash hazards. 16-17

Nick Johnson failed to provide the CIty's Consultant, T&B Planning, the City of Los Alamitos City Council and Planning Commission, and the Airport Land Use Commissions with evidence that contradicted findings by the National Commission on Military Safety (2020) **" Report to the President and the Congress of the United States".** 16-18

The Executive Summary of the Report reads:

The National Commission on Military Aviation Safety asked thousands of pilots and maintainers this question during visits to military flight lines. Across the country, certain answers were consistently repeated, regardless of Service, rank, or airframe: **insufficient flight hours, decreasing proficiency levels, inadequate training programs, excessive administrative duties, inconsistent funding, risky maintenance practices, and a relentless operations tempo.**

The Commission also independently assessed this same question. The Commission **reviewed thousands of mishap reports**, consulted volumes of secondary research, and conducted **data analysis** to determine **why mishap rates have increased**. The Commission also utilized its resident knowledge and experience: two retired four-star military aviators; a former member of the National Transportation Safety Board and Director of Safety and Survivability for the Navy; a former Secretary of the Army who had previously served as Acting Secretary of the Air Force and as a member of Congress; an engineer turned CEO for major aircraft manufacturers; a White House Deputy Chief of Staff for Operations who served four presidents; and a former Navy helicopter pilot who oversaw Air Force One and Marine One while director of the White House Military Office.

This report shares **critical perspectives from the flight line and addresses the safety concerns that so many aviators and maintainers candidly share**d. This report also covers broader topics in the Commission's statutory charter, such as aviation mishap

Page 1 of 6 6/09/24

rates, unexplained physiological episodes, and aviation maintenance delays. The complete list of the Commission's recommendations is provided in Appendix B.

During its study, the Commission realized that many aviation safety issues are uniquely interconnected and require collaborative, cross-cutting solutions. For example, increasing spare parts inventories does little good if there are not enough experienced maintainers to install them. Fixing one issue may require fixing several related issues, and all solutions must be crafted to work in concert. In this report, the Commission took special care to balance competing and sometimes conflicting priorities, and its recommendations are proposed with an understanding of the importance of harmonization.

Our findings and recommendations focus on four areas where Congress and the Department of Defense can take immediate steps to reduce aviation mishaps: Pilots should fly; maintainers should maintain; data can save lives; and funding should be consistent.

Aircrews and Maintainers

The Commission found that aviation and maintenance experience, the key to doing a job safely and efficiently, is declining. Newly trained pilots and maintainers are reporting to operational units without basic skills. Flight hours are being replaced with simulator hours, yet the simulators are often outdated, out of service, or unavailable. Aircrews and maintainers are saddled with additional nonaviation duties that are more valued than their primary duties for purposes of promotion. Furthermore, on top of their experience gaps, some aircrews are experiencing physiological episodes when an aircraft's environmental systems fail to meet the needs of the pilot.

16-18 (CONT.)

This report addresses these issues in detail. Two chapters address the shortcomings in initial training, follow-on training, and personnel management of aircrews and maintainers. One chapter examines the effects of a relentless pace on military aviation for both machine and personnel. Another chapter discusses the human-machine interface and recommends changes in the acquisition process to better meet the needs of the pilot during aircraft design and modification.

"Additional Duties. . . We have an instructor pilot trying to get a forklift license."
—USAF Junior Officer

However, while addressed in separate chapters, these are compounding problems. A reduction in flight hours for new pilot training adds to the requirements for operational units. These units, already overtasked from a high operations tempo, must then conduct training to develop basic skills for new personnel. This stagnates the units' ability to conduct high-level training. In other words, junior pilots and maintainers are starting their careers a lap behind, and then never catching up, all while their units buckle under the additional stress of getting them up to speed. This, in turn, leads to further costs. By being overworked, overstressed, and overloaded with additional duties unrelated to aviation, the morale and readiness of aircrews and maintainers erode. Experienced aircrews and maintainers leave the Services and are replaced by personnel with no expertise. The average level of experience falls, and the cycle repeats.

To address these issues, the Commission recommends a multipronged approach. As outlined in the report, the Services must improve the training of new pilots and maintainers to broaden their experience and limit the burden on operational units. Additionally, the Services must increase the retention of experienced aircrews and

maintainers through better personnel management, increased bonuses, and better schooling opportunities. The Services, having invested years and millions of dollars in initial, on-the-job, and advanced training, must focus the careers of aviation professionals on their aviation duties. Furthermore, to increase safety and readiness, the Services must ensure that aircraft are designed to match the needs of the aircrew who fly them. Without such complementary solutions, the U.S. military could be left with the worst of all worlds: increased costs, decreased readiness, and eroded safety margins.

Data Deficiencies and the Need for a Joint Safety Council

During its study, the Commission identified numerous data deficiencies in military aviation. Due to poor data collection and analysis, the Services and the Department of Defense are missing out on valuable opportunities to reduce risk, prevent mishaps, and optimize human performance. This is repeatedly referenced in the report. For example, one chapter explains how the Department lacks sufficient data collection methods and analysis capabilities to reduce risks and improve safety, while the Services lack standardized procedures and consistent processes in their mishap reporting. Another chapter examines how improved pilot monitoring could help identify, understand, and reduce unexplained physiological episodes. Additional chapters discuss the need for improved data collection to measure training efficacy for pilots and maintainers.

In studying these issues, the Commission reviewed the current practices of commercial aviation, which has successfully used data analytics to identify and reduce safety risk. While certain commercial practices are limited in their applicability to military aviation, the Commission identified policies and practices that offer opportunities to reduce risk and improve safety. For example, compared to the commercial sector, the Commission determined that the Department of Defense is not properly organized to conduct data analytics, coordinate aviation safety activities, develop safety standards or data collection requirements, or review the Services' implementation of aviation safety programs.

The Commission recommends creating a Joint Safety Council. Reporting to the Deputy Secretary of Defense, the council would be responsible for establishing military aviation safety standards, collecting and analyzing safety data, and developing safety priorities. Led by safety officials from the Services, the council would have the necessary expertise and authority to monitor and coordinate aviation safety programs across the Department. This recommendation is further outlined in Chapter 4, and a legislative proposal is contained in Appendix H.

Consistent and Predictable Resourcing

The question of the next mishap was not hard to answer at one Marine base, where a junior Marine told the Commission that his unit was reusing expendable $5 filters on aircraft. The unit, he explained, still had missions to do even if there was no money to purchase new filters. This was one of the egregious examples the Commission found, and it was a direct result of funding suddenly being withdrawn to meet other priorities. Inconsistent funding, and the tolerance it fosters for maintenance shortcuts, were the likely causes of the next mishap at this unit.

"We are doing 12-hour days, five days a week, and hardly flying." —F-22 Pilot

"Guys are going to take risks they don't even know is a risk." —Marine Supervisor

16-18
(CONT.)

A lack of consistent funding is especially pernicious to military aviation safety. Flying, like surgery and other highly technical professions, is a perishable skill that needs routine practice to maintain proficiency. When a unit's funding is restored in the last part of a fiscal year, it simply cannot make up for lost training and deferred maintenance. Late funding, no matter the amount, cannot reverse the impact of months of insufficient flying hours, missing parts, and deferred maintenance. Timing is everything.

By far the greatest and most preventable source of unpredictable funding is Congress's use of continuing resolutions. The Department of Defense has begun the fiscal year with a continuing resolution for 13 of the past 18 fiscal years. As continuing resolutions have become more common, their average duration has also increased. There is near universal agreement that continuing resolutions significantly degrade readiness, waste money, and put the lives of Servicemembers at unnecessary risk.

The Commission concurs and heard examples from every Service of how inconsistent funding degrades virtually every aspect of military aviation. However, empirical research on the impact of continuing resolutions is lacking. Therefore, while the Commission first recommends that the Department of Defense and Congress resource military aviation in a consistent and predictable manner, the Commission also recommends that Congress require a comprehensive, data-driven analysis of continuing resolutions' impact on military aviation.

16-18 (CONT.)

Conclusion

In line with the Commission's statutory charter, this report provides a comprehensive review of military aviation safety. The issues outlined above remain illustrative, not exhaustive. Overall, this report addresses numerous topics related to military aviation, including mishap rates, safety data, unexplained physiological effects, sustainment management systems, funding, operations tempo, training, and talent management. Each of these topics warrants careful review and attention, particularly due to the stakes involved.

During the Commission's six-year study period, aviation mishaps cost the U.S. military 198 lives, 157 aircraft, and well over $9 billion in damages. To reduce these unacceptable costs, the Commission stresses that systemic problems require integrated solutions that prioritize safety. The cost of doing anything else is simply too high.

Website: https://www.globalsecurity.org/military/library/report/2020/ncmas_final_report_20201201.pdf

++++++++++++++++++++++++++++++++++++

Financial Conflict of Interest. Nick Johnson's expertise lies in commercial airports, not military air bases which negates the value of his conclusions. The consultant's opinions are biased due to a financial conflict of interest. Nick Johnson was employed by the Lampson purchasers to secure a report from the FAA, and was

16-19

subsequently hired by the City's DEIR Consultant T&B Planning. Nick Johnson failed to disclose his financial interest between himself and the developer publicly as it related to the preparation of is Report.

16-19 (CONT.)

Cumulate Noise Impact Ignored. The consultant's also failed to consider the cumulate impact on public safety and welfare of noise generated from Traffic along Lampson Ave, in addition to the noise generated from the operation of the JFTB.

The Noise Report prepared by Bill Maddox of Urban Crossroads dated April 22, 2024, included A Noise Impact Analysis at 4 test sites. Using the Maximum dBa measurement at each of the 4 test sites, it is clear that the use of soundproofing mitigation measures on the windows does not reduce the sound dBa levels to that which is the Standard set by the City of Los Alamitos, 45dBa in the interior of the residential units.

Nick Johnson's use of sound contours to conclude that sound was below the threshold failed to recognize that those contours are not static barriers over which sound cannot travel. Noise consists of vibrations that do not travel in a straight line. The sound waves expand like a ripple of water. The Lampson projects places house along the JFTB border with no evidence of a SOUND WALL around the entire project site, property except along the border of Lampson Road. Even that sound wall appears to eliminate the Emergency Vehicle Access Gate form Lampson, placing the residents in jeopardy in the event of a major emergency: fire or earthquake.

16-20

Additional Mitigation Measure to protect the public safety from crash risks and hearing loss should be imposed in a written Development Agreement that include:

1. Written Disclosure in all sales/leasing/rental materials that the State Airport Land Use Commission-Joint Forces Training Base Los Alamitos California, and California Department of Transportation-Division of Aeronautic, and the National Commission on Military Safety (2020) " Report to the President and the Congress of the United States", made findings that operations the Joint Forces Training Base may place the public's health and safety due to excessive noise causing **hearing loss and/or crash related injuries and property damage.**

These warnings should be included in deeds so the warning "runs with the land" to subsequent purchasers since the noise impact from the JFTB are not only reasonably expected to be operated indefinitely but news report from the JFTB state that the use of the base will be expanded.

16-21

2. Require construction of residential units to include "sound cancelling insulation" in the walls and ceilings in addition to sound attenuation windows and doors.

16-22

3. Install sound monitoring sites within the Lampson Project and required the owner/seller/lessor to pay for all mitigation costs associated with decibel readings above the CIty's standard of 45 dBa from the date of sale sale of the unit to the original purchaser. 16-23

Internal Inconsistency of DEIR Reports.

The sound wall barrier along Lampson appears to remove the "Emergency Vehicle Access Point on the east corner of the property at Lampson, which conflicts with the DER Traffic Report. The DEIR Reports are internally inconsistent with multiple Site Plan versions utilized by consultants. ALL of the DEIR Site Plans should be identical. 16-24

Crash Safety Risks Ignored

Nick Johnson's conclusion in his Letter to the City Of Los Alamitos dated August 14, 2023, lacks credibility because the consultant has no experience in safety on Military Airport Bases.

The Consultant did not utilize the **National Commission on Military Safety (2020) " Report to the President and the Congress of the United States"** to evaluate the safety of the project that borders a Military Airport Base.

The resume of the consultant attached to the August 14, 2023 letter demonstrates his complete of lack of knowledge and experience in the operation of a military airport and the attendant safety risks involved in that operation. His opinion lack gravitas. 16-25

The failure to the City's DEIR consultant, T&B Planning, to recognize this lack of competency places the public at substantial safety risks.g

Mitigation measures should include the employment of a consultant with expertise in the operation of a military airport, and identification of mitigation measures to protect the health and safety of occupants of the housing projects.

The mitigation measures should include adequate set backs from the JFTB boundary; submission of a final site plan to the Orange County Fire Authority and Los Alamitos and Seal Beach Police Departments establishing adequate ingress and egress for emergency vehicles along Lampson Ave and throughout the project site. Mitigation may also include reducing the height of the 3 story buildings closer to the JFTB boundaries where take off and landing occur and where the risk of crashes is higher. 16-26

Exhibit 4

Comments on Noise Impact Analysis dated April 22, 2024

On site traffic noice analysis starts with the false premise that "on-site exterior and interior nose impacts are from traffic related noise levels". 16-27

Both the State Airport Land Use Commission and the California Department of Transportation Division of Aeronautics issued findings that noice levels from the operation of the Joint Forces Training Base (JFTB) Orange County have significant noise levels that negatively impact the health and welfare of the public.

The Noise Impact Analysis states that the City of Los Alamitos requires a 45 dBA CNEL internal noise level. 16-28

Remediation measure consist of windows that close and produce a noise reduction of 20.3 dBa on first floors and 26.3 dB on second floors adjacent to Lampson. Installation of a "noise wall" along Lampson is designed to reduce "traffic" noise and has no impact on noice from aircraft, maintenance, operations of the JFTB.

The Noice Impact Analysis conducted limited Noise Level Tests on 4 sites. Those sites were identified as Arbor Dog Park, 4701 Ironwood, 5001 Lunar Drive and Lampson at Old Ranch Country Club. 16-29

The "averaging" of sound and vibrations over the day to obtain a lower than maximum sound impact, fails to protect the public from harmful cumulative noises generated from both traffic and the operation of the military airport.

Site 1 - Arbor Dog Park (north of project) measured a 69.7 dBa daytime and a 52.7 dBa night reading

Site 2 - 5001 Lunar Drive (east of project along Lampson) measured a 76.9 dBa daytime and a 66.2 dBa night reading

Site 3 - 4701 Ironwood Ave (south of project along Lampson) measured 83.7 dBa daytime and 76.6 dBa night reading

Site 4 Lampson at Old Ranch Country Club- west of project measured 69 dBa daytime and 68.7 dBa night reading.

Even applying the mitigation measures proposed (sealed windows, sound barrier along Lampson) does not reduce the interior reading by a sufficient amount to meet City standards for interior sound of 45 dBA. 16-30

Page 1 of 2 Rev 6/9/24

Additional mitigation measures should be required:

1. Disclosure in all sales/leasing materials that the State Airport Land Use Commission and California Department of Transportation-Division of Aeronautic made findings that due to operational noise from the JBTB, the public may be susceptible to health and safety risks associated with excessive noise causing hearing loss and/or crash related injuries and property damage. These warnings should be included in deeds so the warning "runs with the land" to subsequent purchasers since the noise impact from the JFTB are not only reasonably expected to be operated indefinitely but news report from the JFTB state that the use of the base will be expanded.

16-30 (CONT.)

2. Install sound cancelling insulation in the walls and ceilings of all housing units in addition to sound attenuation windows and doors.

16-31

3. Install sound monitoring sites within the project and required the owner to pay for all mitigation costs associated with decibel readings above 45dBa from the sale of the unit to the original purchaser.

16-32

4. The sound wall barrier along Lampson appears to remove the "Emergency Vehicle Access Point on the east corner of the property at Lampson, which conflicts with the DER Traffic Report. The DEIR Reports are internally inconsistent with multiple Site Plan versions utilized by consultants. ALL of the DEIR Site Plans should be identical.

16-33

Exhibits 5 to 8

Comments to Biological Technical Report by Glenn Lukas, Assoc.

The location of two defined sensitive species, the **Cooper's Hawk and Winterling Merlin**, suggest a mitigation measure to prevent destruction of nests between February1 and September 15 consisting of having a biologist conduct a nesting survey three days before grading, disking, and demolition. The nests be cordoned off until the nests are empty. This mitigation measure should be included in a written Development Agreement. 16-34

Comments to Phase I Cultural Resources Study by BFSA Environmental Services

The consultant concludes that there is a limited potential that archaeological deposit are present. It is recommended that as a Condition of Approval the Permit required an archaeologist be retained to conduct periodic spot checks of related ground disturbance activities.

The recommendation for mitigation consists of 4 spot checks: initial ground exposure; 50% of ground disturbance, 80% of ground disturbance, and any other time determined by geologist. If any historic or archaeological resources are encountered, the construction should stop within 50 feet of the find and be assessed for importance.. Excavated finds shall be curated before insurance of an occupancy permit. If human remains are found, a special procedure shall be followed consistent with CEQA Section 15064.5(e). 16-35

Fire Service Questionnaire - Orange County Fire Authority

COMMENT: There does not seem to be a "report" from the Orange County Fire Authority. Instead there is a Questionnaire.

The OCFA states that any increase in population can potentially increase workload. All projects are cumulative and OCFA uses a **fair share** approach to mitigate fire service response impacts and facility/equipment needs.

The OCFA states that the **sources for funding** OCFA are property taxes and charges for services. 16-36

Comment: The Mitigation recommended is a written Condition of Approval is for the Developer to enter into a **written Fire Protection Agreement** with the Orange County Fire Authority which determines the **fair share of funding** for capital improvements necessary to provide adequate fire protection. These **additional property fee assessments** should include the additional costs will be added to the **Homeowners Association Fee** and paid to the OCFA annually by purchasers. This will mitigate the negative financial impact on existing property owners for increased population caused by the project.

The CIty of Los Alamitos should be a party to the HOA Covenants, Conditions and Restrictions, to enforcement the payment of adequate HOA fees to cover the costs of Fire Protection finding, enforceable through a "lien"imposed on delinquent homeowner title, recoverable upon sale of the property or creditor enforcement, thus preventing the City from having to carry the burden of unpaid assessments. 16-37

There is no Site Plan Exhibit identify the access roads for emergency vehicles in the questionnaire. The boundaries lines in Exhibit 1-4 of the Traffic Analysis do NOT show fire equipment can navigate **around ALL sides of the buildings** within the project boundaries. This is a significant safety hazard if a "wall" will surround the project on all sides, or if landscaping prevents a vehicle from driving around the perimeter of each structure. Setbacks 16-38

on the North, East and West sides of the Project may need to be increased and hardscape installed for vehicles and fire hydrants. Exhibit 3-1 "Existing Number of …Lanes" shows that the **"Emergency Vehicle Access"** identified on Exhibit 1-2 **DOES NOT Exist** at Driveway 8. This is **a major inconsistency that affects public safety.**

16-38 (CONT.)

Additional conditions of approval should include review by the OCFA of construction documents including SITE PLANS to confirm applicable fire safety codes and regulations are implemented.

16-39

The **June 2022 Traffic Report does not contain a current Site Plan** that shows the entrances and exit from the projects site. The Report needs to be amended to include the final design plan including the **width of interior street**s, **turning radius,** location of **fire hydrants**, restricted parking curbs and signs and adequate set backs between building and adjacent property line**s to allow fire trust sufficient space to maneuver around ALL sides of the building.** This is relevant to the boundaries along the JFTB. The Site Plan should verify first responders are not trapped within the Project by walls or too narrow set backs in the event of a major emergency such as collapsing buildings in an earthquake, or a plane crash along the JFTB borders.

16-40

City of Seal Beach Police Department Questionnaire.

Comment: Respondent Seal Beach Police Department states SBPD has concerned about the **cumulative impact of multiple projects** along Lampson relative to traffic flow and safety which should be reviewed and mitigation measures proposed.

The Seal Beach Police Department states that SBPD has concerns about **parking impacts to College Park East and users of Arbor Park** who use the Lampson office site for parking. Existing resource (personnel) levels may not be adequate to manage traffic safety concerns on Lampson. The EIR should carefully consider these issues and mitigate measure for traffic enforcement, road maintenance, signalization, and parking restrictions.

16-41

A traffic mitigation plan by the County of Orange, Seal Beach and Los Alamitos should should be considered on Lampson Ave. Respondent states that Seal Beach has no funding for traffic remediation for the Los Alamitos Project. **A traffic signal should be considered at this time.**

16-42

Additional concerns to be addressed in the Final EIR Mitigation measures, and raised by the SBPD, are parking for residents, guest and park users. The only additional parking overflow feeds into Seal Beach College Park East, placing the burden on SBPD for enforcement. Overflow parking in College Park East becomes is a **foreseeable** public safety hazard due to pedestrians crossing a street with a history of accidents and fatalities and the lack of a traffic signal.

16-43

Exhibit 9

DEIR Traffic Analysis - Urban Crossroads - September 2022

Notwithstanding the Comments by the Seal Beach Police Department, the CrossRoads **does NOT provide mitigation measures indicated are required for public safety reasons.**

CrossRoads report dated September 2022 states that only two improvement are contemplated. Summary of Findings, Section 1.1.

1, No stoplight is contemplated. The report states: **If and when** Driveway 2 meets the appropriate warrants, a traffic signal should be installed at this location and should be coordinated along with the other traffic signals on Lampson.

2. Frontage improvements will be limited to sidewalks, driveway modifications needed to accommodate site access and landscaping.

There is no recognitions or response to the **public safety concerns expressed by Seal Beach Police Department in the Questionnaire submitted by the SBPD.** The failure to mitigate safety concerns transfer the costs of enforcement to the City of Seal Beach and imposes safety risks that can be mitigated by a **traffic study and mitigation plan**. 16-44

The County of Orange should be consulted and be the lead agency in coordinating safety plans to prevent the Lampson property owner from avoiding its financial responsibility for public safety improvements. 16-45

The Cross Roads Traffic Analysis failed to take into consider the **cumulative impacts** of multiple projects along Lampson, including **Old Ranch Country Club in Seal Beach** which will add additional traffic impacts to an existing road that has a documented history of excessive accidents and fatalities. 16-46

The Traffic Analysis does not recognize the **"7 foot tall sound wall"** proposed in the **DEIR Noise Report** to be located along Lampson w**hich wall would block the "emergency vehicle access" entry** on the Consultants Exhibit 1-2 Preliminary Site Plan. 16-47

There is no consistent use of dated Site Plan through out the DEIR. The DEIR Reports have various dates that are not uniform in terms of Site Plans, **and there appears to be NO overall review of all DEIR Reports for internal inconsistencies. For Example:** The Planning Department in Seal Beach signed the Traffic Study Agreement (June 1, 2023) **BEFORE the Police Department completed the Police Services Questionnaire** in November 2023. This demonstrates that the Police Department's **safety concern**s were NOT provided to Urban Crossroad in connection with the preparation of the consultants Summary of Findings in June of 2023. This makes the Approved Traffic Analysis Scoping Agreement deficient in terms of public safety concerns. 16-48

Responses to Comment 16

Churchill, Carol, dated June 09, 2024.

16-1 The commenter provides introductory remarks and a summary of the comments on the Draft EIR's technical reports made in the body of the letter. Refer to Response to Comment 16-1 through 16-48 for responses to these comments. No further response is required. Attachments provided as part of this Comment 16 are included in *Attachment A* of this Final EIR.

16-2 The commenter summarizes the regulatory requirements under the executive summary section of the Project's Air Quality Impact Analysis (*Technical Appendix B1* to this EIR) related to South Coast AQMD Rules 402 and 403. The City acknowledges that these rules apply to the Project. This comment does not raise any issues regarding the environmental analysis provided in the Draft EIR and no further response is required.

16-3 The commenter states that Exhibit 1-B, Site Plan, in the Project's Air Quality Analysis is not consistent throughout all technical studies. All technical reports show consistent and accurate site plans relevant to the particular environmental topic being addressed. However, the Vehicle Miles Traveled (VMT) analysis (*Technical Appendix N2* of the Draft EIR) included a preliminary site plan, which has been updated and included as *Attachment B* to this Final EIR pursuant to the commenter's request.

16-4 The commenter asserts that the Air Quality Impact Analysis failed to address the pollutants identified in the Phase I ESA (*Technical Appendix H1* of the Draft EIR) which includes asbestos, lead, and arsenic.

The Air Quality Impact Analysis (*Technical Appendix B1* of the Draft EIR) provides an analysis of air quality impacts consistent with South Coast AQMD methodology. Section 3.2 of the Air Quality Impact Analysis (*Technical Appendix B1* of the Draft EIR) explains that the criteria used to determine the significance of potential Project-related air quality impacts are taken from the CEQA Guidelines (14 CCR §§15000, et seq.). Based on these thresholds, a project would result in a significant impact related to air quality if it would: 1) Conflict with or obstruct implementation of the applicable air quality plan; 2) Result in a ***cumulatively considerable net increase of any criteria pollutant for which the project region is in non-attainment [emphasis added***] under an applicable federal or state ambient air quality standard; 3) Expose sensitive receptors to substantial pollutant concentrations; 4) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people.

South Coast AQMD has developed regional significance thresholds for criteria pollutants that are regulated by federal and state laws through the development of human health based and/or environmentally based criteria for setting permissible levels. In May 2022, the California Air Pollution Control Officers Associated (CAPCOA) in conjunction with other California air districts, including South Coast AQMD, released the latest version of California Emissions Estimator Model (CalEEMod) version 2022.1. The purpose of this model is to calculate

construction-source and operational-source criteria pollutants (VOCs, NOx, SOx, CO, PM_{10}, and $PM_{2.5}$) and GHG emissions from direct and indirect sources; and quantify applicable air quality and GHG reductions achieved from mitigation measures. Based on the analysis presented in Section 4.2, *Air Quality*, of the Draft EIR and the Air Quality Impact Analysis, the Project's air quality impacts were determined to be less than significant. No changes in the Draft EIR are required.

The Phase II Environmental Site Assessment (ESA; *Technical Appendix H2* of the Draft EIR), determined that there was no evidence of a significant release of potential chemicals of concern to the subsurface in the area investigated, including lead and arsenic. With respect to arsenic concentrations, the original Phase II ESA included a typographical error. The Phase II ESA (see Section 5.0 and *Attachment C1* to this Final EIR) has been updated to correct this typographical error and to more accurately reflect the fact that the detected arsenic concentrations found at the Project site are all below the upper bound concentration of 12 mg/kg, and thus, they are trace or background concentrations that do not warrant further investigation or mitigation. The corrected Phase II ESA now reads: "Although the detected concentrations of arsenic found at the site exceed the residential screening level, all levels are less than the DTSC upper bound background concentration of 12 mg/kg."

Section 4.8, *Hazards and Hazardous Materials*, of the Draft EIR identifies the potential for encountering asbestos-containing materials (ACMs) and lead based paint (LBP) during demolition activities. The use of ACM (a known carcinogen) and LBP (a known toxic), both of which are considered hazardous materials, was a common building construction method prior to 1978 and may be present in the existing building. All proposed demolition activities would be required to comply with all applicable federal, State, and local hazardous materials regulation, which includes mandatory provisions for the safe removal, transport, and disposal of PCBs, ACMs and LBP.

Additionally, the Project is required to comply with South Coast AQMD Rule 1403 (Asbestos Emissions) and Title 17 of the CCR, Division 1, Chapter 8: Accreditation, Certification, and Work Practices for Lead-Based Paint and Lead Hazards applies. South Coast AQMD Rule 1403 establishes survey requirements, notification, and work practice requirements to prevent asbestos emissions from emanating during building renovation and demolition activities. Assuming that ACMs are present in the existing structure located on-site, then Rule 1403 requires notification of the South Coast AQMD prior to commencing any demolition activities. Rule 1403 also sets forth specific procedures for the removal of asbestos and requires that an on-site representative trained in the requirements of Rule 1403 be present during the stripping, removing, handling, or disturbing of ACM. Mandatory compliance with the provisions of Rule 1403 would ensure that construction-related grading, clearing, and demolition activities do not expose construction workers or nearby sensitive receptors to significant health risks associated with ACMs. Because future development on the Project site would be required to comply with AQMD Rule 1403 during demolition activities, impacts due to ACMs would be less than significant.

Title 17, CCR, Division 1, Chapter 8: Accreditation, Certification and Work Practices for Lead-Based Paint and Lead Hazards, defines and regulates lead-based paint. Any detectable amount of lead is regulated. During the demolition of the existing structure, there is a potential for exposing construction workers to health hazards associated with lead. The Project would be required to comply with Title 17, CCR, Division 1, Chapter 8, which includes requirements such as employer-provided training, air monitoring, protective clothing, respirators, and handwashing facilities. Mandatory compliance with these requirements would ensure that construction workers and the public are not exposed to significant LBP health hazards or upset during demolition and/or during transport of demolition waste to an appropriate disposal facility and would ensure that impacts related to LBP remain less than significant. Compliance with the above regulatory requirements would ensure that removal of ACMs or LBPs would result in a significant hazard to the public or the environment through routine transport, use, or disposal of hazardous materials, and impacts would be less than significant. Therefore, no mitigation measures are required and no revisions to the Draft EIR are required.

16-5 The commenter asserts that the Air Quality Impact Analysis failed to take into account of burning of significant qualities of fuel at JFTB into consideration in determining the extent of Carbon Monoxide, Nitrogen Oxides, and Ozone produced during construction.

The purpose of the Project's construction analysis is to determine whether Project-generated emissions would result in a *cumulatively considerable* net increase of any criteria pollutant in the South Coast Air Basin. As discussed in Section 4.2, *Air Quality*, of the Draft EIR, according to South Coast AQMD, projects that exceed its project-specific significance thresholds are considered by the South Coast AQMD to be cumulatively considerable. Conversely, projects that do not exceed the project-specific thresholds are not considered to be cumulatively significant. As shown in Table 4.2-5, *Overall Construction Emission Summary*, of the Draft EIR, construction activities associated with the Project would not exceed South Coast AQMD thresholds for any criteria pollutants, including carbon monoxide, nitrogen oxides, and ozone. Therefore, impacts associated with Project-related construction emissions would be less than cumulatively considerable (refer to Page 4.2-30 of the Draft EIR). Thus, the Air Quality Impact Analysis adequately analyzes cumulative impacts that would result from construction activity.

16-6 The commenter states general information about particulate matter. This comment does not raise any issues regarding the environmental analysis provided in the Draft EIR and thus no further response is required.

16-7 The commenter restates the previous comments made related to the Air Quality Impact Analysis not including asbestos, lead, and arsenic into its analysis. The commenter states that arsenic at the site is 42 times higher than the screening levels and grading of the site will release particulate matter containing lead and arsenic that will danger the public health given the extent of contamination. Although the Project site is not a California Air Force Base, EFI Global's report was informed by the fact that the Project site is adjacent to a base installation (the JFTB) in order to evaluate background arsenic levels. The comments here regarding potential health

risk impacts related to air quality and contamination are fully addressed in Response to Comment 16-4. Comments related to arsenic are also addressed in Response to Comment 16-12. No further response is required.

16-8 The commenter states that grading will create particulates that can run untreated into the storm drain running to the ocean, sewer system, and well water in the City of Seal Beach untreated. Construction-related water quality impacts were evaluated in Section 4.6, *Geology and Soils*, and Section 4.8, *Hydrology and Water Quality*. As stated, the Project will be required to implement a Stormwater Pollution Prevention Plan (SWPPP) for construction-related activities. The SWPPP will specify the Best Management Practices (BMPs) that the Project Applicant will be required to implement during construction activities to ensure that waterborne pollution – including erosion/sedimentation – is prevented, minimized, and/or otherwise appropriately treated prior to surface runoff being discharged from the subject property. Examples of BMPs that may be utilized during construction include, but are not limited to, sandbag barriers, geotextiles, storm drain inlet protection, sediment traps, rip rap soil stabilizers, and hydro-seeding. In addition, the Project would be required to implement erosion and dust control measures pursuant to South Coast AQMD Rule 403 to minimize water- and windborne erosion. Mandatory compliance with the SWPPP and the erosion control and dust control measures would reduce, prevent, or minimize soil erosion from Project-related construction activities. Therefore, impacts related to substantial soil erosion or the loss of topsoil would be less than significant and no mitigation is required. Additionally, pursuant to the LAMC Chapter 8.44, the Project Applicant would be required to implement a Water Quality Management Plan (WQMP) to demonstrate compliance with the City's NPDES municipal stormwater permit, and to minimize the release of potential waterborne pollutants, including pollutants of concern for downstream receiving waters. Therefore, the Project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality during long term operation and impacts would be less than significant.

16-9 The commenter states that the site will require extensive mitigation to remediate the concentration of arsenic for public safety and health before grading can occur. Refer to Response to Comment 16-4 regarding the significance of arsenic levels found on the Project site. A typographical error has been corrected. Detected arsenic concentrations found at the Project site were all below the upper bound concentration of 12 mg/kg, and thus, they constitute trace or background concentrations that do not warrant further investigation or mitigation, including remediation.

16-10 The commenter cites select text on limitations on liability in the Project's Phase I ESA (*Technical Appendix H1* of the Draft EIR) ["It should be noted that compounds or materials other than those described could be present in the site environment."]. Additionally, the commenter asserts that the Project's Phase I ESA is deficient because the property owner/user failed to provide a past Phase I ESA that was conducted by Tetra Tech, Inc. (Tetra Tech; included in *Attachment C1* of the Final EIR) in 2016.

Section 1.2 of the Phase I ESA report states that the report has been prepared in accordance with generally accepted environmental methodologies referred to in ASTM E1527-13 and E1527-21 and contains all of the limitations inherent in these methodologies (Refer to Pages 12 and 13 of the Phase I ESA). Language related to limitations on liability and exceptions are commonly found in Phase I ESAs and do not represent a deficiency of the analysis. Moreover, if any other contaminants are discovered during construction that were not identified in the ESA, construction contractors would be required to comply with all applicable federal, State, and local laws and regulations, including but not limited requirements imposed by the Environmental Protection Agency (EPA), Department of Toxic Substances Control (DTSC), and the Santa Ana Regional Water Quality Control Board (RWQCB).

EFI reviewed the above-referenced 2016 Tetra Tech report and found that no recognized environmental conditions (RECs) or recommendations for additional investigation were noted (see *Attachment C2* to this Final EIR). The findings of the above-referenced Tetra Tech report do not alter the results of EFI's Phase I ESA, dated January 18, 2023. Additionally, a Phase II ESA (*Technical Appendix H2* of the Draft EIR) was conducted for the Project which included further geological survey and soil sampling of the Project site.

16-11 The commenter states findings from the 2016 Tetra Tech report related to previous listings of the Project site that contends that they were not provided to the ESA consultant. As discussed in the Project's Phase I ESA (*Technical Appendix H1* of the Draft EIR), the Project's listings in HAZNET in 2000 for generating asbestos containing waste with disposal in landfill, in 2003 as a generator of off-specification aged or surplus organics with a disposal method as transfer station, in 2010 as generating ages/surplus organics identified as other treatment, in 2012 as a generator of hazardous waste with a disposal method of storage, bulking, and/or transfer offsite with no treatment or recovery were all listed within the tables under Section 5.1, Subject Property. Therefore, all previous listings related to the Project site were adequately identified in the Project's Phase I ESA.

16-12 The commenter states the findings related to arsenic in the Phase II ESA and expresses concern with ground water, storm drain runoff, and air borne contaminants during construction. For clarification, the arsenic screening levels were not compared to an Air Force Base land use scenario. EFI recognizes that the arsenic detected in near-surface soils exceeds the Department of Toxic Substances Control (DTSC) screening level (SL) for residential use. It is well documented and accepted by regulatory agencies, including the DTSC, that background or trace concentrations of naturally occurring arsenic in soil throughout the state of California often exceeds the DTSC-SL value of 0.11 milligrams per kilogram (mg/kg). As described in the Phase II, as a result of this analysis, an upper bound background concentration of 12.7 mg/kg can be used as an initial screening level for arsenic concentrations, which has been further proven by the following studies. A statistical analysis was performed at 14 Air Force installations in California to evaluate background levels of arsenic. The result of the analysis detected that an upper bound background concentration of 12.7 mg/kg can be used as an initial screening level for arsenic concentrations.

Furthermore, in a study titled *Determination of a Southern California Regional Background Arsenic Concentration in Soil* (Chernoff, et al., 2008), which was prepared by DTSC staff, the authors concluded, "A Probability Plot and statistical analysis of a large data set from school sites in Los Angeles County gave an upper-bound arsenic concentration of 12 mg/kg. A Probability Plot for school sites from 5 counties in Southern California also gave an upper-bound background arsenic concentration of 12 mg/kg." The study concluded, "This finding suggests that 12 mg/kg [may be] a useful screening number for evaluating arsenic as a chemical of potential concern."

Based on the aforementioned studies, which included both Air Force Base installations and school sites in California, 12 mg/kg is a useful screening number for evaluating arsenic as a chemical of potential concern. All arsenic concentrations in the soil samples analyzed at the Project site were detected at concentrations less than the upper-bound arsenic concentration of 12 mg/kg, and therefore, is not considered a significant environmental concern that would warrant further investigation or mitigation or result in an unacceptable health risk to future occupants.

16-13 The commenter states that additional chemical analysis for other hazardous materials that may become wind borne during construction should be conducted. The commenter does not identify specific materials of concern. The potential for hazardous materials on the Project site were fully analyzed in the Phase I and II ESAs (*Technical Appendix H1and H2* of the Draft EIR). Additionally, as discussed in Section 4.8, *Hazards and Hazardous Materials*, of the Draft EIR, with mandatory compliance with applicable hazardous materials regulations, the Project would not create significant hazard to the public or the environment through routine transport, use, or disposal of hazardous materials during the construction phase (refer to Pages 4.8-16 and 4.8-17 of the Draft EIR) Thus, no additional analysis is required.

16-14 The commenter expresses concern with asbestos, lead, arsenic, and radon. EFI notes that lead and arsenic were not detected at concentrations that would pose an unacceptable health risk to future site occupants, the surrounding community or underlying groundwater. Furthermore, construction Best Management Practices (BMPs) will be employed as a part of the proposed Project to mitigate fugitive dust. Prior to any future demolition or site improvements, the existing structures will undergo routine abatement for asbestos and lead, which will be performed by a properly licensed contractor. Furthermore, such activities will be performed following South Coast Air Quality Management District requirements for the removal and disposal of any suspect asbestos containing material or lead-based paint. Therefore, ongoing monitoring and reporting is not warranted. Refer to Response to Comment 16-4.

As noted in the Phase I ESA, based on research by the USEPA, the average radon concentrations for Orange County are less than 2.0 picocuries per liter (pCi/L), which is below the 4.0 pCi/L action level set by the USEPA. Furthermore, the Radon Potential Zone Map for Orange County, California, dated 2015 notes that the subject property and surrounding area are located in an area of "Low Potential for Indoor Radon Levels Above Four PicoCuries per

Liter"[6]. Therefore, radon is not an environmental concern for the proposed future development, and further investigation or mitigation is not warranted.

The Project will result in the demolition of the currently existing vacant office building in order to allow for project construction, and thus radon testing associated with the existing office building would not result in any relevant results as to the project. Even after demolition of the building, as a general rule it is not industry standard to test a vacant lot for radon and receive accurate results representative of what future construction conditions may be and given that the Project site is located within a low potential area for radon, no testing of radon after construction would be required.

16-15 The commenter states additional testing for TPHd is required to protect the water supply, prevent air pollution, and protect the public's safety. Based on the results of the Phase II ESA, the concentrations of TPH-d detected in site soils does not warrant further investigation. Furthermore, the concentrations do not pose an unacceptable health risk to site occupants, the environment, water supply, or groundwater. Thus, no additional testing for TPHd is required. Refer also to Response to Comment 16-8 related to the SWPPP and BMPs that the Project will implement to protect water quality.

16-16 The commenter states that T&B Planning, Inc. has a conflict of interest in that it is financially obligated to both the City of Los Alamitos and the owner of the Property. The Draft EIR was prepared in accordance with CEQA and the CEQA Guidelines, which allow a lead agency to either prepare an EIR directly with its own staff or accept a draft prepared by a consultant retained by an applicant. (CEQA Guidelines Section 15084(3).) Additionally, CEQA Guidelines Section 15084 states that "before using a draft prepared by another person, the Lead Agency shall subject the draft to the agency's own review and analysis and must reflect the independent judgment of the Lead Agency. The Lead Agency is responsible for the adequacy and objectivity of the draft EIR."

Pursuant to Public Resources Code Section 21067 and CEQA Guidelines Article 4 and Section 15367, the City is the Lead Agency under whose authority this EIR has been prepared. "Lead Agency" refers to the public agency that has the principal responsibility for carrying out or approving a project. As documented in the Draft EIR, the EIR represents the independent judgment of the City of Los Alamitos (as the CEQA Lead Agency) and presents an objective evaluation of the physical environmental effects that could result from construction and operation of the proposed 4665 Lampson Avenue Project refer to Pages S-1, 1-1, and 1-4 of the Draft EIR). The City staff and the City's environmental consultants conducted peer review of the Draft EIR prior to release of the Draft EIR for public review. The City conducted independent review, evaluated, and exercised judgment over the documents and the issues raised and addressed prior to their release for public review. Therefore, the Draft EIR for the

[6] *https://www.conservation.ca.gov/cgs/Documents/Publications/Special-Reports/SR_232-Radon-Map.pdf*

Project is prepared adequately in accordance with the CEQA Guidelines and no revisions to the Draft EIR are required.

This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

16-17 The commenter states that Nick Johnson, the preparer of the Project's Airport Land Use Assessment (*Technical Appendix J1* of the Draft EIR), has no experience in evaluating the operation of a Military Airport and lacks knowledge and expertise to express an opinion on whether the Airport Land Use Plan for the JFTB is inconsistent with findings by ALUC and Caltrans. Contrary to the commenter's assertions, Nick Johnson has several years of experience with military airports including the land use compatibility plan for the joint use Colorado Springs Airport and Peterson Space Force Base, March Air Reserve Base, Marine Corps Air Station Miramar, and Naval Air Station North Island (see *Attachment D* of this Final EIR).

16-18 The commenter states that Nick Johnson failed to provide the findings from a report by the National Commission on Military Safety in 2020. The commenter goes on to quote portions of text from the executive summary of the report. The report provides a comprehensive review of military aviation safety.

The Draft EIR included an analysis of safety hazards of JFTB on the Project (see Section 4.8, *Hazards and Hazardous Materials*, of the Draft EIR). The National Commission on Military Aviation Safety is a report on military aviation nationwide and does not provide safety information or accident data specific to JFTB. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*.

16-19 The commenter restates that the consultant's opinion is biased due to a financial conflict of interest. Refer to Responses to Comments 16-16 and 16-17.

16-20 The commenter states that cumulative noise impacts were not considered and that the mitigation measures on windows would not reduce the interior noise impacts at four test sites.

The commenter may be conflating the operational noise analysis conducted to analyze noise impacts at the four nearest receiver locations with the on-site aircraft noise impacts. The commenter states that the noise measurement at the four nearest receiver locations would exceed the 45dBA standards for interior noise level standards. As discussed in Table 4.11-4, *Summary of Noise Significance Criteria*, the significance of threshold for operational noise analysis is 55 dbA during daytime and 50 dBA during nighttime. The interior noise level standard of 45 dBA is for onsite aircraft noise impacts. The commenter's remark that mitigation measures on windows would not reduce the noise impacts at four test sites were based on applying the results from the operational noise analysis to the on-site aircraft noise threshold. Nevertheless, the Project cumulative noise impacts were fully addressed in Section 4.11, *Noise*, of the Draft EIR, under Subsection 4.11.8, *Cumulative Impact Analysis* (refer to Pages 4.11-34

through 4.11-36). Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*, for airport noise impacts.

Additionally, the commenter states that the proposed sound wall appears to eliminate the emergency access on Lampson Avenue. As shown in Figure 3-38, *Wall and Fence Plan*, of the Draft EIR, the proposed wall would not eliminate emergency access on Lampson Avenue. Exhibit ES-A of the Project's Noise Impact Analysis (*Technical Appendix K* of the Draft EIR) has been updated accordingly and included as *Attachment F* to this Final EIR.

16-21 The commenter requests additional mitigation measures to be imposed in a Development Agreement that include written disclosure for all sales/leasing/rental materials to include the findings of the findings from a report by the National Commission on Military Safety in 2020. Refer to Response to Comment 16-18 related to the findings of this report. As stated in *Technical Appendix J1*, of the Draft EIR, the ALUC mandates compliance with the State's real estate disclosure provisions requiring buyer and renter notification for new residential land uses within an airport influence area (even if these state laws were to be revised or rescinded). The ALUC also requires that signs providing these disclosures and notices be "prominently posted" in real estate sales offices and within the new development depicting overflight areas and helicopter traffic patterns. Please note that a development agreement is not being proposed as part of the Project entitlements. The requested mitigation measures would not clearly lessen any environmental impacts of the Project because requirements for notifications such as these are already required, and therefore does not constitute significant new information pursuant to the CEQA Guidelines.

16-22 The commenter requests that additional mitigation measures be imposed in a Development Agreement to require construction of residential units to include sound cancelling insulation in the walls and ceilings. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*, for airport noise impacts. Project Design Feature PDF N-2 specifies architectural upgrades that are incorporated into the Project design to ensure the Project meets the State and City interior noise standards. Please note that a development agreement is not being proposed as part of the Project entitlements. Thus, no additional mitigation measures are required. The requested mitigation measures would not clearly lessen any environmental impacts of the Project because noise impacts were evaluated and determined to be less than significant with incorporation of PDF N-2, and therefore does not constitute significant new information pursuant to the CEQA Guidelines.

16-23 The commenter requests additional mitigation measures to be imposed in a Development Agreement to install sound monitoring sites with the Project and require the owner/seller/lessor to pay for all mitigation costs associated with decibel readings above the City's standard of 45 dBA from the date of sale of the unit to the original purchaser. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*, for airport noise impacts. The City's interior noise standards will be enforced as outlined Los Alamitos Municipal Code Section 7.20, Noise. The Municipal Code establishes noise regulations and enforcement

mechanisms to control unnecessary, excessive, and annoying sounds emanating from all properties and land uses in the City. No further mitigation is needed. The requested mitigation measures would not clearly lessen any environmental impacts of the Project because noise impacts were evaluated and determined to be less than significant, and therefore does not constitute significant new information pursuant to the CEQA Guidelines.

16-24 The commenter states that Exhibit ES-A, *Noise Control Measure Summary*, in the Project's Noise Impact Analysis appears to remove the emergency access on Lampson Avenue and that the site plan is not consistent throughout all technical studies. Pursuant to the commenter's request, the Project's Noise Impact Analysis has been updated accordingly and included as *Attachment F* to this Final EIR.

16-25 The commenter restates previous comments made about Nick Johnson's expertise and the findings of from a report by the National Commission on Military Safety in 2020 and requests mitigation measure for the employment of a consultant with expertise in the operation of a military airport. Refer to Responses to Comments 16-17 and 16-18 related to Nick Johnson's experience and the findings of the 2020 report.

16-26 The commenter states that mitigation measures should include adequate setbacks from JFTB boundary, submission of a final site plan to OCFA, Los Alamitos and Seal Beach Police Departments to establish adequate ingress and egress for emergency vehicles, and reduction in building height for buildings closer to the boundary of JFTB. As discussed in Section 4.8, *Hazards and Hazards Materials*, of the Draft EIR, the FAA issued Determinations of No Hazard to Air Navigation (*Technical Appendix J2*) after its aeronautical study of the proposed Project revealed that the structures would not exceed obstruction standards and would not be a hazard to air on January 26, 2022 (refer to Page 4.8-18 of the Draft EIR). Additionally, the Project's Fire Master Plan is being reviewed by OCFA as part of the Project's entitlement process. Thus, the City determines no additional mitigation measures are required. Los Alamitos and Seal Beach Police Department were both contacted during the preparation of the Draft EIR and were provided with a copy of the site plan. Responses from both agencies are found in *Technical Appendix L* of the Draft EIR. The requested mitigation measures would not clearly lessen any environmental impacts of the Project because safety hazards with the Project proximity to the Los Alamitos JFTB were evaluated and determined to be less than significant, and therefore does not constitute significant new information pursuant to the CEQA Guidelines.

16-27 The commenter states that the onsite traffic noise analysis starts with the false premise that onsite exterior and interior noise impacts are from traffic related noise levels and that both ALUC and Caltrans Division of Aeronautics issued findings that noise levels from JFTB have significant noise levels that negatively impact the health and welfare of the public. The commenter is conflating two separate issues: Section 7, On-site Traffic Noise Impact, in the Noise Impact Analysis (*Technical Analysis K* of the Draft EIR), which is to determine the noise exposure levels that would result from adjacent traffic noise sources in the Project study area,

and Section 12, Onsite Aircraft Noise Impacts. Noise from aircraft is discussed under Section 12, Onsite Aircraft Noise Impacts, of the Noise Impact Analysis. Refer also to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*, for airport noise impacts.

16-28 The commenter cites to the Noise Impact Analysis related to the City of Los Alamitos 45 dBA CNEL interior noise level criteria and installation of windows and soundwall. The commenter also states that the installation of the noise wall has no impact on noise from aircraft, maintenance, operations of JFTB. The commenter is correct that the noise wall is not intended to reduce noise levels from aircraft operations. Refer also to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*, for airport noise impacts.

16-29 The commenter states the four noise measurement locations that Urban Crossroads, Inc. recorded under existing noise conditions and the measurement daytime and nighttime reading. The noise measurements provided by the commenter are incorrect and higher than those in the Draft EIR and Noise Impact Analysis. As discussed in Section 4.11, *Noise*, of the Draft EIR,

- Location L1, represents the noise levels located approximately 10 feet north of the Project site near Arbor Dog Park at 4665 Lampson Avenue. The noise level measurements collected show an average daytime noise level calculated to be 49.9 dBA Leq and an average nighttime noise level calculated to be 42.4 dBA Leq at location L1.

- Location L2 represents the noise levels located approximately 845 feet east of the Project site near single-family residence at 5001 Lunar Drive. The noise level measurements collected show an average daytime noise level calculated to be 60.8 dBA Leq and an average nighttime noise level calculated to be 52.4 dBA Leq at location L2.

- Location L3 represents the noise levels located approximately 540 feet southwest of the Project site near single-family residence at 4701 Ironwood Avenue. The noise level measurements collected show an average daytime noise level calculated to be 68.7 dBA Leq and an average nighttime noise level calculated to be 60.7 dBA Leq at location L3.

- Location L4 represents the noise levels located approximately 5,486 feet west of the Project site near Old Ranch Country Club Golf Course at 3901 Lampson Avenue. The noise level measurements collected show an average daytime noise level calculated to be 56.5 dBA Leq and an average nighttime noise level calculated to be 55.1 dBA Leq at location L4 (refer to Page 4.11-4 pf the Draft EIR).

16-30 The commenter incorrectly asserts that the Project does not meet the interior noise standards of 45 dBA. The commenter requests that additional mitigation measures be required to include written disclosure for all sales/leasing/rental materials to include the findings from a report by

the National Commission on Military Safety in 2020. Refer to Response to Comment 16-18 related to the findings of this report. Refer also to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*, related to buyer awareness. The Project Applicant will make all required airport disclosures in accordance with State and federal laws. As discussed in Section 4.10, *Land Use and Planning*, of the Draft EIR, the ALUC mandates the provision of the State's real estate disclosure regarding buyer and renter notification for new residential land uses within an airport influence area even if these state laws were to be revised or rescinded. The ALUC also requires that signs providing these disclosures and notices be "prominently posted" in real estate sales offices and within the new development depicting overflight areas and helicopter traffic patterns. Buyer awareness is required as part of the City's approval process for the Project. The buyer awareness notification process is built into the real estate disclosure laws of the State to ensure that potential buyers are fully informed before buying a home near an airport if they are sensitive to the types of annoyances or disruptions that may come with the location (refer to Page 4.10-18 of the Draft EIR). The requested mitigation measures would not clearly lessen any environmental impacts of the Project because requirements for notifications such as these are already required for the Project, and therefore does not constitute significant new information pursuant to the CEQA Guidelines.

16-31 The commenter requests additional mitigation measures to require construction of residential units to include sound cancelling insulation in the walls and ceilings. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*, for airport noise impacts. Refer to Response to Comment 16-22 related to architectural updates. The requested mitigation measures would not clearly lessen any environmental impacts of the Project because noise impacts were evaluated and determined to be less than significant with incorporation of PDF N-2, and therefore does not constitute significant new information pursuant to the CEQA Guidelines.

16-32 The commenter requests additional mitigation measures to require the installation of sound monitoring sites within the Project and require the owner/seller/lessor to pay for all mitigation costs associated with decibel readings above the City's standard of 45 dBA from the date of sale of the unit to the original purchaser. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*, for airport noise impacts. Refer to Response to Comment 16-23. The requested mitigation measures would not clearly lessen any environmental impacts of the Project because noise impacts were evaluated and determined to be less than significant, and therefore does not constitute significant new information pursuant to the CEQA Guidelines.

16-33 The commenter states that Exhibit ES-A, *Noise Control Measure Summary*, in the Project's Noise Impact Analysis appears to remove the emergency access on Lampson Avenue and that the site plan is not consistent throughout all technical studies. Refer to Response to Comments 16-3, 16-24 and 16-26.

16-34 The commenter states that the mitigation measure to prevent destruction of nests and that nests be cordoned off until nests are empty should be included in a written Development Agreement. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, Mitigation Measure MM 4.3-1 includes measures for establishing appropriate avoidance buffers around the nest (based on the species detected), and the buffer areas shall be avoided until the nests are no longer occupied. Moreover, as discussed in Section S.0, *Executive Summary*, of the Draft EIR, State law requires the preparation of a mitigation monitoring and reporting program (MMRP) to ensure that measures that would avoid or lessen significant environmental effects of the project are implemented after project approval. The mitigation measures identified in this EIR have been described in sufficient detail to provide the necessary information to identify the party or parties responsible for carrying out the mitigation, when the mitigation will be implemented, and why the mitigation has been required. An MMRP would be adopted by the City at the time that the Project is considered for approval (refer to Page S-5 of the Draft EIR). The requested mitigation measures would not clearly lessen any environmental impacts of the Project because a Development Agreement is unnecessary to address any such impacts in light of the CEQA requirement that an MMRP be prepared and approved to ensure the existing mitigation measures identified in the Biological Resources section of the Draft EIR are implemented. As such, the commenter's recommendation that this mitigation measure be included does not constitute significant new information pursuant to the CEQA Guidelines. Please note that a development agreement is not being proposed as part of the Project entitlements.

16-35 The commenter recommends a condition of approval for an archaeologist to be retained to conduct periodic spot checks related to ground disturbance activities and includes details of the recommended mitigation measure. The commenter's requested mitigation is already provided under Mitigation Measures MM 4.4-1 and MM 4.4-2 in the Draft EIR, which requires an archaeologist to conduct periodic spot checks during construction, among other things. Thus, the City determines that no additional mitigation measures are required.

16-36 The commenter first states that a questionnaire was prepared instead of a report by OCFA, summarizes OCFA responses to the questionnaire provided in *Technical Appendix L*, of the Draft EIR, and recommends a mitigation for a condition of approval for the Developer to enter into a written Fire Protection Agreement with OCFA to determine the fair share funding necessary to provide adequate fire protection. The commenter states that these fees should be included to the Homeowners Association (HOA) Fee to be paid to OCFA annually.

In accordance with OCFA Guideline B-09, Fire Master Plans for Commercial & Residential Development, Firesafe Planning Solutions prepared a Fire Master Plan for the Project (see Figure 4.8-3, *Fire Master Plan*, in the Draft EIR). The Fire Master Plan demonstrates the Project's compliance with the California Fire and Building Codes and other regulations governing water availability for firefighting and emergency access to the Project site, including but not limited to fire access and roadway design, fire lane identification, and access to structures. A report prepared by OCFA for the Project is typically not a requirement during OCFA's review process of the Project's plans; however, OCFA is responsible for reviewing

and approving the Project's site plan and Fire Master Plan. As discussed in Section 4.13, *Public Services*, of the Draft EIR, the Project Applicant is required to enter into a Secured Fire Protection Agreement to provide for fair-share funding of capital improvements necessary to establish adequate fire protection facilities and equipment, and/or personnel as a condition of approval (refer to Page 4.13-9 of the Draft EIR). Any fees associated with the Secured Fire Protection Agreement would be paid by the Project Applicant prior to construction and not by the future HOA. Thus, the City determines no additional mitigation measures are required.

16-37 The commenter states that the City of Los Alamitos should be a part of HOA Covenants, Conditions and Restrictions, to enforce the payment of adequate HOA fees to cover the cost of Fire Protection funding. Refer to Response to Comment 16-36 related to the Secured Fire Projection Agreement. Payment of fair-share funding and timing would be agreed upon with OCFA; these fees would not be paid through the HOA.

16-38 The commenter states that there is no site plan exhibit that identified the access roads for emergency vehicles in the questionnaire, Exhibit 1-4 of the Traffic Analysis does not show fire equipment can navigate around all sides of the buildings, and Exhibit 3-1 does not show the emergency access at Driveway 8. The commenter is incorrect in all three assertions made for the following reasons. When conducting public service correspondence with OCFA, a cover letter describing the Project, the Project location maps, and Site Plan was provided along with the questionnaire. As discussed in the Traffic Analysis, Exhibit 1-4 depicts driveway intersection recommendations needed to accommodate site access and maintain acceptable peak hour operations for the proposed Project. The purpose of Exhibit 1-4 is not to depict fire equipment access. Figure 4.8-3, *Fire Master Plan*, of the Draft EIR demonstrates the Project's compliance with the California Fire and Building Codes and other regulations regarding emergency access to the Project site, including but not limited to fire access and roadway design, fire lane identification, and access to structures. Moreover, as discussed in the Traffic Analysis, Exhibit 3-1 illustrates the study area intersections located near the proposed Project and identifies the number of through traffic lanes for existing roadways and intersection traffic controls. Exhibit 3-1 does not include the proposed conditions of the Project site and is intended to depict the existing circulation network.

16-39 The commenter recommends additional conditions of approval including review by OCFA of construction documents including the site plans to confirm applicable fire safety codes and regulations are implemented. As discussed in Section 4.13, *Public Services*, of the Draft EIR, site plans would be submitted to OCFA to ensure compliance with OCFA standard conditions, including fire flow requirements based upon the tenant type, building size, and building type (refer to Page 4.13-9 of the Draft EIR).

16-40 The commenter states that the Traffic Analysis does not contain a current site plan and that the report needs to be revised to include width of interior streets, turning radius, location of fire hydrants, restricted parking curbs and signs and adequate setbacks. Note that Project's Traffic Analysis has been updated and included as *Attachment G* to this Final EIR. The commenter's

request for a plan that shows the width of interior streets, turning radius, location of fire hydrants, restricted parking curbs and signs and adequate setbacks are shown in the Figure 4.8-3, *Fire Master Plan*, of the Draft EIR.

16-41 The commenter restates the Seal Beach Police Department's concern on parking impacts to College Park East and Arbor Park and existing resource may not be adequate to manage traffic and safety concerns on Lampson Avenue. The commenter states that the Draft EIR should carefully consider these issues and mitigation measures for traffic enforcement, road maintenance, signalization, and parking restrictions. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, 2.1.2, *Roadway Safety on Lampson Avenue*, 2.1.3, *Parking*, and 2.1.8, *Public Safety*. SBPD stated that it will not be expanding service capacity as a result of the Project because the Project is located within the City of Los Alamitos. However, SBPD has a mutual aid agreement with LAPD and can assist with public services in the event of an emergency, if needed.

16-42 The commenter states that a traffic mitigation plan and traffic signal should be considered. Impacts to automobile delay-based LOS is no longer a CEQA topic pursuant to SB 743. A Traffic Analysis was prepared for non-CEQA purposes and included as *Technical Appendix N1* of the Draft EIR. An updated Traffic Analysis was prepared and included as *Attachment G* of this Final EIR. The Traffic Analysis considered the Project's contribution to intersection deficiencies, if any, as well as a traffic signal. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion* and 2.1.2, *Roadway Safety on Lampson Avenue*.

16-43 The commenter expresses concern with overflow parking to College Park East leading to public safety hazard due to pedestrian crossing and lack of traffic signal. The commenter also states that parking overflow would place a burden on SBPD for enforcement. SBPD stated that it will not be expanding service capacity as a result of the Project because the Project is located within the City of Los Alamitos. However, SBPD has a mutual aid agreement with LAPD and can assist with public services in the event of an emergency, if needed. The Project would install a high visibility crosswalk at the primary neighborhood entry. A Safety Evaluation was prepared to evaluate the Project's safety impact on public roadways and Project access points, including the design of the proposed high visibility crosswalk (see Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, and *Attachment H* of this Final EIR). The Safety Evaluation identifies the on-site circulation for the site, including various vehicle paths (front-loading garbage trucks, fire trucks, delivery trucks, etc.) for various internal drive aisles, which allow for two-way traffic. Access to and from the site will be accommodated via driveways on Lampson Avenue. The vehicle turning templates show acceptable turning movements for the various vehicles and trucks anticipated to access the site (see Attachment D of *Attachment H* of this Final EIR). Table 1 of the Safety Evaluation provides a summary of the types of collisions by intersection for eight intersections. The existing crash rates for the study area intersections are lower than the statewide average crash rates as determined by the 2021 Crash Report. A Project would have the potential to create an increase in collision rate if it introduced a geometric design feature that did not meet safety standards or incompatible uses (e.g. farm

equipment). Implementation of Project improvements (within the public right-of-way) per Los Alamitos and Seal Beach standards ensures all that sight distance requirements, pedestrian crossing requirements, and street design requirements are met. Additionally, the Project vehicle mix is consistent with the adjacent land uses, including the residential neighborhood to the south. As demonstrated, the Project would not result in a safety impact or substantially increase hazards due to a geometric design feature. Refer also to Master Responses 2.1.3, *Parking*, and 2.1.2, *Roadway Safety on Lampson Avenue*.

16-44 The commenter states that Urban Crossroads, Inc. did not provide mitigation measures required to address the public safety concerns expressed by the Seal Beach Police Department. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*. As analyzed in Section 4.13, *Public Services*, of the Draft EIR, the Project would not result in a significant impact to police protection services, including SBPD. Therefore, no mitigation is required.

16-45 The commenter states that the County of Orange should be consulted and be the lead agency in coordinating safety plans to prevent the Lampson property owner from avoiding its financial responsibility for public safety improvements. Refer to Master Response 2.1.8, *Public* Safety, for the Project's potential public safety impacts. For CEQA purposes, the lead agency for the proposed Project is the City of Los Alamitos. The City of Seal Beach is a responsible agency for the proposed Project because the Project site requires approvals from the City of Seal Beach for certain infrastructure improvements. Enforcement of the Project's conditions of approval and mitigation measures will occur through the City of Los Alamitos. The County of Orange does not have jurisdiction over the proposed Project.

16-46 The commenter states that the Traffic Analysis failed to consider the cumulative impacts of multiple projects along Lampson, including Old Ranch Country Club in Seal Beach. Refer to Response to Comment D-9 regarding the analysis of the proposed Project's cumulative traffic impacts.

16-47 The commenter states that the Traffic Analysis does not recognize the proposed 7-foot soundwall that would block the emergency vehicle access entry. As shown in Figure 3-38, *Wall and Fence Plan*, the proposed wall would not eliminate emergency access on Lampson Avenue. Refer to Response to Comments 16-3 and 16-24.

16-48 The commenter states that there is no consistent use of the site plan throughout the Draft EIR and that the public safety concerns from the Seal Beach Police Department were not included in the Project's Traffic Analysis. All technical reports show the correct site plan, with the exception that the site plan in the VMT Report was updated (*Attachment B* of this Final EIR). This does not result in a change to any of the findings of the VMT analysis.

A Safety Evaluation was prepared to confirm that the proposed Project would have no safety impacts on public roadways and Project access points after taking into consideration the Project's implementation of the proposed high visibility crosswalk (see Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, and *Attachment H* of this Final EIR). The Safety

Evaluation further confirms the analysis and determination in the Transportation Section (Section 4.15) of the Draft EIR that the proposed Project would not result in a safety impact or substantially increase hazards due to a geometric design feature. Refer to Response to Comments 16-3 and 16-24 regarding the Project's site plan.

Comment Letter 17

From: Carol Churchill
To: Jordan Nefulda; Shelley Hasselbrink; Trisha Murphy; Emily Hibard; Tanya Doby; Tom Oliver; Chet Simmons
Subject: DEIR Comments on Lampson Project
Date: Monday, May 20, 2024 7:08:40 PM

Comment Letters 4 Sets Los Alamitos.zip
67 MB

17-1

The attached "Lampson Comment emails" are intended to be a partial response the Request for Comments to the Notice of Availability of Draft Environmental Impact Report (DEIR) and the Notice of Preparation of DEIR for the Lampson Project, Los Alamitos, California.

The Lampson Comment emails are public records produced by the City Clerk of the City of Los Alamitos pursuant to a Public Records Request. The Comments address the potential significant effects generated by the proposed project in relation to the following Environmental Analysis Check List Categories: biological resources, cultural resources, geology and soil, transportation and tribal cultural resources.

Please acknowledge receipt of the 4 SETS of Comments, and your ability to open the Attachment containing
Set 1 - 108 pages
Set 2 - 96 pages
Set 3 - 65 pages
Set 4 - 71 pages

17-2

In the absence of a response, written copies of the Comments will be delivered to Tom Oliver in the Planning Department prior to June 10, 2024

Respectfully
Carol Churchill
On Behalf of
Protect Our Community
Los Alamitos-Rossmoor-Seal Beach

Responses to Comment 17

Churchill, Carol, dated May 20, 2024.

17-1 The commenter provides a set of comment letters as a partial response to the NOA for the Draft EIR. The commenter notes that the comment letters are public records produced by the City Clerk pursuant to a Public Records Request and addresses the potential significant effects related to biological resources cultural resources, geology and soil, transportation, and tribal cultural resources. The Draft EIR analyzed the above-mentioned environmental topics in Sections 4.3, 4.4, 4.6, 4.15, and 4.16, respectively.

17-2 The commenter requests receipt of the four sets of comment letters, which contain comment letters received on the Notice of Preparation (NOP) of the Draft EIR. These comment letters were incorporated as *Technical Appendix A* in the Draft EIR and are provided in *Attachment A* of this Final EIR (refer to this attachment for comment numbering). Written responses to NOP comments are not required but are used to inform the scope of the Draft EIR. However, because the commenter included all the NOP comments as part of this comment letter, responses to the four sets of comment letters are provided below. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. However, NOP comments provided during the scoping process were taken into consideration during the preparation of the Draft EIR (see Table 1-1, of the Draft EIR).

17-3 The commenter inquires about access to the open space/park for the low-income housing area. As shown in Figure 3-22, *Site Plan*, of Section 3.0, *Project Description*, of the Draft EIR, there are two open space areas with the affordable housing units portion of the site: a tot lot park area and young adult zone (refer to Page 3-7 of the Draft EIR).

17-4 The commenter inquires about Project parking and increased traffic on Lampson Avenue with the Project and the Interstate 405 (I-405) expansion. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, and 2.1.3, *Parking*.

17-5 The commenter requests trees to be studied in the Draft EIR. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, on April 18, 2022, the City of Los Alamitos adopted a Parkway Tree Master Plan as part of its Urban Forest Program. This plan addresses City parkway trees. There are currently no parkway trees along the Project's frontage. The Project would not result in an impact to the City parkway trees. Therefore, the Project would not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance. No impact would occur and mitigation is not required (refer to Page 4.3-34 of the Draft EIR). See also Response to Comment 17-6.

17-6 The commenter inquires about tree removal during Project construction. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, the Project requires removal of existing

ornamental trees (refer to Page 4.3-33of the Draft EIR). Impacts would be less than significant, as explained in the Draft EIR.

17-7 The commenter expresses concerns about the need for trees in the community, lack of open space, removal of trees, automobile pollution, and requests for only one entry whether the primary apartment entryway is proposed. As discussed in Section 4.1, *Aesthetics*, of the Draft EIR, the Project site does contain a number of ornamental trees onsite that will be removed and replaced. As shown in Figure 3- 18, *Landscape Plan*, a total of 441 trees would be planted throughout the Project site (refer to Page 4.1-10 of the Draft EIR). Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, for the discussion of the open space. See also Response to Comment 17-6 regarding air quality.

Moreover, as discussed in Section 4.2, *Air Quality*, of the Draft EIR, implementation of the Project which includes mobile emissions sources would not: 1) exceed applicable South Coast AQMD localized criteria pollution emissions thresholds during construction and operation; 2) would not cause or measurably contribute to the formation of a CO "hot spot;" and 3) would not result in a health risk for nearby residents during construction (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR). The commenter' suggestion for one entry way is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-8 The commenter expresses concerns regarding impacts to AYSO operations and states that the Project would eliminate kids ability to play soccer. The Project would not eliminate kids ability to play soccer in connection with AYSO events. As discussed in Section 3.0, *Project Description*, of the Draft EIR, AYSO uses the abutting Arbor Park (north of Project) on weeknights and weekends for soccer practice and games, utilizing the existing paved parking lot on the Project site for overflow parking, particularly on weekends. To allow for additional parking at Arbor Park and Arbor Dog Park, located adjacent to the north boundary of the Project site, the Project Applicant proposes to dedicate or grant an easement for the northern 10 feet of property abutting Arbor Park and Arbor Dog Park to the City of Los Alamitos or jurisdiction with authority over the two parks. This dedication or grant of easement would support the use of this area for parking after construction of the Project by allowing an approximate capacity of 154 to 200 parking spaces to serve the parks, depending on the ultimate configuration (refer to Page 3-4 of the Draft EIR). Additionally, the Project Applicant has agreed to coordinate with the City of Seal Beach and AYSO, as needed, with respect to parking for Arbor Park and Arbor Dog Park. Refer to Master Response 2.1.3, *Parking*.

17-9 The commenter opposes the Project due to traffic issues and removal of AYSO operations. Project. Refer to Response to Comment D-30, 17-8, and Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic and 2.1.3, *Parking*, and regarding AYSO operations.

17-10 The commenter expresses concerns regarding overflow parking to Arbor Park and College Park East and the lack of signal control from the Project. Refer to Master Response 2.1.3, *Parking*, for a detailed discussion on the proposed Project's potential parking impacts. As discussed in Section 3.0, *Project Description*, of the Draft EIR, the primary neighborhood entry is not anticipated to meet a peak hour or planning level (daily volume) that would warrant a traffic signal. Therefore, the Project no longer proposes installation of a traffic signal. A Safety Evaluation was prepared to confirm that the Project would have no safety impacts on public roadways (see Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, and *Attachment H* of this Final EIR). The Safety Evaluation further confirms the analysis and determination in the Transportation Section (Section 4.15) of the Draft EIR that the Project would not result in a safety impact or substantially increase hazards due to a geometric design feature.

17-11 The commenter expresses concerns regarding provision of open space/park space for residents of the proposed Project. The commenter requests that the Draft EIR include a listing of existing parks within a ½ mile of the Project and an evaluation of Project impacts to recreational facilities. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*. Pursuant to the commenter's request, Section 4.14, *Recreation*, of the Draft EIR includes a listing of existing parks within a ½ mile of the Project and an evaluation of Project impacts to recreational facilities.

17-12 The commenter requests that the Draft EIR include an evaluation of noise impacts at Arbor Park during weekends to the proposed Project. The commenter requests the noise study to include all hours of the day on Saturdays when whistles, loud voices, cheering, and other noises are made. CEQA does not require an analysis of the impact of existing environmental conditions on a proposed Project. Therefore, an evaluation of activities at Arbor Park and related noise impacts to the future residents of the Project were not evaluated. Noise impacts associated with the Project were evaluated in Section 4.11, *Noise*, of the Draft EIR.

17-13 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-14 The commenter expresses concerns with parking and open space for the Project. Refer to Master Response 2.1.3, *Parking*, for parking impacts and 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, for recreation impacts.

17-15 The commenter opposes the Project due to congestion on Lampson Avenue and parking. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns, and 2.1.3, *Parking*, for parking concerns.

17-16 The commenter opposes the Project due to existing conditions of parks and limited green space in the Project area. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, for recreation impacts.

17-17 The commenter recommends the Draft EIR focus on biological resources due to the Project's adjacency to both the JFTB Los Alamitos and Arbor Park. The commenter requests significant impacts analysis to several species of protected birds known to utilize the immediate surrounding area of the Project. Pursuant to the commenter's request, Section 4.3, *Biological Resources*, of the Draft EIR discuss impacts to biological resources including protected bird species. Thus, no further response is required.

17-18 The commenter requests analysis on Swainson's Hawk, White-tailed Kite, Northern Harrier, and Vermilion Flycatcher. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, the above-mentioned species were analyzed. Implementation of Mitigation Measures MM 4.3-1 through MM 4.3-3 would ensure that pre-construction surveys are conducted for nesting birds, nesting raptors, and bat roosts prior to site disturbance. If nesting birds or raptors are present on the Project site, mitigation requires avoidance of active nests. With implementation of the required mitigation, potential impacts to nesting birds and common raptors would be reduced to below a level of significance (refer to Pages 4.3-37 through 4.3-39 of the Draft EIR).

17-19 The commenter recommends a thorough and extensive literature review of the above-mentioned sensitive species and to investigate rigorous nesting bird protection measures as well as possible compensatory mitigation for direct and indirect loss of foraging habitat both on- and offsite as a result of the Project. The commenter also recommends analysis of impacts to Peregrine Falcon, Horned Lark, Swainson's Hawks, or others, including non-avian species. A Project-specific biological technical report was prepared for the Draft EIR (included as *Technical Appendix C1* of the Draft EIR), which included a thorough and extensive literature review, general biological surveys, habitat assessments, and focused bat surveys. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, peregrine falcon was not detected on the site and foraging potential is very limited and nesting sites are absent (refer to Page 4.13-17 of the Draft EIR). Additionally, the California horned lark was not detected onsite during all surveys and not expected to nest onsite due to proximity of large trees adjacent to the open field (refer to Page 4.13-17 of the Draft EIR). The Swainson's hawk would not be expected to nest onsite due to the lack of solitary trees and level of nearby human disturbance such as development and traffic, but would be expected to forage opportunistically onsite, but primarily over large open fields, including open areas within the JFTB, Seal Beach Naval Weapons Station, Old Ranch Country Club and the Navy golf course (refer to Page 4.13-18 of the Draft EIR). Moreover, implementation of Mitigation Measures MM 4.3-1 through MM 4.3-3 would ensure that pre-construction surveys are conducted for nesting birds, nesting raptors, and bat roosts prior to site disturbance. If nesting birds or raptors are present on the Project site, the identified mitigation requires avoidance of active nests. With implementation of the required mitigation, potential impacts to nesting birds and common raptors would be reduced to below a level of significance (refer to Pages 4.3-37 through 4.3-39 of the Draft EIR).

17-20 The commenter expresses concerns with the Project due to limited green space existing residents would have access to, traffic and parking impacts on Lampson Avenue, and lack of a signal control. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns, 2.1.3, Parking, for parking impacts, and 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, for recreation impacts. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for traffic signal concerns.

17-21 The commenter expresses concerns with the Project due to the insufficient number of planned parking spaces. The commenter also expresses concerns with the proposed low-income housing. Refer to Master Response 2.1.3, *Parking* for parking concerns. The commenter's concern on low-income housing is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-22 The commenter expresses concerns with parking during AYSO operation and traffic impacts on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns, 2.1.3, *Parking*, for parking concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, for safety concerns.

17-23 The commenter expresses concerns with the Project and requests the Draft EIR include the environmental issues that are discussed below in Responses to Comment 17-24 to 17-28.

17-24 The commenter requests consideration of wildlife, endangered habitats, plants, nesting birds, noise from pets, rodents, and inquires about the California Natural Diversity Database. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, wildlife, special-status vegetation communities, special-status species, nesting birds, and indirect impacts to biological resources were analyzed (refer to Pages 4.3-29 through 4.3-31 of the Draft EIR).

17-25 The commenter inquires about whether the City has reviewed the CDFW's CEQA Review website. This comment is acknowledged and no further response is required. As discussed in Section 1.0, *Introduction*, of the Draft EIR, the Draft EIR has been prepared in accordance with all criteria, standards, and procedures of CEQA (California Public Resource Code Section 21000 et seq.) and the CEQA Guidelines (California Code of Regulations, Title 14, Division 6, Chapter 3, Section 15000 et seq.). Pursuant to Public Resources Code Section 21067 and CEQA Guidelines Article 4 and Section 15367, the City is the Lead Agency under whose authority this EIR has been prepared. "Lead Agency" refers to the public agency that has the principal responsibility for carrying out or approving a project. Serving as the Lead Agency and before taking action to approve the Project, the City has the obligation to: (1) ensure that this EIR has been completed in accordance with CEQA; (2) review and consider information contained in this EIR as part of its decision making process; (3) make a statement that this EIR reflects the City's independent judgement; (4) ensure that all significant effects on the environment are eliminated or substantially lessened where feasible; and, if necessary (5) make written findings for each unavoidable significant environmental effect stating the reasons why

mitigation measures or project alternatives identified in this EIR are infeasible and citing the specific benefits of the Project that outweigh its unavoidable adverse effects (CEQA Guidelines Section 15090 through 15093) (refer to Page 1-3 of the Draft EIR).

17-26 The commenter requests consideration of water issues due to drought conditions. As discussed in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, based on the water supplies available and the estimated water demand, there are sufficient water supplies available to serve the Project during average, single dry, and multiple dry years. Additionally, the Project is subject to connection and service fees to offset increased demand and assist in facility expansion and service (at the time of need). Accordingly, there would be sufficient water supplies available to serve the Project and impacts would be less than significant (refer to Pages 4.17-15 through 4.17-17 of the Draft EIR).

17-27 The commenter requests consideration of traffic impacts on Lampson Avenue and emergency access. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, for safety concerns.

17-28 The commenter requests consideration of sanitation, trucks, and landfills and requests involvement in the Project noticing. As discussed in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, solid waste from the City is transported to Frank R. Bowerman Sanitary Landfill in the City of Irvine and the Olinda Alpha Sanitary Landfill near the City of Brea. The two landfills have a combined permitted disposal capacity of 19,500 tons per day. The Project's estimated solid waste generation represents approximately 0.0077 % of the two landfill's capacity and therefore, would not contribute significantly to both of the landfill's daily capacity. Additionally, the Project is subject to connection and service fees to offset increased demand and assist in facility expansion and service (at the time of need). Accordingly, impacts would be less than significant and no mitigation is required (refer to Pages 4.17-19 through 4.17-20 of the Draft EIR). Additionally, as discussed above, the NOA was mailed to responsible agencies, local government agencies, and interested parties that received the NOP, to individuals who had previously requested the NOA or EIR, and to all individuals who provided NOP comments on April 24, 2024.

17-29 The commenter expresses general opposition to the Project due to inadequate Project parking and using Seal Beach Homeowners' parking spaces. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

17-30 The commenter states that the Project would bring a significant increase in traffic and traffic hazards to Lampson Avenue such as making U-turns at Heather. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, for sight distance.

17-31 The commenter states that inadequate public facilities will cause Project residents to use Seal Beach's public facilities, specifically College Park East's parks. As discussed in Section 4.14, *Recreation*, of the Draft EIR, the Project would result in an increase in residents; however, the

Project is not anticipated to increase the use of the existing parks such that a significant impact would result. Accordingly, implementation of the Project would not increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility could occur or be accelerated. Impacts would be less than significant (refer to Pages 4.14-8 through 4.14-10 of the Draft EIR). Refer also to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*.

17-32 The commenter states that the Project will put a strain on the Los Alamitos Unified School District System. As discussed in Section 4.13, *Public Services*, of the Draft EIR, based on current enrollment, there is a deficiency of 45 students at the K-5 grade level at Project buildout. However, the District currently has open enrollment which allows students to attend schools other than the school assigned based upon their area of residence. As shown in Table 4.13-5, there are four other K-5 elementary schools within a 2.5 mile radius of the Project site with a total excess capacity of 62 students and enough excess capacity to serve the Project generated 51 K-5 students. It should be noted that the projected student population is conservative because it represents a snapshot in time. It is unlikely that all students generated by the Project would occur at Project buildout but rather would fluctuate over the life of the Project. Moreover, the Project would be required to pay development impact fees to LAUSD in compliance with SB 50 for the construction of new schools, which provides full and complete mitigation to school facilities. Development impact fees currently charged by LAUSD for residential uses are $5.17 per sf, and the Project Applicant will pay the applicable fees at the time building permits. Although project buildout would result in an increase of 135 students, the availability of schools in the area and the payment of impact fees in compliance with SB 50 would address any potential impacts. Therefore, based on the preceding, impacts from implementation of the Project on school services would be less than significant. No mitigation is required (refer to Pages 4.13-10 through 4.13-12 of the Draft EIR).

17-33 The commenter states that the change in the use of the land from a state office building to housing will necessitate major utility infrastructure changes. The commenter states that the construction work needed for these changes will cause major disruptions to Lampson Avenue and College Park East residents for many months. Section 3.3.7, *Infrastructure Improvements*, of the Draft EIR, discusses the Project's proposed utility infrastructure improvements. As discussed in 4.17, *Utilities and Service Systems*, of the Draft EIR, the construction of the Project's infrastructure improvements necessary to serve the Project would not result in any significant physical effects on the environment. Impacts would be less-than significant and no mitigation is required (refer to Page 4.17-13 of the Draft EIR). Additionally, as discussed in Section 4.8, *Hazards and Hazardous Materials*, construction on Lampson Avenue will require an encroachment permit and approval from the City Engineer Lane closures that may be required for median improvements would be temporary and require a permit and compliance with LAMC 12.08.200, Safety precautions–Obstruction of traffic. Compliance with LAMC 12.08.200 would ensure safe crossing and access for all vehicle and pedestrians at all times (refer to Page 4.8-21 of the Draft EIR).

17-34 The commenter states that the Project will put a strain on water supply and would cause air pollution. As discussed in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, based on the water supplies available and the estimated water demand, there are sufficient water supplies available to serve the Project during average, single dry, and multiple dry years. Additionally, the Project is subject to connection and service fees to offset increased demand and assist in facility expansion and service (at the time of need). Accordingly, there would be sufficient water supplies available to serve the Project and impacts would be less than significant (refer to Pages 4.17-15 through 4.17-17 of the Draft EIR). As discussed in Section 4.2, *Air Quality*, of the Draft EIR, implementation of the Project would not: 1) exceed applicable South Coast AQMD localized criteria pollution emissions thresholds during construction and operation; 2) would not cause or measurably contribute to the formation of a CO "hot spot;" and 3) would not result in a health risk for nearby residents during construction (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR).

17-35 The commenter expresses opposition to the Project and states that the Project will bring hundreds of vehicles onto Lampson avenue creating more pollution, impacting wildlife, and causing traffic and safety issues. As discussed in Section 4.2, *Air Quality*, of the Draft EIR, implementation of the Project would not: 1) exceed applicable South Coast AQMD localized criteria pollution emissions thresholds during construction and operation; 2) would not cause or measurably contribute to the formation of a CO "hot spot;" and 3) would not result in a health risk for nearby residents during construction (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR). As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, impacts to biological resources were determined to be less than significant with mitigation (refer to Pages 4.3-37 through 4.3-39 of the Draft EIR). Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue,* for pedestrian safety concerns.

17-36 The commenter states that the Project residents will utilize nearest cities for all their needs and recreation causing excessive noise, pollution, traffic congestion, and wear and tear on facilities/equipment. Refer to Response to Comment 17-34 for pollution concerns. As discussed in Section 4.11, *Noise*, of the Draft EIR, the Project would not exceed significance thresholds for construction noise levels, operational noise levels, or off-site traffic noise levels. As such, the Project would not generate substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. Impacts would be less than significant (refer to Pages 4.11-23 through 4.11-29 of the Draft EIR). Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns. As discussed in Section 4.14, *Recreation*, of the Draft EIR, the Project would result in an increase in residents; however, the Project is not anticipated to increase the use of the existing parks such that substantial additional use or physical deterioration of the existing parks would occur or be accelerated. Accordingly, impacts would be less than significant (refer to Pages 4.14-8 through 4.14-10 of the Draft EIR).

17-37 The commenter recommends adding a traffic light, reducing apartments to two stories, and adding a playground and asks to consider the added noise, lights, traffic, pollution, and overcrowding of the Project. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for traffic signal concerns. The Draft EIR evaluated Project impacts related to noise, lighting, transportation, and air quality. Refer also to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*.

17-38 The commenter expresses gratitude regarding the number of concerns for the Project. This comment is acknowledged and no further response is required.

17-39 The commenter requests the Draft EIR address safety issues for pedestrians and parking for Arbor Park. As discussed in Section 3.0, *Project Description*, of the Draft EIR, non-motorized circulation would include pedestrian connectivity with existing sidewalks along Lampson Avenue, including an existing signalized pedestrian connection to the south at Rose Street and Lampson Avenue and pedestrian "paseo" connections with Arbor Park and the Arbor Dog Park to the north. The Project would provide pedestrian gates to be controlled by the Homeowners' Association to restrict residents from entering Arbor Park and Arbor Dog Park outside of hours specified by JTFB. The Project would provide 577 parking spaces (475 spaces for the single family detached and townhomes and 102 for the apartments) in exceedance of the 440 parking spaces that would be required pursuant to the State's Density Bonus Law. Refer to Master Response 2.1.3, *Parking*, for parking concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns.

17-40 The commenter requests that noise impacts are addressed in the Draft EIR. As discussed in Section 4.11, *Noise*, of the Draft EIR, the Project would not exceed significance thresholds for construction noise levels, operational noise levels, and off-site traffic noise levels. As such, the Project would not generate substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. Impacts would be less than significant (refer to Pages 4.11-23 through 4.11-29 of the Draft EIR).

17-41 The commenter states that the loss of Arbor Park would be a huge detriment due to parking access. Refer to Master Response 2.1.3, *Parking*, for parking concerns. Additionally, the Project would be confined to the Project site with the exception of infrastructure improvements and would not remove Arbor Park as a recreational facility for the community. AYSO will be able to continue to use Arbor Park for soccer games upon Project development.

17-42 The commenter inquires about traffic flow on Lampson, use of existing facilities in the area, noise and pollution from construction, and public services be addressed in the Draft EIR. The Draft EIR includes analysis on traffic, recreation, noise, air quality, and public services in Sections 4.15, 4.14, 4.11, 4.2, and 4.13, respectively.

17-43 The commenter provides an introduction about being a nearby resident and expresses opposition to the Project. This comment is noted for the record and will be forwarded to the

decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. NOP comments provided during the scoping process were taken into consideration during the preparation of the Draft EIR. Thus, no further response is required.

17-44 The commenter expresses concerns with traffic impacts on Lampson Avenue, cross streets and freeway exits and requests traffic, wildlife and safety impacts be conducted. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns. A traffic analysis and biological resources report was conducted for the Project (Refer to *Technical Appendix N1 and C1,* of the Draft EIR respectively). Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for pedestrian safety concerns and Response to Comments B-2 and B-3 for impacts on the freeway system.

17-45 The commenter expresses concerns with the Project and notes being a resident that utilizes Arbor Park and Arbor Dog Park. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-46 The commenter expresses concerns with traffic on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns.

17-47 The commenter expresses concerns with recreational impacts and parking. Refer to Master Response 2.1.3, *Parking,* for parking concerns. As discussed in Section 4.14, *Recreation,* of the Draft EIR, the Project would result in an increase in residents; however, the Project is not anticipated to increase the use of the existing parks such that substantial additional use or physical deterioration of the existing parks would occur or be accelerated. Impacts would be less than significant (refer to Pages 4.14-8 through 4.14-10 of the Draft EIR).

17-48 The commenter expresses concerns about the removal of green space and greenhouse gas emissions. As discussed in Section 3.0, *Project Description,* of the Draft EIR, the Project would provide a total of 67,480 square feet (sf) or 1.55 acres of open space in the Project site, including 16,508 sf of usable common open space, 51,320 sf of private open space (homeowner maintained). The 51,320 sf of private open space includes 4,620 sf of multi-family private deck, 5,181 sf of townhomes private deck, and 41,519 sf of private open space (homeowner maintained) (refer to Page 3-7 of the Draft EIR). As discussed in Section 4.7, *Greenhouse Gas Emissions,* of the Draft EIR, construction and operation of the Project would generate a 2,757.11 $MTCO_2e$/yr; the Project would not exceed the significance threshold of 3,000 $MTCO_2e$/yr. Thus, impacts would be less than significant and no mitigation is required (refer to Pages 4.7-26 through 4.7-27 of the Draft EIR).

17-49 The commenter expresses concerns with air quality and health impacts to local residents. As discussed in Section 4.2, *Air Quality*, of the Draft EIR, implementation of the Project would not: 1) exceed applicable South Coast AQMD localized criteria pollution emissions thresholds during construction and operation; 2) would not cause or measurably contribute to the formation of a CO "hot spot;" and 3) would not result in a health risk for nearby residents during construction (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR).

17-50 The commenter concludes the comment letter and expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-51 The commenter expresses concerns with the Project's public noticing not extending to Garden Grove. The mailing list radius complied with the City of Los Alamitos distance requirements and was expanded to 1,000 feet to include every house within College Park East and Parkwood regardless of distance. Additionally, public notice was published in the Event News Enterprise; the notice of availability and Draft EIR were made available for review, on the City's web site. Therefore, the City met and exceeded its legal requirement for noticing. No further response is required.

17-52 The commenter raises concerns with the amount of on-site parking for the Project and the potential for the College Park East neighborhood or the Arbor Park parking lot to be used for overflow parking. The commenter also expresses concerns regarding lack of signal control planned for traffic in and out of the development and traffic safety on Lampson. Refer to Master Response 2.1.3, *Parking*, for parking concerns. A condition of approval has been added to the Project to ensure the parking garages onsite be used primarily for parking purposes. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for traffic signal concerns and concerns regarding roadway safety.

17-53 The commenter notes that College Park East has less park acreage than other Seal Beach neighborhoods, states that the Project does not show park space, requests that the Draft EIR include a listing of existing parks within a half-mile radius of the Project and requests an evaluation of whether the development should include park space to avoid further impacts to nearby parks. Refer to Response to Comment 17-11.

17-54 The commenter requests that the Draft EIR evaluate weekend noise levels at Arbor Park due to soccer games and dogs at the dog park. The commenter recommends proposing mitigation measures to avoid future complaints from residents of the Project. Refer to Response to Comment 17-12.

17-55 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to

any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-56 The commenter expresses gratitude for being included in the NOP of the Draft EIR, provides a summary of the Project Description as described in the NOP and notes that Caltrans is a responsible agency on the Project. This comment is acknowledged and no further response is required.

17-57 The commenter recommends the Project consider the design of Complete Streets that include high-quality pedestrian, bicycle, and transit facilities that are safe and comfortable for all users; encourages the Project to look at opportunities to include Complete Streets improvements; consider including long-term bicycle parking facilities for the multi-family apartment units; ensure appropriate temporary detours to maintain safe bicycle access on Lampson Avenue during construction; and coordinate with Caltrans System Planning Unit regarding the existing Park and Ride facility agreement. As discussed in Section 3.0, *Project Description*, of the Draft EIR, the Project would promote the use of bicycles as an alternative means of transportation by providing short-term and/or long-term bicycle parking accommodations. Along the Project frontage, Lampson Avenue is developed to its ultimate General Plan roadway classification. Frontage improvements would include median improvements, sidewalks, driveway modifications needed to accommodate site access, and landscaping improvements as required by City standards (refer to Page 3-4 of the Draft EIR). Additionally, at the time of preparation of this Final EIR, the Park-n-Ride that previously occupied the Project site has not been in operation for the past 18 months and when in operation had limited usage. There are no requirements or proposal to provide a substitute park-and-ride location.

17-58 The commenter requests submittal of all traffic related documents for Caltrans review. The commenter requests that data used in the Traffic Impact Analysis be no more than two years old and be based on Southern California Association of Governments Regional Transportation Plan Model; and recommends using the Highway Capacity Manual methodology for traffic analyses. The Traffic Analysis (*Technical Appendix N1* of the Draft EIR) was provided to Caltrans for review during the 45-day public review period for the Draft EIR. The Traffic Analysis was prepared in accordance with the City of Los Alamitos' requirements, as required by CEQA. Refer also to Response to Comment B-1 through B-13.

17-59 The commenter recommends the Project ensure that truck parking, ingress and egress, and staging will not interfere with vehicle parking, pedestrian paths, or bicycle lanes/parking; establish freight pick up and drop off times that do not coincide with peak commute hours to reduce passenger vehicle conflicts and congestion for freight; consider amazon lockers or an equivalent shared drop off location depending on number of packages for residential package delivery; and work with local partners and community representatives to mitigate truck traffic routing onto residential streets or conflicting with other road users. Refer to Response to

Comment B-11 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding truck parking and freight pick up. As demonstrated, the Project would not result in any vehicle conflicts on-site as proposed; however, installation of an Amazon locker may be considered by the Project proponent following occupancy of the Project.

17-60 The commenter attaches a list of comments for the Project which are responded to below and expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-61 The commenter expresses concerns with traffic and traffic safety on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue,* for roadway safety concerns.

17-62 The commenter states that the Project will affect the neighborhood of College Park East and that the low-income housing has the potential to bring increased crime to the neighborhood and decrease existing home values. As discussed in Section 4.13, *Public Services*, of the Draft EIR, implementation of the Project would generally result in an increase in calls for service (not solely related to the fact that the site will include low-income housing); however, Los Alamitos Police Department has indicated that this increase would not adversely impact Los Alamitos Police Department's existing resources. The existing resources would be adequate to meet the additional demands generated by the Project. The Los Alamitos Police Department has not indicated the need for a new police station or expansion of existing facilities due to the Project. Responses times and service ratios would be met and would not require the construction of new facilities. Because the Project does not include or require construction of new police facilities and does not generate a need for additional facilities, increases in demands for police protection resulting from implementation of the Project impacts would be less than significant (refer to Page 4.13-10 of the Draft EIR). Additionally, home values are not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-63 The commenter expresses concerns with minimal parking at the Project site and how it will impact neighboring streets. Refer to Master Response 2.1.3, *Parking,* for parking concerns. A condition of approval has been added to the Project to ensure the parking garages onsite be used primarily for parking purposes.

17-64 The commenter expresses concerns with an increase in the need for police presence and expresses general opposition to the Project. Refer to Response to Comment 17-62.

17-65 The commenter expresses concerns with the aesthetics of the development. As discussed in Section 4.1, *Aesthetics*, of the Draft EIR, buildout of the Project would change the existing visual character of the site from a two-story, 88,000 sf commercial office building to a two- to three-story residential development consisting of 246 units. The Project would be visually

compatible with the existing residential and park uses in the Project site's vicinity. Additionally, the Project would be compliant with the zoning development standards and City requirements pertaining to scenic quality. Accordingly, the Project would not conflict with applicable zoning and other regulations governing scenic quality. Impacts would be less than significant (refer to Page 4.1-18 of the Draft EIR).

17-66 The commenter expresses concerns with air quality from the increased traffic on Lampson and during construction. As discussed in Section 4.2, *Air Quality*, Project-related activities would not exceed the applicable South Coast AQMD regional thresholds of significance during construction and operation. As such, Project-related emissions would not violate South Coast AQMD air quality standards or contribute to the non-attainment of ozone standards in the SCAB, and impacts would be less than significant (refer to Pages 4.2-23 through 4.2-26 of the Draft EIR).

17-67 The commenter expresses concerns with construction noise and road closures on Lampson Avenue. Refer to Response to Comment 17-40 for noise impacts. As discussed in Section 4.15, *Transportation*, of the Draft EIR, during construction, frontage improvements including median improvements, sidewalks, driveway modifications needed to accommodate site access, and landscaping improvements would be constructed in accordance with City standards. Lane closures that may be required for median improvements would be temporary and require a permit and compliance with Los Alamitos Municipal Code (LAMC) 12.08.200, Safety precautions–Obstruction of traffic. This would ensure safe crossing and access for all vehicles and pedestrians at all times. (refer to Pages 4.15-16 through 4.15-17 of the Draft EIR).

17-68 The commenter expresses concerns with fire, police, and medical responses due to increased traffic. The commenter also expresses concern that more accidents will occur due to increased traffic. As discussed in Section 4.13, *Public Services*, of the Draft EIR, considering the existing firefighting resources available in the City, implementation of the Project is not expected to result in the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impact. Per correspondence with the OCFA, there are currently no deficiencies in fire protection service provided to the Project site. OCFA has not indicated the need for a new fire station or expansion of existing facilities due to the Project. The Secured Fire Protection Agreement would ensure that responses times and service ratios are met due to the implementation of the Project and no new fire station facilities would be required (refer to Page 4.13-9 of the Draft EIR). Refer to Response to Comment 17-62 for police protection services. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for roadway safety concerns.

17-69 The commenter expresses concerns with greenhouse gas emissions due to construction and increased traffic. Refer to Response to Comment 17-48 for greenhouse gas emissions.

17-70 The commenter expresses concerns with safety hazards due to speeding and increased traffic and hazardous vehicle emissions. Refer to Master Response 2.1.2, *Roadway Safety on Lampson*

Avenue, for pedestrian safety concerns. Refer to Response to Comment 17-48 and 17-66 for vehicle emissions. As discussed in Section 4.8, *Hazards and Hazardous Materials*, of the Draft EIR, during construction, the Project would result in roadway improvements along Lampson, including replacement of the existing median curb and construction of the two proposed driveways. Construction on Lampson will require an encroachment permit and approval from the City Engineer Lane closures that may be required for median improvements would be temporary and require a permit and compliance with LAMC 12.08.200, Safety precautions–Obstruction of traffic. Compliance with LAMC 12.08.200 would ensure safe crossing and access for all vehicle and pedestrians at all times (refer to Page 4.8-21 of the Draft EIR).

17-71 The commenter expresses concerns with land use and planning and opines that the Project is an inconsistent use given its adjacency to the active military airfield. As discussed in Section 4.10, *Land Use and Planning*, of the Draft EIR, the Project would not conflict with JFTB AELUP's safety, height, noise, or aircraft overflight criteria, and impacts would be less than significant. Table 4.10-2, *General Plan Consistency Analysis*, provides an analysis of the Project's consistency with all applicable General Plan goals and policies that were adopted for the purpose of avoiding or mitigating an environmental effect. As shown in Table 4.10-2, the Project would not conflict with any of the applicable General Plan goals and policies. Accordingly, the Project would have a less-than-significant impact with respect to a conflict with the City of Los Alamitos General Plan and mitigation is not required (refer to Pages 4.10-14 through 4.10-32 of the Draft EIR).

17-72 The commenter expresses concerns with noise pollution on Lampson Avenue and added vehicles on the I-405 from residents exiting onto Lampson Avenue. Refer to Response to Comment 17-36.

17-73 The commenter expresses concerns with increased population and housing and its impact on parking spaces and uses of existing parks. As discussed in Section 4.12, *Population and Housing*, of the Draft EIR, the Project would not result in substantial unplanned growth in the area because: 1) the Project is within the growth projections of the City's General Plan, 2) the planned housing is a requirement of State Housing Law and in response to an existing unmet need for housing, 3) the Project is consistent with the existing General Plan land use and zoning designations, and 4) the Project improves the City's job-housing balance by developing housing in a currently jobs-rich and housing-poor area. Therefore, implementation of the Project would not result in substantial unplanned population growth, and impacts would be less than significant (refer to Pages 4.12-8 through 4.12-10 of the Draft EIR). Refer to Master Response 2.1.3, *Parking*, for parking concerns. Refer to Response to Comment 17-11 for impacts to existing recreational facilities.

17-74 The commenter expresses concerns with the increase in traffic and lack of available parking in the College Park East neighborhood and recommends that parking permits be implemented. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns

and 2.1.3, *Parking*, for parking concerns. Refer to Response to Comment 17-73 for population impacts.

17-75 The commenter expresses concerns with the strain on Seal Beach public services from the new development due to traffic accidents, pedestrian related issues, traffic issues. As discussed in Section 4.13, *Public Services*, of the Draft EIR, fire protection services for the Project site is currently provided by the Orange County Fire Authority (OCFA) and police protection service is provided by the Los Alamitos Police Department (refer to Page 4.13-1 and 4.13-2 of the Draft EIR). Refer also to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for roadway safety concerns and 2.1.8, *Public Safety*, for concerns related to public services.

17-76 The commenter expresses concerns with the increased use of parks and the increased need for maintenance of park equipment. Refer to Response to Comment 17-11 for impacts to existing parks.

17-77 The commenter expresses concerns with road impacts from heavy equipment usage. The Project would be required to comply with all applicable local regulations related to vehicle weight limits. If the Project requires the use of an oversize vehicle in excess of the eight, width, height or length permitted by the Vehicle Code, a permit shall be obtained from the City of Seal Beach in accordance with the City of Seal Beach Municipal Code 8.10.135, *Movement of Oversize Vehicles*. Additionally, the Project Applicant would be required to pay development impact or connection fees, as applicable or required, to the City of Seal Beach, as agreed upon, prior to Project approval for future infrastructure improvements.

17-78 The commenter expresses concerns with rodents due to more trash and litter caused by additional residents. The Project site plan incorporates necessary trash enclosures protect against rodent populations onsite. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-79 The commenter expresses concerns with overcrowded schools/libraries. As discussed in Section 4.13, *Public Services*, of the Draft EIR, the Project would be required to pay development impact fees to LAUSD under SB 50 for the construction of new schools, which provides full and complete mitigation to school facilities. Development impact fees currently charged by LAUSD for residential uses are $5.17 per sf. Although project buildout would result in an increase of 135 students, the availability of schools in the area and the payment of impact fees in compliance with SB 50 would address any potential impacts. Impacts from implementation of the Project on school services would be less than significant (refer to Pages 4.13-10 through 4.13-12 of the Draft EIR).

Project buildout would increase population onsite by an estimated 647 residents, thus increasing demand for other public facilities, such as library services. Increased demands are

expected to most affect the library facilities closest to the Project site – that is the Los Alamitos-Rossmoor Library. According to the administrative manager of the OCPL, it is anticipated that the increase in residents may impact service. With the current renovations previously underway at the library, however, OCPL does not expect Project buildout to require construction of new or expanded physical library facilities, the construction of which could cause a substantial adverse impact. Although future Project residents would be mainly served by the Los Alamitos-Rossmoor Library, they would have access to all libraries within OCPL's system. Therefore, impacts to library services would be less than significant and no mitigation is required (refer to Page 4.13-12 of the Draft EIR).

17-80 The commenter expresses concerns with traffic safety on Lampson Avenue, Seal Beach Boulevard and Valley View, and cut through traffic. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns and Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for safety concerns. Refer to Response to Comment 9-19 for cut through traffic.

17-81 The commenter expresses concerns with the added burden to utilities and service system infrastructure. Refer to Section 4.17, *Utilities and Service Systems*, of the Draft EIR, which evaluates this issue and concludes there would be sufficient water supplies, wastewater treatment facility capacity, and landfill capacity available to serve the Project and impacts would be less than significant (refer to Page 4.17-15 to 4.17-20 of the Draft EIR).

17-82 The commenter expresses concerns with aesthetic views of the Project site and expresses general opposition to the Project. Refer to Response to Comment 17-65 for aesthetics.

17-83 The commenter expresses concerns with insufficient parking, increased foot traffic, unsafe street crossings, and increased crime. Refer to Master Response 2.1.3, *Parking,* for parking concerns and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for safety concerns. Refer to Response to Comment 17-70 for street crossing and Response to Comment 17-62 for police protection.

17-84 The commenter expresses concerns with the proposed open space of the Project and the burden to existing recreational facilities. Refer to Response to Comment 17-11 for impacts to existing recreational facilities and Response to Comment 17-14 for the Project's proposed open space area. Additionally, refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*.

17-85 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-86 The commenter expresses concerns with safety impacts and traffic congestion due to increased traffic. Refer to Response to Comment 17-70 for street crossing concerns. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns and Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for safety concerns.

17-87 The commenter expresses concerns with insufficient parking. Refer to Master Response 2.1.3, *Parking,* for parking concerns.

17-88 The commenter expresses concerns with Project residents utilizing Seal Beach City resources, parks and amenities. Refer to Response to Comment 17-11 for impacts to existing recreational facilities.

17-89 The commenter expresses concerns with construction vehicles during Project construction and the current signage restricting trucks over 3 tons from using the street. Refer to Response to Comment 17-77.

17-90 The commenter expresses concerns with traffic on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns.

17-91 The commenter expresses concerns with impacts to Arbor Park and inquires about an evaluation of existing parks and proposed parks. Refer to Response to Comment 17-11 for impacts to existing recreational facilities and Response to Comment 17-14 for the Project's proposed open space area. Additionally, refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities.*

17-92 The commenter expresses concerns with impacts to Arbor Park and parking and recommends the new development include a play area for residents to offset demand. Refer to Response to Comment 17-11 for impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area. Additionally, refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities.* Refer to Master Response 2.1.3, *Parking,* for parking concerns.

17-93 The commenter recommends the Draft EIR consider noise levels coming from the park and from parking for residents. The commenter recommends that the residential units provide sufficient sound barriers or building materials to reduce noise levels. The commenter encourages the City to add improvements to soccer fields. Refer to Response to Comment 17-12 for noise concerns. As discussed in Section 4.14, *Recreation,* of the Draft EIR, per the City's park dedication requirements under Chapter 16.18 (Dedication of Land for Park Facilities and Payment of In Lieu Fees) of the City of Los Alamitos Municipal Code, all new residential development is required either to dedicate parkland or pay park facilities impact fees to offset the cost to expand or construct new park and recreational space and facilities to adequately serve the City's growing population (refer to Page 4.14-11 of the Draft EIR). Additionally, the commenter's request for the City to invest in more soccer fields is noted for

the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-94 The commenter expresses general opposition to the Project and expresses concerns with additional vehicles and traffic congestions on Lampson Avenue along with impacts to wildlife and residences, and safety issues. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for safety concerns. Refer to Response to Comments 17-18, 17-19, and 17-35 for impacts to wildlife.

17-95 The commenter expresses concerns with overcrowding, excessive noise, pollution, traffic, parking, and wear and tear to existing public facilities. The commenter recommends adding a traffic light and reducing the apartment density. Refer to Response to Comment 17-36 for impacts related to noise, pollution, traffic, and wear and tear to existing public facilities and Response to Comment 17-37 for impacts related to overcrowding above. Refer to Master Response 2.1.3, *Parking*, for parking concerns. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for traffic signal concerns. Refer to Response to Comment 17-71 for land use consistency.

17-96 The commenter expresses general opposition to the Project due to safety concerns from traffic, insufficient parking, lack of community spaces, aesthetics, noise, and impacts to existing recreational facilities. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns, 2.1.3, *Parking* for parking concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns. Refer to Response to Comment 17-65 for aesthetic concerns and Response to Comment 17-12 for noise concerns. Refer to Response to Comment 17-11 for impacts to existing recreational facilities and Response to Comment 17-14 for the Project's proposed open space area.

17-97 The commenter expresses concerns with safety and traffic on Lampson Avenue. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns.

17-98 The commenter expresses concerns with insufficient parking which will led to increase foot traffic and unsafe street crossings. Refer to Master Response 1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns and 2.1.3, *Parking*, for parking concerns.

17-99 The commenter expresses concerns with impacts to existing parks and proposed open space. Refer to Response to Comment 17-11 for impacts to existing recreational facilities and Response to Comment 17-14 for the Project's proposed open space area.

17-100 The commenter expresses concerns with construction noise and visual impacts from the Project and request a taller sound and privacy wall. Refer to Response to Comment 17-65 for aesthetic concerns. Refer to Response to Comment 17-36 for construction noise. The commenter's

request for a higher wall is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-101 The commenter expresses concerns with impacts to Arbor Park and expresses general opposition to the Project. Refer to Response to Comment 17-11 for impacts to existing recreational facilities and 2.1.3, *Parking,* for parking concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-102 The commenter expresses concerns with the Project due to impacts to College Park East, including parks and parking. Refer to Response to Comment 17-11 for impacts to existing recreational facilities. Refer to Master Response 2.1.3, *Parking,* for parking concerns.

17-103 The commenter expresses concerns with increased traffic on Lampson Avenue and risk with heavy construction vehicles. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue,* for roadway safety concerns. Refer to Response to Comment 17-77 regarding construction vehicle concerns.

17-104 The commenter expresses concerns with noise and pollution. Refer to Response to Comment 17-12 for noise concerns and Response to Comment 17-34 for pollution concerns.

17-105 The commenter expresses concerns with impacts to existing parks and states that no parks are planned for the new development. Refer to Response to Comment 17-11 for impacts to existing recreational facilities. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, for concerns regarding the Project's planned open space.

17-106 The commenter expresses concerns with insufficient parking. Refer to Master Response 2.1.3, *Parking,* for parking concerns.

17-107 The commenter expresses general opposition to the Project and concerns due to lack of resources. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-108 The commenter expresses concerns with impacts to school services. Refer to Response to Comment 17-79 for responses regarding school services.

17-109 The commenter expresses concerns with police and fire protection services. Refer to Response to Comment 17-62 for responses regarding police protection services and Response to Comment 17-68 for responses regarding fire protection services.

17-110 The commenter expresses concerns with impacts to existing parks and proposed open space. Refer to Response to Comment 17-11 for impacts to existing recreational facilities and Response to Comment 17-14 for responses regarding the Project's proposed open space area.

17-111 The commenter expresses concerns with medical services and how the Project would impact the Los Alamitos hospital. The Project buildout would increase the population onsite by an estimated 647 residents, a small percentage of which are expected to need hospital services at any given time. This growth was anticipated in the Los Alamitos Housing Element Update. There are six medical facilities and hospitals within a 5 mile radius of the Project site. Therefore, it is not expected that the Project would impact the Alamitos Medical Center in such a way that it would require the construction of new or expanded medical facilities. Emergency medical services would be provided by OCFA. Per correspondence with the OCFA, there are currently no deficiencies in fire protection service provided to the Project site. OCFA has not indicated the need for a new fire station or expansion of existing facilities due to the Project. The Project applicant must enter into the Secured Fire Protection Agreement which would ensure that responses times and service ratios are met due to the implementation of the Project and no new fire station facilities would be required (refer to Page 4.13-9 of the Draft EIR).

17-112 The commenter expresses concerns with the insufficient amount of youth camps, summer camps, and summer school activities available, and the increase in taxes. The commenter also expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-113 The commenter expresses concerns with light pollution, sound pollution above roadway standards, vibrations, increased traffic, loss of park space, and unsafe road conditions. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.3, *Parking* regarding parking concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns. As discussed in Section 4.1, *Aesthetics*, of the Draft EIR, the Project would redevelop the Project site with residential uses which would produce artificial light. The Project would be required to adhere to the light and glare requirements as set forth in the LAMC (Chapter 8.48 - Lighting Performance Standards and Section 17.24.040 Light and Glare). Chapter 8.48 addresses the visual impacts of exterior lighting on adjacent property owners and neighborhoods. The chapter outlines guidelines for the design, scale, location, and illumination level of lighting fixtures. The guidelines aim to reduce light trespass and prevent glare. Section 17.24.040 would require shielding of light sources to reduce impacts on surrounding land uses including sensitive receptors in College Park East. The City would confirm compliance with all applicable lighting requirements during future review of building permit applications/plans. Mandatory compliance with LAMC Chapter 8.48 and Section 17.24.040 would ensure that the Project would not introduce any permanent design features that would adversely affect day or nighttime views in the area (refer

to Page 4.1-19 of the Draft EIR). Refer also to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, for impacts related to the loss of park space.

As discussed in Section 4.11, *Noise*, of the Draft EIR, based on the significance criteria for off-site traffic noise impacts, land uses adjacent to the study area roadway segments would not experience substantial noise level increases due to Project-related traffic noise level increases and off-site traffic related noise impacts would less than significant. No mitigation is required. The Project's construction and operational activities would not exceed vibration thresholds at all nearest receiver locations. As such, the Project would not generate excessive groundborne vibration or groundborne noise levels. Impacts would be less than significant (refer to Pages 4.11-25 through 4.11-30 of the Draft EIR).

17-114 The commenter expresses concerns regarding the height of the buildings, and with light and sound from the proposed apartment buildings, particularly during nighttime hours. Refer to Response to Comment 17-65 for aesthetic concerns and to Response to Comment 17-113 above for light and sound concerns. As discussed in Section 4.11, *Noise*, of the Draft EIR, the operational noise analysis evaluates the potential daytime and nighttime activities at the Project site. Both daytime and nighttime Project operational noise levels at nearby sensitive receptor locations would be less than significant (refer to Pages 4.11-24 through 4.11-25 of the Draft EIR).

17-115 The commenter expresses concerns with additional cars on Lampson Avenue and noise and vibration impacts. Refer to Response to Comment 17-113 above.

17-116 The commenter expresses concerns with parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-117 The commenter expresses concerns with traffic and safety concerns on Lampson Avenue, including U-turns at Heather Street. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns.

17-118 The commenter expresses concerns with the proposed density and use of existing recreational facilities. Refer to Response to Comment 17-71 regarding land use consistency. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. As discussed in Section 4.12, *Population and Housing*, of the Draft EIR, The Project site is identified within the City's Housing Element as a housing element site with an estimate of 246 units. Development of the Project with a total of 246 units would be consistent with the City's 2021–2029 Housing Element (refer to Page 4.12-9 of the Draft EIR).

17-119 The commenter expresses concerns with impacts to AYSO operation and parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-120 The commenter recommends denial of the Project. This comment is noted for the record and will be forwarded to the decision makers for required review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-121 This comment letter references a peer review memorandum of the Project's Preliminary Water Quality Management Plan conducted by the City's consultants. This comment is addressed in Response to Comment 17-122.

17-122 The comments pertain to the Project's Water Quality Management Plan and were made by the City's consultants. These comments were addressed and incorporated into an updated WQMP which was included as *Technical Appendix I2* of the Draft EIR.

17-123 The commenter expresses concerns with impacts to Heather Park and opines that the park cannot handle additional children. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-124 The commenter expresses concerns with increased traffic on Lampson Avenue and safety concerns for the bike lane. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns.

17-125 The commenter expresses concerns with insufficient parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-126 The commenter expresses concerns with impacts to AYSO operation and parking. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

17-127 The commenter expresses concerns with safety on Lampson Avenue. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns.

17-128 The commenter expresses concerns with the proposed open space and utilization of existing parks. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-129 This comment letter pertains to removal of a "Stop Lampson Project" sign on the property. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-130 The commenter asserts that the Project Applicant's focus was to keep the Project unknown to the public and expresses concerns with increased traffic and safety issues in the surrounding neighborhoods. As discussed previously, in compliance with Section 15201 of the State CEQA Guidelines, the City has taken steps to provide opportunities for public participation in the environmental review process. The mailing list radius for noticing complied with the City of Los Alamitos distance requirements and was expanded to 1,000 feet to include every house within College Park East and Parkwood regardless of distance. Additionally, public notice was published in the Event News Enterprise; the notice of availability and Draft EIR were made available for review, on the City's web site. Therefore, the City met and exceeded its legal requirement for noticing. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for roadway safety concerns.

17-131 The commenter expresses concerns with the zoning and proposed density. Refer to Response to Comment 17-71 regarding land use consistency.

17-132 The commenter expresses concerns with limited accessibility into and out of the Project and how that impacts emergency access during fire hazards or police access. As discussed in Section 4.13, *Public Services*, access to and around structures would meet OCFA and CFC requirements. Figure 4.8-3, *Fire Master Plan*, of the Draft EIR demonstrates compliance with all codes and other regulations governing water availability for firefighting and emergency access to the Project site and structures. Compliance with OCFA requirements would ensure adequate provision of resources such as access, water mains, fire flows, and fire hydrants (refer to Page 4.13-9 of the Draft EIR).

17-133 The commenter expresses concerns with traffic and safety issues on Lampson Avenue and the lack of a stop light. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns.

17-134 The commenter expresses concerns with traffic accidents due to increased traffic on Lampson Avenue. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns.

17-135 The commenter expresses concerns with access through Lampson Avenue and safety concerns. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns.

17-136 The commenter expresses concerns with safety and traffic on Lampson Avenue. Refer to Master Response Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns.

17-137 The commenter expresses concerns with insufficient parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-138 The commenter expresses concerns with impacts to AYSO operation based on parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-139 The commenter expresses concerns with the proposed density and safe access around the Project site. Refer to Response to Comment 17-71 regarding land use consistency and Response to Comment 17-132 regarding safe access.

17-140 The commenter expresses concerns with the lack of "no U-turn" signage and lack of a traffic signal. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns including U-turns. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns.

17-141 The commenter expresses concerns with insufficient parking and recommends adding a parking garage or decreasing the proposed units. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-142 The commenter recommends requiring a public park. Refer to Response to Comment 17-11regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-143 The commenter recommends keeping some of the land commercial and adding small restaurants. A commercial alternative at the Project site was considered but rejected as a "No Project" alternative. It is unlikely that the existing office building would resume operation since commercial uses would be inconsistent with the General Plan designation and zoning. Refer to Response to Comment 17-71 for land use consistency.

17-144 This comment letter is an informational email from AYSO Region 159 to notify the public about the Project. The commenter expresses concerns with parking, lack of a traffic signal proposed, impacts to existing recreation facilities, and noise impacts to residents from AYSO usage of Arbor Park. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding the lack of a traffic signal, 2.1.3, *Parking*, regarding parking concerns, and 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding impacts to existing recreational facilities. CEQA does not require an analysis of the impact of environmental conditions on a proposed Project. Therefore, an evaluation of activities at Arbor Park and related noises to the future residents of the Project were not evaluated.

17-145 The commenter expresses concerns with parking, traffic, and pollution and expresses general opposition to the Project. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-34 regarding pollution concerns.

17-146 The commenter expresses concerns with noise pollution, overcrowding of Heather Park, traffic safety, and negative impacts to AYSO operation. Refer to Response to Comment 17-36 and 17-37 above regarding noise pollution, impacts to existing recreational facilities, traffic safety, and AYSO operation concerns.

17-147 The commenter expresses concerns with the Project due to sound pollution impacting Ironwood Avenue from added traffic. Refer to Response to Comment 17-113 above regarding off-site traffic noise impacts.

17-148 The commenter expresses concerns with increased traffic and safety issues for pedestrians and cyclists on Lampson Avenue. The commenter provides links to several news articles referencing accidents that have occurred on Lampson. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue,* regarding pedestrian and cyclist safety concerns.

17-149 The commenter expresses concerns with aesthetics, specifically daytime glare, nighttime illumination, and existing visual characteristics. Refer to Response to Comment 17-113 regarding light and glare concerns. Refer to Response to Comment 17-65 regarding consistency with zoning development standards.

17-150 The commenter expresses concerns with existing property values._Property value is not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. Thus, no further response is required.

17-151 The commenter expresses concerns with air quality, specifically increased carbon monoxide emissions, particulate matter, and greenhouse gas emissions. Refer to Response to Comment 17-35 regarding air quality impacts concerns and Response to Comment 17-48 regarding greenhouse gas emissions concerns.

17-152 The commenter expresses concerns with biological impacts, specifically impacts to wildlife, birds, and trees. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife and birds. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, on April 18, 2022, the City of Los Alamitos adopted a Parkway Tree Master Plan as part of its Urban Forest Program. This plan addresses City parkway trees. There are currently no parkway trees along the Project's frontage. The Project would not result in an impact to the City parkway trees. Therefore, the Project would not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance. No impact would occur and mitigation is not required (refer to Page 4.3-34 of the Draft EIR).

17-153 The commenter expresses concerns with geology and soils, drainage impacts, and runoff concerns, including soccer field conditions. As discussed in Section 4.6, *Geology and Soils*, of the Draft EIR, Mitigation Measure MM 4.6-1 would ensure that that the Project's design professionals and construction contractors implement the recommendations of the Project's

Geotechnical Investigation (*Technical Appendix F1* of the Draft EIR), which in turn would ensure measures are implemented to address potential impacts due to the exposure of people or structures to adverse effects, including loss, injury, or death as a result of strong seismic ground shaking liquefaction hazards, soil settlement and expansion. Implementation of the required mitigation would ensure that impacts are reduced to less-than-significant levels (refer to Page 4.6-16 of the Draft EIR).

As discussed in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would substantially increase the rate or amount of surface runoff resulting in flooding on- or offsite (refer to Pages 4.9-22 through 4.9-23 of the Draft EIR). Project runoff would flow to the southwest corner (refer to Pages 4.9-18 through 4.9-20 of the Draft EIR) and would not impact the soccer fields.

17-154 The commenter expresses concerns with impacts to public services, specifically fire protection, police protection, libraries and parks. As discussed in Section 4.13, *Public Services*, of the Draft EIR, implementation of the Project would result in an increased requirement for public services. However, considering the existing resources available, the Project is not expected to result in the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impact. Impacts are less than significant (refer to Pages 4.13-8 through 4.13-12 of the Draft EIR). Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities. Refer also to Response to Comment in 17-62 regarding impacts to the police protection services.

17-155 The commenter recommends disapproval of the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-156 The commenter states that the parking lot on Lampson at West Ed has a Caltrans park and ride and is concerned that the new development is missing the park and ride. The Commenter also states that the parking lot used to support Arbor Park and is concerned that the parking lot is not being kept for the community park. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. As of the time of preparation of this Final EIR, the Park-n-Ride that previously occupied the Project site has not been in operation for the past 18 months and when in operation had limited usage. There are no requirements or proposal to provide a substitute park-and-ride location.

17-157 The commenter expresses concerns that the Project will overpopulate the Lampson/College Park East area and cause overflow parking in their neighborhood, along with increasing traffic. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.3, *Parking*, regarding parking concerns.

17-158 The commenter expresses concerns with impacts to wildlife, including nesting red-tailed hawks, and asserts that measures must be taken to ensure endangered species and nesting birds are not disturbed. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife and birds.

17-159 The commenter expresses concerns with impacts to wildlife, specifically relocation of species. The commenter asserts that the City include specific details of how wildlife would be affected by the plan and include a no kill requirement for those animals relocating themselves into local neighborhoods. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife and birds and corresponding mitigation measures. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, the Project site is not located within or part of a wildlife movement corridor. The site is located within the Pacific flyway; however, given the small area of the site, lack of native habitats and levels of disturbance, there is no potential for significant impacts to the Pacific flyaway. The Project site is developed and is adjacent to developed areas that do not contribute to wildlife movement. Therefore, the Project would not substantially interfere with an established migratory wildlife corridor (refer to Page 4.3-33 through 4.3-34 of the Draft EIR).

17-160 The commenter expresses concerns with the origination of the water supply and loss of wetlands for migratory animals. Refer to Response to Comment 17-26 regarding water supply. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, the Project would not result in a substantial adverse effect on state or federally protected wetlands during both construction and operational activities. No impact would occur and mitigation is not required. The Project would be required to comply with existing laws including but not limited to the Migratory Bird Treaty Act (MBTA) and California Department of Fish and Game Code Sections 3505, 3503.5, and 3800. Therefore, no impact would occur, and mitigation is not required with respect to wetland impacts (refer to Pages 4.3-32 through 4.3-34 of the Draft EIR).

17-161 The commenter expresses concerns with the Project site in close proximity to the military base and decrease in property values. The commenter also expresses concerns regarding an increase in crime and questions where additional resources for code enforcement will come from. The commenter also expresses concerns with traffic issues on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns and Response to Comment 17-62 related to the potential increase in crime. The Project Applicant will be required to pay Development Impact fees that will be used for future public service improvements. Property value is not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their

review and consideration prior to any action being taken on the Project. Thus, no further response is required.

17-162 The commenter expresses concerns with increased traffic and safety concerns on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding safety concerns.

17-163 The commenter expresses concerns that Arbor Park will be shut down because of noise complaints by new residents of the Project. The commenter also expresses concern that with no proposed open space as part of the Project, children will have to cross Lampson to utilize Heather Park. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, for a detailed discussion on the Project's proposed open space. There is no evidence to support the statement that Arbor Park would be shut down due to noise complaints by new residents of the Project; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. Thus, no further response is required

17-164 The commenter expresses concerns with parking, connection to Arbor Park, and proposes a playground. Refer to Master Response 2.1.3, *Parking* regarding parking concerns and Response to Comment 17-14 regarding proposed open space. As discussed in Section 3.0, *Project Description*, of the Draft EIR, non-motorized circulation would include pedestrian connectivity with existing sidewalks along Lampson Avenue, including an existing signalized pedestrian connection to the south at Rose Street and Lampson Avenue and pedestrian "paseo" connections with Arbor Park and the Arbor Dog Park to the north. The Project would provide pedestrian gates to be controlled by the Homeowners' Association to restrict residents from entering Arbor Park and Arbor Dog Park outside of hours specified by JTFB (refer to Page 3-5 of the Draft EIR).

17-165 The commenter expresses concerns with increased traffic and safety issues on Lampson Avenue. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-166 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-167 The commenter expresses concerns with increased traffic on Lampson Avenue, Seal Beach Boulevard and Valley View Boulevard, inadequate parking, and safety concerns. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns, and 2.1.3,

Parking, regarding parking concerns. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns.

17-168 The commenter expresses concerns with increase in population, increased traffic and safety of only one thoroughfare. Refer to Response to Comment 17-73 regarding population growth and Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding safety concerns. As discussed in Section 4.8, *Hazards and Hazardous Materials*, of the Draft EIR, the Project site is not located within a very fire hazard severity zone and City's General Plan identifies very little risk of wildland fire hazards due to the urban nature of Los Alamitos, Rossmoor, and the surrounding communities. The City currently does not have any designated evacuation routes, however, the EOP recognizes that during a major evacuation event, all major roadways would be available for evacuation purposes. Implementation of the Project would not result in changes to the existing roadways that would impair or physically interfere with the EOP or evacuation routes (refer to Page 4.8-21 of the Draft EIR).

17-169 The commenter expresses concerns with lack of parking spaces causing future residents to park in College Park East. The commenter is also concerned about pedestrian safety as they cross Lampson. Refer to Master Response 2.1.3, *Parking* regarding parking concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding safety concerns.

17-170 The commenter expresses concerns with an increase in car accidents and expresses general opposition to the Project. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-171 The commenter provides an introduction and expresses general concerns regarding the Project which are responded to below.

17-172 The commenter expresses concerns about the lack of parking spaces and the use of parking garage for storage. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns A condition of approval has been added to the Project to ensure the parking garages onsite be used primarily for parking purposes.

17-173 The commenter expresses concerns with traffic, accidents and speeding. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns.

17-174 The commenter expresses concerns with noise and air pollution during construction. The commenter also expresses concern for impacts to wildlife in the strawberry fields to the west of the Project. Refer to Response to Comment 17-40 regarding noise impacts and Response to Comment 17-35 regarding air pollution. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, wildlife, special-status vegetation communities, special-status species, nesting

birds, and indirect impacts to biological resources were analyzed (Refer to Pages 4.3-29 through 4.3-31 of the Draft EIR).

17-175 The commenter expresses concerns with increased traffic and suggests scaling the project down or not building it altogether. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns.

17-176 The commenter requests environmental studies be prepared on traffic safety, parking, population, and recreation. The commenter expresses concerns about the proposed building heights, lack of parking, lack of traffic signals, and lack of recreation space. The commenter also expresses concern regarding the increase in traffic and pedestrians and the resulting safety issues. A Traffic Analysis, Onsite Parking Analysis, and Parks Impact Analysis were prepared for the Project and are included as *Technical Appendix N1, P, and M,* to the Draft EIR, respectively. Refer to Response to Comment 17-73 regarding concerns regarding population growth; Response to Comment 17-65 regarding aesthetic concerns; Response to Comment 17-11 regarding impacts to existing recreational facilities; Response to Comment 17-14 regarding the Project's proposed open space area. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns and 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities,* regarding recreation space concerns.

17-177 The commenter requests a restriction in the number of units proposed, the building of a recreation space, increase parking to accommodate residents and their guests, and recommends that a traffic signal be installed so that residents do not make U-turns at Heather Avenue and Rose Avenue. The Project proposes to develop up to only 246 residential units. Refer to Response to Comment 17-14 for the Project's proposed open space area. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for traffic signal concerns. Refer to Master Response 2.1.3, *Parking*, for parking concerns and 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities,* for recreation space concerns.

17-178 The commenter expresses concerns with impacts to Heather Park and opines that the park cannot handle additional children. Refer to Response to Comment 17-123 for impacts to Heather Park and capacity.

17-179 This comment letter pertains to discussion items for a meeting between the City and City consultants. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-180 The commenter expresses concerns with access into Arbor Park from the Project site through the proposed pedestrian connections. The approval of the proposed pedestrian connections are speculative and not reasonably foreseeable at this time and for that reason are not further

evaluated in the Draft EIR; however, these comments are noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-181 The commenter expresses concerns with parking in Arbor Park and sufficient parking for the Project. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-182 The commenter expresses concerns with traffic flow at the left turn lane at the main entrance and congestion on Lampson. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-183 The commenter expresses concerns with lack of Project parking, and the use of parking garage for storage, and its impacts to parking at Arbor and Heather Park. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. A condition of approval has been added to the Project to ensure the parking garages onsite be used primarily for parking purposes.

17-184 The commenter expresses concerns with impacts to Heather Park facilities, the impact on tennis courts and safety issues regarding pedestrians crossing Lampson to get to the park. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area. Refer to Master Comment 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-185 The commenter expresses concerns with traffic safety on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-186 The commenter expresses concerns with safety issues for children at the bus stop at Heather Park, runoff and flooding, utilities and impacts to service, police response and the density of the Project. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. As discussed in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would substantially increase the rate or amount of surface runoff resulting in flooding on- or offsite (refer to Pages 4.9-22 through 4.9-23 of the Draft EIR). Refer to Response to Comment 17-81 regarding impacts to utilities and services systems. Refer to Response to Comment 17-62 regarding police protection.

17-187 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment

letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-188 The commenter expresses concerns with construction noise; road closures; fire and police response; increased traffic on Lampson; parking; increased population; traffic safety; utilities and service systems; impacts on local shopping and services; safety of children; impacts on local parks and public services, and AYSO at Arbor Park. Refer to Response to Comment 17-36 regarding construction noise. Refer to Response to Comment 17-62 regarding police protection services, Response to Comment 17-67 regarding road closures, and Response to Comment 17-68 regarding fire protection services. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-73 regarding population growth. Refer to Response to Comment 17-81 regarding impacts to utilities and services systems. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities.

17-189 The commenter expresses concerns with traffic. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and Response to Comment D-9 for cumulative traffic impacts.

17-190 The commenter expresses concerns with population growth, overflow parking, and increased traffic and safety impacts to Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns; 2.1.3, *Parking*, f regarding parking concerns; and 2.1.2 *Roadway Safety on Lampson Avenue*, regarding safety concerns. Refer to Response to Comment 17-73 regarding population growth.

17-191 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-192 The commenter expresses concerns with traffic. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-193 The commenter expresses concerns with impacts to existing parks, parking and sports programs. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-194 The commenter expresses concerns with residents of the Project parking in College Park East and the need for traffic lights to handle congestion. Refer to Master Response 2.1.3, *Parking* regarding parking concerns and 2.1.1, *Transportation and Traffic Congestion*, for traffic congestion concerns. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns.

17-195 The commenter expresses concerns with increased crime due to increased parking in College Park East. Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities. Refer to Response to Comment 17-62 regarding police protection.

17-196 The commenter expresses concerns with air quality due to increased traffic and noise pollution. As discussed in Section 4.2, *Air Quality*, of the Draft EIR, the Project would not exceed criteria pollutant thresholds established by the South Coast AQMD for emissions of any criteria pollutant and impacts would be less than significant (refer to Pages 4.2-24 and 4.2-25 of the Draft EIR). Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns. Refer to Response to Comment 17-40 regarding noise impacts.

17-197 The commenter expresses concerns with the use of existing parks and wait times for their amenities. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities.

17-198 The commenter expresses concerns with police response services. Refer to Response to Comment 17-62 regarding police protection.

17-199 The commenter expresses concerns with impacts to school services and safety concerns for children crossing on Lampson Avenue. Refer to Response to Comment 17-79 regarding impacts to school services and Response to Comment 17-70 regarding safe crossing. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-200 The commenter expresses concerns with traffic congestion, pollution and safety concerns on Lampson. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns. Refer to Response to Comment 17-34 for pollution concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for safety concerns

17-200 The commenter expresses concerns with traffic congestion, pollution and safety concerns on Lampson. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns. Refer to Response to Comment 17-34 regarding pollution concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding safety concerns

17-201 The commenter expresses concerns with increased traffic, pollution, noise, parking, street crossing, and safety near the JFTB. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns, Response to Comment 17-34 regarding pollution concerns, Response to Comment 17-40 regarding noise impacts, Master Response 2.1.3, *Parking*, regarding parking concerns, Response to Comment 17-70 regarding safe crossing, Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns, and Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*, for concerns related to safety from the military base.

17-202 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-203 The commenter expresses concerns with noise from additional traffic, safety on Lampson Avenue, and air quality impacts. Refer to Response to Comment 17-113 regarding off-site traffic noise impacts. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-66 regarding air quality impacts.

17-204 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-205 The commenter expresses concerns with construction noise, cumulative noise, dust, dirt and rodents. Refer to Response to Comment 17-40 regarding noise impacts. As discussed in Section 4.11, *Noise*, of the Draft EIR, the Project would not result in an increase in the cumulative noise levels at sensitive receiver locations during both construction and operation (refer to Page 4.11-34 of the Draft EIR). Refer also to Response to Comment D-9 for cumulative offsite traffic noise impacts. Refer to Response to Comment 9-21 regarding the potential for rodents and small animals to move into CPE. As discussed in Section 4.6, *Geology and Soils*, the Project would be required to implement erosion and dust control measures pursuant to South Coast AQMD Rule 403 to minimize water- and windborne erosion. Mandatory compliance with the SWPPP and the erosion control and dust control measures would reduce, prevent, or minimize soil erosion from Project-related construction activities (refer to Page 4.6-10 of the Draft EIR). Moreover, as discussed in Section 4.2, *Air Quality*, of the Draft EIR, the Project would not exceed the South Coast AQMD localized significance thresholds for assessing localized health impacts from criteria air pollutants during construction. Therefore, sensitive receptors would not be exposed to substantial pollutant concentrations during Project construction. Further, Project traffic would not create or result in a CO "hotspot." Therefore, sensitive receptors would not be exposed to substantial pollutant concentrations due to the Project, and impacts would be less than significant (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR).

17-206 The commenter expresses concerns with increased traffic and safety concerns due to additional traffic. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding safety concerns.

17-207 The commenter expresses concerns with traffic noise and accidents. Refer to Response to Comment 17-113 regarding off-site traffic noise impacts. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-208 The commenter expresses concerns with dense neighborhoods, increased traffic, safety, noise, and air pollution. Refer to Response to Comment 17-73 regarding population growth. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-34 regarding pollution concerns. Refer to Response to Comment 17-40 regarding noise impacts.

17-209 The commenter expresses general opposition to the Project and expresses concerns with the proposed density. Refer to Response to Comment 17-71 regarding land use consistency. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-210 The commenter expresses concerns with increased traffic, U-turn at Heather Park and associated safety concerns, parking, and use of existing parks. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns, and 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities.

17-211 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-212 The commenter expresses general opposition and requests an unbiased review/full assessment of the Project. As discussed in Section 1.0, *Introduction*, of the Draft EIR, the Draft EIR is an informational document that represents the independent judgement of the City of Los Alamitos, acting as the Lead Agency pursuant to the CEQA, and evaluates the physical environmental effects that could result from construction and operation of the proposed Project. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-213 The commenter expresses concerns with increased traffic, air quality, and noise pollution. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Response to Comment 17-40 regarding noise impacts.

17-214 The commenter expresses concerns with limited parking, lack of parks/recreation area, impacts to school services, impacts to emergency service providers, construction equipment impacts to Lampson, construction noise, impacts on animals, aesthetics, water supply, and water quality during construction. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area. Refer to Response to Comment 17-79 regarding impacts to school services. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. Refer to Response to Comment 17-77 regarding construction equipment. Refer to Response to Comment 17-36 regarding construction noise. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife and birds. Refer to Response to Comment 17-65 regarding aesthetic concerns. Refer to Response to Comment 17-26 regarding water supply.

As discussed in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality during construction or long-term operation. Impacts would be less than significant and no mitigation is required (refer to Pages 4.9-14 through 4.9-16 of the Draft EIR).

17-215 The commenter requests consideration of the above-mentioned concerns in the Draft EIR. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-216 The commenter expresses concerns related to infrastructure to support the Project, impacts to public services, and water supply. The commenter recommends a park instead of the Project. Refer to Response to Comment 17-81 regarding utilities concerns. Refer to Response to Comment 17-154 regarding impacts to public services. Refer to Response to Comment 17-26 regarding water supply. Refer to Response to Comment 17-14 regarding the Project's proposed open space area. The commenters recommendation for a park is acknowledged and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-217 The commenter expresses concerns with insufficient parking spaces, traffic congestion, loss of parking for sporting events at Arbor Park, accidents and safety. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns; 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns, and 2.1.3, *Parking*, regarding parking concerns.

17-218 The commenter expresses general opposition to the Project and concerns with traffic. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-219 The commenter expresses concerns with traffic on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-220 The commenter expresses concerns with impacts to school services. Refer to Response to Comment 17-79 regarding impacts to school services.

17-221 The commenter expresses concerns with emergency access and evacuation. Refer to Response to Comment 17-132 for emergency access and 17-168 for evacuation.

17-222 The commenter expresses concerns with additional traffic on Lampson Avenue and impact of construction trucks on the roadway. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Maintenance and repair concerns regarding the "wear and tear" of streets would be addressed by the agencies with jurisdiction over those roadways to the extent the Project construction results in any damage to streets or roadways. Refer to Response to Comment 17-77 regarding heavy construction equipment.

17-223 The commenter expresses concerns with emergency and evacuation routes. As discussed in Section 3.0, *Project Description*, of the Draft EIR, vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site (full access driveway). Additionally, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site (refer to Page 3-4 of the Draft EIR). Refer to Response to Comment 17-132 regarding emergency access. As discussed in Section 4.8, *Hazards and Hazardous Materials*, of the Draft EIR, the City currently does not have any designated evacuation routes, however, the EOP recognizes that during a major evacuation event, all major roadways would be available for evacuation purposes. Implementation of the Project would not result in changes to the existing roadways that would impair or physically interfere with the EOP or evacuation routes (refer to Page 4.8-21 of the Draft EIR).

17-224 The commenter expresses concerns with aesthetics of the proposed apartments. Refer to Response to Comment 17-65 regarding aesthetic concerns.

17-225 The commenter expresses concerns with impacts to existing parks and proposed open space. The commenter recommends the Project be reduced/modified. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area. Additionally, refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*.

17-226 The commenter expresses concerns with inadequate parking, traffic congestion, impacts to emergency response, air quality, noise pollution, and impacts to school services. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-79 regarding impacts to school services.

17-227 The commenter inquires about the Project timeline and proposed means of entry for the Project site. For purposes of analysis in the Draft EIR, construction is assumed to occur over a period of approximately 39.5 months. The estimated Project construction schedule, organized by construction stage, is summarized in Table 3-4, *Estimated Construction Schedule* of the Draft EIR. The Project is anticipated to be partially operational in early 2025 with some buildings being fully constructed by that time (refer to Pages 3-4 through 3-14 of the Draft EIR). As discussed in Section 3.0, *Project Description*, of the Draft EIR, vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Additionally, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site.

17-228 The commenter expresses concerns with traffic on Lampson Avenue, Seal Beach Boulevard, and Valley View. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-229 The commenter expresses concerns with traffic congestion and safety, GHG emissions, hazardous materials, air quality, and noise pollution. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue,* regarding safety concerns. Refer to Response to Comment 17-48 regarding greenhouse gas emissions. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Response to Comment 17-40 regarding noise impacts.

As discussed in Section 4.8, *Hazards and Hazardous Materials*, of the Draft EIR, the Project site does not contain any hazards, nor is the Project site affected by any off-site hazards. During Project construction and operation, mandatory compliance with federal, State, and local regulations would ensure that the proposed Project would not create a significant hazard to the environment due to routine transport, use, disposal, or upset of hazardous materials. Impacts would be less than significant (refer to Pages 4.8-15 through 4.8-17 of the Draft EIR).

17-230 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment

letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-231 The commenter expresses concerns with existing views of the mountains, trees, and wildlife, excessive noise, bright lights, traffic, pollution, and overcrowding. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-113 regarding light pollution. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-34 regarding pollution concerns. Refer to Response to Comment 17-73 for population growth.

As discussed in Section 4.1, *Aesthetics*, of the Draft EIR, the Project development would block the partial and distant views of the San Gabriel Mountains from Lampson Avenue along the project frontage. However, redevelopment of the Project site would not result in a substantial adverse effect on a scenic vista, because background views of the San Gabriel Mountains are distant and limited due to existing development and landscaping and the Project site is not considered to be part of a designated scenic vista. Therefore, impacts would be less than significant (refer to Pages 4.1-8 through 4.1-10 of the Draft EIR).

17-232 The commenter expresses concerns with traffic, noise, pollution, overcrowding, safety and quality of life for people and animals. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-34 regarding pollution concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-233 The commenter expresses concerns with noise from traffic impacting residents, pets and wildlife. Refer to Response to Comment 17-113 regarding off-site traffic noise impacts. Section 4.11, *Noise*, of the Draft EIR, analyzed the Project's construction and operational related noise impacts and found impacts to be less than significant. Under Public Resources Code Section 21085, social noise generated by project occupants and their guests is not considered a significant environmental impact of residential projects on humans for CEQA purposes.

17-234 The commenter expresses concerns with noise from school buses, children and the safety of children crossing the street in the absence of a bus stop. Refer to Response to Comment 17-113 regarding off-site traffic noise impacts. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns.

17-235 The commenter expresses concerns with noise impacts to wildlife and safety of wildlife crossing Lampson Avenue. The commenter also expresses concern that noise from the Project will impact residents with special needs and those sensitive to sound and requests that a study be completed to determine impacts on these residents.

As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, indirect (or secondary) impacts are those that are reasonably foreseeable and caused by a project but occur at a different time or place. Indirect impacts can occur at the urban/wildland interface of projects, to biological resources located downstream from projects, and other offsite areas where the effects of the project may be experienced by plants and wildlife. Examples of indirect impacts include the effects of increases in ambient levels of noise or light; predation by domestic pets; competition with exotic plants and animals; introduction of toxics, including pesticides; and other human disturbances such as hiking, off-road vehicle use, unauthorized dumping, etc. Indirect impacts are often attributed to the subsequent day-to-day activities associated with project build-out, such as increased noise, the use of artificial light sources, and invasive ornamental plantings that may encroach into native areas. Indirect effects may be both short-term and long-term in their duration. These impacts are commonly referred to as "edge effects" and may result in a slow replacement of native plants by non-native invasive species, as well as changes in the behavioral patterns of wildlife and reduced wildlife diversity and abundance in habitats adjacent to project sites. The Project site is not surrounded by or adjacent to natural open space; rather, adjacent facilities include Arbor Dog park, Arbor Park and the Navy Golf Course which are recreational facilities subject to regular human uses and associated disturbances, including noise. The Project is not expected to result in indirect effects to biological resources as the Project site is predominantly developed with existing outdoor lighting in place and the proposed Project would incorporate measures to minimize indirect light spillover into the adjacent areas including Arbor Park, Navy Golf Course, and JFTB (refer to Page 4.3-31 of the Draft EIR).

As indicated in Section 4.1, *Noise*, of the Draft EIR, some land uses are more tolerant of noise than others. For example, schools, hospitals, churches, and residences are more sensitive to noise intrusion than commercial or industrial developments and related activities (refer to Page 4.11-3 of the Draft EIR). This section analyzed noise level impacts at nearby sensitive receiver locations, as required by CEQA, and impacts were found to be less than significant.

17-236 The commenter expresses concerns with noise from existing noise sources (e.g. fighter jets, military vehicles, police helicopters training, and traffic on Lampson) and the Project's heavy equipment for construction and its cumulative effect on residents. Refer to Response to Comment 17-36 regarding construction noise.

17-237 The commenter expresses concerns with AYSO operation and overflow parking into surrounding neighborhoods adding increased noise and air pollution to College Park East. The commenter also expresses concern regarding additional pollution from increased vehicles, health impacts negative affects to aesthetics, and how added air pollution may affect property values and requests studies to address these concerns.

A parking study (*Technical Appendix Q* of the Draft EIR) has been conducted for the Project to evaluate the parking need at Arbor Park and Arbor Dog Park, including AYSO Region 159 uses. Refer to Master Response 2.1.3, *Parking*, for the results of the parking study and overflow

parking. Additionally, as discussed in Section 4.2, *Air Quality*, of the Draft EIR, the increase in vehicle trips associated with the Project would not result in significant air quality impacts or health affects to nearby sensitive receptors, including residents at College Park East (refer to Page 4.2-27 through 4.2-29 of the Draft EIR).

Regarding AYSO overflow parking, if there were not adequate parking spaces for an AYSO soccer game event, vehicles would have the option of dropping off players/visitors at the park and/or driving a short distance to available parking off-site and walking to the park. These scenarios would not result in the addition of new vehicle trips attributable to the Project. Additionally, any change in vehicle trip distance would be negligible, as it would only occur on Saturdays during soccer season. Because these vehicles are arriving at certain appointed times to watch or participate in these events, they are not expected to circle the parking lot to wait until a parking space became available. As such, vehicles unable to find adequate parking would not result in any significant traffic impacts related to congestion at the site or air quality impacts related to emissions (refer to Page 4.2-25 of the Draft EIR). Property value is not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. Thus, no further response is required regarding property values.

17-238 The commenter expresses concerns about insufficient parking available and indirect noise impacts from people parking and talking in the neighborhood. Refer to Master Response 2.1.3, *Parking,* regarding parking concerns. Indirect social noise impacts are not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project

17-239 The commenter expresses concerns about Project lighting and how it will impact drivers, residents and wildlife. The commenter requests 3-D renderings of how the Project will appear from the College Park East backyards from Heather to Rose Streets and requests a daytime and nighttime [lighting] model for all residents adjacent to Lampson Avenue in College Park East between these streets. Refer to Response to Comment 17-113 regarding lighting impacts and 17-2135 for indirect impacts such as lighting to wildlife. Additionally, visual rendering of the Project on Lampson Avenue is shown in Figure 4.1-2 and 4.1-3 of the Draft EIR. For purposes of evaluating aesthetic impacts under CEQA, views from public vantage points, not private views (e.g. from the backyards of residents), are required to be evaluated.

17-240 The commenter expresses concerns about Project lighting affecting wildlife and requests a shade study. The commenter questions whether solar panels will be included to help with the energy crisis. Refer to Response to Comment 17-235 related to indirect impacts to biological resources. Additionally, the Project will include solar photovoltaic with the capability to generate up to 1,229,520 kWh/annually as a Project Design Feature (PDF GHG-1). Moreover, pursuant to the commenter's request, a shade and shadow study was conducted for the Project (*Attachment I* of this Final EIR). The study provides 3 shade and shadow conditions (9 AM,

11AM, 3PM) for winter solstice (December) and summer solstice (June) periods. The longest shadows are cast during the winter months and the shortest shadows are cast during the summer months. In the Northern Hemisphere, the longest day and shortest night of the year occur on the Summer Solstice (on June 21 or 22), marking the beginning of summer. The shortest day and longest night of the year occur on the Winter Solstice (December 21 or 22), marking the beginning of winter. The measurement of shadow lengths that occur at the winter and summer solstices therefore represent the most extreme shadow patterns that occur throughout the year. As shown, during the summer period, the shade and shadow would mostly be confined to the Project site without spillover to adjacent properties. During the winter period, shade and shadow would spillover in the northwestern direction during 9AM and in the northeastern direction during 11 AM. However, the shade and shadow footprint would be minimal and would occur on roadway to the east and parking lot to the north. Therefore, the Project would not result in a significant change in the shade or shadow footprint to nearby properties and open space, and this analysis confirms that the Project will not result in any impacts related to shade or shadow to nearby properties and open space.

17-241 The commenter expresses concerns with the lack of a traffic light, safety and congestion. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding safety concerns and Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic congestion concerns.

17-242 The commenter expresses concerns with pollution and dust from construction and vehicles and their impact to residents and wildlife. The commenter questions how many trees will be cut down. The commenter requests that a study be completed to determine how this added pollution will impact neighboring communities.

As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, the Project requires removal of existing ornamental trees (refer to Page 4.3-33 of the Draft EIR). As shown in Figure 3- 18, *Landscape Plan*, a total of 441 trees would be planted throughout the Project site to replace the existing trees onsite. Impacts to wildlife were also addressed in Section 4.3, *Biological Resources*, of the Draft EIR, and determined to be less than significant with mitigation measures incorporated.

An air quality impact analysis was conducted and included as *Technical Appendix B1* of the Draft EIR. As discussed in Section 4.2, *Air Quality*, of the Draft EIR, implementation of the Project would not: 1) exceed applicable South Coast AQMD localized criteria pollution emissions thresholds during construction and operation; 2) would not cause or measurably contribute to the formation of a CO "hot spot;" and 3) would not result in a health risk for nearby residents during construction. The land use with the greatest potential exposure to Project construction-source diesel particulate matter (DPM) emissions is Location R3 which is located approximately 86 feet south of the Project site at an existing residence located at 4625 Ironwood Avenue. R3 is placed in the private outdoor living areas (backyard) facing the Project

site. At the Maximally Exposed Individual Receptor (MEIR), the maximum incremental cancer risk attributable to Project construction-source DPM emissions is estimated at 2.59 in one million, which is less than the South Coast AQMD's significance threshold of 10 in one million. At this same location, non-cancer risks were estimated to be less than 0.01, which would not exceed the applicable threshold of 1.0. Location R3 is the nearest receptor to the Project site and would experience the highest concentrations of DPM during Project construction due to meteorological conditions (wind speed and direction) at the site. Because all other modeled receptors would experience lower concentrations of DPM during Project construction, all other receptors in the vicinity of the Project would be exposed to less emissions and therefore less risk than the MEIR identified for location R3. As such, the Project will not cause a significant human health or cancer risk to adjacent land uses as a result of Project construction activity (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR).

17-243 The commenter expresses concerns with the lack of proposed playgrounds, shopping centers, grocery stores, recreational amenities and other community resources such as walking paths, business centers and public transportation hubs. The commenter expresses concern that the current facilities and resources cannot handle additional overcrowding and wear. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding impacts to recreational facilities and refer to Response to Comment 1-73 for overcrowding concerns. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-244 The commenter expresses concerns with traffic and parking. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-245 The commenter expresses concerns with the height of the proposed structures. Refer to Response to Comment 17-65 regarding aesthetic concerns.

17-246 The commenter expresses concerns with safety on Lampson Avenue. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-247 The commenter expresses concerns with lack of available parking and use of existing parks for parking and recreation, and overcrowding. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Response to Comment 17-73 regarding population growth.

17-248 The commenter expresses concerns with the proposed density. Refer to Response to Comment 17-71 regarding land use consistency.

17-249 The commenter expresses concerns with Project site ingress and egress, uncontrolled intersections and safety on Lampson. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and Master Response 2.1.2, *Roadway Safety on Lampson Avenue,*regarding safety concerns. As discussed in Section 3.0, *Project Description*, of the Draft EIR, vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Additionally, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site (refer to Page 3-4 of the Draft EIR).

17-250 The commenter inquires about proposed open space/recreational area. Refer to Response to Comment 17-14 regarding the Project's proposed open space area.

17-251 The commenter inquires about guest parking. Refer to Master Response 2.1.3, *Parking*.

17-252 The commenter questions what is meant by affordable housing. As discussed in Section 3.0, *Project Description*, the Project intends to provide a variety of affordable housing types to support middle-income workers (refer to Pages 3-1 through 3-2 of the Draft EIR). Middle-income workers are characterized as Moderate Income as defined in the City's Housing Element.

17-253 The commenter inquires about Project construction impacts including road closures, construction equipment and noise impacts. Refer to Response to Comment 17-36 regarding construction noise. As discussed in Section 4.15, *Transportation*, of the Draft EIR, during construction, frontage improvements including median improvements, sidewalks, driveway modifications needed to accommodate site access, and landscaping improvements would be constructed in accordance with City standards. Refer to Response to Comment 17-67 regarding road closures.

17-254 The commenter expresses concerns with the zoning and incompatible use of the Project. Refer to Response to Comment 17-71 regarding land use consistency.

17-255 The commenter expresses concerns with construction noise, pollution, road closures, increased traffic, parking, use of existing parks, increased crime, and property values. Refer to Response to Comment 17-36 regarding construction noise. Refer to Response to Comment 17-34 regarding pollution concerns. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Response to Comment 17-62 regarding police protection services and 17-67 above regarding construction road closures. The commenter also expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-256 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-257 The commenter expresses concerns with traffic safety. Refer to Master Response 2.1.1, *Traffic Concerns/Congestion* regarding traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-258 The commenter expresses concerns with air quality. Refer to Response to Comment 17-35 for air quality impacts. Moreover, as discussed in Section 4.2, *Air Quality*, of the Draft EIR, impacts associated with Project-related construction and operational emissions would be less than cumulatively considerable. The Project would also have a less-than-cumulatively considerable LST impact during construction and long-term operation and impacts associated with CO "Hot Spots" would be less than cumulatively considerable (refer to Page 4.2-30 of the Draft EIR).

17-259 The commenter expresses concerns with noise pollution. Refer to Response to Comment 17-40 regarding noise impacts. Moreover, as discussed in Section 4.11, Noise, of the Draft EIR, the Project would not result in an increase in the cumulative noise levels at sensitive receiver locations during both construction and operation (refer to Page 4.11-34 of the Draft EIR). Refer also to Response to Comment D-9 for cumulative offsite traffic noise impacts.

17-260 The commenter expresses concerns with impacts to existing parks and recreation. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-261 The commenter expresses concerns with limited parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-262 The commenter expresses concerns with emergency response. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services.

17-263 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-264 The commenter expresses concerns with traffic safety. Refer to Master Response 2.1.1, *Traffic Concerns/Congestion* regarding traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-265 The commenter expresses concerns with air quality. Refer to Response to Comment 17-35 regarding air quality impacts. Moreover, as discussed in Section 4.2, *Air Quality*, of the Draft EIR, impacts associated with Project-related construction and operational emissions would be less than cumulatively considerable. The Project would also have a less-than-cumulatively considerable LST impact during construction and long-term operation and impacts associated with CO "Hot Spots" would be less than cumulatively considerable (refer to Page 4.2-30 of the Draft EIR).

17-266 The commenter expresses concerns with noise pollution. Refer to Response to Comment 17-40 regarding noise impacts. Moreover, as discussed in Section 4.11, *Noise*, of the Draft EIR, the Project would not result in an increase in the cumulative noise levels at sensitive receiver locations during both construction and operation (refer to Page 4.11-34 of the Draft EIR). Refer also to Response to Comment D-9 for cumulative offsite traffic noise impacts.

17-267 The commenter expresses concerns with impacts to existing parks and recreation. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-268 The commenter expresses concerns with limited parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-269 The commenter expresses concerns with emergency response. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services.

17-270 The commenter expresses general opposition to the Project and expresses concerns with traffic, noise pollution and safety. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-40 regarding noise impacts.

17-271 The commenter expresses concerns with noise and air pollution. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-35 regarding air quality impacts. As discussed in Section 4.2, *Air Quality*, of the Draft EIR, impacts associated with Project-related construction and operational emissions would be less than cumulatively considerable. The Project would also have a less-than-cumulatively considerable LST impact during construction and long-term operation and impacts associated with CO "Hot Spots" would be less than cumulatively considerable (refer to Page 4.2-30 of the Draft EIR). Moreover, as discussed in Section 4.11, *Noise*, of the Draft EIR, the Project would not result in an increase in the cumulative noise levels at sensitive receiver locations during both

construction and operation (refer to Page 4.11-34 of the Draft EIR). Refer also to Response to Comment D-9 for cumulative offsite traffic noise impacts.

17-272 The commenter expresses concerns with damage to roads from the addition of heavy road equipment and vehicles; traffic congestion; and safety for pedestrians with additional drivers. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns, and Response to Comments 17-77 and 17-222 regarding road impacts from heavy equipment.

17-273 The commenter expresses concerns with pedestrian safety and traffic accidents. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for safety concerns.

17-274 The commenter expresses concerns with insufficient parking; overcrowding of existing parks; and crime with the addition of more people. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area. Refer to Master Response 2.1.8, *Public Safety*, regarding safety concerns.

17-275 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-276 The commenter expresses concerns with EIR topics such as aesthetics, air quality, cultural resources, construction noise and road closures, emergency response, greenhouse gas emissions, hazards and hazardous materials, land use and planning, noise pollution, population and housing, recreation, public services, schools and library impacts, and utilities and services systems. The commenter also expresses concerns regarding parking, road impacts from heavy equipment, rodents, and traffic safety. As discussed in Section 4.0, *Environmental Analysis*, of the Draft EIR, taking all known information and public comments into consideration, 17 primary environmental subject areas were evaluated in detail. Each subsection evaluated several specific subject matters related to the primary environmental subject. The title of each subsection is not limiting; therefore, refer to each subsection for a full account of the subject matters addressed therein (refer to Page 4-1 of the Draft EIR). Please also refer to Master Response 2.1.3, *Parking*, regarding parking concerns, Response to Comment 17-77 regarding road impacts from heavy equipment, and Response to Comment 9-21 regarding rodent concerns.

17-277 The commenter expresses general concerns to the Project which are responded to below.

17-278 The commenter expresses concerns about traffic congestion, particularly during school drop off hours. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-279 The commenter expresses concerns with parking, including meeting the needs for guest/overflow parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-280 The commenter expresses concerns with air quality during demolition of the existing building. Refer to Response to Comment 17-242 regarding air quality impacts to sensitive receptors during construction.

17-281 The commenter requests parking studies to ensure sufficient parking for residents to avoid impacts to College Park East and other neighborhoods. The commenter notes that there are no existing groceries or schools within walking distance. The commenter requests that studies be completed on the increased traffic and pollution, especially noise and smog. An Onsite Parking Analysis, Traffic Analysis, Noise Impact Analysis, Air Quality Impact Analysis, and Health Risk Assessment were prepared for the Project and are included in Draft EIR *Technical Appendices P, N1, K, B1* and *B2*, respectively.

17-282 The commenter expresses concerns with increased traffic impact on surrounding streets including accidents and congestion, and rezoning Arbor Park for residential development. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns. Refer to Response to Comment 17-71 regarding land use consistency. The commenter also expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-283 The commenter expresses concerns with property value, construction and road closures, public services response times, traffic safety, noise, air quality, greenhouse gas emissions, parking, pressure on schools and parks, and rodents and sanitation. Refer to Response to Comment 17-154 regarding impacts to public services. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Response to Comment 17-48 regarding greenhouse gas emissions. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-79 regarding school services. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Response to Comment 17-28 regarding sanitation. Refer to Response to Comment 17-67 regarding road closures. Refer to Response to Comment 9-21 regarding rodent concerns. See Response to Comment 17-284 regarding property values.

17-284 The commenter expresses concerns with property value. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments

were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-285 The commenter expresses concerns with construction road closure. Refer to Response to Comment 17-67 above regarding construction road closures.

17-286 The commenter expresses concerns with public services response times, safety concerns due to increased traffic, increased noise, and impacts to air quality and greenhouse gas emissions. Refer to Response to Comment 9-15 regarding public service response times, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns, Response to Comment 17-40 regarding noise impacts, Response to Comment 17-35 regarding air quality concerns, and Response to Comment 17-48 for greenhouse gas emissions impacts.

17-287 The commenter expresses concerns with impacts to school services, parks, and sanitation. Refer to Response to Comment 17-79 regarding school services. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Response to Comment 17-28 regarding sanitation.

17-288 The commenter expresses concerns with inadequate parking. Refer to Master Response 2.1.3, *Parking,* regarding parking concerns.

17-289 The commenter expresses concerns with vehicle access to the Project site and safety issues for emergency vehicles and school buses. As discussed in Section 3.0, *Project Description*, of the Draft EIR, vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Additionally, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site (refer to Page 3-4 of the Draft EIR). Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns.

17-290 The commenter expresses concerns with the lack of proposed open space for recreation, and safety for children crossing Lampson to access recreational facilities. The commenter also expresses concern regarding an increase in VMT and the elimination of the current Park-n-Ride lot. The commenter suggests adding a formal telework center to the project to reduce mobile source emissions and air pollution. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding open space concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns, 2.1.1, *Transportation and Traffic Congestion*, regarding VMT impacts, and Response to Comment 10-5 regarding impacts related to the existing Park-n-Ride and telework recommendation.

17-291 The commenter states that California law requires solar panels on new housing and zero emission electric vehicle charging stations which are not mentioned in the schematics. As part of the Project's Project Design Features (PDFs), the Project will include solar photovoltaic

with the capability to generate up to 1,229,520 kWh/annually (PDF GHG-1) and the Project's parking areas will be designed to provide electric vehicle (EV) charging stations. At minimum, the number of EV charging stations will equal the Tier 2 Residential Voluntary Measures of the California Green Building Standards Code, Section A4.106.8.2.1 (PDF GHG-4) (refer to Page 4.5-6 to 4.5-7 of the Draft EIR). Thus, no revisions to the Draft EIR are required.

17-292 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-293 The commenter expresses concerns with EIR topics, traffic congestion, pollution, and proposed density. Refer to Response to Comment 17-276 regarding EIR topics. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-35 regarding pollution concerns. Refer to Response to Comment 17-71 regarding land use consistency.

17-294 The commenter expresses concerns with parking at Arbor Park, the dog park and overflow into the surrounding communities. The commenter also expresses concern for the safety of families crossing Lampson to get to recreational facilities. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-295 The commenter expresses concerns with impacts to existing parks, pedestrian safety, lack of public transportation, crime, and property values. Refer to Response to Comment 17-11 for impacts to existing recreational facilities. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities. Refer to Response to Comment 17-62 regarding police protection services. Property value is not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-296 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. However, it should be noted that, since these NOP comments were written prior to the preparation and release of the Draft EIR, the comment letters do not address the adequacy of the environmental analysis in the Draft EIR. Thus, no further response is required.

17-297 The commenter expresses concerns with traffic congestion, safety issues on Lampson, parking and increased crime. Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns, 2.1.3, *Parking* regarding parking concerns and 2.1.8, *Public Safety*, regarding public safety concerns.

17-298 The commenter expresses concerns with insufficient parking for residents of the Project and the lack of parking for recreational users of Arbor Park. The commenter also expresses concern regarding traffic, safety, recreation, noise, pollution from cars, stress on public services. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Section 4.14, *Recreation*, of the Draft EIR for analysis regarding the Project's impact on existing recreational facilities. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-34 regarding pollution concerns. Refer to Response to Comment 17-154 for impacts to public services.

17-299 The commenter expresses concerns with medical response times, overcrowding of medical facilities, increased traffic causing safety concerns on Lampson, and lack of parks and open space. Refer to Response to Comment 17-111 regarding medical response and overcrowding of medical facilities. Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-300 The commenter expresses concerns with increased traffic and congestion and requests that an environmental study assess traffic impacts, accident risk, and emissions. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Response to Comment 17-48 regarding greenhouse gas emissions.

17-301 The commenter expresses concerns with the lack of public outreach other than the mandated 500 feet notification radius. Refer to Response to Comment 17-51 regarding public noticing procedures

17-302 The commenter expresses concerns with insufficient parking, increased traffic with no additional traffic control devices, and safety issues on Lampson. Refer to Master Response

2.1.3, *Parking*, regarding parking concerns. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-303 The commenter expresses concerns with parking, pedestrian and cyclist safety and the adequacy of Lampson to handle additional vehicles. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns, and 2.1.1, *Transportation and Traffic Congestion*, regarding the capacity of Lampson Avenue.

17-304 The commenter expresses concerns with additional traffic on Lampson Avenue, resulting traffic accidents that may occur and traffic congestion. The commenter requests technical studies on the braking reaction times for vehicles traveling eastbound on Lampson Avenue at the intersections of Basswood Street, Candleberry Avenue and Heather Drive. The commenter also requests that studies address any additional traffic control signals devices or modifications needed to the existing devices. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns, including stopping sight distance. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns.

17-305 The commenter expresses concerns with traffic congestion, especially during the school commute, and requests a study on the phasing of the traffic control devices at Lampson Avenue and Seal Beach Boulevard and whether a right turn lane should be added. The commenter also requests a study of the traffic control devices at the intersection of Old Ranch Plaza and Lampson Avenue and would like to know what changes or modifications to these traffic control devices are proposed. A Traffic Analysis was prepared for the Project (included as Draft EIR *Technical Appendix N1* and *Attachment G* to this Final EIR*)* which evaluated potential circulation system deficiencies that may result from the development of the Project, and where necessary recommend improvements to achieve acceptable operations consistent with General Plan level of service goals and policies. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns which includes the results of the Traffic Analysis and the recommended improvement.

17-306 The commenter expresses concerns with traffic congestion and safety for those at the intersection of Seal Beach Boulevard and St. Cloud Drive. The commenter requests a study of the traffic control devices at southbound Seal Beach Boulevard at Lampson Avenue and additional lanes or modifications to the traffic control devices. The commenter also expresses concern for bicycles traveling on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns. A Traffic Analysis was prepared for the Project (included as Draft EIR *Technical*

Appendix N1 and *Attachment G* to this Final EIR*)* which evaluated potential circulation system deficiencies that may result from the development of the Project, and where necessary recommend improvements to achieve acceptable operations consistent with General Plan level of service goals and policies. Regarding the commenter's concern on Seal Beach Boulevard and St. Could Drive, the Project contributes less than 50 peak hour trips to this intersection and the intersection lies outside of the study area that has been evaluated in the Traffic Analysis. Therefore, Project's contribution/effect to this intersection is not expected to meet applicable thresholds to warrant improvements to be implemented by the Project.

17-307 The commenter expresses concerns with pedestrian crossing, use of existing parks, and recommends roadway improvements including the addition of a sidewalk to the north side of Lampson Avenue between Seal Beach Boulevard and Tulip Drive. The commenter also requests a study on the impact of foot traffic on Lampson Avenue due to the Project, stating that California's "jaywalking" law will change in January of 2023 and allow for people to cross any street, as long as they safely cross, without impeding vehicular traffic. AB 2147, the Freedom to Walk Act, would decriminalize jaywalking when the roadway is safe to cross. A Safety Evaluation was prepared to confirm that the Project would have no safety impacts on public roadways and Project access points (see Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, and *Attachment H* of this Final EIR). The Safety Evaluation further confirms the analysis and determination in the Transportation Section (Section 4.15) of the Draft EIR that the Project would not result in a safety impact or substantially increase hazards due to a geometric design feature. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding a summary of the Safety Evaluation and issues relating to pedestrian safety. Regarding the request for an additional sidewalk on Lampson Avenue between Seal Beach Boulevard and Tulip Drive, the Project would include improvements to sidewalks along the Project's frontage on Lampson Avenue; sidewalk areas beyond the Project site's frontage are not included within the Project boundary or within the scope of the Project. However, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. Refer also to Response to Comment 17-11 regarding impacts to existing recreational facilities.

17-308 The commenter expresses concern regarding traffic congestion at the intersection of Valley View Street and Lampson Avenue and requests a study on the traffic signal time and where additional traffic signal devices need to be added or modified. The commenter also requests a dedicated right turn lane be added in this area for vehicles making a right turn from Lampson Avenue to southbound Valley View Drive. The commenter also requests traffic studies for Blackmer Street, Trinette Avenue, Cerulean Avenue, Tunstall Street, St. Mark Street, and Tiffany Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Transportation analysis under CEQA is now based on VMT rather than impacts to automobile delay-based level of service (LOS) (traffic congestion). A Traffic Analysis was prepared for the Project and is included as Draft EIR *Technical Appendix N1*, and an updated Traffic Analysis was prepared and included as *Attachment G* to this Final EIR. The intersections selected for analysis is based on discussion with the City of Los Alamitos,

Seal Beach, and Garden Grove staff. Additionally, the roadway of Blackmer, Trinette, Tunstall, St. Mark, Tiffany, and Cerulean are all internal streets to an existing residential neighborhood. Industry standard recognizes that any contribution less than 50 peak hour trips does not cause a significant increase in delay. The Project is not anticipated to contribute more than 50 peak hour trips to any of these roadways and therefore does not warrant further analysis. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns. The peak hour intersection operations analysis presented in the Traffic Analysis indicates the intersection of Valley View Drive and Lampson Avenue operates at an acceptable LOS and meets the City of Garden Grove's operational standards. As such, no improvements are needed. Furthermore, there is no available right-of-way to implement an eastbound right-turn lane without acquiring property/right-of-way.

17-309 The commenter expresses concerns with a lack of parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns

17-310 The commenter expresses concerns with lack of parking and traffic. The commenter requests a study on the potential occupancy of both the Project and College Park East developments and how many vehicles would be associated with the residents. The commenter also requests a study of how the extra vehicular traffic from the development will cause wear and tear of the streets within College Park East and Lampson Avenue. Refer to Master Response 2.1.3, *Parking*, for parking concerns which includes the results of the Onsite Parking Analysis (*Technical Appendix P* of the Draft EIR), and 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Maintenance and repair concerns regarding the "wear and tear" of streets would be addressed by the agencies with jurisdiction over those roadways. Additionally, a condition of approval has been added to the Project to ensure the parking garages onsite be used primarily for parking purposes.

17-311 The commenter expresses concerns with proposed open space and impacts to existing parks. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area. Additionally, refer to Master Comment 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, for concerns regarding open space.

17-312 The commenter expresses concerns regarding decreased emergency response times and requests a study of the impact the Project will have on the Seal Beach Police Department services deployed to assist the Los Alamitos Police Department. The commenter requests information on whether additional police officers would need to be hired to handle the increase in potential service calls. The commenter also requests a study on the impact additional residents will have on the response time of Orange County Fire Department. Refer to Response to Comment 17-154 regarding impacts to public services.

17-313 The commenter expresses concerns with construction noise and road impacts and requests a study on how the developer would manage demolition, removal of debris, and transportation

of construction equipment and materials. The commenter also expresses concern regarding the impact of heavy equipment on the integrity of Lampson. The commenter requests a study on how additional cut through traffic due to construction on Lampson would impact College Park East and Garden Grove. Refer to Response to Comment 17-67 regarding road closures during construction. Refer to Response to Comment 9-19 regarding construction noise and Response to Comment 17-77 regarding road impacts from heavy equipment. Even though it is not reasonably foreseeable that one construction project would significantly deteriorate a roadway, maintenance and repair concerns regarding the "wear and tear" of streets would be addressed by the agencies with jurisdiction over those roadways. Additionally, the Project would be required to comply with South Coast AQMD Rule 403, which is intended to reduce the amount of particulate matter entrained in the ambient air as a result of anthropogenic (human-made) fugitive dust sources by requiring actions to prevent and reduce fugitive dust emissions. There is no cut-through traffic that is assumed to occur (or any that has been evaluated) with the completion of the Project through any of the adjacent local residential streets since these streets do not provide any direct connection to the regional freeway system. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for a detailed discussion on cut-through traffic into existing neighborhoods.

As discussed in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, based on the approximate construction waste generated per day, demolition and construction waste generated by the Project is not anticipated to cause these landfills to exceed their maximum permitted daily disposal volume. Furthermore, none of these regional landfill facilities are expected to reach their total maximum permitted disposal capacities during the Project's construction period. In addition, the Project would be required to comply with LAMC Chapter 8.13, Construction and Demolition Waste, which requires the Project Applicant to divert a minimum of 50 percent of the construction and demolition debris resulting from the proposed development in compliance with State and local statutory goals and policies (refer to Pages 4.17-19 through 4.17-20 of the Draft EIR).

17-314 The commenter requests a technical study on glare impacts and visual impacts of the 3-story building. The commenter expresses concern regarding the lack of privacy for Ironwood Avenue residents and requests a visual simulation for residents between 4509 and 4701 Ironwood Avenue. Refer to Response to Comment 17-113 regarding light and glare concerns. Refer to Response to Comments 17-65 and 17-239 regarding aesthetic concerns.

17-315 The commenter expresses concerns with the rodent population due to animals dispersing into nearby neighborhoods during construction. Refer to Response to Comment 9-21 regarding rodent concerns.

17-316 The commenter requests a technical study on impacts to wildlife, particularly related to how the Project would impact the coyote and rabbit population. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife. With respect to biological resources, CEQA requires an analysis of a Project's impacts to special status wildlife species. Impacts to

common wildlife species, such as coyotes and rabbits, are not evaluated as protected species under CEQA.

17-317 The commenter requests a technical study on street lighting in the area, noting that there is limited lighting on Lampson Avenue between Valley View Street and Seal Beach Boulevard. This comment pertains to the existing lighting and it does not raise any concerns related to the Project's potential for impacts on the physical environment or the sufficiency of the environmental analysis in the Draft EIR. No further response to this comment is required.

17-318 The commenter expresses general opposition to the Project due to increased traffic. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-319 The commenter expresses concerns that the Project would negatively impact EIR topics such as Aesthetics, Air Quality, Cultural Resources, Construction Noise and road closure, Fire / Police / Medical Response, Greenhouse Gas Emissions, Hazards & Hazardous Materials, Land Use & Planning, Noise Pollution (vehicles on Lampson), Population & Housing, Public Services, Recreation, Road impacts from heavy equipment, Rodents, Schools / Libraries, Traffic Safety, and Utilities & Service Systems. The commenter also expresses concern regarding parking. Refer to Response to Comment 17-276 regarding concerns regarding EIR topics. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-320 The commenter expresses concerns with impacts to existing parks, traffic congestion, pollution and an imbalance of housing in a small area. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-35 regarding pollution concerns. Refer to Response to Comment 17-71 regarding land use consistency.

17-321 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-322 The commenter expresses concerns with EIR topics. Refer to Response to Comment 17-276 regarding concerns regarding EIR topics.

17-323 The commenter requests submittal of studies pertaining to environment, fire and police services, parking, population growth, and school services. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-73 regarding population growth. Refer to Response to Comment 17-79 regarding impacts to school services.

17-324 The commenter expresses general opposition to the Project due to noise pollution, air quality, traffic, and parking and requests proper impact studies to be prepared and reviewed. A Noise

Impact Analysis, Air Quality Impact Analysis, Traffic Analysis, and Onsite Park Analysis was prepared and are included as Draft EIR *Technical Appendix K, B1, N1, and P*, respectively. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-325 The commenter requests amendment of prior comments. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-326 This comment is part of an email template requesting examples of how the Project could negatively affect the community. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-327 This comment lists the EIR topics. Refer to Response to Comment 17-276 regarding EIR topics.

17-328 The commenter expresses concerns with low-income housing, Section 8 government supported housing and increased crime. As discussed in Section 3.0, *Project Description*, of the Draft EIR, the Project intends to provide a variety of affordable housing types to support middle-income workers (refer to Pages 3-1 through 3-2 of the Draft EIR). Refer to Response to Comment 17-62 regarding police protection.

17-329 The commenter expresses concerns with crime. Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities. Refer also to Response to Comment 17-62 regarding police protection.

17-330 The commenter opposes the Project stating concerns about traffic, increase in car accidents, and congestion and requests the Project be scaled back. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns. In regard to scaling the Project back, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-331 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-332 The commenter expresses concerns regarding traffic, accidents and questions where the water supply for the additional units will come from. The commenter also expresses concern regarding parking for residents of the Project as well as those utilizing Arbor Park. The commenter is also concerned about existing parks handling additional people. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue,* regarding roadway safety concerns. Refer to Response to Comment 17-26 regarding water supply concerns. Refer to Master Response 2.1.3, *Parking,* regarding parking concerns. Refer to Response to Comment 17-31 regarding concerns regarding impacts to existing recreational facilities.

17-333 The commenter lists the EIR topics and expresses concerns with traffic. Refer to Response to Comment 17-276 regarding EIR topics. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns. Note that aesthetic impacts under CEQA evaluate view impacts from public spaces, and not from private backyard views.

17-334 The commenter expresses concerns with traffic, safety and noise on Lampson Avenue. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue,* regarding roadway safety concerns. Refer to Response to Comment 17-113 for off-site traffic noise impacts.

17-335 The commenter expresses concerns with traffic noise, construction noise, pollution and air quality. As discussed in Section 4.11, *Noise*, of the Draft EIR, land uses adjacent to the study area roadway segments would not experience substantial noise level increases due to Project-related traffic noise level increases and off-site traffic related noise impacts would less than significant (refer to Pages 4.11-25 through 4.11-29 of the Draft EIR). Refer to Response to Comment 17-36 for construction noise concerns. Refer to Response to Comment 17-34 for pollution and air quality concerns.

17-336 The commenter expresses concerns with open space, wildlife, including bird species like the burrowing owl, and proposed density. Refer to Response to Comment 17-11 impacts to existing recreational facilities and Response to Comment 17-14 the Project's proposed open space area. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife and birds. Refer to Response to Comment 17-71 regarding land use consistency. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-337 The commenter expresses concerns with traffic congestion, traffic accidents, impacts to schools, and parks. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue,* regarding roadway safety concerns. Refer to Response to Comment 17-79 regarding impacts to school services. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-338 The commenter expresses concerns with noise pollution, parking and road impacts from heavy equipment. Refer to Response to Comment 17-113 regarding off-site traffic noise impacts. Refer to Master Response 2.1.3, *Parking,* regarding parking concerns. Refer to Response to Comment 17-77 regarding road impacts from heavy equipment.

17-339 The commenter expresses concerns with traffic safety and impacts to existing parks. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities.

17-340 The commenter expresses concerns with parking plan, open space, and traffic. Refer to Master Response 2.1.3, *Parking,* for parking concerns. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-341 The commenter expresses concerns with additional traffic, air quality impacts, noise pollution on Lampson Avenue, traffic safety, loss of parking, and impacts to schools. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Response to Comment 17-113 above for off-site traffic noise impacts. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns and 2.1.3, *Parking,* for parking concerns. Refer to Response to Comment 17-79 regarding impacts to schools.

17-342 The commenter expresses concerns with traffic, safety, impacts to existing parks and property value. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Property value is not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-343 The commenter lists out EIR topics and expresses general opposition to the Project. Refer to Response to Comment 17-276 regarding EIR topics. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-344 The commenter expresses concerns with dust from construction and health impacts. Refer to Response to Comment 17-205 regarding erosion control and dust control measures. As discussed in Section 4.2, *Air Quality,* of the Draft EIR, implementation of the Project would not: 1) exceed applicable South Coast AQMD localized criteria pollution emissions thresholds during construction and operation; 2) would not cause or measurably contribute to the formation of a CO "hot spot;" and 3) would not result in a health risk for nearby residents during construction (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR). In regard to dust

from additional traffic upon completion of construction, the air quality analysis evaluated the increase criteria pollutants (including particulate matter) due to Project operation and determined that impacts were less than significant.

17-345 The commenter expresses concerns with increased traffic and lack of traffic lights and left turn signals. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns.

17-346 The commenter expresses concerns with noise levels from traffic and property value. Refer to Response to Comment 17-113 regarding off-site traffic noise impacts. Property value is not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-347 The commenter expresses concerns with the overcrowding of existing parks and that no parks are included for the current Project. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding onsite open space concerns.

17-348 The commenter expresses concerns with fire and police protection services and questions the land use for this area. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. Refer to Response to Comment 17-71 regarding land use consistency.

17-349 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-350 The commenter makes introductory remarks and expresses concern regarding existing and future sound pollution. Refer to Response to Comment 17-147 regarding concerns regarding noise pollution.

17-351 The commenter raises concerns about the number of accidents on Lampson and the safety of children and pedestrians. The commenter also provides links to news sources about accidents on Lampson. A Safety Evaluation (*Attachment H* to this Final EIR) was prepared which analyzed collision data, pedestrian and bicycle safety, and site access management (e.g. driveway sight distance, driveway spacing, project access and queuing, multimodal conflict points, and pedestrian/bicycle connections. Refer to 2.1.2, *Roadway Safety on Lampson Avenue*, regarding the results of the Safety Evaluation and pedestrian and cyclist safety concerns.

.

17-352 The commenter lists concerns about the aesthetics of the Project and the impact on daytime glare, nighttime illumination, and existing visual characteristics. Refer to Response to Comment 17-113 regarding light and glare concerns and Response to Comment 17-65 regarding consistency with zoning development standards for existing visual characteristics.

17-353 The commenter expresses concerns with existing property values. Refer to Response to Comment 17-150 above regarding property values.

17-354 The commenter expresses concerns with air quality, specifically carbon monoxide emissions, particulate matter, and greenhouse gas emissions. Refer to Response to Comment 17-35 regarding air quality impacts concerns and Response to Comment 17-48 regarding greenhouse gas emissions concerns. .

17-355 The commenter expresses concerns with biological impacts, specifically impacts to wildlife, birds, and trees. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife and birds. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, on April 18, 2022, the City of Los Alamitos adopted a Parkway Tree Master Plan as part of its Urban Forest Program. This plan addresses City parkway trees. There are currently no parkway trees along the Project's frontage. The Project would not result in an impact to the City parkway trees. Therefore, the Project would not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance. No impact would occur and mitigation is not required (refer to Page 4.3-34 of the Draft EIR).

17-356 The commenter expresses concerns with geology and soils, drainage impacts, and runoff concerns. Refer to Response to Comment 17-153 above regarding impacts to geology and soils, drainage, and runoff.

17-357 The commenter expresses concerns with impacts to public services. Refer to Response to Comment 17-154 above regarding impacts to public services.

17-358 The commenter recommends disapproval of the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-359 The commenter expresses opposition to the Project and concerns with traffic congestion and parking, noise pollution, and increased need for fire/police services. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-360 The commenter expresses concerns with traffic impacts on Lampson Ave and parking on Ironwood from new residents. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.3, *Parking*, regarding parking concerns.

17-361 The commenter expresses concerns with health impacts and air quality impacts. The Draft EIR's Air Quality Impact Analysis (*Technical Appendix B1* of the Draft EIR) included localized air quality impacts and addressed impacts to sensitive receptors in accordance with CEQA and South Coast AQMD Guidelines. Refer to Response to Comment 17-35 regarding health impacts concerns and 17-35 regarding air quality impacts.

17-362 The commenter expresses concerns with increased traffic, road closures, crime, and emergency response. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 for fire protection services.

17-363 The commenter expresses concerns with noise impacts. As discussed in Section 4.11, *Noise*, of the Draft EIR, the operational noise analysis evaluates the potential daytime and nighttime activities at the Project site. Refer to Response to Comment 17-40 regarding noise impacts.

17-364 The commenter expresses concerns with traffic safety on Lampson Avenue along with an increase in traffic and pollution. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns

17-365 The commenter expresses concerns with impacts to youth sports at the existing parks and expresses general opposition to the Project. The commenter also expresses concern over the Project's impacts to home values. Refer to Response to Comment 17-11 for impacts to existing recreational facilities. Property value is not an environmental issue analyzed under CEQA. Additionally, in regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-366 The commenter expresses general opposition to the Project and lists out EIR topics of concern. Refer to Response to Comment 17-276 regarding EIR topics concerns.

17-367 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-368 The commenter expresses concerns with impacts to existing parks, traffic, parking and crime, and property values. Refer to Response to Comment 17-11 regarding impacts to existing

recreational facilities. Refer to Response to Comment 17-62 regarding police protection services. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns, and 2.1.3, *Parking*, regarding parking concerns. Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities. Additionally, property value is not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-369 The commenter recommends reconsidering the proposed location and expresses concerns with the proposed density. Refer to Response to Comment 17-71 regarding land use consistency. The commenter asserts that studies should be done to investigate and quantify short and long-term impacts of the proposed location for the Project and that community members should be given access to these studies. Technical studies by technical experts in each field were prepared to evaluate the Project's short term (construction) and long term (operation) impacts, included as technical appendices to the Draft EIR, and provided for public review. The Draft EIR and technical appendices are available for review at the City of Los Alamitos, Development Services Department – Planning Division, 3191 Katella Avenue, Los Alamitos, California 90720, during the City's regular business hours or can be accessed in electronic form on the City's website at http://cityoflosalamitos.org/203/Planning-Commission-Projects (refer to Page 1-36 of the Draft EIR).

17-370 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-371 The commenter expresses general opposition to the Project and lists out EIR topics concerns. Refer to Response to Comment 17-276 regarding EIR topics concerns. Moreover, as discussed in Section 4.11, *Noise*, of the Draft EIR, the Project would not result in an increase in the cumulative noise levels at sensitive receiver locations during both construction and operation (refer to Page 4.11-34 of the Draft EIR). Refer also to Response to Comment D-9 for cumulative offsite traffic noise impacts.

17-372 The commenter opposes the Project and expresses concerns with air quality, noise pollution, traffic congestion, pedestrian safety, and parking. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns, and 2.1.3, *Parking*, for parking concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-373 The commenter expresses concerns with dust and hazardous materials. Refer to Response to Comment 17-205 regarding erosion control and dust control measures concerns. Refer to Response to Comment 17-229 regarding hazardous materials concerns.

17-374 The commenter expresses concerns with land use and planning (housing density and recreation space), low income housing, and crime. Refer to Response to Comment 17-71 for land use consistency. Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities. Refer to Response to Comment 17-62 regarding police protection services. As discussed in Section 3.0, *Project Description*, of the Draft EIR, the Project intends to provide a variety of affordable housing types to support middle-income workers (refer to Pages 3-1 through 3-2 of the Draft EIR).

17-375 The commenter expresses concerns with traffic, accidents, and emergency response. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. Additionally, as discussed in Section 4.8, *Hazards and Hazardous Materials*, construction on Lampson Avenue will require an encroachment permit and approval from the City Engineer Lane closures that may be required for median improvements would be temporary and require a permit and compliance with LAMC 12.08.200, Safety precautions–Obstruction of traffic. Compliance with LAMC 12.08.200 would ensure safe crossing and access for all vehicle and pedestrians at all times (refer to Page 4.8-21 of the Draft EIR).

17-376 This comment is part of an email template requesting examples and EIR topics for analysis. Refer to Response to Comment 17-276 regarding EIR topics.

17-377 The commenter makes introductory remarks and expresses concern regarding existing and future sound pollution. Refer to Response to Comment 17-147 regarding concerns regarding sound pollution.

17-378 The commenter raises concerns about the number of accidents on Lampson and the safety of children and pedestrians. The commenter also provides links to news sources about accidents on Lampson. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian and cyclist safety concerns.

17-379 The commenter lists concerns about the aesthetics of the Project and the impact on daytime glare, nighttime illumination, and existing visual characteristics. Refer to Response to Comment 17-113 regarding light and glare concerns and Response to Comment 17-65 regarding consistency with zoning development standards for existing visual characteristics. 17-380 The commenter expresses concerns with existing property values. Refer to Response to Comment 17-150 above regarding property values.

17-381 The commenter expresses concerns with air quality, specifically carbon monoxide emissions, particulate matter, and greenhouse gas emissions. Refer to Response to Comment 17-35 regarding air quality impacts concerns and Response to Comment 17-48 regarding greenhouse gas emissions concerns.

17-382 The commenter expresses concerns with biological impacts, specifically impacts to wildlife, birds, and trees. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife and birds. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, on April 18, 2022, the City of Los Alamitos adopted a Parkway Tree Master Plan as part of its Urban Forest Program. This plan addresses City parkway trees. There are currently no parkway trees along the Project's frontage. The Project would not result in an impact to the City parkway trees.

17-383 The commenter expresses concerns with geology and soils, drainage impacts, and runoff concerns. Refer to Response to Comment 17-153 above regarding impacts to geology and soils, drainage, and runoff.

17-384 The commenter expresses concerns with impacts to public services. Refer to Response to Comment 17-154 above regarding impacts to public services.

17-385 The commenter recommends disapproval of the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-386 The commenter expresses opposition to the Project and concerns with traffic congestion and parking, noise pollution, increased need for fire/police services, construction noise and impacts to public services. Refer to Response to Comment 17-359 above for responses on these topics. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-387 The commenter expresses concerns with traffic impacts on Lampson Ave and parking on Ironwood from new residents. Refer to Response to Comment 17-360 above regarding traffic impacts and parking.

17-388 The commenter expresses concerns about health impacts and air quality impacts. Refer to Response to Comment 17-361 above regarding health and air quality impacts.

17-389 The commenter expresses concerns regarding increased traffic, road closures, crime, and emergency response. Refer to Response to Comment 17-362 above for responses on these topics.

17-390 The commenter expresses concerns about noise impacts. Refer to Response to Comment 17-363 above regarding noise impacts.

17-391 The commenter expresses concerns with traffic safety on Lampson Avenue along with an increase in traffic and pollution. Refer to Response to Comment 17-364 above regarding traffic, safety, and pollution concerns.

17-392 The commenter expresses concerns regarding impacts to youth sports at the existing parks and expresses general opposition to the Project. The commenter also expresses concern over the Project's impacts to home values. Refer to Response to Comment 17-11 for impacts to existing recreational facilities. Property value is not an environmental issue analyzed under CEQA. Additionally, in regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-393 The commenter expresses concerns with increased traffic, traffic noise, traffic safety, school services in Rossmoor and impacts to roads in Rossmoor. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding roadway safety concerns. Refer to Response to Comment 17-113 regarding off-site traffic noise impacts. Refer to Response to Comment 17-79 regarding impacts to school services. Refer to Response to Comment 17-77 regarding road impacts during construction.

17-394 This comment is part of an email template requesting examples and EIR topics for analysis. Refer to Response to Comment 17-276 regarding EIR topics concerns.

17-395 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-396 The commenter expresses general opposition to the Project and lists EIR topics of concern. Refer to Response to Comment 17-276 regarding EIR topics of concern.

17-397 The commenter expresses concerns with dust from construction, health impacts, increased traffic, and lack of traffic lights and left turn signals. Refer to Response to Comment 17-344 and 17-345 for responses on these topics.

17-398 The commenter expresses concerns with noise levels from traffic. Refer to Response to Comment 17-346for responses on these topics.

17-399 The commenter expresses concerns with the overcrowding existing parks and that no parks are included for the current Project. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding onsite open space concerns.

17-400 The commenter expresses concerns with fire and police protection services and parking. Refer to Response to Comment 17-348 regarding fire and police protection services and Master Response 2.1.3, *Parking*, regarding parking concerns.

17-401 The commenter expresses general opposition to the Project and raises concerns that the Project will negatively affect the College Park East neighborhood. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-402 The commenter expresses concerns with loss of open space for wildlife and traffic impacts. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife and birds including hawks (several varieties). As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, common avian species detected included house finch and mourning dove (refer to Page 4.3-5 of the Draft EIR) while barn owl was detected by GLA biologists flying over or in proximity to the Project site. Implementation of Mitigation Measures MM 4.3-1 and MM 4.3-2 would ensure that pre-construction surveys are conducted for nesting birds and nesting raptors prior to site disturbance. If nesting birds or raptors are present on the Project site, the identified mitigation requires avoidance of active nests. With implementation of the required mitigation, potential impacts to nesting birds and common raptors would be reduced to below a level of significance (refer to Pages 4.3-37 through 4.3-39 of the Draft EIR). Refer to Response to Comment 17-403, below, regarding traffic concerns.

17-403 The commenter expresses concerns with traffic with no proposed alternative route and references traffic and flooding issues that arose during a 1995 rainstorm. The commenter acknowledges the validity of affordable housing federal guidelines and suggests alternative sites for the Project. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, regarding flooding impacts. Regarding alternative Project Site suggestions, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-404 The commenter expresses general opposition to the Project and raises concerns regarding the impact of one city's project on another city, specifically the size, stature, and location. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-405 The commenter expresses concerns with traffic, pedestrian safety due to U-turns on Heather Street, and emergency response times. The commenter also requests report on the number of

tickets written for speeding and report on accidents on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns and collision data. Refer to Response to Comment 17-62 for police protection services and Response to Comment 17-68 regarding fire protection services.

17-406 The commenter expresses concerns with on-site parking and overflow parking in the College Park East neighborhood. The commenter also raises concerns regarding the rate of vehicle accidents. Refer to Master Response 2.1.3, *Parking* for parking concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for accident concerns. Additionally, a condition of approval has been added to the Project to ensure the parking garages onsite be used primarily for parking purposes.

17-407 The commenter expresses concerns with impacts to existing parks and proposed open space. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-408 The commenter expresses concerns with construction noise and road closure. Refer to Response to Comment 17-40 regarding noise impacts. As discussed in Section 4.15, *Transportation*, of the Draft EIR, during construction, frontage improvements including median improvements, sidewalks, driveway modifications needed to accommodate site access and landscaping improvements would be constructed in accordance with City standards. Refer to Response to Comment 17-67 regarding lane closures.

17-409 The commenter believes that the Project will negatively affect College Park East and expresses concerns about increased traffic and accidents. Refer to Master Responses *2.1.1, Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-410 The commenter inquires about additional traffic signals and overflow parking. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-411 The commenter inquires about increased use of Seal Beach public services and the City's public services. The commenter inquires about the utility infrastructure. Refer to Response to Comment 17-75 regarding impacts to Seal Beach public services. Refer to Response to Comment 17-81 for utilities concerns. As discussed in Section 4.13, *Public Services*, of the Draft EIR, fire protection services for the Project site is currently provided by the Orange County Fire Authority (OCFA) and police protection service is provided by the Los Alamitos Police Department (refer to Page 4.13-1 and 4.13-2 of the Draft EIR). Refer to Master Reponses 2.1.8, *Public Safety*, for concerns related to public services.

17-412 The commenter expresses general opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-413 The commenter expresses concerns regarding EIR topics. Refer to Response to Comment 17-276 regarding EIR topics.

17-414 The commenter expresses general concerns with the Project which are responded to below.

17-415 The commenter expresses concerns with aesthetics and visibility and suggests decreasing the height of the Project or including landscaping to screen buildings. Refer to Response to Comment 17-65 regarding aesthetic concerns. The comment regarding building height and landscaping is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-416 The commenter expresses concerns with traffic and accidents. The commenter also suggests adding traffic signals, increasing policing of roads, and improving center medians. Refer to Master Responses *2.1.1, Transportation and Traffic Congestion,* regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue,* regarding pedestrian safety concerns. Refer to Master Response 2.1.8, *Public Safety*, regarding policing concerns. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns. Along the Project frontage, Lampson Avenue is developed to its ultimate General Plan roadway classification. Frontage improvements would include median improvements, sidewalks, driveway modifications needed to accommodate site access, and landscaping improvements as required by City standards.

17-417 The commenter expresses concerns with parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-418 The commenter expresses concerns with overflow into surrounding neighborhoods for park use and dog walking, apparent lack of on-site amenities, and use of existing parks. As discussed in Section 3.0, *Project Description,* of the Draft EIR, the usable common open space areas in the Project site would include amenities such as tot-lot with rubberized play surface, shade surface with BBQ Island and dining furniture, lawn area with cornhole, ping pong table, and lounge seating with fire-pit (refer to Page 3-7 of the Draft EIR). Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities.

17-419 The commenter expresses concerns with traffic, pollution, and overcrowding at parks, and parking. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* regarding traffic concerns, Response to Comment 17-34 regarding pollution concerns, Master Response

2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding impacts to exiting recreational facilities, and 2.1.3, *Parking*, regarding parking concerns.

17-420 The commenter expresses concerns with traffic and accidents. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion* regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-421 The commenter expresses concerns with potential gophers. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-422 The commenter expresses concerns with increased traffic on Lampson Avenue. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-423 The commenter expresses concerns with pedestrian safety, pollution, and noise. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-12 regarding noise concerns and Response to Comment 17-34 for pollution concerns.

17-424 The commenter expresses concerns with traffic impacts on Lampson Ave, school district impacts, and impacts to public services. As discussed in Section 2.0, *Environmental Setting*, of the Draft EIR, the Project site is zoned as "Multi-Family Residential (R-3)" and the R-3 zone applies to lots intended to provide multi-family housing (refer to Page 2-3 of the Draft EIR). Therefore, the Project proposed residential uses are consistent with the existing zoning designation. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Refer to Response to Comment 17-79 for school services. Refer to Response to Comment 17-154 for impacts to public services.

17-425 The commenter expresses concerns with traffic on Lampson Ave, lack of proposed parks and reduction of open space, use of College Park East residential streets as "cut through" routes, and fire and police services. The commenter also requests technical study results. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area. Refer to Response to Comment 9-19 regarding cut through traffic. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. As discussed in Section 1.5, *EIR Scope, Format, and Content*, of the Draft EIR, the *Technical Appendices* are available for review at the City of Los Alamitos, Development Services Department – Planning Division, 3191 Katella Avenue, Los Alamitos, California 90720, during the City's regular business hours or can be accessed in electronic form on the City's website at http://cityoflosalamitos.org/203/Planning-Commission-Projects (refer to Page 1-36 of the Draft EIR).

17-426 The commenter expresses concerns with parking at Arbor Park for soccer games. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-427 The commenter expresses concerns with EIR topics. Refer to Response to Comment 17-276 regarding EIR topics.

17-428 The commenter expresses general opposition to the Project due to overcrowding, impacts to wildlife, increased traffic, health impacts, and decreased property values. Refer to Response to Comment 17-73 regarding population growth. Refer to Response to Comments 17-18, 17-19, and 17-35 regarding impacts to wildlife and birds. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

As discussed in Section 4.2, *Air Quality*, of the Draft EIR, implementation of the Project would not: 1) exceed applicable South Coast AQMD localized criteria pollution emissions thresholds during construction and operation; 2) would not cause or measurably contribute to the formation of a CO "hot spot;" and 3) would not result in a health risk for nearby residents during construction (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR).

Property values are not an environmental issue analyzed under CEQA. However, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-429 This comment is part of an email template requesting examples and EIR topics for analysis. Refer to Response to Comment 17-276 regarding EIR topics.

17-430 The commenter expresses concerns with traffic on Lampson Ave, accidents, noise pollution, air quality impacts, crowded parks, crime to vehicles and homes, more vehicles within the College Park East neighborhood, lower housing values, more rodents due to construction, and damage to aesthetics. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson* Avenue, regarding accident concerns. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in the need for construction of additional facilities. Response to Comment 17-62 regarding police protection services. Refer to Response to Comment 17-65 for aesthetic concerns. Refer to Response to Comment 9-21 regarding rodent concerns. Regarding housing values, these comments are not environmental issues analyzed under CEQA; however, these comments are noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-431 The commenter expresses concerns with aesthetics, air quality, construction noise and road closure, emergency response, greenhouse gas emissions, and hazards and hazardous waste. Refer to Response to Comment 17-65 regarding aesthetic concerns. Refer to Response to Comment 17-66 and 17-258 regarding air quality impacts and cumulative air quality impacts. Refer to Response to Comment 17-40 and 17-205 regarding noise impacts and cumulative noise impacts. As discussed in Section 4.13, *Public Services*, of the Draft EIR, fire protection services for the Project site is currently provided by the Orange County Fire Authority (OCFA) and police protection service is provided by the Los Alamitos Police Department (refer to Page 4.13-1 and 4.13-2 of the Draft EIR). Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. Refer to Response to Comment 17-48 regarding greenhouse gas emissions. Refer to Response to Comment 17-229 regarding hazardous materials.

17-432 The commenter expresses concerns with land use and planning, noise from construction, existing noise from the Joint Base, overflow parking in College Park East, use of College Park East parks, and public services. Refer to Response to Comment 17-71 regarding land use consistency. Refer to Response to Comment 17-40 regarding construction noise impacts. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)*, regarding noise impacts due to the Los Alamitos JFTB. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding park use. Refer to Response to Comment 17-154 regarding impacts to public services.

17-433 The commenter expresses concerns with recreation, road impacts during construction, schools/libraries, traffic safety, taxes, utilities and service systems, and aesthetics. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Response to Comment 17-77 regarding road impacts during construction. Refer to Response to Comment 17-79 regarding impacts to school and library services. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-81 regarding utilities concerns. Refer to Response to Comment 17-65 regarding aesthetic concerns

17-434 This comment is part of an email template requesting examples and EIR topics for analysis. Refer to Response to Comment 17-276 regarding EIR topics.

17-435 The commenter inquires about site access, utilizing the existing traffic signal at Rose Street, left turn access at the proposed east entrance, and concern about left turns exiting the Project or making U-turns at Heather Street. As discussed in Section 3.0, *Project Description*, of the Draft EIR, vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Additionally, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site (refer to Page 3-4 of the Draft EIR). Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding

traffic concerns including U-terns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns. In regard to the commenter's suggestion of land acquisition at Rose Street, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-436 The commenter expresses concerns with Project driveway entrances. As discussed in Section 4.13, *Public Services*, of the Draft EIR, access to and around structures would meet OCFA and CFC requirements. Figure 4.8-3, *Fire Master Plan*, of the Draft EIR demonstrates compliance with all codes and other regulations governing water availability for firefighting and emergency access to the Project site and structures. Compliance with OCFA requirements would ensure adequate provision of resources such as access, water mains, fire flows, and fire hydrants (refer to Page 4.13-9 of the Draft EIR).

17-437 The commenter inquires about JFTB regulations and the proposed development. As discussed in Section 4.10, *Land Use and Planning*, of the Draft EIR, the City and the Project site are within the airport planning area of the Los Alamitos JFTB. Land uses within the airport planning-area boundaries are required to conform to four key areas of military airport compatibility including: 1) aviation safety; 2) aircraft noise; 3) aircraft overflight; and 4) airspace protection/height zoning. Section 2.1 of the AELUP describes the standards and criteria adopted by the Airport Land Use Commission for Orange County for establishing planning boundaries. The Project would not conflict with JFTB AELUP's safety, height, noise, or aircraft overflight criteria, and impacts would be less than significant. No mitigation is required (refer to Page 4.10-14 through 4.10-18 of the Draft EIR).

17-438 The commenter inquires about impacts to police and fire responses. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services.

17-439 The commenter inquiries about the Statewide Community Infrastructure Program and/or other subsidies to build homes and address the City's Regional Housing Needs Allocation (RHNA) requirements and with Mello Roos Act. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-440 The commenter expresses concerns with emergency access and site access. Refer to Response to Comment 17-132 regarding emergency access. As discussed in Section 3.0, *Project Description*, of the Draft EIR, vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Additionally, a restricted emergency vehicle

access point with Lampson Avenue would be provided at the eastern end of the site (refer to Page 3-4 of the Draft EIR).

17-441 The commenter inquires about the City's tree ordinance. As discussed in Section 4.3, *Biological Resources*, of the Draft EIR, on April 18, 2022, the City of Los Alamitos adopted a Parkway Tree Master Plan as part of its Urban Forest Program. This plan addresses City parkway trees. There are currently no parkway trees along the Project's frontage. The Project would not result in an impact to the City parkway trees. Therefore, the Project would not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance. No impact would occur, and mitigation is not required (refer to Page 4.3-34 of the Draft EIR).

17-442 The commenter inquires about impervious surface area and water quality requirements. As discussed in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality during construction or long-term operation. Impacts would be less than significant, and no mitigation is required (refer to Pages 4.9-14 through 4.9-16 of the Draft EIR). The Project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would substantially increase the rate or amount of surface runoff resulting in flooding on- or offsite (refer to Pages 4.9-22 through 4.9-23 of the Draft EIR).

17-443 The commenter inquires about the parking concession and parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. As discussed in Section 3.0, *Project Description*, of the Draft EIR, the Project would provide 577 parking spaces, which is below the City's required 679 parking spaces pursuant to LAMC Section 17.22.030, Required Parking Spaces. The State's Density Bonus Law specifies that for housing developments that qualify for a density bonus the local government shall not require a vehicular parking ratio, inclusive of parking for persons with a disability and guests, that exceeds the following ratios: (A) zero to one bedroom: one onsite parking space; (B) two to three bedrooms: one and one-half onsite parking spaces; and (C) four and more bedrooms: two and one-half parking spaces. (Gov't Code Section 65915(p)(1).) The Applicant requests that the City require no more than 2.35 spaces per unit for a total of 577 parking spaces for the Project, which is significantly more than the 440 parking spaces that would be required pursuant to the State's Density Bonus Law (refer to Page 3-13 of the Draft EIR).

17-444 The commenter inquires about the Project's greenhouse gas emissions. Refer to Response to Comment 17-48 for greenhouse gas emissions.

17-445 The commenter expresses concerns with EIR topics and traffic. Refer to Response to Comment 17-276 regarding EIR topics. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-446 The commenter expresses opposition to the Project due to traffic congestion and safety. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-447 The commenter expresses concerns with noise pollution and availability of parks. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding parking concerns.

17-448 The commenter expresses concerns with impacts to wildlife and rodents. Refer to Response to Comments 17-18 and 17-19 regarding impacts to wildlife and birds. Refer to Response to Comment 9-21 regarding rodent concerns.

17-449 This comment is part of an email template requesting examples and EIR topics for analysis. Refer to Response to Comment 17-276 regarding EIR topics.

17-450 The commenter expresses concerns regarding overcrowded schools. Refer to Response to Comment 17-79 regarding impacts to school services.

17-451 The commenter expresses concerns regarding increased traffic. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-452 The commenter requests amendment of prior comments. Refer to Response to Comment 17-325 above for responses to this comment

17-453 This comment is part of an email template requesting examples of how the Project could negatively affect the community and listing the EIR topics. Refer to Response to Comment 17-326 above for responses to these topics.

17-454 The commenter expresses concerns with low-income housing, Section 8 government supported housing, and increased crime. Refer to Response to Comment 17-328 above for responses to these topics.

17-455 The commenter expresses concerns with crime. Refer to Response to Comment 17-329 above for responses to this topic.

17-456 The commenter expresses opposition to the Project and concerns about overbuilding in the area, which will lead to more traffic and accidents. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding collision. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being

taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-457 The commenter opposes the Project and requests to scale back the Project. Refer to Response to Comment 17-330 above for responses to these topics. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-458 The commenter expresses concerns with traffic safety, parking, quality of life, U-turns on Heather Street, and use of residential streets to bypass Lampson traffic. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding cut-through traffic, traffic safety concerns and U-turns on Heather Street. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Quality of life is not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. Refer to Response to Comment 9-19 regarding cut through traffic during construction.

17-459 The commenter expresses concerns with on-site parking availability. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Additionally, a condition of approval has been added to the Project to ensure the parking garages onsite be used primarily for parking purposes.

17-460 The commenter expresses concerns with impacts to public services and existing parks. Refer to Response to Comment 17-154 regarding impacts to public services. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities.

17-461 The commenter expresses concerns with construction noise, road closure during construction, overflow parking in College Park East, road impacts from usage of heavy construction equipment, traffic safety, noise pollution, and Heather Park usage. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-67 regarding road closure during construction. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic safety concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding impacts to existing recreational facilities.

17-462 The commenter requests environmental studies on the EIR topics and expresses concerns with traffic and vehicle accidents. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding impacts related to accidents. As discussed in Section 1.5, *EIR Scope, Format, and Content*, of the Draft EIR, the *Technical Appendices* are available for review at the City of Los Alamitos, Development Services Department – Planning Division, 3191 Katella Avenue, Los Alamitos, California 90720, during the City's regular business hours

or can be requested in electronic form on the City's website at http://cityoflosalamitos.org/203/Planning-Commission-Projects. (Refer to Page 1-36 of the Draft EIR)

17-463 The commenter expresses concerns with EIR topics. Refer to Response to Comment 17-276 regarding EIR topics.

17-464 The commenter expresses concerns with construction, rodent issues, aesthetics, and increased traffic. Construction impacts are analyzed throughout the Draft EIR. Refer to Response to Comment 9-21 regarding rodent concerns. Refer to Response to Comment 17-65 regarding aesthetic concerns. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-465 The commenter inquires what studies have been completed to assess impacts on residents. The commenter also expresses concerns with aesthetics/height, rodents, traffic, noise, hazardous materials, impacts to existing parks, and accidents.

As discussed in Section 1.5, *EIR Scope, Format, and Content*, of the Draft EIR, the *Technical Appendices* are available for review at the City of Los Alamitos, Development Services Department – Planning Division, 3191 Katella Avenue, Los Alamitos, California 90720, during the City's regular business hours or can be requested in electronic form on the City's website at http://cityoflosalamitos.org/203/Planning-Commission-Projects or by contacting the City's Development Services Department – Planning Division. (Refer to Page 1-36 of the Draft EIR) Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding vehicle accident concerns. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-229 regarding hazardous materials. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Response to Comment 9-21 regarding rodent concerns.

17-466 The commenter opposes the Project and expresses concerns regarding increased traffic, availability of open space, housing prices, poor aesthetics, worsening Air Quality and GHG emissions, hazards and hazardous materials, noise and population and housing. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding open space concerns. Refer to Response to Comment 17-65 regarding aesthetic concerns. Refer to Response to Comment 17-35 regarding air quality impacts. Refer to Response to Comment 17-48 regarding greenhouse gas emissions. Refer to Response to Comment 17-229 regarding hazardous materials. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-73 regarding population growth. Housing prices are not an environmental issue analyzed under CEQA. Additionally, in regard to the commenter's opposition to the Project, this comment is noted for the record and will be

forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-467 The commenter expresses concerns with aesthetics and air quality impacts and makes additional remarks in opposition to the Project. Refer to Response to Comment 17-65 regarding aesthetic concerns. Refer to Response to Comments 17-35 and 17-258 regarding air quality impacts and cumulative air quality impacts. The remainder of the comments do not address potential impacts of the Project on the physical environment or the sufficiency of the Draft EIR, and therefore no further response to this comment is required.

17-468 The commenter expresses concerns with the proposed density and the impacts on traffic, recreation, noise, wildlife, and parking. Refer to Response to Comment 17-71 regarding land use consistency. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Regarding impacts to wildlife, as discussed in Section 4.3, *Biological Resources*, of the Draft EIR, wildlife, special-status vegetation communities, special-status species, nesting birds, and indirect impacts to biological resources were analyzed. Impacts to biological resources were determined to be less than significant with mitigation (refer to Pages 4.3-29 through 4.3-39 of the Draft EIR).

17-469 The commenter expresses concerns about increased traffic on Lampson, parking, and safety. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, 2.1.2, *Roadway Safety on Lampson Avenue,* regarding safety concerns, and 2.1.3, *Parking*, regarding parking concerns.

17-470 The commenter expresses concerns with the increase in greenhouse gas emissions and hazardous waste during construction, including soil disturbance resulting in Aerially Deposited Lead and toxic dust. Refer to Response to Comment 17-48 regarding greenhouse gas emissions. Refer to Response to Comment 17-229 regarding hazardous materials. Additionally, lead was not detected at concentrations that would pose an unacceptable health risk to future site occupants, the surrounding community or underlying groundwater. Furthermore, construction BMPs will be employed as a part of the Project to mitigate fugitive dust. Therefore, ongoing monitoring and reporting would not be warranted. Regarding construction fumes, a construction health risk assessment was prepared for the Project (*Technical Appendix B2* of the Draft EIR) and determined that Project construction impacts would be less than significant.

17-471 The commenter expresses concerns with the proposed density, parking impacts, and increased traffic. Refer to Response to Comment 17-71 regarding land use consistency. Refer to Master Response 2.1.3, *Parking,* regarding parking concerns. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion* regarding traffic concerns. Additionally, a condition of

approval has been added to the Project to ensure the parking garages onsite be used primarily for parking purposes.

17-472 The commenter expresses opposition to the Project and raises concerns with traffic issues, safety, noise, utilities and service systems, and vehicle accidents. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-81 regarding utilities concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding safety and vehicle accident concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-473 The commenter expresses concerns with property values and aesthetic views of mixed area housing. Refer to Response to Comment 17-65 regarding aesthetic concerns. Property values are not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-474 The commenter expresses concerns with traffic impacts on Lampson Avenue and water supply. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-26 regarding water supply.

17-475 The commenter expresses concerns with traffic and on-site parking. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-476 The commenter expresses concerns with AYSO parking and use of existing parks. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-11 regarding impacts to existing recreational facilities and Response to Comment 17-14 regarding the Project's proposed open space area.

17-477 The commenter expresses concerns with traffic on Lampson Avenue, increase in accidents and speeding, and flooding. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding safety and vehicle accident concerns. As discussed in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would substantially increase the rate or amount of surface runoff resulting in flooding on- or offsite (refer to Pages 4.9-22 through 4.9-23 of the Draft EIR).

17-478 The commenter expresses concerns with use of existing parks, on-site parking, and parking at Arbor Park. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of*

On-Site Amenities, regarding impacts to recreational facilities. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-479 The commenter expresses concerns with quality of life, increased traffic, and the provided on-site parking. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.3, *Parking*, regarding parking concerns. Quality of life is not an environmental issue analyzed under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-480 The commenter expresses concerns with noise, dirt, and traffic due to construction; pedestrian safety, inadequate parking; air quality, noise, and commute time due to traffic; overcrowding of parks; population growth; and crime. Refer to Response to Comment 17-36 regarding construction and operational noise impacts. Refer to Response to Comment 17-205 regarding erosion control and dust control measures. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding safety concerns, and 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding the Project's proposed open space area and impacts to existing recreational facilities. Refer to Response to Comment 17-73 regarding population growth. Increase in crime is not an environmental impact on the physical environment unless it leads to an increase in services or decrease in response times resulting in need for construction of additional facilities. Refer to Response to Comment 17-62 regarding police protection services.

17-481 The commenter expresses concerns with Project plans, improvement plans on Lampson Avenue, and parking. Refer to Master Response 2.1.3, *Parking, regarding* parking concerns. As discussed in Section 3.0, *Project Description*, of the Draft EIR, Figure 3-4, *Site Plan*, depicts the overall site plan proposed as part of the Project. Vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Additionally, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site. The Project would implement stop controls for the southbound approach at all driveways on Lampson Avenue. The driveway for the apartment entry would be restricted to right in/right-out access only. Vehicular circulation would be unrestricted throughout the Project site. Along the Project frontage, Lampson Avenue is developed to its ultimate General Plan roadway classification. Frontage improvements would include median improvements, sidewalks, driveway modifications needed to accommodate site access, and landscaping improvements as required by City standards (refer to Pages 3-2 through 3-4 of the Draft EIR).

17-482 The commenter expresses general opposition to the Project and lists EIR topics. Refer to Response to Comment 17-276 regarding EIR topics. In regard to the commenter's opposition

to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-483 The commenter expresses concerns with traffic and accidents on Lampson Avenue. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding vehicle accident concerns.

17-484 The commenter expresses concerns with use of existing parks and proposed open space. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding the Project's proposed open space area and impacts to existing recreational facilities.

17-485 The commenter expresses concerns about insufficient parking and safety. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns.

17-486 The commenter expresses concerns with traffic, overcrowding, and parking. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-73 regarding population growth.

17-487 The commenter expresses general opposition to the Project and concerns with safety. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns and Master Response 2.1.8, *Public Safety*, regarding general safety concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-488 The commenter expresses general opposition to the Project and expresses concern with traffic. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-489 The commenter expresses general opposition to the Project and lists EIR topics. Refer to Response to Comment 17-276 regarding EIR topics. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-490 The commenter expresses opposition to the Project and concerns with traffic congestion, crowded schools, and use of existing parks. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-79 regarding impacts to school services. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding the Project's proposed open space area and impacts to existing recreational facilities. In regard to the commenter's opposition to the

Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-491 The commenter lists EIR topics. Refer to Response to Comment 17-276 regarding EIR topics.

17-492 The commenter opposes the Project and expresses concerns with overpopulation, overuse of resources, and traffic issues. Refer to Response to Comment 17-73 regarding population growth. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. As discussed in Section 5.0, *Other CEQA Considerations*, of the Draft EIR, the Project would also not reduce the availability of non-renewable natural resources associated with long-term operational activities (refer to Page 5-2 and 5-3 of the Draft EIR). In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-493 The commenter expresses concerns with emergency response times, increased traffic, U-turns at Heather Street, accidents, and use of existing parks. Refer to Response to Comment 17-62 regarding police protection services and Response to Comment 17-68 regarding fire protection services. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, for vehicle accident concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding impacts to existing recreational facilities.

17-494 The commenter expresses concerns with increased traffic accidents and emissions. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding vehicle accident concerns. Refer to Response to Comment 17-48 regarding greenhouse gas emissions.

17-495 The commenter expresses concerns with traffic on Lampson Avenue and traffic safety. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic safety and vehicle accident concerns.

17-496 The commenter expresses concerns with noise pollution and air quality. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-66 regarding air quality impacts.

17-497 The commenter expresses concerns with parking. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns.

17-498 The commenter expresses concerns with flooding on Lampson Avenue. As discussed in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which

would substantially increase the rate or amount of surface runoff resulting in flooding on- or offsite (refer to Pages 4.9-22 through 4.9-23 of the Draft EIR).

17-499 The commenter expresses concerns with recreation areas. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding the Project's proposed open space area and impacts to existing recreational facilities.

17-500 The commenter expresses concerns with aesthetics. Refer to Response to Comment 17-65 regarding aesthetic concerns. The Draft EIR and technical studies are available for public review on the City's website: https://cityoflosalamitos.org/203/Planning-Commission-Projects.

17-501 The commenter expresses concerns with extra traffic on Lampson Avenue. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-502 The commenter expresses concerns with inadequate parking and use of existing recreational facilities. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding the Project's proposed open space area and impacts to existing recreational facilities.

17-503 The commenter recommends reducing the intensity of the Project. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-504 The commenter recommends a sound wall on the Los Alamitos side of the Project and reducing the Project intensity. The Project includes sound walls along the southern edge of the Project. site. Also refer to Response to Comment 17-40 regarding noise impacts. Regarding the intensity of the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-505 The commenter recommends that funds for air purifiers and higher fences for College Park East residents be provided by the developer. Refer to Response to Comment 17-66 regarding air quality impacts. Refer to Response to Comment 17-65 regarding aesthetic concerns.

17-506 The commenter expresses concerns with parking, safety, traffic, noise, and public services. Refer to Master Responses 2.1.3, *Parking*, regarding parking concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns, and 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Response to Comment 17-154 regarding impacts to public services.

17-507 The commenter expresses concerns with insufficient on-site parking and pedestrian safety. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns, and 2.1.2, *Roadway*

Safety on Lampson Avenue, regarding pedestrian safety. A condition of approval has been added to the Project to ensure the parking garages onsite be used primarily for parking purposes. In regard to the commenter's request for reduced units, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-508 The commenter expresses concerns with traffic and traffic safety on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns and 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic safety concerns.

17-509 The commenter expresses concerns with construction noise impacts. Refer to Response to Comment 17-40 for noise impacts. Additionally, as discussed in Section 4.11, *Noise*, of the Draft EIR, the Project would not result in an increase in the cumulative noise levels at sensitive receiver locations during both construction and operation (refer to Page 4.11-34 of the Draft EIR). Refer also to Response to Comment D-9 for cumulative offsite traffic noise impacts.

17-510 The commenter expresses opposition to the Project and concerns with public services and utilities. Refer to Response to Comment 17-154 regarding impacts to public services. Refer to Response to Comment 17-81 regarding utilities concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-511 The commenter provides an introduction and expresses concerns which are responded to below.

17-512 The commenter expresses concerns regarding availability of on-site parking, overflow parking to Arbor Park and College Park East, and the lack of signal control from the Project. Refer to Master Response 2.1.3, *Parking* regarding a detailed discussion on parking impacts. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* and Response to Comment 17-10 regarding traffic and signal control concerns.

17-513 The commenter expresses concerns regarding provision of open space/park space for residents. The commenter requests the Draft EIR include a listing of existing parks within a half-mile of the Project and an evaluation of Project impacts to recreational facilities. Refer to Response to Comment 17-11 regarding availability of open space and impacts to recreational facilities.

17-514 The commenter requests the Draft EIR include an evaluation of noise at Arbor Park during weekends. The commenter requests the noise study to include all hours of the day on Saturdays when whistles, loud voices, cheering, and other noises are made. Refer to Response to Comment 17-12 regarding noise at Arbor Park.

17-515 The commenter expresses concerns about new recreational areas, availability of on-site parking, a need for widening the existing bicycle lane on Lampson Ave, and traffic conditions

on North Seal beach Boulevard. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding the Project's proposed open space area and impacts to existing recreational facilities. Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue* regarding a discussion about bicycle facilities. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns.

17-516 The commenter provides an introduction and expresses concerns which are responded to below.

17-517 The commenter expresses concerns with traffic, drainage, and backyard privacy. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. As discussed in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would substantially increase the rate or amount of surface runoff resulting in flooding on- or offsite (refer to Pages 4.9-22 through 4.9-23 of the Draft EIR). Backyard privacy is not an environmental issue evaluated under CEQA; however, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-518 The commenter expresses concerns with dust, pollution, and noise. Refer to Response to Comment 17-35 regarding health impacts. As discussed in Section 4.6, *Geology and Soils*, the Project would be required to implement erosion and dust control measures pursuant to South Coast AQMD Rule 403 to minimize water- and windborne erosion and to control fugitive dust. Mandatory compliance with the Project's SWPPP and the erosion control and dust control measures would reduce, prevent, or minimize soil erosion from Project-related construction activities. Refer to Response to Comment 17-40 regarding noise impacts. The Project's Air Quality Impact Analysis and Noise Study is included as *Technical Appendices B1 and K* to the Draft EIR, respectively.

17-519 The commenter expresses concerns with increased traffic and noise on Lampson. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-40 regarding noise impacts.

17-520 The commenter expresses concerns with pollution and noise impacts to pets, and accidents. Refer to Response to Comment 17-35 regarding air quality and health impacts. Refer to Response to Comment 17-40 regarding noise impacts. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding vehicle accident concerns.

17-521 The commenter expresses opposition to the Project and concerns with traffic and safety issues on Lampson Avenue, accessibility issues to Arbor Park and Dog Park, overflow parking into College Park East, and burdens on the school district. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, 2.1.2, *Roadway Safety on*

Lampson Avenue, regarding traffic safety concerns, and 2.1.3, *Parking*, regarding parking concerns. Refer to Response to Comment 17-32 regarding impacts on the school district. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-522 The commenter expresses opposition to the Project and concerns with aesthetics. Refer to Response to Comment 17-65 regarding aesthetic concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-523 The commenter expresses concerns with construction pollution, noise, and traffic. The Draft EIR's Air Quality Impact Analysis (*Technical Appendix B1* of the Draft EIR) included localized air quality impacts and considered sensitive receptors in accordance with CEQA and South Coast AQMD Guidelines. Refer to Response to Comment 17-35 regarding health impacts. As discussed in Section 4.6, *Geology and Soils*, of the Draft EIR, the Project would be required to implement erosion and dust control measures pursuant to South Coast AQMD Rule 403 to minimize water- and windborne erosion. Mandatory compliance with the SWPPP and the erosion control and dust control measures would reduce, prevent, or minimize soil erosion from Project-related construction activities. Refer to Response to Comment 17-40 for noise impacts. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns.

17-524 The commenter expresses concerns with traffic safety, population growth, school services, and use of existing parks. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic safety concerns. Refer to Response to Comment 17-73 regarding population growth. Refer to Response to Comment 17-32 regarding impacts on school services. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding impacts to existing recreational facilities.

17-525 The commenter provides concluding remarks. This comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

17-526 The commenter expresses concerns with impacts to AYSO and Arbor Park. Refer to 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding impacts to existing recreational facilities. Refer to Master Response 2.1.3, *Parking*, regarding concerns regarding parking at Arbor Park.

17-527 The commenter expresses concerns with traffic on Lampson and overflow parking from Project residents in College Park East. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns, and 2.1.3, *Parking* regarding parking concerns.

17-528 The commenter expresses concerns regarding parking availability at Arbor Park and the impact on AYSO operations. Refer to Master Response 2.1.3, *Parking*, regarding concerns regarding parking at Arbor Park.

17-529 The commenter opposes the Project and expresses concerns with parking availability at Arbor Park and overflow parking in College Park East. Refer to Master Response 2.1.3, *Parking*, regarding Arbor Park and on-site parking concerns. In regard to the commenter's opposition to the Project, this comment is noted for the record and will be forwarded to the decision makers for their review and consideration prior to any action being taken on the Project.

17-530 The commenter expresses concerns with access onto Lampson Avenue, traffic during and after construction, and availability of open space to Project residents. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion* regarding traffic concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities,* regarding the Project's proposed open space area and impacts to existing recreational facilities.

Vehicle access to the Project site would be provided via two driveways on Lampson Avenue, one for the apartment entry on the western side and one for the primary neighborhood entry central to the site. Additionally, a restricted emergency vehicle access point with Lampson Avenue would be provided at the eastern end of the site. The Project would implement stop controls for the southbound approach at all driveways on Lampson Avenue. The driveway for the apartment entry would be restricted to right-in/right-out only. Vehicular circulation would be unrestricted throughout the Project site. Refer to Response to Comment 17-10 and Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, regarding traffic signal concerns.

17-531 The commenter expresses concerns with traffic impacts, accidents, and noise impacts from JFTB operation on the Project's future residents. Refer to Master Responses 2.1.1, *Transportation and Traffic Congestion* regarding traffic concerns, 2.1.2, *Roadway Safety on Lampson Avenue*, regarding pedestrian safety concerns, and 2.1.9, *Proximity to the Los Alamitos Joint Force Training Base (JFTB)* for related responses.

17-532 The commenter provides an introduction and expresses concerns which are responded to below. Refer to Response to Comment 17-511 above for responses to these topics.

17-533 The commenter expresses concerns regarding availability of on-site parking, overflow parking to Arbor Park and College Park East, and the lack of signal control from the Project. Refer to Master Response 2.1.3, *Parking*, regarding a detailed discussion on parking impacts. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, and Response to Comment 17-10 regarding traffic and signal control concerns.

17-534 The commenter expresses concerns regarding provision of open space/park space for residents. The commenter requests the Draft EIR include a listing of existing parks within a ½ mile of the Project and an evaluation of Project impacts to recreational facilities. Refer to Response to Comment 17-11 regarding availability of open space and impacts to recreational facilities.

17-535 The commenter requests the Draft EIR include an evaluation of noise at Arbor Park during weekends. The commenter requests the noise study to include all hours of the day on Saturdays when whistles, loud voices, cheering, and other noises are made. Refer to Response to Comment 17-12 regarding concerns regarding noise at Arbor Park.

17-536 The commenter expresses concerns with water supply and electricity. As discussed in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, the Project would be served in accordance with the California Public Utilities Commission (CPUC) and Federal Energy Regulatory Commission tariffs. As discussed in Section 4.5, *Energy*, Project operational energy demands are estimated to be 98,388 kWh/year of electricity which would be supplied by Southern California Edison (SCE) (refer to Page 4.17-15 of the Draft EIR). Refer to Response to Comment 17-26 regarding water supply.

17-537 The commenter expresses concerns with traffic, police services, and the scale of the Project. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, regarding traffic concerns. Refer to Response to Comment 17-62 regarding police protection services. Refer to Response to Comment 17-65 regarding aesthetic concerns.

17-538 The commenter expresses concerns with affordable housing, parking, and use of existing parks. As discussed in Section 3.0, *Project Description*, of the Draft EIR, the Project intends to provide a variety of affordable housing types to support middle-income workers (refer to Pages 3-1 through 3-2 of the Draft EIR). Refer to Master Response 2.1.3, *Parking*, regarding parking concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, regarding impacts to existing recreational facilities.

Responses to Comment 18

De Boer, Kristal, dated June 09, 2024.

18-1 The commenter expresses concerns with the Project on the College Park East community. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

18-2 The commenter requests new environmental reports that are unbiased and provide environmental remediation measures. The commenter requests the City to release the Peer Review report before any environmental decisions are made on the Project.

The City staff and the City's environmental consultant conducted peer review of the Draft EIR prior to release of the Draft EIR for public review. Pursuant to Public Resources Code Section 21067 and CEQA Guidelines Article 4 and Section 15367, the City is the Lead Agency under whose authority this EIR has been prepared. "Lead Agency" refers to the public agency that has the principal responsibility for carrying out or approving a project. As documented in the Draft EIR, the EIR represents the independent judgment of the City of Los Alamitos (as the CEQA Lead Agency) and presents an objective evaluation of the physical environmental effects that could result from construction and operation of the proposed 4665 Lampson Avenue Project (see Draft EIR, pp. S-1, 1-1, and 1-4).

18-3 The commenter expresses concerns with traffic, increased pollution, sewage, drainage, public utilities, and emergency response. The Draft EIR addressed the environmental topics raised by the commenter. Also refer to Section 2.1, Master Response, of this Final EIR. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

Comments on the DEIR for 4665 Lampson Avenue

Dear Mr. Oliver:
Lampson Avenue is a street that suffers many safety concerns. There have been many fatal accidents on this street. It is unconscionable to add 246 residential units knowing there is yet another large development on its way. And all of these units with minimum parking. While providing housing is admirable, to not give a thought to whether those who live there are safe is

19-1

not. This is dangerous and it is asking for problems—both foreseeable and unforeseeable in the future. I urge the Council to cut back the density. 19-1 (CONT.)

Once upon a time quality of life meant something to our officials. This huge project will not only increase accidents, air pollution, tire dust, noise, but will overcrowd this small impacted area of Los Alamitos, Seal Beach and West Garden Grove. There is absolutely no concern for the new residents or existing resident's quality of life. 19-2

The safety concerns continue in the proposed project with the idea of sharing a very old sewer system with Seal Beach. If Seal Beach concurs with this bad idea, you should require a new sewer system be built so sewage spills do not become an issue, a safety concern for everyone. 19-3

And then there is water drainage. The Golf Course and College Park East already flood when we have rain. There needs to be mitigation worked out with the City of Seal Beach to ensure that new drainage systems are in place for the new development, College Park East, West Garden Grove and the Golf Course. 19-4

My suggestions are: 1. Cut the density, 2. Increase the parking, 3. Replace Seal Beach City's sewer system along Lampson, 4. Add new drainage projects for all the affected neighborhoods —College Park East, West Garden Grove, The Golf Course and the new development.

Thank you for the opportunity to examine and comment on the DEIR for 4665 Lampson. I request that my observations and requests be entered into the EIR, addressed, answered, and mitigated. 19-5

Sincerely yours,
Ellery Deaton

Responses to Comment 19

Deaton, Ellery, dated June 07, 2024.

19-1 The commenter expresses concerns with traffic safety on Lampson Avenue. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns.

19-2 The commenter expresses concerns with increased accidents, air pollution, tire dust, noise, and overcrowding and overall quality of life. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

19-3 The commenter expresses concerns with sharing an "old" sewer system with the City of Seal Beach and requests that a new sewer system is built to avoid sewage spills. Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for a discussion on sewer impacts.

19-4 The commenter expresses concerns with drainage and recommends mitigation be worked out with the City of Seal Beach to ensure new drainage systems are in place for the Project and nearby neighborhoods. Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for hydrology concerns.

19-5 The commenter makes suggestions to: 1) to cut the density, 2) increase the parking, 3) replace Seal Beach's sewer system along Lampson Avenue, 4) add new drainage projects for affected neighborhoods. The commenter requests the comments to be included in the Final EIR, addressed, answered, and mitigated. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

Comment Letter 20

Lampson Project EIR response

Kellie DuRose <kelliedurose@gmail.com>
Mon 6/10/2024 4:42 PM
To:Tom Oliver <Toliver@cityoflosalamitos.org>

6 attachments (9 MB)
image_50427649.JPG; image_50372353.JPG; image_67171585.JPG; image_50735873.JPG; image_67210241.JPG; image_50422785.JPG;

I am writing in response to the Lampson Housing Project EIR. I live in the College Park East neighborhood and have lived here for over 6 years and think the proposal for the location does not make sense for the area and should not be approved. I have concerns about parking, safety, traffic, infrastructure, and services. 20-1

The proposed number of parking spots allocated to the community is highly insufficient. A little over 2 parking spaces per home is not sufficient for any neighborhood. Prior to moving to Seal Beach my husband and I lived in the 360 at South Bay planned community in Hawthorne, CA. It was new construction consisting of condos, townhouses, and single family homes. Each home had a garage and there were also street parking spots (both parallel parking along streets as well as pull-in spots on side streets). We parked our cars inside our garage and only needed street parking for our guests. Even with this, parking was a nightmare. We had many occasions where we had to have guests park outside the community and we had to go pick them up and shuttle them to our home. The amount of parking proposed at this location seems very similar and therefore very inadequate. Residents and guests are going to end up parking in the College Park East neighborhood and trying to cross a very dangerous street, Lampson. Even in our single family home community I find that our street is always full of cars because people don't use their garages and have more than 2 cars, filling our streets with overflow from another community will only make it worse. If this is to proceed then I think fewer homes should be planned and more space allocated to parking so that all of the residents and their guests can easily park in the community without needing our streets for overflow. 20-2

Earlier I mentioned Lampson being a dangerous street and this community would make it even worse. In my short 5 years here there have been an extreme amount of accidents on Lampson, including fatalities. People drive too fast and don't notice people pulling out of the CPE community and the West Garden Grove community and adding a new community is not going to change that. Additionally, we have many problems with people heading on Lampson towards Seal Beach Blvd and u-turning at Heather from the dog park and based on the proposed configuration I see that only increasing. Forcing tons of cars into u-turn situations is extremely dangerous and opening the street up to more accidents than it already has, and it already has too much. 20-3

I also have concerns about traffic. The intersections of Seal Beach Blvd and Lampson and Valley View and Lampson are very congested today with the existing communities and the traffic they produce that adding many more people and homes is only going to make it worse. Additionally, if a portion of this community is truly allocated for low income housing (I 20-4

have my doubts that any of these properties will actually be affordable for low income families but that is beside the point) then public transportation will need to be easily accessible. To my knowledge there are no bus stops along Lampson and if they were to be introduced (if they aren't, people are going to walk 1.5 miles to Seal Beach Blvd or 1.1. miles to Valley View to catch the bus one way?!?!) then that would make traffic even more of a problem along Lampson. If residents are going to be needing to walk to bus stops there aren't adequate sidewalks on Lampson to accommodate this (specifically from Seal Beach Blvd to Tulip). Walking would require crossing a very busy Lampson.

On the topic of public transportation, a park and ride is being eliminated by this development which is actually discouraging current residents from carpooling and hurting the environment. The state government is saying that we need to be environmentally conscious and increase low income housing and I don't see this development focused on either.

20-4 (CONT.)

In addition to driving and walking safety the EIR does not address airplane safety concerns raised by CalTrans and CALUC. I think both agencies raise valid concerns and don't understand why those aren't included in the EIR.

20-5

I am concerned about the existing infrastructure in the area and additional development that will negatively contribute to it. We have dealt with flooding in the CPE neighborhood for many years with no solutions presented. The water table issues exist in that area as well and will only lead to more issues with the existing issues going unresolved. I feel as if the existing residents flooding issues should be resolved before new construction starts. I have attached some pictures to show the flooding on our street over the past few years. It's bad and needs to be resolved before we eliminate runoff options with more building.

20-6

Finally, I feel as if we do not have the appropriate amount of services in the area to accommodate a new community. We have very few grocery stores in the area and some of them are very old. The stores in the strip malls at Valley View and Lampson which would be the closest for this community are closing down, are very run down, or have been left empty for years. People in the community have raised concerns to the city of Garden Grove and to the owners of the properties and nothing is being addressed. We also have very old infrastructure for electricity, internet, cable, etc. and are well overdue for upgrades for the existing communities. And now we're proposing adding new residents and communities with no plans to address any of these issues.

20-7

Responses to Comment 20

DuRose, Kellie, dated June 10, 2024.

20-1 The commenter provides introductory remarks and expresses concerns with parking, safety, traffic, infrastructure, and services which are responded to below.

20-2 The commenter expresses concerns about the insufficient number of parking spaces and provides personal experience of inadequate parking. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

20-3 The commenter expresses concerns with traffic safety on Lampson Avenue. The commenter states that Lampson is a dangerous street, there have been many accidents, and there are problems with U-turns on Heather. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue,* for pedestrian safety concerns.

20-4 The commenter expresses concerns with traffic congestion on Lampson Avenue and nearby intersections. Additionally, the commenter expresses concerns with accessibility of public transportation for affordable housing residents and elimination of the Park-n-Ride. The commenter states that there is no bus stop along Lampson Avenue and inadequate sidewalks on Lampson to accommodate walking from Seal Beach Boulevard to Tulip.

The commenter is correct that there is no transit service along Lampson Avenue; the nearest OCTA bus stop from the Project site is Route 123, approximately 1.2 miles at the intersection of Valley View Street and Lampson Avenue. The existing Park-n-Ride that previously occupied the Project site has not been in operation for the past 18 months and when in operation had limited usage. As discussed in Section 4.15, *Transportation*, of the Draft EIR, the Project Mitigation Measure MM 4.15-1 has been incorporated which includes implementing CAPCOA strategies such as coordination with OCTA to determine whether providing new or re-routing existing transit services to the site would be feasible, as determined by OCTA pursuant to OCTA's standards (refer to Page 4.15-19 of the Draft EIR). Refer to Master Response 2.1.1, *Transportation and Traffic Congestion,* for traffic concerns. Refer to Master Response 2.1.2, *Avenue, for* pedestrian safety concerns.

20-5 The commenter states that the EIR does not address airplane safety concerns raised by Caltrans and ALUC. The commenter is incorrect in stating that the Draft EIR did not address airplane safety concerns. Please refer to Draft EIR, Section 2.4.3 for a discussion regarding Airport Environs Land Use Plan for the Joint Forces Training Base Los Alamitos and the ALUC process. Airport safety is analyzed in Section 4.8, *Hazards and Hazardous Materials*, in the Draft EIR. Refer also to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (*JFTB).

20-6 The commenter expresses concerns with flooding and existing storm drainage infrastructure in the area. The commenter expresses concerns with the existing water table and recommends

flooding issues be resolved before construction starts. Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for hydrology concerns.

20-7 The commenter expresses concerns with existing utility infrastructure and services (i.e. grocery stores) in the area due to the Project's population growth. The commenter expresses concerns with the age of existing grocery stores and nearby stores to the Project site. As discussed in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, there is sufficient capacity in utility services to serve the Project site. The Project would be served in accordance with the CPUC and Federal Energy Regulatory Commission tariffs. The Project does not propose uses that are inherently energy intensive and the energy demands in total would be comparable to other residential uses of similar scale and configuration. No new or expanded off-site dry utilities are required to serve the Project, and therefore there would be no impact associated with any such facilities that could cause significant environmental effects. (refer to Draft EIR p. 4.17-15) The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

Comment Letter 21

From: Chris Eble
To: Tom Oliver
Subject: Lampson project
Date: Sunday, May 5, 2024 3:32:45 PM

Mr. Oliver-

I'm sure you've heard from many of us about this residential project to be built on Lampson Ave. you've probably heard many concerns about the number of parking spaces to be provided per number of units. It is unacceptable. To think that people will be taking public transit to offset the lack of parking is to be intellectually dishonest. The residents would park in college park because that will be the only option. Not only will it impact residents that already are dealing with lack of parking as children grow older and start to drive but it will become a real safety concern. I've lived in college park for only 5 years and in that time I've seen a dozen or so serious accidents on Lampson. The last one was almost in our back yard just 6-7 weeks ago. Lampson is already dangerous as everybody knows- you add to that hundreds of people crossing it (maybe at a traffic light maybe not) everyday and you have made life in this neighborhood much more dangerous. The likeliness that there will be a fatality will go up exponentially if the project goes through as planned. 21-1 21-2

This of course doesn't even take into account the joint air base and the study that seems to have been ignored by the powers that want this project. I don't understand how a federal study/conclusion can be ignored by local government. 21-3

Safety should be the first concern and at least from where I sit it has been overtaken by the affordable housing cartel and whatever monies that brings to the city. It's almost always about money and it certainly is with the Lampson project. It's unsafe and it's wrong to put revenue above safety. 21-4

Sincerely,

Chris Eble

Responses to Comment 21

Eble, Chris, dated May 05, 2024.

21-1 The commenter expresses concerns about the number of parking spaces provided. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

21-2 The commenter expresses concerns about pedestrian safety and traffic on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Refer to Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns.

21-3 The commenter expresses concerns with the ALUC and Caltrans conclusions and states that the studies have been ignored. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB).*

21-4 The commenter expresses general opposition to the project. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

Comment Letter 22

Lampson Housing Project

susanne farjami <sfarjami@hotmail.com>
Sun 6/9/2024 11:18 AM

To:Tom Oliver <Toliver@cityoflosalamitos.org>
Cc:Farhad <ffarjami@aol.com>

IRONSCALES couldn't recognize this email as this is the first time you received an email from this sender sfarjami@hotmail.com

We were dismayed to learn that the Lampson Project draft environmental impact reports were prepared by consultants hired by Lampson LLC (the property developer), not by independent consultants who should have been hired by the City of Los Alamitos. 22-1

It makes sense that land bordering a military airport would not be zoned for residential development. It makes no sense that this area was re-zoned to allow for residential development, especially after the Airport Land Use Commission and the California Department of Transportation - Division of Aeronautics deemed this area unsuitable and unsafe for residential housing. 22-2

It is our understanding that hundreds of opposition letters written by members of this community in November 2022 were not provided to the City Council or the Planning Commission. Why would they be prevented from knowing the extent of opposition to this project within the community before making this decision?

Before this project proceeds any further, all conflicts of interest should be disclosed and unbiased consultants should prepare new environmental reports that address the obvious public safety and quality of life issues this project creates for the residents of Los Alamitos, Rossmoor and Seal Beach. In addition, the "Peer Review" report should be released before any environmental decisions are made on the Lampson Project. 22-3

We have lived in Rossmoor for 30 years, raised a family here and enjoyed a relatively safe and quiet community. Building so much new housing in a small area will have a huge impact on our quality of life with increased traffic, congestion, noise and safety issues. Building these houses next to a military airbase just adds to these concerns.

We would urge the Los Alamitos City Council, the Planning Commission, and everyone involved in this project to listen to the many, many voices in this community that oppose this project for so many reasons - you work for them! 22-4

Fred and Susanne Farjami

Responses to Comment 22

Farjami, Susanne dated June 09, 2024.

22-1 The commenter expresses dismay that the EIR was prepared by consultants hired by the Project Applicant and not the City. The City staff and the City's environmental consultant conducted peer review of the Draft EIR prior to release of the Draft EIR for public review. Pursuant to Public Resources Code Section 21067 and CEQA Guidelines Article 4 and Section 15367, the City is the Lead Agency under whose authority this EIR has been prepared. "Lead Agency" refers to the public agency that has the principal responsibility for carrying out or approving a project. As documented in the Draft EIR, the EIR represents the independent judgment of the City of Los Alamitos (as the CEQA Lead Agency) and presents an objective evaluation of the physical environmental effects that could result from construction and operation of the proposed 4665 Lampson Avenue Project (see Draft EIR, pp. S-1, 1-1, and 1-4).

22-2 The commenter expresses concerns with the zoning of the Project site and expresses concerns with ALUC and Caltrans conclusion on the site. Please refer to Draft EIR, Section 2.4.3 for a discussion regarding Airport Environs Land Use Plan for the Joint Forces Training Base Los Alamitos and the ALUC process. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*.

22-3 The commenter inquires why the NOP comment letters were not provided to City Council or Planning Commission. The commenter requests all conflicts of interest be disclosed and new unbiased environmental reports that address public safety and quality of life issues. The commenter also requests the Peer Review report be released before any environmental decisions are made.

The NOP comment letters are intended to inform the scope of the Project's EIR. The NOP comments were summarized in the Draft EIR (see Table 1-1 of the Draft EIR) and included in *Technical Appendix A* of the Draft EIR, therefore, the NOP comments were made publicly available. The Draft EIR and Final EIR, including all comments made on the Project will be made available to the decision makers prior to any scheduled public hearings on the Project.

Please refer to Response to Comment 16-16 and 22-1 regarding the EIR reflecting the independent judgment of the City, as Lead Agency, and peer review. There are no known conflicts of interest.

22-4 The commenter opposes the Project and expresses concerns with increased traffic, congestion, noise, and safety issues and quality of life. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

Subject: 4665 Lampson Project
Date: Thursday, May 2, 2024 12:15:08 PM

Sir:
Just a quick note in regards to this project. First, I think that 246 housing units are a bit too many. People have to go to work, school, shopping and doctor's appointments etc. This will lead to much traffic congestion, much more than there is now. Second, it is too close to the Los Alamitos Military airport. The training that goes on there is very loud on weekends and sometime during the week. How happy do you think people will be when they find themselves in that noise and the level will be higher because they are close to the airport. Third, what will you do, if God forbid, a helicopter or military plane crashes.
I believe I read that that safety board did not give your project its blessing. Who will be morally and monetarily responsible? Maybe cut back on the project and put it as far from the military runway as possible. Maybe it would be a good idea for you to hire a small plane and pilot and fly over the area to get a birds eye view. The runway is closer than you think. You can't use a drone because it is a military facility, but a small plane is allowed to make a fly over.

23-1

23-2

Cordially,
Rosemary Frenkiel

Subject: Lampson Project and Old Ranch Country Club Project
Date: Saturday, May 4, 2024 11:24:53 AM

Dear Mr. Oliver,

We are two of many community residents who are deeply concerned about these high density / low income projects moving forward. It seems that we as a community have no say in this matter. 24-1

The negative impact these projects will have to our community in terms of traffic congestion, parking, noise and air pollution, crime, increased demand on city and energy resources, etc., are very serious. 24-2

It should be noted that two State Agencies, Cal Trans Division of Aeronautics and the California Airport Land Use Commission, issued warnings that these projects have safety and health issues due to their close proximity to the Joint Forces Training Base. These warnings were omitted from the Draft Environmental Impact Report. This is unacceptable "editing" to get your projects approved. 24-3

In closing, we will stress again that we highly disapprove of these projects which have such a high negative impact to our community. 24-4

Mr. & Mrs. L.C. Fulton

Subject: Lampson project
Date: Sunday, May 19, 2024 1:09:45 PM

IRONSCALES couldn't recognize this email as this is the first time you received an email from this sender zombie4me2@aol.com

I have lived in college park east half my life, my mother still lives there. I now live in rossmoor. This project will make it that much harder to get to and from visiting with my mother. Traffic is already awful on lampson. I agree with all the points made below. This was not well thought out and is only benefiting the builder and creating more property tax for Los alamitos which is not being directly impacted by the new traffic. 25-1

1. The mixed use of density of 20 units per acre is too high to accommodate adequate parking. Spill-over right into College Park East. 25-2

2. AYSO games will be impacted and not be able to continue with limited parking. 25-3

3. Vehicle access to the project site via two driveways on Lampson is not safe.

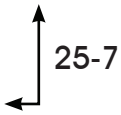
Ingress and egress are severely limited due to the green belt divider on Lampson.

This is a safety issue for school buses and emergency vehicles. 25-4

4. The project opens space should be converted into a recreational park with playground equipment for neighborhood children.

Without the play area, the kids will be dangerously crossing Lampson via walking or biking to access Heather Park. 25-5

5. Vehicle miles travel will be significantly increased on Lampson, Seal Beach Blvd, and Valley View.



The current **Park and Ride** lot that supports car pooling and van pooling will be eliminated increasing vehicle miles traveled further. Project should providing a **Telework Center** in the project to mitigate travel impacts. 25-6

6. California law requires **solar panels** on new housing and **zero emission electric vehicle charging stations**. Neither are mentioned in the draft plan.

SINCERELY, 25-7

KIM GARTHWAITE

Responses to Comment 25

Garthwaite, Kim, dated May 19, 2024.

25-1 The commenter provides introductory remarks, expresses concerns with traffic on Lampson Avenue, and expresses general opposition to the Project. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Other specific comments are addressed below.

25-2 The commenter expresses concerns with inadequate parking due to the proposed density and potential spill over into College Park East. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

25-3 The commenter expresses concerns with AYSO operations and parking. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

25-4 The commenter expresses concerns with vehicle access onto the Project site and safety issues for emergency vehicles and school buses. Refer to Master Responses 2.1.2, *Roadway Safety on Lampson Avenue*, and 2.1.7, *Emergency Vehicle Access*.

25-5 The commenter recommends the Project open space be converted into a recreational park. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities.*

25-6 The commenter expresses concerns with VMT, states that the elimination of the current Park and Ride Lot will further increase VMT, and recommends the Project provide a Telework Center. The existing Park-n-Ride that previously occupied the Project site has not been in operation for the past 18 months and when in operation, had limited usage. Additionally, as discussed in 4.15, *Transportation*, of the Draft EIR, the Project would result in significant VMT impacts with the implementation of Mitigation Measure MM 4.15-1. Mitigation Measure MM 4.15-1 includes implementing CAPCOA strategies such as installing broadband infrastructure or other communication technologies that encourages telecommuting and working from home, which would reduce mobile source emission (refer to Page 4.15-19 of the Draft EIR).

25-7 The commenter states that California law requires solar panels on new housing and zero emission electric vehicle charging stations which are not mentioned in the Draft EIR. Contrary to the commenter's assertions, as part of the Project's Project Design Features (PDFs), the Project will include solar photovoltaic with the capability to generate up to 1,229,520 kWh/annually (PDF GHG-1) and the Project's parking areas will be designed to provide electric vehicle (EV) charging stations. At minimum, the number of EV charging stations will equal the Tier 2 Residential Voluntary Measures of the California Green Building Standards Code, Section A4.106.8.2.1 (PDF GHG-4) (refer to Page 4.5-6 to 4.5-7 of the Draft EIR) Thus, no revision to the Draft EIR is required.

Subject: Lampson project
Date: Sunday, May 19, 2024 11:47:03 AM

Dear Tom Oliver,
Please consider below points and our requests as residents before moving forward with the Lampson project as most of the residents are opposed to this not so well planned development. Below are the most pressing concerns; 26-1

1. The mixed use of density of 20 units per acre is too high to accommodate adequate parking. Spill-over right into College Park East will cause air pollution and accidents in the neighborhoods. 26-2

2. AYSO games will be impacted and not be able to continue with limited parking. This takes away the right of our kids play soccer in our own neighborhoods. 26-3

3. Vehicle access to the project site via two driveways on Lampson is not safe. Ingress and egress are severely limited due to the green belt divider on Lampson. This is a safety issue for school buses and emergency vehicles. 26-4

4. The project opens space should be converted into a recreational park with playground equipment for neighborhood children. Without the play area, the kids will be dangerously crossing Lampson via walking or biking to access Heather Park. 26-5

5. Vehicle miles travel will be significantly increased on Lampson, Seal Beach Blvd, and Valley View.
The current **Park and Ride** lot that supports car pooling and van pooling will be eliminated increasing vehicle miles traveled further. Project should provide a **Telework Center** to mitigate travel impacts. 26-6

6. California law requires **solar panels** on new housing and **zero emission electric vehicle charging stations**. Neither are mentioned in the draft plan. 26-7

7. This area is a lovely and relatively quiet community where most households are families where we feel safe and its not congested by traffic, pollution or too much housing squeezed into a small area. This project causes a HUGE loss to the hundred of families calling College Park East and the surrounding area “home”. **Only a win for the developer.** 26-8

8. Lampson Avenue is not only used by the over 1,700 households in College Park East, but those who live nearby in Rossmoor and Los Al and Garden Grove who go shopping, drop/pick up kids at school and bypass the freeway.

Lampson is only a two lane street with constant use and at times extremely congested. By adding one 246 units and potentially 500 additional car trips daily, Lampson will be a nightmare.

26-9

9. **I am requesting a study on the impact of foot traffic on Lampson** due to the development.
I would also like a **sidewalk added** to the north side of Lampson between Seal Beach Blvd and Tulip Drive. I am concerned that with the **decreased visibilit**y of drivers traveling eastbound on Lampson due to curves in the roadway, as well as the boulders and trees in the center divider, there will be an i**ncrease in pedestrian injuries and fatalities.**

Please stop the Lampson project.
Kindly,

Gizem Gulec

26-10

Responses to Comment 26

Gulec, Gizem, dated May 19, 2024.

26-1 The commenter provides introductory remarks and expresses opposition to the Project. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

26-2 The commenter expresses concerns with inadequate parking due to the proposed density, spill over into College Park East air pollution, and accidents. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

26-3 The commenter expresses concerns with AYSO operation and parking. Refer to Master Response 2.1.3, *Parking*, for parking concerns.

26-4 The commenter expresses concerns with vehicle access onto the Project site and safety issues for emergency vehicles and school buses. Refer to Master Responses 2.1.2, *Roadway Safety on Lampson Avenue*, and 2.1.7, *Emergency Vehicle Access*.

26-5 The commenter recommends the Project open space be converted into a recreational park. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities.*

26-6 The commenter expresses concerns with VMT, states that the elimination of the current Park and Ride Lot will further increase VMT, and recommends the Project provide a Telework Center. The existing Park-n-Ride that previously occupied the Project site has not been in operation for the past 18 months and when in operation had limited usage Additionally, as discussed in 4.15, *Transportation*, of the Draft EIR, the Project would result in significant VMT impacts with the implementation of Mitigation Measure MM 4.15-1. Mitigation Measure MM 4.15-1 includes implementing CAPCOA strategies such as installing broadband infrastructure or other communication technologies that encourages telecommuting and working from home, which would reduce mobile source emission (refer to Page 4.15-19 of the Draft EIR).

26-7 The commenter states that California law requires solar panels on new housing and zero emission electric vehicle charging stations which are not mentioned in the Draft EIR. Contrary to the commenter's assertions, as part of the Project's Project Design Features (PDFs), the Project will include solar photovoltaic with the capability to generate up to 1,229,520 kWh/annually (PDF GHG-1) and the Project's parking areas will be designed to provide electric vehicle (EV) charging stations. At minimum, the number of EV charging stations will

equal the Tier 2 Residential Voluntary Measures of the California Green Building Standards Code, Section A4.106.8.2.1 (PDF GHG-4) (refer to Page 4.5-6 to 4.5-7 of the Draft EIR) Thus, no revision to the Draft EIR is required.

26-8 The commenter expresses concerns with traffic congestion, pollution, and proposed density, and expresses general opposition to the Project. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

26-9 The commenter expresses concerns with traffic on Lampson Avenue. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns.

26-10 The commenter requests a study on the impact of foot traffic on Lampson Avenue and a sidewalk added to the north side of Lampson between Seal Beach Boulevard and Tulip Drive. A Safety Evaluation was prepared to confirm that the Project would have no safety impacts on public roadways and Project access points (see Master Response 2.1.2, *Roadway Safety on Lampson Avenue*, and *Attachment H* of this Final EIR). The Safety Evaluation further confirms the analysis and determination in the Transportation Section (Section 4.15) of the Draft EIR that the Project would not result in a safety impact or substantially increase hazards due to a geometric design feature. As for the commenter's request for an additional sidewalk on Lampson Avenue between Seal Beach Boulevard and Tulip Drive, the Project would include sidewalks along the Project's frontage on Lampson Avenue and areas beyond the Project site's frontage is not part of the Project boundary or a requirement of the Project Applicant. However, this comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

Following up on this email.

Unfortunately, the quality of the EIR work that has been released is very disappointing. There are claims of conflict of interest as well and tremendous safety concerns with respect to the JFTB. These do not appear to be properly addressed.

As noted in my prior email, a proper due diligence on such a controversial development requires these reports independently reviewed and results of those to be shared with the public. Without independent peer review, there is no way to address these concerns.

As a resident of Seal Beach, I trust this route will be followed and concerns of the residents will be addressed.

> It is remarkable to propose this location for such a high density, boilerplate housing project. The idea of state mandating housing is rather ridiculous by itself and most likely won't achieve the results it is intended to, but proposing this right next to a neighborhood with completely different characteristics defies pretty much every urban planning principle in the book. Self inflicted wound is perhaps best way to describe this, very short sighted. Destroying livability is essentially akin to asking those who live there to move somewhere else. Perfect way to diminish the attractiveness of the city in the long term by making life miserable for those who live there.
>
> Clearly this can have a significant impact on our neighborhood and such consequences will be unacceptable and unfair but ultimate losers will also include the city of los Alamitos and city of seal beach.

27-2

> This project location appears to be ill conceived in many ways. Right next to Arbor and Dog parks, which are two of the busiest recreation areas in the city, with arbor park hosting soccer events every week. There is absolutely no way lampson can handle this added traffic due to this development. There is absolutely no way our parks can handle this additional demand from the new condensed housing. It will create parking issues in our neighborhood, crime will go up. It will be a disaster from urban planning perspective and not only diminish value of our neighborhood but our city as well.
>
> As a CPE resident, and an engineer/consultant who has contributed to many planning studies as part of numerous developments across California, I strongly recommend reconsidering the

27-3

proposed location for the high density housing. This will certainly have a significantly negative impact to its neighbors. And those "neighbors" will likely use every legal tool they have to oppose this development location of which not only defies common sense but likely would not pass any objective criteria/test either. Hopefully, this idea goes away but if not an extensive due dilligence process should be expected and planned. Studies by reputable consultants/experts that investigate and quantify the short/long term impact of the proposed location on its surrounding communities and the city overall should be performed. If these studies are done by the developer, they should be independently peer reviewed by the city and findings should be objectively reconciled. Community members also should be given access to these studies and also an opportunity to perform independent peer reviews, and city should collect their comments. All comments need to should be addressed satisfactorily.

Thank you,

Responses to Comment 27

Gulec, CK, dated June 10, 2024.

27-1 The commenter states that there is a conflict of interest and safety concerns with JFTB. The commenter requests proper due diligence on the Draft EIR and should be independently reviewed and shared to the public. The City staff and the City's environmental consultant conducted peer review of the Draft EIR prior to release of the Draft EIR for public review. Pursuant to Public Resources Code Section 21067 and CEQA Guidelines Article 4 and Section 15367, the City is the Lead Agency under whose authority this EIR has been prepared. "Lead Agency" refers to the public agency that has the principal responsibility for carrying out or approving a project. As documented in the Draft EIR, the EIR represents the independent judgment of the City of Los Alamitos (as the CEQA Lead Agency) and presents an objective evaluation of the physical environmental effects that could result from construction and operation of the proposed 4665 Lampson Avenue Project (see Draft EIR, pp. S-1, 1-1, and 1-4). Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*.

27-2 The commenter expresses opposition to the Project. The commenter does not provide any specific comments on the adequacy of the Draft EIR. However, these comments are noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project.

27-3 The commenter expresses concerns with impacts to existing parks, traffic on Lampson Avenue, and parking, as well as independent peer review of developer initiated studies. Refer to Master Response 2.1.3, *Parking*, for parking concerns. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*. Refer to Response to Comment 27-1 regarding independent review.

COMMENT LETTER 28

From: Ann Gunvalsen
To: Tom Oliver
Subject: 4665 Lampson Avenue Project
Date: Thursday, April 25, 2024 5:04:33 PM

Dear Planning Committee,

I am in favor of this new devleopment on Lampson. Nobody wants more traffic etc., but how are we going to control homelessness when people can't afford homes. The only solution is building more projects like this one in all communities.

28-1

Ann Gunvalsen Saks

Los Al Lampson Project-Horning comments.docx;

June 10, 2024

To: Tom Oliver toliver@cityoflosalamitos.org

From: Donald M. Horning

Subject: Comments to the Draft Environmental Impact Report for the proposed Lampson Park Place, LLC Project at 4665 Lampson Ave.

I am a retired environmental professional with 40+ years of experience. I submit the following comments based upon my review of the Draft Environmental Impact Report. My emphasis is primarily on sections noted to have no significant environmental impact where a clear argument to the contrary exists. 29-1

Section 4.8 Environmental Hazards / Hazardous Materials

Threshold E. The Project is located within the Joint Forces Airport land use plan. The report determined that there is a "less than significant impact" with no mitigation required.

Comment: This is a military airport used for training pilots from the US military and from other allied countries. The training involves practice primarily in helicopters and smaller winged aircraft with occasional large cargo planes.

This military airport is regulated primarily by the US Military and not the Federal Aviation Authority. The entire area of the Project site is within a designated Military Airport Safety Zone. Permanent housing is not recommended. 29-2

Threshold F. *Physical Interference* There is a written Military Emergency Response Plan and Emergency Evacuation Plan

Comment: Construction of a permanent housing Project within this Military Airport Safety Zone is clearly not in the best interests of anyone.

Mitigation: At a minimum, measures need to be developed to provide full disclosure to residents of the hazards noted in Thresholds E and F at this site noted by the State Airport Land Use Commission and the National Commission on Military Safety (2020). 29-3

Section 4.9 Hydrology and Water Quality. The report notes a determination of less than significant impact with no mitigation required.

Threshold C Impact of Drainage and Surface Water

Comment: The Project area is underlain with liquefaction soils that can heave more than 10% under wet conditions. The entire Project area along the residential areas across 29-4

Lampson Street (College Park East) are currently subject to significant flooding.

29-4 (CONT.)

Mitigation: The combination of liquefaction soils and clear evidence of decades of nearby flooding during even moderate rain events signals a need for mitigation within the Project area, so as to not repeat what is happening in the nearby existing College Parke East neighborhood.

Surface drainage likewise needs a suitable outlet that directs drainage to unoccupied areas adjacent to the military airport.

29-5

Section 4.10 Land Use Planning. The report notes no significant impact with no mitigation required.

Comment: The Project is clearly located within the Military Airport Safety Zone. This should be a red flag regarding suitableness for permanent housing.

29-6

Section 4.12 Population and Housing. The report indicates less than significant impact with no mitigation required

Comment: This area was never zoned for permanent multifamily housing due to the proximity of the military airport.

Mitigation: Again, at a minimum, measures need to be developed to provide full disclosure to residents of the hazards noted in Sections 4.10 and 4.12 at this site noted by the State Airport Land Use Commission and the National Commission on Military Safety (2020).

29-7

4.13 Public Service. The report indicates less than significant impact to existing Fire, Emergency, and Police Services

Comment: It is foolish to assume that a large high density, multifamily complex has no significant impact to emergency services. The services of Rossmoor, Los Alamitos, Seal Beach and Orange County are already at capacity. The fact that two other proposed projects within the same general area, will certainly have an adverse impact to the current load to response agencies.

Mitigation: Instead of the erroneous assumption that such development would have no impact on response services, there needs to be a documented study to assess current response times and the personnel needed to meet the needs once this project is completed and how the developers can help meet that new need.

29-8

4.15 Transportation. The report indicates a potentially significant impact.

Comment: I agree with this determination but the report offers no suggestion of possible mitigation.

Mitigation: A study by OCTA should be required and funded by the developers to determine specific mitigation measures for the developers to address.

29-9

4.17 Utilities and Service System. The report indicates a less than significant impact.

Comment: This is clearly an erroneous conclusion as the primary sanitary sewer connection will be to the City of Seal Beach sewer line. This line is currently at an approximate 50%

29-10

capacity. The addition of 10-15 % increase to the base capacity by the Project will move close to the recommended 80% maximum flow for the pipe.

In addition, the City of Seal Beach officials have stressed that some sewer lines are over 100 years old and there are critical concerns of an aging sewer system which results in brakes that can lead to pollution violations and fines.

The study of this sewer line in this report only was regarding volume and capacity but did not address the age of the pipe and whether nearing the maximum capacity of an aging pipe would result in catastrophic failure or the probability of stormwater intrusion.

29-10 (CONT.)

Mitigation: Further study is needed to determine the age of the sewer line, the relationship to the proposed increase capacity, the additional increased capacity from the proposed development at Old Ranch, whether the line needs to be replaced to effectively handle the resulting increased capacity of both developments, and if one or both of these developers need to replace this sewer line because a relining of the sewer line reduces the capacity, such that the line would not be able to accommodate both projects hooking into the line.

29-11

I appreciate the opportunity to comment on this Environmental Impact Report.

Donald M. Horning, Resident

Seal Beach

Responses to Comment 29

Horning, Donald, dated June 10, 2024.

29-1 The commenter provides an introduction and provides comments on the Draft EIR which are responded to below.

29-2 The commenter lists Threshold e of Section 4.8, *Hazards and Hazardous Materials*, and states that the entire area of the Project site is within a designated Military Airport Safety Zone and permanent housing is not recommended. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*.

29-3 The commenter lists Threshold f of Section 4.8, *Hazards and Hazardous Materials* and states that construction of permanent housing within the Military Airport Safety Zone is not in the best interests of anyone. The commenter recommends mitigation measures be developed to provide full disclosure of the hazards noted in Thresholds e and f noted by the State ALUC and National Commission on Military Safety (2020). Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (*JFTB).The proposed mitigation measure is already mandated through regulatory requirements. Per Master Response 2.1.9, ALUC mandates the provision of the State's real estate disclosure regarding buyer and renter notification for new residential land uses within an airport influence area even if these state laws were to be revised or rescinded. The ALUC also requires that signs providing these disclosures and notices be "prominently posted" in real estate sales offices and within the new development depicting overflight areas and helicopter traffic patterns. Buyer awareness is required as part of the City's approval process for the Project. The buyer awareness notification process is built into the real estate disclosure laws of the State to ensure that potential buyers are fully informed before buying a home near an airport if they are sensitive to the types of annoyances or disruptions that may come with the location (refer to Page 4.10-18 of the Draft EIR).

29-4 The commenter lists Threshold c of Section 4.9, *Hydrology and Water Quality*, and states that the Project area is underlain with liquefaction soils that can heave more than 10% under wet conditions. The commenter states the entire Project area along the residential areas across Lampson are currently subject to significant flooding. Section 4.6, Geology and Soils, in the Draft EIR, states that the Project site is located within a liquefaction hazard zone per the State of California Seismic Hazard Zone for liquefaction potential, imposes mitigation measures, and determined that impacts were less than significant after mitigation. Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for hydrology concerns.

29-5 The commenter recommends a mitigation measure to provide a suitable outlet that directs drainage to unoccupied areas adjacent to the military airport due to current flooding conditions. Arbor Park is within the JFTB and drains south to the same earthen channel outlet as the Project site. If the proposed flows from the Project are not allowed to outlet to the JFTB at the

southwest corner of the site, proposed flows from the Project would not be allowed to outlet to the JFTB to the north of the site either since they are essentially the same outlet location. In addition, the existing site does not flow in the northerly Arbor Park/ JFTB area as the site drains in the southwesterly direction, therefore directing stormwater runoff to the north would change the historic drainage pattern which can potentially cause downstream flooding. Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, for hydrology concerns.

29-6 The commenter states that the Project is clearly located within the Military Airport Safety Zone and should be a red flag regarding suitableness for permanent housing. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)*.

29-7 The commenter incorrectly states that the Project site was never zoned for permanent multifamily housing due to the proximity of the military airport. The commenter recommends mitigation measures be developed to provide full disclosure of the hazards noted in Thresholds e and f noted by the State ALUC and National Commission on Military Safety (2020).

The Project site is currently zoned for residential uses (refer the Draft EIR, Section 2.4.2, *Zoning*). Refer to Response to Comment 29-3 and Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB)* regarding disclosures required.

29-8 The commenter disagrees with the impact conclusion in Section 4.13, *Public Services* and states that the public services of Rossmoor, Los Alamitos, Seal Beach, and Orange County are already at capacity. The commenter recommends mitigation measures to assess current response times and personnel needed to meet the needs once the Project is completed.

The commenter does not provide evidence that the services of Rossmoor, Los Alamitos, Seal Beach, and Orange County are already at capacity. The Draft EIR includes correspondence from the public service providers for the Project site which demonstrate adequate capacity for the Project (*Technical Appendix L*). As discussed in Section 4.13, *Public Services*, of the Draft EIR, implementation of the Project would increase the overall demand on fire and police protection and emergency services in the City. However, considering the existing firefighting resources available in the City, implementation of the Project is not expected to result in the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impact. Per correspondence with the OCFA, response times would not decrease to necessitate the construction of a new fire station. In order to maintain acceptable service ratios, OCFA uses a fair share approach to mitigate fire service response impacts and facility/equipment needs. Similarly, the increase in potential services needed would not require the construction of a new police station or improvements to the existing station that serves the Project site. Implementation of the Project would result in an increase in calls for service; however, Los Alamitos Police Department has indicated that this increase would not adversely impact Los Alamitos Police Department's existing resources. Therefore, impacts to public services would be less than significant (refer to Page 4.13-9 to 4.13-10).

29-9 The commenter agrees with the impact conclusion for VMT but recommends a study by OCTA to determine specific mitigation measures for the developers to address. The commenter incorrectly states that the Draft EIR offers no suggested mitigation measures. As discussed in Section 4.15, *Transportation*, of the Draft EIR, the Project would result in significant VMT impacts with the implementation of Mitigation Measure MM 4.15-1. Mitigation Measure MM 4.15-1 includes implementing CAPCOA strategies such as coordination with the OCTA whether providing new or re-routing existing transit services to the site would be feasible, as determined by OCTA pursuant to OCTA's standards (refer to Page 4.15-19 of the Draft EIR).

It is also not necessary for the developer to hire OCTA to determine mitigation measures. The Draft EIR was circulated to OCTA for public review and comment, which is the appropriate process for OCTA to suggest mitigation. It should be noted that OCTA did provide a comment letter on the Draft EIR and responses were provided under Comment Letter F, above.

29-10 The commenter disagrees with the impact conclusion in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, and states that the sewer lines are currently at 50% capacity and the Project would lead to near the recommended maximum flow for the sewer pipe. The commenter states that the sewer study addressed the volume and capacity but did not address the age of the pipe and whether nearing the maximum capacity of the sewer pipe would result in catastrophic failure or probability of stormwater intrusion.

A Sanitary Sewer Analysis (*Technical Appendix O* of the Draft EIR) was prepared for the Project and investigates the sewer discharge route for the proposed development to the existing sewer mains of three manholes: 1) Basswood and Aster Street (Manhole A-16); 2) Candleberry Avenue and Aster Street (Manhole A-21); and 3) Elder Avenue (Manhole A-25). As concluded in the Project's Sanitary Sewer Analysis, Basswood and Aster Street [Manhole A-16] is at depth-to-diameter ratio of 0.3013; Candleberry Avenue and Aster Street [Manhole A-21] is at depth-to-diameter ratio of 0.3266; and Elder Avenue [Manhole A-25] is at depth-to-diameter ratio of 0.3958 under existing conditions. An updated Sanitary Sewer Analysis (*Attachments M1 and M2* of this Final EIR) was prepared in response to comments received, which demonstrates that there is adequate sewer capacity with Project implementation. Refer to Section 5.0 of this Final EIR for revisions and clarifications made to Section 4.17, *Utilities and Service Systems*. Moreover, in order to connect to the City of Seal Beach sanitary sewer service, the Project Applicant would be required to pay connection fees, which may be used by the City of Seal Beach to maintain its existing infrastructure and implement needed improvements.

29-11 The commenter recommends for further study to determine the age of the sewer line, the relationship to the proposed increase capacity, the additional increase capacity from the proposed development at Old Ranch, whether the lines need to be replaced to effectively handle the resulting increased capacity of both developments. Refer to Response to Comment 29-10 regarding the sewer line capacity and maintenance (e.g. age of the sewer line). The Sanitary Sewer Analysis (*Attachments M1 and M2* of the Final EIR) evaluated upstream sewer flows in combination with the Project. As indicated in Response to Comment 29-10, the sewer

discharge route to the existing sewer mains has adequate capacity to accept the Project's sewer generation.

Old Ranch Country Club would connect to sewer facilities/manholes downstream of the manholes analyzed for the Project. The sewer analysis for Old Ranch Country Club will need to demonstrate adequate sewer capacity along with upstream sewer flows. Additionally, a sewer capacity analysis has been conducted to include all components of the Old Ranch Country Club (see *Attachment L* to this Final EIR). To evaluate a potential increase in the flow depth to pipe diameter ratio (d/D) based on the increase in total demand associated with the Old Ranch Country Club project and after taking into consideration the amount of sewer discharge associated with the Project, C&V Consulting, Inc. applied the increase in total demand from the further refined Old Ranch Country Club Project to manhole (MH) IDs B03-A14 and B01-A13 through B01-A02A. These manholes and their associated pipeline segments are located downstream of the three manholes that were monitored for the Project and as such include the upstream sewer flows anticipated by the Project and currently existing development. The Draft EIR concluded that the proposed flows from the Project, in addition to the observed flows, create a proposed depth of flow that would not impact the existing surrounding sanitary sewer systems, and that the existing sewer system has adequate capacity for the proposed development.

As concluded, the overall d/D is anticipated to be less than 0.5 for the identified segments with the increased demand added to the system. This means that when the sewer flows from the further refined Old Ranch Country Club project are added to the sewer flows from the Project based on the downstream monitored manhole flows, the depth of flow to pipe diameter ratio is less than 50%. This in turn means that even with the Old Ranch Country Club project, the sewer pipe system capacity remains capable of maintaining an adequate flow well below 50% of its flow depth capacity. As such, adequate capacity exists to serve the Project's projected demand in addition to the sewer pipe systems existing commitments, even after taking into account the Old Ranch Country Club project. The anticipated d/D increase determined from the Project plus the Old Ranch Country Club Project is approximately 2.6-3.4%, which is considered negligible.

Comment Letter 30

Concerns Regarding the Lampson Project

Leah N. Huffington <lhuffington@lclark.edu>

To:Tom Oliver <Toliver@cityoflosalamitos.org>

IRONSCALES couldn't recognize this email as this is the first time you received an email from this sender lhuffington@lclark.edu

Dear Tom Oliver,

We hope this message finds you well. We are writing to express our pressing concerns regarding the proposed Lampson Project in Los Alamitos. The project poses significant environmental and infrastructural challenges that will predominantly affect our neighborhoods once the developer departs. While Los Alamitos stands to gain financially, Seal Beach (and Garden Grove) will bear the brunt of increased pollution, strained infrastructure, and potential health risks associated with the development of 246 new complexes and apartments.

As mentioned previously, the proposed development also raises air, water, and noise pollution that could jeopardize the well-being of future and current residents. The noise pollution from military jets and aircraft, in violation of established aircraft codes, threatens to disrupt the peace and quality of life for apartment residents. This decision, though overturned by distant decision-makers, overlooks the direct effects on Seal Beach residents who rightfully deserve a say in matters that could detrimentally affect their community.

30-1

Additionally, the proposed placement of townhomes between heavily fertilized golf courses poses significant health risks, including potential exposure to cancer-causing agents and water contamination from pesticides and toxins. The increased water usage by new residents could worsen contamination of groundwater, surface water, soil, air quality, and ocean health. Moreover, the removal of trees without adequate replacement would exacerbate air pollution, harm the environment, and diminish essential greenery crucial for maintaining air quality, reducing carbon footprint, and preserving wildlife habitats. It's essential to prioritize preserving green spaces, especially as our community grows.

30-2

The strain on local road infrastructure, compounded by dangerous intersections such as Rose and Lampson, poses significant risks to pedestrians and drivers alike. Illegal U-turns on Lampson are frequent, further endangering residents—members of our family have narrowly avoided accidents multiple times. Increased population density will exacerbate traffic congestion and safety concerns, especially during peak hours and events like soccer games. How will Los Alamitos plan to accommodate the increased vehicle miles traveled? Installing one traffic light will do little to prevent the inevitable increase in cars, which will escalate accidents and deaths in the Seal Beach neighborhood.

30-3

Additionally, the Lampson Project not only impacts convenience but also raises safety concerns with increased traffic and parking on residential streets, compromising pedestrian and vehicle safety. The plan appears to narrow streets, reduce potential greenery, and deliberately limit parking so Los Alamitos tenants must park at College Park East (CPE). The builder plans to force Los Alamitos residents to find parking elsewhere, adding strain to CPE infrastructure and streets. The developer aims to have residents utilize Seal Beach parks without contributing, minimizing open park space.

30-4

Essentially, new residents will be forced to use parks and residential parking outside their own development due to property overbuilding, likely leading developers to limit on-site parking to maximize units. As discussed in the Ayres Hotel open house, attempts have even been made to segregate townhome and private residence parking in their development. Ultimately, Seal Beach stands to gain nothing but increased infrastructure costs and overcrowding. The developer benefits from the CPE community without contributing to costs and maintenance by overbuilding and failing to provide enough parking or sufficient open park spaces and recreation areas in the development.

30-4 (CONT.)

The flooding issue along Lampson will worsen with the addition of 246 homes. Seal Beach purchased the Ironwood property to improve drainage to the Old Ranch Country Club golf course. The Lampson project's Draft EIR mentions potential drainage solutions, including undersized exit drainage that might discharge onto Lampson, potentially damaging vehicles and houses along Ironwood Ave. Flooded streets pose risks like structural damage, health hazards from mold and contaminated water, and financial burdens from repairs and property devaluation. Would Los Alamitos be accountable for repairing these damages to Seal Beach? Are there alternative measures to reduce burdens on Seal Beach residents or lower risks on Lampson Road?

30-5

In conclusion, while recognizing the importance of housing development, we urge the committee to reconsider the scale of the Lampson Project. Rather than completely halting the project, we propose a reduction in the number of units (possibly halving the number of units or eliminating the construction of the townhomes or apartments). This adjustment aims not to thwart housing development but rather to safeguard the well-being of Seal Beach residents and mitigate the project's negative repercussions on our community and environment.

We appreciate your attention to these matters and look forward to your thoughtful consideration of the concerns raised.

Thank you for your time.

30-6

Best regards,
Leah, Lidia, and Hector Huffington

Responses to Comment 30

Huffington, Leah, Lidia, and Hector, dated June 07, 2024.

30-1 The commenter expresses concerns with strained infrastructure and potential health risks, along with air, water, and noise pollution from the Project.

Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. As discussed in Section 4.2, *Air Quality*, of the Draft EIR, the Project would not exceed the South Coast AQMD localized significance thresholds for assessing localized health impacts from criteria air pollutants during construction. Therefore, sensitive receptors would not be exposed to substantial pollutant concentrations during Project construction. Further, Project traffic would not create or result in a CO "hotspot." Therefore, sensitive receptors would not be exposed to substantial pollutant concentrations due to the Project, and impacts would be less than significant (refer to Pages 4.2-26 through 4.2-29 of the Draft EIR).

As discussed in Section 4.9, *Hydrology and Water Quality*, the Project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality during construction or long-term operation. Impacts would be less than significant and no mitigation is required (refer to Pages 4.9-14 through 4.9-16 of the Draft EIR).

As discussed in Section 4.11, *Noise*, of the Draft EIR, the Project would not exceed significance thresholds for construction noise levels, operational noise levels, and off-site traffic noise levels. As such, the Project would not generate substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. Impacts would be less than significant (refer to Pages 4.11-23 through 4.11-29 of the Draft EIR).

30-2 The commenter expresses concerns with health risks, including potential exposure to cancer-causing agents and water contamination from pesticides and toxins due to the placement of proposed townhomes between heavily fertilized golf courses. The commenter states concerns that increased water usage by new residents could worsen contamination of groundwater, surface water, soil, air quality and ocean health. The commenter expresses concern regarding the removal of trees without adequate replacement stating that this could exacerbate air pollution, and diminish greenery crucial for maintaining air quality, reducing carbon footprint, and preserving wildlife habitats.

The Phase I ESA (*Technical Appendix H1* of the Draft EIR) concluded that no other adjoining/immediately surrounding properties (within 100 feet) were listed on any of the regulatory databases researched or the listings were not associated with the storage or disposal of hazardous wastes including aboveground or underground storage tanks, did not indicate a known chemical release, and did not indicate a property use where the use of hazardous chemicals would be expected. The commenter does not provide evidence that existing and/or

future residences adjacent to the golf course would create a health risk. As discussed in Section 4.8, *Hazards and Hazardous Materials*, of the Draft EIR, Based on a review of regulatory databases and a site reconnaissance, the Project site does not contain any hazards, nor is the Project site affected by any off-site hazards. The Phase I ESA and Limited Phase II ESA identified no RECs, HRECs, or CRECs during the course of the assessment. The potential chemicals of concern detected in the soil in the areas assessed do not indicate that a significant subsurface chemical release occurred. The detected concentrations found during the investigation are considered to be de minimis for the proposed residential redevelopment. Therefore, past and present uses do not represent a significant environmental concern for the Project site. As a result, implementation of the Project would result in less than significant impacts. No mitigation is required (refer to Pages 4.8-16 through 4.8-17 of the Draft EIR).

It is unclear how the increased use of water at the Project would result in air quality impacts. Regarding the potential of groundwater, surface water, and soil contamination impacts due to the increased in water usage, as discussed in Section 4.9, *Hydrology and Water Quality*, of the Draft EIR, the Project Applicant would be required to implement a WQMP to demonstrate compliance with the City's NPDES municipal stormwater permit, and to minimize the release of potential waterborne pollutants, including pollutants of concern for downstream receiving waters. The WQMP is a site-specific post-construction water quality management program designed to address the pollutants of concern of a development project via best management practices (BMPs), implementation of which ensures the on-going protection of the watershed basin (refer to Page 4.9-15 of the Draft EIR).

As discussed in Section 4.17, *Utilities and Service Systems*, of the Draft EIR, based on the water supplies available and the estimated water demand, there are sufficient water supplies available to serve the Project during average, single dry, and multiple dry years. Additionally, the Project is subject to connection and service fees to offset increased demand and assist in facility expansion and service (at the time of need). Accordingly, there would be sufficient water supplies available to serve the Project and impacts would be less than significant. No mitigation is required (refer to Pages 4.17-15 through 4.17-17 of the Draft EIR).

Regarding the removal of trees without adequate replacement, as discussed in Section 4.1, *Aesthetics*, of the Draft EIR, the Project site does contain a number of ornamental trees onsite that will be removed and replaced. As shown in Figure 3- 18, *Landscape Plan*, a total of 441 trees would be planted throughout the Project site (refer to Page 4.1-10 of the Draft EIR).

30-3 The commenter expresses concerns with the strain on local road infrastructure including dangerous intersections such as Rose and Lampson, and the impact on pedestrian safety. The commenter also expresses concern regarding the increased population density and its impact on traffic congestion during peak hours and events such as soccer games. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Response 2.1.2, *Roadway Safety on Lampson Avenue* for pedestrian safety concerns.

30-4 The commenter expresses concerns with safety due to increased traffic and parking. The commenter is concerned that the plan narrows streets, reduces greenery and limits parking so that tenants will have to park at College Park East. The commenter expresses concern that tenants will use existing Seal Beach parks for parking and minimize open park space without the developer contributing to costs and maintenance. Refer to Master Response 2.1.1, *Transportation and Traffic Congestion*, for traffic concerns. Response 2.1.2, *Roadway Safety on Lampson Avenue*, for pedestrian safety concerns. Refer to Master Response 2.1.3, *Parking*, for parking concerns. Refer to Master Response 2.1.10, *Loss of Existing Open Space and Provision of On-Site Amenities*, for impacts to existing parks.

30-5 The commenter expresses concerns with flooding along Lampson Avenue. The commenter expresses concern that the exit drainage that may discharge to Lampson is undersized and flooding could potentially damage homes and vehicles along Ironwood Avenue. Refer to Master Response 2.1.4, *Hydrology and Wastewater Infrastructure Analysis*, related to flooding impacts.

30-6 The commenter recommends reconsidering the scale of the Project and reducing the number of units proposed. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

COMMENT LETTER 31

4232 Birchwood Ave

Seal Beach, CA 90740

Tom Oliver
Associate Planner, City of Los Alamitos Planning Department
3191 Katella Avenue Los Alamitos, California 90720

Dear Mr. Oilver

I am very disappointed with the sequence of events by which the plan to develop the property on Lampson Avenue was approved by your city. Two State Agencies (CalTrans Division of Aeronautics and the California Airport Land Use Commission) issued written findings that the Lampson Ave. location was not suitable for residential development due to public safety and health risks as a result of activities at the Joint Forces Training Base that borders the project site. The State Agencies' warnings have been omitted from the Draft Environmental Impact Report prepared by Lampson Consultants. This sounds VERY shady to me. 31-1

Also, Consultants Nick Johnson and T&B Planning employee Les Johnson, are consultants Employed by Lampson LLC, according to the City of Los Alamitos Planning Department-Public Records. This sounds like a clear conflict of interest to me. It sure looks like this project is being pushed through despite these issues, just because the city of Los Alamitos wants to make some money, because they don't give a damn about the neighbors that this project will directly affect, and it's just "win at all costs" for the city of Los Alamitos.

I am sure if the situation were reversed and YOU were the one that was directly impacted by the very questionable actions of another nearby city, you would be upset too, so do you have any sense of empathy and fairness? If the city of Los Alamitos wants to make enemies out of their neighbors, they are doing a very good job of that. Is that what you want? Do you care? Will this somehow come back to bite the city of Los Alamitos in the future? 31-2

Sincerely,

David Kalish

Responses to Comment 31

Kalish, David, dated No date.

31-1 The commenter expresses concerns that the Caltrans and California ALUC findings regarding public safety and health risks were omitted from the Draft EIR. Refer to Master Response 2.1.9, *Proximity to the Los Alamitos Joint Forces Training Base (JFTB).*

31-2 The commenter expresses opposition to the Project and states there is a conflict of interest between consultants and the Project Applicant. Refer to Response to Comment 16-16 related to the preparation of the Draft EIR and conflicts of interest. This comment is noted for the record and will be forwarded to the decision makers for their required review and consideration prior to any action being taken on the Project. This comment does not raise any issues concerning the environmental analysis provided in the Draft EIR and thus no further response is required.

Subject: Comments for Proposed Lampson Project

Mr Oliver, Reference, Draft Enviromental Impact Report (DEIR)

My name is Tom Lasser. I am a retired military aviation officer with no official connection to the Joint Forces Training or Los Alamitos Army Airfield.

Encroachment(noun)- Intrusion on a person's territory, etc, a gradual advance beyond usual or acceptable limits...(Dictionary)

No one questions the ability to development, build housing especially under the current conditions of the State of California. But encroachment is the most critical threat to military bases and airfields in California. Encroachment in all forms is the bane of military installations.

32-1

I did not see a clear sign or evidence of a professional response from the airfield staff at Los Alamitos Army Airfield. I highly suggest the EIR considers the input of the assigned, local aviation subject matter experts from the airfield to better describe flight operations, altitudes, flight patterns, safety concerns including briefings, charts and testimony. This is evidence that needs to be documented.

There will be noise complaints, disagreement issues, quality of life allegations, negative comments and unrest from the residents of this new project which projects into the base, overlooks the airfield and is under the flight patterns.

The first thing people do when they knowingly move adjacent to an airport...*is to complain about the airport*.

Though there may be some documentation, this proposal must still comply to laws, ordinances or regulations. And common-sense facts.

The EIR does not clearly address this enduring topic and effect upon the airfield and I recommend it be researched and documented.

T*om Lasser*
